THE CANADA YEAR BOOK 1919

Published by Authority of the
Right Hon. Sir George E. Foster, G.C.M.G., M.P.,
Minister of Trade and Commerce.

OTTAWA
THOMAS MULVEY
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1920

THE
CANADA YEAR BOOK
1919

CONTENTS.

	PAGE.
Erratum.....	xi
Retrospective Index.....	xii
The Canada Year Book, 1919.....	xiii
Statistical Summary of the Progress of Canada.....	xiv-xvi
Index.....	683-597

I. HISTORY OF THE GREAT WAR, 1914-1918.

By Brig.- General E. A. CRUIKSHANK, LL.D., F.R.S.C., Director of the Historical Section, General Staff, Department of Militia and Defence, Ottawa.....	1-65
---	------

APPENDICES.

I. Awards of the VICTORIA CROSS (V.C.).....	66-67
II. Statistical Abstract showing number of Military Honours and Decorations conferred upon Members of the Canadian Expeditionary Force.....	68-73

II. CHRONOLOGICAL HISTORY OF CANADA, 1497-1919.....	74-84
---	-------

III. PHYSICAL CHARACTERISTICS OF CANADA.

Geographical Features.....	84-91
1. Drainage Basins of Canada.....	85-86
2. Lengths of Principal Rivers and Tributaries in Canada.....	86-87
3. Area and Elevation of the Great Lakes.....	88
4. Areas of Principal Canadian Lakes by Provinces.....	89-90
Economic Geology of Canada, 1918. By WYATT MALCOLM, Department of Mines, Ottawa.....	91-99

IV. AREA AND POPULATION.

1. Land and Water Area of Canada by Provinces and Territories as in 1919.....	100
2. Population of Canada by Provinces and Territories in the Census Years 1871 to 1911.....	101
3. Area and Population of Canada in 1911 by Provinces and Districts and Population in 1901.....	101-105
4. Population of Cities and Towns having over 5,000 inhabitants in 1911, compared with 1871-81-91-1901.....	106-107
5. Urban Population of Canada by Size Groups, 1901 and 1911.....	107
6. Rural and Urban Population of Canada in 1901 and 1911 by Provinces, and increase or decrease in the decade.....	108
7. Rural and Urban Population of Canada by Provinces and Sexes, 1911.....	108
8. Population of Canada by Sexes, 1901 and 1911.....	109-110
9. Ratio of Females to Males in Rural and Urban Divisions, 1911.....	110
10. Conjugal Condition of the people of Canada, classified as single, married, widowed, divorced, legally separated and not given, by Provinces, Census of 1911.....	110-111
11. Population of the Prairie Provinces, 1901, 1906, 1911 and 1916.....	112
12. Population of Prairie Provinces by Sex at each Census Period from 1870 for Manitoba and from 1901 for Saskatchewan and Alberta.....	113
13. City Population of the Prairie Provinces, 1901, 1906, 1911 and 1916.....	113

Vital Statistics.

14. Number of Births, Marriages and Deaths, by Provinces, 1911-1918.....	114-115
15. Number of Births, Marriages and Deaths, by Principal Cities, 1913-1918.....	116-122

Immigration.

16. Number of Immigrant Arrivals in Canada, 1897-1919.....	123
17. Arrivals at Inland and Ocean Ports in Canada in fiscal years 1913-1919.....	123-124
18. Rejections of Immigrants upon arrivals at Ocean Ports and Deportations after ad- mission, by principal causes, for the fiscal years 1903-1919.....	124
19. Number by Nationalities of Deportations after Admission, 1903-1919.....	125
20. Juvenile Immigrants and Applications for their Services, 1901-1919.....	125
21. Sex, Occupation and Destination of Immigrants for the fiscal year ended March 31, 1919.....	125-126
22. Destination of Immigrants into Canada by Provinces, 1901-1919.....	126
23. Record of Chinese Immigration, 1886-1919.....	127
24. Record of Oriental Immigration, 1901-1919.....	127
25. Expenditure on Immigration in the fiscal years 1868-1919.....	128

V. EDUCATION.

General Features of Canadian Education System.....	128
Higher Education in Canada.....	129
Education Statistics of Canada.....	130
1. Number of Schools, Teachers and Pupils in Canada by Provinces, 1901-1918.....	131-134
2. Normal and Model Schools in Nova Scotia, New Brunswick, Quebec, Ontario and Manitoba, 1901-1918, Saskatchewan and Alberta, 1906-1918.....	135-137
3. Number of Teachers and Pupils in Model Schools, Academies and Roman Catholic Classical Colleges in Quebec, 1901-1918.....	137-138
4. Number of Teachers and Pupils in Collegiate Institutes and High Schools in Ontario, 1901-1918.....	138
5. Number of Teachers and Pupils in Continuation Schools in Ontario, 1911-1918.....	139
6. Number of Teachers and Pupils in Collegiate Institutes and High Schools in Saskat- chewan, 1908-1918.....	139
7. Number of Teachers and Pupils in High Schools in British Columbia, 1901-1918.....	139
8. General Summary of Elementary and Secondary Schools under public control, 1918.....	140

Education—con.

	PAGE.
9. Receipts and Expenditure for Public Education in Canada by Provinces, 1901-1918. .	141-146
10. Average Annual Salaries of School Teachers, by Provinces, 1917-1918.	147
11. Universities of Canada: Foundation, Affiliation, Faculties and Degrees.	148-149
12. Universities of Canada: Number of Teaching Staff and Students in the various Faculties, 1918-19.	150-153
13. Universities of Canada: Financial Statistics, 1918-19.	154-155
14. Colleges of Canada: Foundation, Affiliation, Faculties and Degrees.	156-158
15. Colleges of Canada: Number of Teaching Staff and Students, 1918-19.	158-159
16. Colleges of Canada: Financial Statistics, 1918.	160-161

VI. CLIMATE AND METEOROLOGY.

The Weather of Canada during the year 1918. Information furnished by the Dominion Meteorological Service, Toronto.	162-165
1. Temperature of the year 1918 at Representative Stations, compared with Normal Annual Averages for the period 1888 to 1907.	166
Precipitation of the year 1918 at Representative Stations, compared with Normal Annual Averages for the period 1888 to 1907.	167

VII. PRODUCTION.

Agriculture.

1. Area, Yield, Quality and Value of principal Field Crops in Canada, 1915-1919.	171-184
2. Annual Average Yields per acre of Field Crops for Canada and by Provinces from 1915 to 1919, with Decennial Averages for the years 1909-18 and 1910-19.	185-187
3. Areas and Yields of Wheat, Oats, Barley and Flaxseed in the three Prairie Provinces, 1917-1919.	187
4. Total Areas and Values of Field Crops in Canada, 1914-19.	188
5. Field Crops of Canada, compared as to Quantity and Value, 1918 and 1919.	189
6. Quality of Grain Crops as indicated by Average Weight per measured bushel, 1910-19.	190
7. Numbers of Farm Live Stock in Canada, by Provinces, 1918 and 1919.	191-193
8. Estimated Numbers of Farm Live Stock, 1914-1919.	193-195
9. Average Values of Farm Animals and of Wool, as estimated by Crop Correspondents, 1914-19.	196
10. Numbers in June and Values in December of Farm Live Stock in Canada as estimated by Crop Correspondents, 1918 and 1919.	197-198
11. Estimated Total Values of Farm Live Stock in Canada, by Provinces, 1914-19.	198-199
12. Average Values per acre of Occupied Farm Lands in Canada, as estimated by Crop Correspondents, 1910, 1914-1919.	200
13. Average Wages of Farm Help in Canada, as estimated by Crop Correspondents, 1914-1919.	201-202

Dairying.

14. Production and Value of Creamery Butter, by Provinces, 1916, 1917 and 1918.	203
15. Production and Value of Factory Cheese, by Provinces, 1916, 1917 and 1918.	203-204
16. Production and Value of Creamery Butter and Factory Cheese, 1900, 1907, 1910, and 1915-1918.	205
17. Cold Storage Warehouses in Canada, 1919.	205-206

Agricultural Prices.

18. Weekly Range of Prices of Wheat at Winnipeg and Fort William, 1918 and 1919.	210
19. Monthly Range of Average Prices of Wheat at Winnipeg and Fort William, 1914-1919.	207-209
20. Weekly Range of Prices of Oats at Winnipeg and Fort William, 1918.	210-211
21. Weekly Range of Prices of Oats at Winnipeg and Fort William, 1919.	212-213
22. Weekly Range of Prices of Barley and Flax at Winnipeg and Fort William, 1918.	213-214
23. Weekly Range of Prices of Barley and Flax at Winnipeg and Fort William, 1919.	214-215
24. Monthly Range of Average Prices of Barley, Oats and Flax at Winnipeg and Fort William, 1914-1919.	216-218
25. Monthly Range of Average Prices in British Markets of Canadian Wheat and Oats, 1913-1919.	219-220

Miscellaneous.

26. Production and Value of Flax Fibre in Ontario, 1915-18.	221
27. Estimated Areas and Yields of Tobacco in Canada, 1917-19.	222
28. Estimated Production and Value of Wool in Canada, 1915-1919.	222
29. Allocation of Payments to Provincial Governments under the Agricultural Instruction Act, 1916-17—1919-20.	223
30. Stocks of Wheat in Canada at the end of March, 1916-20.	223
31. Stocks of wheat in Canada at the end of March, 1916-20—summary statement.	224
32. Stocks of Oats, Barley and Flax in Canada on March 31, 1919 and 1920.	224
33. Value of the Annual Agricultural Production of Canada, 1915-19.	225
34. Acreage and Production of Cereals and of Potatoes in various Countries of the World, 1917 and 1918.	227-230

Agricultural Experiment Stations of Canada.

35. Dominion Experimental Farms and Stations.	231-234
Dominion Experimental Farms and Stations, 1919.	231
Provincial Agricultural Experiments.	234-238

Forestry.

	PAGE.
36. Quantities and Values of the cut of Lumber, Shingles and Lath by Provinces, 1917 and 1918.....	239
37. Total Consumption and Value of Pulpwood, 1908-18.....	241
38. Quantities and Values of Wood used in the manufacture of Pulp, 1916-18.....	241
39. Kinds of Wood used in the manufacture of Pulp by quantities and values, 1916, 1917 and 1918.....	241
40. Quantities of Wood used and of Pulp manufactured, 1914-1918.....	242
41. Production of Paper by Provinces, 1917 and 1918.....	243
42. Exports from Canada of Wood Pulp, by Countries, in the fiscal years 1914-1919.....	243
43. Quantity and Value of Wood, Blocks and Other, for Pulp, exported to the United States, 1904-1919.....	244

Fisheries.

44. Number and Capital Value of Fishing Vessels, Boats, Nets, Traps, etc., used in the Fisheries of Canada, 1917 and 1918.....	245-246
45. Number of Persons Employed in the Fisheries of Canada, 1917 and 1918.....	246
46. Government Bounties to Fishermen in the fiscal years 1915 to 1918.....	247
47. Quantities and Values of Sea Fish marketed in Canada during the calendar years 1917 and 1918.....	247-249
48. Quantities and Values of Inland Fish marketed in Canada during the calendar years 1917 and 1918.....	250
49. Quantity and Value of Chief Commercial Fishes, 1914-15 to 1916-17 and 1917 and 1918.....	250-251
50. Total Value of Fisheries by Provinces in the fiscal years 1915-1917 and calendar years 1917, 1918.....	251
51. Total Value of the Fisheries of Canada in the fiscal years 1870-1918.....	252
52. Values of Exports and Imports of Fish, 1902-1918.....	252
53. Exports of the Fisheries, the Produce of Canada, by principal countries, in the fiscal years 1918 and 1919.....	252
54. Exports of the Fisheries, compared as to Quantities and Values, 1917 and 1918 ('000' omitted).....	253

Minerals.

55. Quantities and Values of Minerals produced in Canada, calendar years 1917 and 1918..	255-256
56. Increase or Decrease in Quantities and Values of Principal Mineral Products, for the Calendar Year 1918, as compared with 1917.....	256
57. Quantities and Values of Minerals produced in Canada, Calendar Year 1919.....	257
58. Increase or Decrease in Quantities and Values of Principal Mineral Products for the Calendar Year 1919 as compared with 1918.....	258
59. Mineral production of Canada, compared as to Quantity and Value, for Calendar Years 1917 and 1918.....	258-259
60. Value of Mineral Production in Canada, 1886-1919.....	259
61. Value of Minerals produced in Canada by Provinces in the Calendar Years 1917, 1918 and 1919.....	260
62. Quantity of Gold produced in Canada by Provinces during the Calendar Years 1901-1919.....	260
63. Value of Gold produced in Canada by Provinces during the Calendar Years 1901-1919.....	260-261
64. Quantity and Value of Silver produced in Canada during the Calendar Years 1887-1919.....	261
65. Quantity and Value of Silver produced in Canada by Provinces during the Calendar Years 1901-1919.....	261
66. Quantity and Value of Copper produced in Canada by Provinces during the Calendar Years 1901-1919.....	262
67. Quantity and Value of Nickel produced in Canada during the Calendar Years 1889-1919.....	262
68. Production of Principal Minerals in Canada, for the Calendar Years 1909-1919.....	263
69. Production of Asbestos and Asbestic in Canada for the Calendar Years 1909-1919.....	264
70. Production of Cement in Canada for the Calendar Years 1902-1919.....	264
Iron Blast Furnaces in Canada in 1918.....	264
Electric Furnace Plants in Canada in 1918.....	265
Mines Departments of Provincial Governments.....	265-268
71. Value of the Mineral Production of Quebec, 1900-18.....	266
72. Production of Silver at the Cobalt Camp, Ontario, 1904-18.....	267
73. Value of Total Mineral Production of British Columbia, 1852-1918.....	268
74. Quantity and Value of Mineral Products in British Columbia for the Calendar Years 1916-1918.....	268
75. Quantity and Value of the World's Production of Gold and Silver for the Calendar Years 1917 and 1918.....	269-270
76. Imports into Canada of Portland Cement, 1898-1919.....	270
77. Imports into Canada of Anthracite and Bituminous Coal for home consumption during the fiscal years 1901-1919.....	271
78. Exports of Coal the produce of Canada, 1903-1919.....	271
79. Exports of Mineral Products, compared as to Quantity and Value, for the fiscal years ended Mar. 31, 1918 and 1919.....	271-272

Manufactures.

80. Statistics of Manufactures of Canada, 1915 and 1917, all Establishments, Irrespective of Number of Employees.....	275
81. Statistics of Manufactures by Provinces, 1915 and 1917.....	275
82. Statistics of Manufactures by Provinces, 1900, 1905, 1910, 1915 and 1917.....	276
83. Statistics of Manufactures, 1917.....	277-283

Manufactures—con.

	PAGE.
84. Establishments and Total Production by Group Values, 1915 and 1917	284
85. Male and Female Employees, on Salaries and Wages, by Provinces, 1917.....	284
86. Number of Employees by Weekly Wage Groups, 1917	284
87. Wage Earners classified by Groups of Industries and of Wages, 1917.....	285

Water Powers of Canada.

By J. B. CHALLIES, C. E. (Tor.), M.E.I.C., Director of Water Power, Department of the Interior, Ottawa	285-288
88. Water Powers of the British Empire.....	286
89. Water Powers of Foreign Countries.....	286-287
90. Water Powers in Canada by Provinces, 1919.....	287

VIII. TRADE AND COMMERCE.

1. Aggregate External Trade of Canada, 1868-1920.....	290
2. Movement of Coin and Bullion, 1868-1918.....	291
3. Duties Collected on Exports, 1868-1892, and on Imports for Home Consumption, 1898-1920.....	292
4. Ratio of Exports to Imports and Value per capita of Exports, Imports and Total Trade, 1868-1919.....	293
5. Exports to the United Kingdom, to the United States and to Other Countries of Merchandise the produce of Canada, 1868-1920.....	294
6. Imports from the United Kingdom, from the United States and from Other Countries of Merchandise entered for Home Consumption, 1868-1920.....	295
7. Values of Exports from Canada to the United Kingdom, to the United States, to Other Countries and to All Countries, by Classes of Merchandise, in five year averages and for the fiscal years 1911-1919.....	296-298
8. Values of Exports to the United Kingdom, to the United States and to All Countries, by Classes of Merchandise the Produce of Canada, 1916-1919.....	299
9. Value of Imports from the United Kingdom, from the United States and from All Countries by Classes of Merchandise entered for Home Consumption, 1916-1919.....	300
10. Value of Canadian Merchandise Exported to the United Kingdom, United States and other Countries by Classes, during the fiscal years 1918 and 1919.....	301
11. Value of Merchandise Imported for Home Consumption from the United Kingdom, United States and other Countries, by Classes, during the fiscal years 1918 and 1919.....	301
12. Exports of Canada to United Kingdom, United States and All Countries in quantities and values, by classes of home produce in the four fiscal years 1915-1918.....	302-327
13. Imports of Canada, from the United Kingdom, the United States and All Countries, in quantities and values, by classes entered for consumption in the four fiscal years 1915-1918.....	327-361
14. Quantities and Values of Principal Articles Imported into and Exported from Canada during the fiscal year ended March 31, 1919.....	362-368
15. Values of Exports which may be classed as Manufactures in the four fiscal years 1915- 1918.....	368-369
16. Summary of Values of Exports to the United Kingdom, to the United States and to Other Countries of Home Produce which may be classed as Manufactures in the four fiscal years 1915-1918.....	369
17. Values of Imports which may be classed as Manufactures in the four fiscal years 1915- 1918.....	370
18. Summary of Imports from the United Kingdom, from the United States and from Other Countries, which may be classed as Manufactures, in the four fiscal years 1915-1918.....	371
19. Values of Exports (domestic and foreign) to the British and Foreign West Indies, by Countries, during the fiscal years 1917-1919.....	372
20. Values of Imports entered for home consumption (dutiable and free) from the British and Foreign West Indies, by Countries, during the fiscal years 1917-1919.....	372
21. Value of Imports and Exports from and to British and Foreign West Indies, 1901-1919.....	373
22. Percentage Proportions of Imports from United Kingdom and United States, respect- ively, to totals of dutiable and free in the 19 fiscal years 1901-1919.....	373
23. Average ad valorem Rates of Duty collected on Imports from United Kingdom, United States and All Countries in the 52 fiscal years 1868-1919.....	374
24. Value of Total Exports and Imports entered for home consumption, and the duty collect- ed thereon, at certain Ports, during the fiscal years ended March 31, 1918 and 1919.....	374-375
25. Imports of certain Articles of Raw Material for home consumption, 1902-1919.....	376
26. Imports of Canada by values entered for consumption from British Empire and Foreign Countries, under the General, Preferential, and Treaty Rate Tariffs in the four fiscal years 1916-1919.....	377-378
27. Aggregate Trade of Canada by Countries for the fiscal year ended March 31, 1919.....	378-379
28. Values of Exports from Canada of Home Produce to the British Empire and to Foreign Countries in the five fiscal years 1915-1919.....	380
29. Values of Imports into Canada of Merchandise entered for Consumption, from the British Empire and from Foreign Countries, in the five fiscal years 1915-1919; also of Coin and Bullion.....	381
30. Value of Merchandise imported into and exported from Canada through the United States during the fiscal years ended March 31, 1917-1918.....	382
31. Quantities and Values of Selected Animal and Agricultural Food Products imported into the United Kingdom, by Countries whence imported, during the five calendar years, 1914-1918.....	383-387
32. Quantities and Values of Animal and Agricultural Products, exported from the United States to Principal Countries for the years ended June 30, 1914-1918.....	388-405

Grain Statistics.

PAGE.

33. Number and Storage Capacity of Canadian Grain Elevators in the crop years 1901-1919	406-408
34. Quantities of Grain inspected during the fiscal years 1917-1919	409-411
35. Quantities of Grain inspected during the fiscal years ended March 31, 1914-1919	411-412
36. Shipments of Grain by vessels from Port William and Port Arthur for the navigation seasons 1918 and 1919	413
37. Shipments of Grain by vessels and all-rail route from Port William and Port Arthur for the crop years ended August 31, 1918 and 1919	413

Bounties.

38. Bounties paid in Canada on Lead, 1899-1918	414
39. Bounties paid in Canada on Crude Petroleum, 1905-1919	414

Patents, Copyright, Trade Marks, Etc.

40. Number of Canadian Patentees by Provinces of Residence, for the fiscal years 1910-1919	415
--	-----

IX. TRANSPORTATION AND COMMUNICATIONS.**Steam Railways.**

1. Record of Steam Railway Mileage, 1835-1918	420
2. Steam Railway Mileage by Provinces, 1911-1918	420
3. Capital Liability of Steam Railways, 1876-1918	421
4. Areas of Land Subsidies granted to Steam Railways by the Dominion and Provincial Governments up to June 30, 1918	421
5. Mileage, Capital, Earnings and Operating Expenses of Steam Railways, 1918	422-424
6. Steam Railway Statistics, 1901-1918	424
7. Earnings and Operating Expenses of Steam Railways per mile of line, 1909-1918	425
8. Distribution of Operating Expenses of Steam Railways, 1916-1918	425
9. Aid to Railways in the form of Guarantees of Bonds, Interest, etc., by the Dominion and Provincial Governments, up to June 30, 1918	425
10. Analysis of the Total Financial Aid given to Steam Railways up to June 30, 1918	426
11. Total Amount of Dominion Government Aid paid to Steam Railways up to June 30 of each year, 1901-1918	426
12. Cost of Construction, Working Expenses and Revenue of Government Railways, 1868-1900, and 1901-1918, and before Confederation	427
13. Capital Expenditure by Dominion Government for construction of Government Steam Railways to March 31, 1918	427
14. Mileage and Rolling Stock of Steam Railways, 1913-1918	428
15. Freight handled by Steam Railways, 1914-1918	428-429
16. Total Salaries and Wages, with Ratios of same to gross Earnings and Operating Expenses on Steam Railways, 1907-1918	430
17. Number of Steam Railway Employees and Amount of Salaries and Wages, 1911-1918	430
18. Number of Passengers, Employees and Others Killed and Injured on Steam Railways, 1888-1918	430
19. Number of Persons Killed and Injured on Steam Railways, 1916-1918	431

Electric Railways.

20. Electric Railway Statistics, 1901-1918	432
21. Mileage and Equipment of Electric Railways, 1916-1918	432
22. Capital Liability of Electric Railways, 1908-1918	433
23. Mileage, Capital, Earnings and Operating Expenses of Electric Railways, 1918	433-434
24. Number of Passengers, Employees and others Killed and Injured on Electric Railways, 1894-1918	435

Motor Vehicles.

25. Number of Motor Vehicles registered in Canada by Provinces, 1914-1919	438
26. Speed Limits in miles per hour for Motor Vehicles by Provinces	438

Express Companies.

27. Operating Mileage of Express Companies in Canada, 1916-1919	439-440
28a. Operating Expenses of Express Companies, 1915-1918	440
28b. Operating Expenses of Express Companies, 1919	441

General Survey of the Climate of Canada. By R. F. STUPART, F.R.S.C., Director of the Meteorological Service of Canada, Toronto.	1914	128-139
Natural Resources of the Dominion of Canada. By WATSON GRIFFIN, Department of Trade and Commerce, Ottawa. With 10 illustrations.	1916-17	1-61
The Story of Confederation. By SIR JOSEPH POPE, K.C.M.G., C.V.O., I.S.O., Under Secretary of State for External Affairs, Ottawa. With 2 illustrations.	1918	1-13
Fifty Years of Canadian Progress, 1867 to 1917. By ERNEST H. GODFREY, F.S.S., Editor, Dominion Bureau of Statistics, Ottawa.	1918	23-72
The Climate of Canada since Confederation. By SIR FREDERICK STUPART, Director, Dominion Meteorological Service, Toronto.	1918	154-157
Water-Powers of Canada. By J. B. CHALLES, C.E. (Tor.), M.Can. Soc. C.E., Superintendent, Water Power Branch, Department of the Interior, Ottawa.	1918	231-283

TABLES IN CANADA YEAR BOOK, 1918.

Area and Population.	PAGE.
10. Male Population of Canada 18 to 45 years of age, classified according to Nativity by Single Years and by Provinces, Census, 1911.	99-101
11. Percentage Proportion by Provinces of the Male Population, 18 to 45 years of age, which was Canadian-born or Foreign-born on June 1, 1911.	102
12. Percentage Distribution by Provinces of the Canadian-born, British-born and Foreign-born Male Population, 18 to 45 years of age on June 1, 1911.	102
<i>Population Census of Prairie Provinces, 1916.</i>	
16. Urban and Rural Population of the Prairie Provinces, 1901-1916.	105
17. Origins of the Population of the Prairie Provinces, born in Canada, United States, or elsewhere, 1916.	106
18. Male and Female Population of the Prairie Provinces grouped by age periods, 1916.	107
19. Conjugal Condition of the Prairie Provinces, 1911 and 1916.	108
20. Proportion of Males to Females in Age Groups of Single, Married, Widowed and Divorced, 1911 and 1916.	109
21. Birthplace of the People of the Prairie Provinces, 1911-1916.	110
22. Population of Prairie Provinces, 10 years of age and over, who cannot speak English, 1916.	110
23. Illiteracy by Sex in the Population, 10 years of age and over, 1916.	111
24. Citizenship of Foreign-born in Prairie Provinces, 1916.	111
25. Number and Percentage of Foreign-born Males, by Birthplaces, naturalized, 1916.	112
<i>Production.</i>	
<i>Agricultural Census of the Prairie Provinces, 1916.</i>	
13. Total Area and Area of Land in Farms, 1911 and 1916.	192
14. Number of Farms, by Provinces, 1911 and 1916.	193
15. Distribution of Farms by Size of Holding and Tenure, 1916.	193
16. Classification of Farm Lands, 1911 and 1916.	194
17. Numbers of Farm Live Stock by Provinces and Classes, 1916.	194
18. Numbers of Farm Live Stock, 1911 and 1916.	195
19. Numbers of Pure-bred Live Stock in the Prairie Provinces, 1911 and 1916.	196-197
20. Fruit Production of the Prairie Provinces, 1915.	198
21. Value of Farm Property, by Provinces, 1911 and 1916.	199
22. Values of Field and Animal Products and of all Farm Property, by Provinces, 1910 and 1915	199
<i>World's Statistics of Farm Live Stock.</i>	
42. Numbers of Farm Live Stock by Principal Countries of the World, 1907 and 1916.	225-230
<i>Finance.</i>	
21. General Statistics of Cities and Towns, 1917.	497-498
22. Assessment and Valuation of Property of Cities and Towns, 1917.	498-500
23. Receipts, Expenditure, Assets and Liabilities of Cities and Towns, 1917.	501-502

THE CANADA YEAR BOOK, 1919.

The special feature of the Canada Year Book of 1919 is an illustrated History of the Great War, 1914-1918, with appendices showing the number of rewards for gallantry and honourable service granted to members of the Canadian Expeditionary Force.

A reorganization of the official statistics of Canada, which is now in progress by the Dominion Bureau of Statistics, is reflected by improvements in various sections, including especially those of Education (Section V); Trade and Commerce (Section VIII); Transportation and Communications (Section IX); and Finance (Section XI). In the last named section the Provincial Public Accounts, after exhaustive analysis, have been reclassified to permit of true comparability as between province and province and as between one year and another.

In all sections is given the latest information available up to the time of printing, and all the tables include, wherever possible, the figures of 1919. Articles and tables not requiring alteration or bringing up to date have not been repeated, but are noted for purposes of reference in the Retrospective Index on page xii.

The volume has been edited by Mr. ERNEST H. GODFREY, F.S.S., with the assistance of Mr. S. A. CUDMORE, B.A. (Oxon.) Grateful acknowledgments of valuable co-operation are again tendered to officers of the Dominion and Provincial Governments throughout Canada, including Mr. R. E. GOSNELL, of the Department of Public Information, for assistance in compiling the record of principal events and legislation. The tables have been compiled by Mr. JAMES SKEAD and Mr. JOSEPH WILKINS, and the diagrams have been drawn by Mr. R. E. WATTS.

R. H. COATS,

Dominion Statistician.

DOMINION BUREAU OF STATISTICS,

OTTAWA, June 30, 1920.

STATISTICAL SUMMARY OF THE PROGRESS OF CANADA.

ORIGIN OF THE WAR.

THE news of the murder of the Austrian Heir Apparent, and his wife, in the streets of Serajevo, the capital of the province of Bosnia, on June 28, 1914, came upon the world like a thunderbolt from a blue sky. Demonstrations of popular indignation and hostility to Serbia followed in Vienna and other Austrian cities. The government press in Austria and Germany at once adopted the theory that the murder was the result of a wide-spread conspiracy in that country, although the assassin declared that he alone was responsible for the deed. Three weeks of ominous silence followed. On July 23, Austria presented an ultimatum to Serbia which it was impossible for that country to accept and remain an independent state, and to which was attached a peremptory demand for its entire acceptance in forty-eight hours. Within the period named, Serbia, with Russian approval, announced her willingness to accede to all the Austrian demands except two, which she desired should be referred to the Hague Tribunal.

At noon, on July 28, Austria declared war by an open telegram, and on the following night, the Austrian batteries on the left bank of the Danube, and their gun boats in the river, began a bombardment of Belgrade, the Serbian capital. An invasion of that country followed at once.

Meanwhile, the British Foreign Secretary, Sir Edward Grey, made strenuous efforts to maintain peace. He proposed a European

conference to meet in London. France and Italy accepted without delay. The German Government replied on July 27 that it would accept mediation "in principle," reserving its right to assist Austria if attacked. On July 30, Russia ordered a general mobilization of its army. At midnight of July 31 the German Ambassador at St. Petersburg (now Petrograd) presented an ultimatum from his government, requiring Russia to begin demobilization within twelve hours, or before noon on the following day. As soon as the limit named in the ultimatum had expired, both the German and Austrian Governments ordered a general mobilization of their armies and navies, and at seven o'clock that evening Russia was informed that a state of war existed between Germany and that country. On the same day, the President of the French Republic signed a decree for general mobilization, after receiving information that Germany had presented an ultimatum to Russia, and was beginning to mobilize, thus declaring the intention of France to stand by its ally. Sir Edward Grey had already instructed the British Ambassadors at Berlin and Paris to ask whether the neutrality of Belgium, in the event of war, would be respected by Germany and France. The French Government replied promptly in the affirmative, except in the event of some other power violating that neutrality, when France might find herself compelled in self-defence to act otherwise. On August 2 the German Government required Belgium to take up an attitude of friendly neutrality by permitting German troops to pass through her territory for the invasion of France, granting a time limit of twelve hours in which to make a reply. On the night of August 1 German troops invaded Luxemburg and during the following day, overran the entire Duchy and entered French territory near Longwy. On August 3 France informed Germany that a state of war existed between them in consequence of this invasion. Next day the British Government sent an ultimatum to Germany requiring that country to respect the neutrality of Belgium, which the German chancellor had already declared it would be necessary to violate. Before this was received, the German troops had entered Belgian territory in force and attempted next day, to capture Liège, its chief industrial city, by direct assault. Having undervalued the efficiency of the garrison, they attacked in close formation and were repelled with heavy loss. On August 5, in consequence, the British Government declared the existence of a state of war between Great Britain and Germany, as having begun at eleven p.m. on the preceding day. It is worthy of remark that all belligerents sedulously abstained from making a distinct declaration of war. Italy announced its intention of remaining neutral on the ground that the war undertaken by Austria was an aggressive conflict.

For many years the governing classes in Germany had been schooled in the belief that this gigantic struggle between the great powers of Europe was inevitable and must result in "world power or downfall" for Germany. They had diligently prepared for it by taking every measure which the resources of the country would permit to increase its military and naval strength. The deepening of the Kiel canal had been accomplished. This gave the navy a safe harbour

of refuge with outlets at once into the Baltic and the North sea. It has been aptly compared to a "fox's earth with a double entrance." The law for the immense increase of the army had not yet come into full effect, and the projected preparations for offensive warfare were not entirely completed. Every conceivable plan for the invasion of France as the most redoubtable adversary had been critically considered. There were three possible routes for this invasion: one leading directly from Germany into France was barred by a chain of great defensive fortresses, with the exception of the somewhat narrow gap of Mirécourt between Toul and Epinal. The other two passed through the neutral states of Luxemburg and Belgium. All of these were eventually to be utilized. The invasion was to take the form of a great tidal wave sweeping irresistibly across the frontier on the broadest front, and ultimately enveloping and destroying the French field army and dictating terms in the capital. Success must be gained by the utmost swiftness and ruthless energy in execution, combined with a decided numerical superiority. Owing to the great extent of the country, the incompleteness of its railway system and presumed inefficiency of its government, it was considered improbable that the mobilization of the Russian army could be effected in less than six weeks. In France, the mobilization period was two days longer than in Germany; consequently it seemed possible that the German army might overwhelm France and be in a position to turn effectively upon the Russians afterwards.

The course that would be pursued by Great Britain was a matter of vital importance to both countries. The German chancellor frankly thought it incredible that Great Britain would risk the existence of her empire for the sake of a mere "scrap of paper" as he scornfully described the treaty for the maintenance of Belgian neutrality. If Great Britain remained neutral, the superiority of the German and Austrian fleets was so great as to insure them naval supremacy. The French feared that British assistance, if given at all, would come so late as to be of small avail. The declaration of August 5 was made so promptly as to relieve them from their worst apprehensions in that respect.

OPERATIONS ON THE WESTERN FRONT, 1914.

On August 6 the Germans brought up their heavy howitzers, and in the course of the day, to the amazement of the soldiers of other nations, drove the Belgians out of two of their strongest forts at Liège. Still the Belgian resistance was obstinate and the Germans lost precious time in their advance. Some of the forts held out for many days, and as long as this continued, it was impossible for them to utilize the railways to pass the city in great force, and supply their troops. This delay enabled the French and British armies to advance and meet them on the frontier between France and Belgium.

As a diversion in favour of the Belgians the first French army made a premature inroad into Alsace. A force based upon Belfort crossed the frontier and occupied Altkirch on August 7, and took possession of the large industrial city of Mulhausen next day. On the 9th, however, this force was attacked from two directions and

driven out. It was strongly reinforced and again advanced. There was hard fighting on the march, but on August 19, Mulhausen was again taken with several batteries of German field guns and many prisoners. The whole of Upper Alsace was apparently evacuated by the Germans and the French advanced to the Rhine.

The German mobilization was completed on August 14, and on August 19, the Belgian army was defeated at Louvain and driven into Antwerp. On August 20 the Germans occupied Brussels and levied a huge war contribution. Their armies, estimated at nearly a million of men, were rapidly advancing against the allied forces assembling near the Franco-Belgian frontier. The French mobilization was completed on August 17, and on the same day it was announced that a British expeditionary force, consisting of five infantry divisions and five cavalry brigades had actually landed in France. The movement of these troops, which began seven days before, had been kept a profound secret. The main body of the French army had in the first instance occupied a defensive position extending from Belfort to Mézières near the Belgian frontier, some seventy-five miles southeast of Brussels. This had recently been extended westward by the movement of French troops and the British army to a line reaching from Namur through Charleroi to Mons, the British army being on the extreme left near Mons. Another French army was placed under orders to come up on the left of the British extending the line to the fortress of Lille. It was confidently expected that the ring of forts surrounding Namur and strongly garrisoned would delay the German advance for a considerable period. The bombardment of these forts by heavy howitzers began on the morning of August 22. They were completely wrecked and surrendered on the afternoon of the 24th. The fall of this town exposed the left flank of the allied army to an enveloping movement which the Germans were not slow to undertake.

The Second French Army had forced the passes of the Vosges mountains and advanced into Lorraine. Their success in several small engagements induced them to make an ill advised attack on a strongly prepared position at Morhange which was repelled with heavy loss in men and guns. They were closely pursued across the frontier and retreated to the south of Lunéville, which was occupied by the Germans. This entailed the retreat of the First Army from Alsace, and a large portion of it was immediately sent by rail to the extreme left of the allied line to form a part of the new Sixth French Army which was being organized near Amiens. Of twenty-five army corps of the first line troops in the German army, all but four were now massed for operations in France with the intention of making a rapid and irresistible onslaught upon the allied armies, which it was intended to envelop by a double flanking movement in the hope of bringing about another and greater Sedan. August 23 was a bad day for the allies. One French army was defeated at Charleroi; another at Virton, in advance of Nancy. The Sixth French Army failed to come up on the left of the British, who had held their position near Mons with great difficulty and heavy losses. Consequently, they were compelled to retreat to avoid being turned on both flanks. Lille surrendered and

a general retreat of the whole allied left, from Verdun westward began toward Paris. On August 24, a flood of Uhlans swept through the north of France. They occupied Valenciennes, Denain and many other towns. The First German Army under General von Kluck continued its advance at top speed, trying to outflank the British in their retirement and drive them towards Maubeuge. The obvious purpose of its wide sweep westward was at once to turn the successive escarpments which form the natural defences of Paris to the eastward and envelop the opposing forces. Hot fighting took place at Landreies on August 25, and next day at Le Cateau. The losses on both sides were severe, but the British were obliged to abandon many guns on continuing their retreat. Fighting took place that day on a front of almost one hundred miles. A very fierce assault by the Germans in the neighbourhood of Nancy was repelled with great loss. Mézières was abandoned by the French. The allied forces were pushed back all along the line on their left. On August 27 the old frontier fortress of Longwy surrendered after a bombardment of several days. Maubeuge was invested. The Germans advanced to the forest of the Argonne. The French Cabinet resigned and was replaced immediately by a stronger one, General Gallièni was appointed Governor of Paris. Arrangements were made for the removal of the French ministry to Bordeaux.

Large Russian armies had entered Eastern Prussia and Galicia, where they had gained important victories. The inhabitants were flying before them in terror. Three German army corps were promptly sent eastward by rail to oppose the invaders. The German operations in France were driven forward with furious energy and speed, regardless of losses and the exhaustion of the troops, in the hope of winning decisive victory before turning against their eastern enemy. The tired men were ruthlessly spurred onward and reminded of the military maxim that "sweat saves blood." As their mobilization was more effective than that of the allies, they still greatly outnumbered them in the decisive theatre of war, west of Verdun. The British army was again outflanked and driven from Cambrai on August 26, and from St. Quentin on the 28th. On the 29th it was directed to fall back to a selected position behind the Marne, on a line extending from Compiègne to Soissons. Amiens, Laon and Reims were abandoned. The Fifth French Army on the British right made a fierce counter-offensive at Guise with some success, but its left attack failed and the line of the Somme was abandoned. The Sixth French Army, however, was hastily forming up on the British left, but retired toward Paris. The bridges crossing the Marne and other rivers were everywhere destroyed in the retreat. On September 3, the French Government removed to Bordeaux. General Joffre advised Sir John French to retire behind the Seine which he did, and the Germans crossed the Marne. It was no longer possible for them to outflank the allied left which then rested securely on the great fortress of Paris garrisoned by half a million men. Their whole enveloping movement had therefore failed. Their losses had been very great, not only in battle but on the march, owing to the feverish haste of their movements. Their First Army which had been moving directly upon Paris, swerved

sharply to its left and marched eastward, thus presenting its right flank to an allied attack. The German line of communication extended back nearly two hundred miles through Belgium, to their own country, and the railways in many places were destroyed and bridges broken. In this perilous situation, the fateful decision was taken to withdraw six additional army corps and send them eastward for the protection of East Prussia and the support of the Austrian Army, which had been badly beaten in Galicia. After their departure, the advantage of numbers was considerably on the side of the allies.

On September 5 representatives of Great Britain, France and Russia signed an agreement binding each power not to conclude a separate peace, nor discuss conditions of peace without the consent of the others. General Joffre issued an order of the day, directing a general offensive to begin next morning. In the evening a sortie from the garrison of Verdun captured a large provision train on its way to the army of the German Crown Prince. The battle of the Marne began at sunrise on September 6, and continued for seven days. The right of the allies rested on Verdun, their left on Paris. The front of battle covered one hundred and fifty miles, and it is estimated that two and a half millions of men were engaged. By noon of the first day, von Kluck discovered the danger of his position and commenced a hurried retreat covering the movement of his columns by strong rear guards. His retirement exposed the flank of the armies on his left which in turn, were forced to retire. Maubeuge, however, surrendered on the 7th, with its garrison of forty thousand men, having endured a fierce bombardment for twelve days. The besieging force was liberated to strengthen other German armies. After retiring across the Marne, the Germans turned at bay and fought desperately to hold their ground. On September 11, the army of the Crown Prince launched a general attack on the French positions at the Grand Couronné de Nancy, which failed with great loss. On the following day, however, the Germans succeeded in taking the forts of Troyon and Camp des Romains on the Meuse and crossed that river at St. Mihiel. The German armies on their right retired across the river Aisne. Amiens, Reims, Chalons sur Marne were evacuated by them. Many prisoners and guns were lost in their retreat. The victors themselves were so amazed at their success, that it became popularly known in France as "the miracle of the Marne." Foremost among the contributory causes of the German defeat, were the physical exhaustion of their troops, the breakdown of their transport service and the withdrawal of nine army corps at the critical moment to the eastern front.

They had already prepared a strong defensive position on the plateau north of the Aisne, with its right resting on the wooded hills near Noyon, and destroyed the bridges in their front. Four lines of railways leading from Belgium were available for their supply, and another connecting these, ran from east to west, close in rear. Their operations at first were wholly defensive, but were followed later by occasional counter-attacks. The allies prolonged their line steadily to their left in the hope of turning the German position, and striking their communications. The Germans responded by a similar extension

of their lines northward, and at the end of the third week of the fighting on the Aisne, the lines held by the opposing forces reached La Bassée, within ten miles of the Belgian frontier.

Antwerp, the new seat of the Belgian Government, had been besieged by the Germans. Their bombardment began on September 28. The protecting forts were soon reduced to silence. A considerable body of British troops and marines had arrived for the assistance of the garrison, but on October 5, the situation was definitely pronounced hopeless, and the evacuation of the city began. Four days later, the Germans took possession.

A great force of cavalry followed by two newly organized German armies, began its advance on the roads leading to Dunkirk and Calais. Lille and the manufacturing towns in its vicinity were soon occupied by them without resistance. The British army had been reinforced from England, and by a strong contingent from India, which landed at Marseilles, and it was hastily moved from its position on the Aisne to a new line extending from La Bassée to Ypres. French and Belgian troops continued the line to the North Sea at Dixmude. In the middle of October, the Germans began a great attack near Ypres, making desperate efforts to force their way to Calais and Dunkirk. This lasted almost without intermission until November 5, when its failure was tacitly confessed. The allies acting on the defensive had lost one hundred thousand men while the loss of the Germans was undoubtedly much greater. At its conclusion, four millions of men faced each other in parallel lines of entrenchments, extending from the North sea to the Swiss frontier, a distance in a direct line of three hundred and fifty miles, but following the sinuous battle front, measuring more than five hundred. During the remainder of the year, these lines practically remained stationary, with little gain or loss of ground on either side.

OPERATIONS ON THE EASTERN FRONT, 1914.

The Russian advance against East Prussia and Galicia began on August 16. Two large armies were directed upon the former province. The first of these, known as the army of the Niemen, defeated a German corps in a rear guard action at Gumbinnen, and threatened Königsberg, the great frontier fortress. The other, called the army of the Narew, advanced successfully in the region of the Masurian lakes and occupied Allenstein. On August 22, General Paul von Hindenburg was placed in command of the German armies on this front. By a skilful use of railways and mechanical transport, and taking advantage of the natural features of the country he enveloped and practically annihilated the army of the Narew near Tannenberg on August 30 and 31. Having been strongly reinforced from the western front, he turned swiftly against the army of the Niemen and drove it across the frontier with heavy loss. He next invaded and overran the greater part of the province of Suwalki. The Russians took up a position behind the Niemen, which Hindenburg failed to cross. He was subsequently worsted in a series of actions near Augustowo, September 28-October 3, and forced to retire into East Prussia. Having been strongly reinforced from the west, the Germans

again advanced and captured the great industrial city of Lodz. They then marched against Warsaw but were checked before reaching that city.

The Russian invasion of Galicia was more fortunate. After some minor successes, they won a very great victory over an Austrian army near Lemberg on September 2. They drove the Austrians across the river San, captured Jaroslav, and besieged the great fortress of Przemyśl. They then advanced upon Cracow. The Austrian army was heavily reinforced by Germans and the Russians retired to the line of the Vistula to protect Warsaw. Here they were attacked and succeeded in holding their ground in a battle of six days' duration, when a strong force of cavalry enveloped the German left wing and forced them to make a long and costly retreat. Early in December, the Russians renewed the siege of Przemyśl and again advanced towards Cracow.

The Austrian invasions of Serbia had been repelled with severe loss and a Serbian army invaded Bosnia and besieged Serajevo. In November, the Austrian army was reinforced, drove out the Serbians and pursued them into their own country. Belgrade was bombarded and laid in ruins. On December 5, the Serbian army defeated the invaders and recaptured Belgrade on the 14th.

Montenegro declared war on Austria on August 7, and assisted the Serbians in their invasion of Bosnia. On October 31, diplomatic relations between Turkey and the Allies were broken off. Following upon a Germano-Turkish attack upon the Russian Black Sea coast, Great Britain declared war against Turkey and annexed Cyprus on November 5, and France declared war next day. A Holy War against the Allies was proclaimed by the Sultan on November 25. The allied fleet bombarded the forts at the Dardanelles. The Turks invaded the Caucasian frontier of Russia, but were almost immediately driven out. Troops from India landed at the head of the Persian Gulf, and occupied the port of Basra on November 21. The Turks were defeated by this force at Kurna on the Tigris on December 8, and the richest part of the Delta was occupied by the victorious troops.

NAVAL AND COLONIAL WARFARE, 1914.

With the entry of Great Britain into the war, the command of the seas passed into the hands of the Allies. It became no longer possible for the reservists of Germany and Austria to return from beyond the seas, and the conquest of the German colonies was an easy matter. About half of the German shipping at the declaration of war was on the high seas or in foreign and colonial ports. The destruction of German commerce and the close blockade of her ports must eventually accomplish her ruin. Her fleet, however, still commanded the Baltic and enabled her to carry on a prosperous trade with Scandinavia, and the outer world through Scandinavian ports. The main task of the British Grand Fleet in the North sea was to prevent German squadrons or single ships from reaching the Atlantic or from remaining at sea any length of time without meeting a superior British force. The first encounter of any magnitude took place in the Bight of Heligoland on August 28. Three German cruisers and two torpedo boats were destroyed.

Small German squadrons made flying raids upon the English ports on two occasions. Appearing off Yarmouth on November 3, they caused some damage, and on December 16, the ports of Scarborough, Hartlepool and Whitby were bombarded and many inhabitants killed or wounded. The German cruisers, which were then at sea, were able to inflict considerable damage on British and allied shipping. The most successful of these were the Karlsruhe, the Emden and the Koenigsberg. The Emden was finally destroyed by the Australian cruiser "Sydney" at the Cocos islands on November 9, and the Koenigsberg was bottled up in the Rufigi river in German East Africa, where she was subsequently destroyed. On November 3, a British squadron of three cruisers encountered a German squadron of much superior force off the harbour of Coronel in Chile. The German Admiral von Spee skilfully taking advantage of weather conditions, succeeded in sinking the Monmouth and Good Hope, while the third British vessel escaped. When this event became known to the Admiralty, another squadron of superior strength was secretly equipped and despatched under Admiral Sturdee in search of the victors. On the morning of December 5, the German squadron of five ships was sighted off the Falkland islands and four of them were quickly destroyed. They were gallantly fought to the last.

Several British cruisers and destroyers were sunk by submarines, and on October 27 the "Audacious," a new super-dreadnought, was sunk by a mine off the north coast of Ireland. German merchant shipping was quickly swept from the face of the ocean, being captured or interned in neutral ports.

The war against the German overseas possessions was vigorously prosecuted. The German colony in Samoa was taken by an expedition from New Zealand on August 29. The Bismarck Archipelago was captured by the Australians on September 12, and King William's Land, and Yap in the Caroline islands were occupied by them in the latter part of the same month. The colonial forces of British South Africa invaded German South West Africa. Japan declared war against Germany on August 23. In September, a Japanese army, joined by a small British force, besieged the fortress of Tsingtau which surrendered on November 7. The Marshall islands were occupied by the Japanese on October 6.

An insurrection in South Africa headed by Generals de Wet and Beyers was quickly suppressed by the colonial forces.

A Canadian expeditionary force was rapidly assembled in August, 1914, at the training camp of Valcartier, near Quebec, where it remained until transportation and a sufficient escort of ships of war could be provided late in the following month; and on October 14, this force consisting of approximately 32,000 men arrived at Plymouth. Contingents from Australia and New Zealand were transported to Egypt. A large force of British territorial troops was despatched to India, liberating an expeditionary force of British and Indian troops for service in France. The French Nineteenth Army Corps from Algeria was conveyed across the Mediterranean unmolested, and great numbers of native troops were recruited for service in the French dominions of Africa and Asia, and brought to France. Such

movements of troops would not have been practicable without absolute control of the sea.

At the end of the year, Germany had signally failed in her main purpose of destroying the French and British armies, and afterwards in a very desperate effort to reach the Channel ports. She had, however, overrun Belgium and remained in possession of a tenth of the soil of France containing its most valuable mines of coal and iron, and several of its greatest industrial towns. Austrian armies had been soundly beaten by the Russians and Serbians, and the province of Galicia had been lost.

OPERATIONS ON THE WESTERN FRONT, 1915.

In January the Allies made three determined efforts to pierce the German lines in Alsace, in Champagne, and at Souchez, north of Arras. A French force crossed the Aisne near Soissons and gained a precarious foothold north of the river. The stream rose in flood during the night and carried away most of the bridges, thus isolating the force on the north side. It was attacked by greatly superior numbers on the 13th and driven across the river with heavy loss. On the morning of March 13, a formidable offensive began on the British front at Neuve Chapelle, ten miles west of Lille. The German entrenchments were levelled by a well directed artillery fire and carried by the infantry without much difficulty. The advance was continued as far as the second line, where the assaulting troops were compelled to halt through disorganization. The artillery was unable to continue its barrage from want of ammunition and the expected reinforcements did not come up. The position won was maintained and German counter-attacks were repelled with great loss. Neuve Chapelle has been aptly described as a victory that "halted half way through lack of prompt support and co-ordination." On March 14, the Germans commenced a terrific bombardment of the British lines at St. Eloi. Shortly after, they sprang an immense mine and blew up part of the British entrenchments which were then carried by assault. Next day the British counter-attacked and retook most of the lost ground. On April 17, the British sprang a mine under Hill 60, three miles south-east of Ypres, and carried the German works by assault. Fierce fighting followed during the next five days. On the evening of the 22nd the Germans discharged a great volume of poisonous gas against the French trenches north of Ypres, which was carried toward them by a favourable wind. The French African troops holding this line were surprised and became panic-stricken. A whole division was nearly destroyed in consequence. The Germans poured into the gap and began to cross the canal. At the same time, they attempted to use gas against the Third Canadian Infantry Brigade, on the French right. Here the direction of the wind was not so propitious and the Canadians firmly held their lines and repelled the attack which was renewed against the Second Canadian Brigade on the following afternoon with no better success. These assaults with gas continued intermittently until the middle of May. Within two weeks, the allied troops were supplied with gas helmets and respirators and the temporary advantage of the Germans was at an end. They had forced

the Allies to shorten their lines at Ypres, but failed to take the city and were ultimately driven back across the canal.

The month of April was also marked by a resolute effort on the part of the French to expel the Germans from their foothold across the Meuse at St. Mihiel. They made limited progress on the flanks of the German salient, but failed to carry the main position. Their losses were severe. To relieve the British and assist the Russians in their operations, General Foch began a great offensive on a front of twenty miles north of Arras on May 10. The first line of German trenches was overwhelmed by a terrific storm of shells and carried with little difficulty. The Germans were well prepared in their alternative lines of defence, and succeeded in holding their positions, although these attacks were continued with little relaxation for the next three months. The British attacked La Bassée, and gained some ground, but eventually failed again from want of artillery ammunition. On July 30, the Germans retook some trenches they had lost near Hooze by making use of flame projectors for the first time.

The Allies began a prolonged bombardment on September 1, which lasted for twenty-five days, preparatory to an advance on a wide front. The British attacked near La Bassée, and penetrated the German lines to a depth of two miles. The French gained some ground on the British right, and in Champagne pierced the German lines on a front of fifteen miles. Nearly 30,000 prisoners were taken, but the Allies failed to break the German third line. Troops were swiftly brought from the Russian front, yet subsequent counter-attacks made by the Germans in the months of October and November did not recover much of their lost ground and proved very costly. For the remainder of the year, operations on this front were of a local and unimportant nature.

OPERATIONS ON THE EASTERN FRONT, 1915.

At the beginning of the year, Warsaw was still the chief objective of the German movements. Their attacks upon the Russian positions in January and February in western Poland were generally unsuccessful. A great army was collected in East Prussia which began its advance on July 7, and drove the Russian forces across the Niemen. At the same time, a formidable Austro-German offensive started in the Carpathians with the purpose of relieving Przemyśl. This force was beaten in a great battle near Halicz on March 11; Przemyśl surrendered with its garrison of 120,000 men on March 22. The battle in the Carpathians continued until the middle of April when the roads became impassable by continuous rains. The German offensive was afterwards resumed by a skilful attack under the command of Field Marshal von Mackensen. After a terrific artillery preparation on May 2, the Germans succeeded in piercing the Russian positions at Gorlice and forced retreat to the line of the river San. Here the Russians were again attacked and, after a battle which lasted for two weeks, were forced to retire; and Przemyśl was retaken. Another battle began for the possession of Lemberg, which was captured by the Austrians on June 22. In the middle of July, a gigantic offensive

commenced all along the eastern front. The Germans forced the passage of the Narew, and advanced against Warsaw. Libau was taken on August 1; Ivangorod fell on August 4, and Warsaw was occupied on the 5th. The Russian armies were pursued with great energy, but succeeded in effecting their retreat without suffering a decisive overthrow. The remainder of their frontier fortresses were taken in rapid succession, or evacuated, and the remnant of their troops retired beyond the river Dvina where they were rallied and received strong reinforcements. In September, they once more assumed the offensive and gained a considerable success south of the Pripet marshes.

During the whole of this period, their well organized network of military railways enabled the Germans to concentrate large masses of troops at almost any point in the theatre of war. Whole armies were conveyed rapidly by this means from front to front and flank to flank.

THE ITALIAN FRONT, 1915.

Italy declared war on Austria on May 23, 1915. Next day Italian troops invaded Austrian territory on all adjacent fronts. The cities of Trent and Trieste were their main objectives. The blockade of the Austro-Hungarian ports was taken over by the Italian navy. Owing to the great natural strength of the Austrian positions, and their careful fortification, the advance of the invaders was slow and costly. On July 25, they gained a foothold on the Carso plateau on the road to Trieste, but were subsequently obliged to retire by the overwhelming fire of the Austrian artillery. This year terminated without any further advance. The natural obstacles of a mountainous country proved well nigh insuperable and could only be overcome by immense exertions and great engineering skill. In many instances batteries, constructed at a height of nine or ten thousand feet above the sea level, were firing at targets above the clouds. An accumulation of water was usually as urgent as a supply of ammunition.

CONQUEST OF SERBIA, 1915.

In the end of September, 1915, a large German army under the command of von Mackensen was concentrated on the northern frontier of Serbia. A week later the Bulgarians definitely entered into the war as allies of the central powers. The Austro-German armies crossed the frontier on October 6 in great force. Their advance was very slow but quite irresistible. The Serbian army was driven steadily before them, and the country overrun. By the beginning of December its remnants were driven into the mountains of Montenegro and Albania, where many perished from disease and privation. French and British troops had occupied the Greek port of Salonik on October 5, and moved northward along the railway into southern Serbia, where they occupied an extensive intrenched position. Here they were attacked by the Bulgarians on December 6, and after nine days severe fighting compelled to retire to Saloniki.

CAMPAIGN AT THE DARDANELLES, 1915.

After closely blockading the entrance to these straits for some months, a powerful British and French fleet was assembled for a naval attack in February, 1915. The coast defences had meanwhile been greatly strengthened, and a powerful army assembled for their protection under the direction of German officers. The bombardment began on February 19, and was continued at intervals until the evening of March 2. Several of the forts were silenced and greatly damaged. On March 20, the attack was renewed. Three battleships of the allied squadron were sunk during the day by mines or gun fire. This was a serious reverse.

A military expedition under the command of Sir Ian Hamilton had already been organized to attack these defences in the rear. It consisted of a British, an Australian-New Zealand and a French army corps, numbering 120,000 men. A much larger force of Turkish troops, with a considerable number of German officers and soldiers had been assembled to oppose the invasion. A landing was effected on April 25, with serious losses. A limited foothold was secured on the peninsula but after most persistent efforts, the troops failed to carry the heights dominating their position. Siege operations were then undertaken, which continued in the face of insuperable difficulties until the end of the year, when the undertaking was reluctantly abandoned, and the allied troops were withdrawn, after months of incredible efforts in which they had displayed indomitable courage and tenacity.

OPERATIONS IN EGYPT AND MESOPOTAMIA, 1915.

The British garrison in Egypt had been strongly reinforced the year before. The Suez canal was fortified and guarded by strong garrisons. An advance of the Turks from Syria was repelled in the first week of February, 1915. Subsequent small raids were easily repulsed. In April the British-Indian force in Mesopotamia was reinforced by a second division, and General Sir John Nixon took command. The Turks were defeated at Shaiba on April 12, and again at Nasiriyeh on the Euphrates about ninety miles above on July 24. They were again defeated at Kut-el-Amara, on the Tigris on September 28, and closely pursued by a British division under General Townshend. They were driven from a fortified position in Ctesiphon, twenty miles from Bagdad, on November 22. Afterwards they were greatly reinforced and Townshend was obliged in turn to retire to Kut-el-Amara, where he was surrounded and besieged.

A formidable attempt of the Turks to invade Russian territory in the Caucasus was defeated. One Turkish army corps was forced to surrender and two others were entirely routed. The Russians gained ground slowly in Armenia and Persia.

CONQUEST OF GERMAN SOUTHWEST AFRICA, 1915.

The rebellion in South Africa terminated on February 3, with the surrender of the last rebel leader. The colonial forces under the command of General Louis Botha, the premier of the Union, under-

took the invasion of German South West Africa. The principal port had already been occupied by a small British force. Two divisions of the colonial forces entered the colony and marched upon Windhoek, the capital, which was occupied on May 12. The German governor surrendered on July 9 with the remnant of his force.

NAVAL WARFARE, 1915.

At the beginning of the year only four German cruisers were still at sea. Two of these sought refuge at ports in the United States in the month of April and were interned. The Dresden, sole survivor of the battle at the Falkland islands, was overtaken by a small squadron at Juan Fernandez, on March 14, and sunk. The Karlsruhe is stated to have been destroyed by accident. The Königsberg, blockaded in the Rufigi river in German East Africa, was destroyed by two British monitors on July 11. On January 24, a German squadron, apparently on its way to attack some British port, was encountered by a British squadron of superior force about thirty miles from the coast of England. In the action which followed, the German cruiser Blücher was sunk and the remainder driven off in a damaged condition. The British battle cruiser, Lion, and the destroyer, Meteor, were temporarily disabled, but the losses of the crews were small. On February 4, a proclamation was issued by the German Admiralty, declaring all the waters surrounding Great Britain and Ireland as a war zone after the 18th of that month, in which every hostile ship would be destroyed by their submarines. Many vessels were destroyed in pursuance of this policy, with the loss of thousands of lives. The sinking of the Cunard liner "Lusitania," the largest British ship in the Atlantic service, on May 7, by which 1,153 persons perished, caused a tremendous outburst of indignation in all neutral countries, as well as among the allied nations. The submarine campaign, however, absolutely failed in interrupting commerce between the British Isles and the rest of the world, or in interfering materially with the transport of troops and supplies into the several theatres of war. British submarines on the other hand succeeded in entering the Baltic and the Sea of Marmora, where many hostile vessels were destroyed by them. Allied commerce on the high seas was protected and the commerce of their enemies completely stopped.

PARTICIPATION IN THE WAR OF THE BRITISH OVERSEAS DOMINIONS AND COLONIES, 1915.

The First Canadian Division had trained at Salisbury Plain during the fall and winter, and crossed to France toward the end of February, 1915. The frontispiece to this volume facing page 1, represents the landing of the Canadian troops at St. Nazaire. They were engaged with distinction at Ypres, Festubert, Givenchy and Neuve Chapelle. Sir John French reported that at Ypres, in April, 1915, they "held their ground with a magnificent display of tenacity and courage," and that they "averted a disaster which might have been attended with the most serious consequences." (See the

illustration facing page 14). A second division arrived in England early in the summer, and in November a third division was organized. On September 14, a Canadian Corps of two divisions was formed in France with Lieut.-General E. H. Alderson in command. The total number of troops recruited for service in Canada by the end of the year was officially reported as amounting to 212,690. In a New Year's message published on the last day of the year, the Prime Minister stated that the military force contributed by Canada would be increased to half a million of men. Subscriptions to the various war funds were augmented by many millions of dollars.

The support afforded by Australia was equally cordial both in troops and money. At the beginning of November, it was officially stated that 92,000 men from Australia had actually been despatched to the theatre of war. At the same time New Zealand had sent 25,000 men to the front, and the Union of South Africa, besides supplying large contingents of troops for service in South, West, East and Central Africa, had furnished 6,500 men for service in Europe. Newfoundland had supplied 1,600 men for service on land besides sending many men to the navy. The British colonies in the West Indies sent two thousand men, and smaller contingents were furnished by Ceylon and Fiji.

ECONOMIC RESULTS OF THE WAR, 1915.

Early in the year 1915 it became apparent that the German authorities were seriously alarmed by the tightening of the British blockade. The entire control of provisions and all military supplies was taken by the Imperial Government, and decrees were enacted for fixing prices. All stocks of certain metals were reserved for military use. Before the end of the year, it was confessed that the scarcity of food was bearing very heavily upon the poorer classes, for whom only a sufficient supply of grain and potatoes could be provided. This difficult situation had been alleviated to a certain extent by the occupation of Belgium and the great industrial districts of northern France and Poland, with their valuable mines of coal and iron, numerous blast furnaces and textile factories. Every effort was made to turn these to the best account. It was admitted that on several occasions, the German armies had been placed in a critical situation by a shortage of artillery ammunition late in the autumn of 1914, and again in the summer of 1915.

The chief object of the campaign against Serbia was to establish an overland communication with Turkey, and obtain supplies from that source. The importation of raw materials, food stuffs and certain manufactures, and the export of her own industrial products, had become vital conditions of the economic life of Germany. Consequently, the sinister effects of the blockade were felt more and more daily as the war continued. In Austria-Hungary, a general seizure of all grain and flour was decreed on February 26, and a system of per capita distribution inaugurated in the large cities next month. The prices of food rose enormously, and in the autumn entailed great suffering upon the working classes.

French commerce was seriously affected by the war. Exports were diminished by one half, while imports increased in value by ten per cent. Strong measures were adopted in June to increase the supply of munitions. Skilled mechanics taken from the factories on mobilization were recalled with that object. By the middle of the month 650,000 persons were engaged in producing munitions.

Imports into Great Britain greatly increased, but there was a considerable reduction in exports. A Ministry of Munitions was established in June, and a great campaign inaugurated to increase the output of shells and artillery. A Munitions Bill, which placed the government in nearly as complete control of the persons employed in work shops and ammunition factories as it had over the troops in the field, was quickly enacted.

A National Registration Bill was passed in July; in November the system of recruiting was re-organized, and before the end of the year the government reluctantly decided to adopt a modified form of conscription.

OPERATIONS ON THE WESTERN FRONT, 1916.

In December, 1915, General Joffre was appointed to command all the French armies, and was succeeded by General de Castelnau in command of the French troops engaged in France. Sir Douglas Haig succeeded Sir John French in command of the British forces in France, and late in December, 1915, the Indian army corps was transferred to Mesopotamia. At the commencement of the year, the German forces were probably much outnumbered on the western front, but they held dominating positions which were not easily attacked. In the month of January, their armies on that front were heavily reinforced and resumed the offensive at several points, apparently to test the strength of the allied positions and keep them in uncertainty as to their future intentions. On the morning of February 21, a tremendous artillery preparation began in the sector of Verdun, followed by a fierce infantry attack in the afternoon, which carried several of the French first line positions. Their assaults were continued on the two following days, and by the night of the 24th they had captured the whole of the first line of the French intrenchments on the right bank of the Meuse, and taken several thousand prisoners at the cost of terrible losses. The French garrison was continually reinforced, and kept well supplied with ammunition. It is stated that four thousand motor trucks were constantly employed on this service, and two hundred thousand men brought up to hold the defences. The struggle continued with a dreadful sacrifice of life on both sides, with little intermission until March 22. The fort of Douaumont, a very commanding position, was taken by the Germans, but otherwise their gains were insignificant. A lull in the fighting occurred between the 22nd and the 28th of March, when the attacks were renewed on both banks of the river, and continued until April 25. Three fortified villages which had been converted by an intense bombardment into shapeless heaps of ruins were taken, but a great final assault utterly failed, and the assailants never succeeded in really approaching the main defences of the place.

HISTORY OF THE GREAT WAR

ITALIAN, BALKAN, PALESTINE AND MESOPOTAMIAN FRONTS

Fighting began again during the first week in May and lasted on the left bank of the Meuse, until the first of July. Fort Vaux was taken on June 6, and on June 9 one hundred thousand men were employed on a front of only three miles in a desperate assault on the heights of Thiaumont which they eventually carried. The British offensive on the Somme caused a great diversion of troops in that direction and compelled the Germans thenceforth to remain on the defensive in this sector.

The long delayed allied attack on that part of the German lines was preceded by a tremendous bombardment lasting continuously for five days on a broad front, by frequent raids at night with small parties to ascertain its results, and by successful assaults on the German aircraft. Many of their observation balloons were brought down, and allied aeroplanes bombed divisional headquarters and the principal railway stations in rear. Decisive ascendancy in the air was secured in the sector selected for the main offensive, and the concentration of troops was carried out with all possible secrecy. The British forces had been heavily reinforced and two new armies formed. A large additional frontage was taken over by them from the French on the Somme. The time for the assault was fixed for 7.30 a.m. on July 1. Sir Henry Rawlinson commanded the British troops allotted for the attack, which was made on a front of twenty miles against the Thiepval ridge, while the French attacked on an eight mile front on both sides of the river Somme, to their right, under the orders of General Foch. The British attack failed on the extreme left, owing to insufficient preparation, but the German first line was pierced on a front of sixteen miles in the face of an obstinate resistance, chiefly from machine guns concealed in positions where they could not be reached by artillery fire. The French were successful all along their front, as an attack there seems to have been somewhat unexpected. The advance was continued on July 2 and 3. On the following day, operations were delayed by heavy thunderstorms, but the French continued to gain ground. Heavy reinforcements had been received by the Germans who began violent counter-attacks upon the British.

On the 7th a division of the Prussian guard made a desperate attack on the British position near Contalmaison, which was repelled with great loss, many prisoners being taken. Fighting continued day after day with great fury, and the Germans were driven from a large portion of their second line by the end of the month. Numerous desperate struggles took place for small positions. The fighting in the month of August continued daily with slow but steady gains of ground on the part of the Allies, yet at no point did they succeed in breaking through. The artillery bombardment was continued with unprecedented energy. On some occasions, ninety thousand shells were fired within an hour by the allied guns, and in certain instances, more than a million inside of twenty-four hours. A great force of cavalry and horse artillery was held in readiness close in rear, with the intention of taking advantage of a breach in the enemy's position. A great joint attack was delivered with considerable success on a front of forty miles on September 3, in which twenty-eight allied divisions

were engaged. On September 14 and 15, the British assaulted the German positions near Courcellette, which was carried by the Second Canadian Division. Many heavy armoured landships or "Tanks" were first brought into action on this occasion with great success, and the German losses were extremely heavy, as they had massed troops for a counter attack in their front trenches. On September 26, the First Canadian Division captured the Hessian trench and other British troops carried the great Hohenzollern redoubt, noted for its elaborate system of defences and deemed impregnable. Next day they carried the Stuff redoubt and two thousand yards of adjacent trenches, and on the 28th the Schwaben redoubt which commanded the valley of the Ancre river. During the first week of October, operations were greatly impeded by heavy rains, but on the 7th the British made an advance of twelve hundred yards on an eight mile front. The French undertook a vigorous and skilfully prepared offensive near Verdun on October 24, when they recaptured Douaumont, and in a few hours regained nearly all the ground they had lost on the east side of the Meuse since the beginning of the German offensive, taking several thousand unwounded prisoners. Operations were then begun against Fort Vaux, which was evacuated by the Germans on November 2, as a result of a furious bombardment. The weather during November was highly unfavourable for operations on the entire western front owing to incessant rains which soon converted the country into a sea of mud; still on November 12, the French captured Saillisel, a strong position north of the Somme and pierced the German fourth line. Next day the British attacked on both sides of the river, favoured by a dense mist, and penetrated the German intrenchments to a depth of a mile on a front of three thousand yards, taking five thousand prisoners. Many heavy bombardments and trench raids took place during the remainder of the year without appreciable gain on either side.

After several days artillery preparation, the French executed a successful attack on the German lines east of the Meuse, near Verdun, and carried their intrenchments on a front of six miles, taking nearly twelve thousand prisoners and many guns on December 15.

The German offensive at Verdun had failed disastrously. The allied offensive had also fallen far short of the objectives in view. Both operations entailed immense sacrifices in life and enormous expenditures of ammunition.

OPERATIONS ON THE ITALIAN FRONT, 1916.

The weather prevented active operations on this front during the early months. The snow was deep, and misty weather interfered with the effective use of artillery. The rugged character of the country made supply of the opposing forces a task of extreme difficulty. Continuous preparations had been carried on by the Austrians during the winter and early spring for an offensive on a great scale in the Trentino, when the weather became favourable. In March all their main positions were fiercely bombarded to prevent reinforcements from being sent to the French front. The Austrians had brought

large bodies of men from the Russian front, and had conducted all their operations with such profound secrecy that when their principal attack commenced, the Italians were ill prepared to oppose it. On May 14 the Austrians began a violent bombardment of the Italian positions on a front of many miles. They employed upwards of two thousand guns, of which eight hundred were of very large calibre, among them forty howitzers of the largest class. The force assembled for this attack numbered 350,000. The infantry assault began on May 18, and continued to gain ground in the valleys of Adige and Brenta until June 2, when it was checked upon a new line many miles in rear. The Austrians reported the capture of thirty thousand prisoners and three hundred guns. For the next two weeks they continued to attack the new Italian positions from day to day on various parts of the line, and on one occasion along its whole front, but failed to make any important advance. Three divisions were then hastily withdrawn to oppose the Russian offensive in Galicia. On June 25, the Austrian retreat began to a selected position protected by strong rear guards, but was not effected without serious losses.

An Italian offensive had been planned to take place on the Isonzo, simultaneously with the allied attack on the Somme and the Russian invasion of Galicia, having Gorizia as its main objective. This had been postponed on account of the Austrian advance in the Trentino. The attack began on August 6, and Gorizia was taken three days later. The advance was continued successfully until August 17, when it was checked. Their offensive on this front was not resumed until October 11. Several lines of trenches were captured on that and the following day. On the Carso plateau, a further advance was made on November 1 and 2, when a portion of Austrian intrenchments was carried and many prisoners taken. Further active operations were prevented by bad weather.

OPERATIONS ON THE RUSSIAN FRONT, 1916.

At the beginning of the year the Russians still occupied a defensive line in front of their railway, extending from the gulf of Riga to the frontier of Rumania, over seven hundred miles in length. Here they repelled every attempt of the enemy to pierce their positions and reach the railway. On December 23, 1915, they commenced an offensive to divert attention from their projected operations in the Caucasus. Fierce fighting continued until the middle of January, 1916, along the Strypa and Styr rivers without any important success on either side. On March 16 the Russians advanced towards Vilna to relieve the pressure at Verdun and possibly to anticipate a German offensive in the vicinity of Riga. Little progress was made before a thaw put an end to operations at the end of the month. Another great offensive on their part began in June, with three army groups acting under the immediate direction of the Czar with General Alexieff as chief of staff. This movement opened with simultaneous attacks on selected portions of the Austrian line, south of the Pripet marshes on June 4. Both the opposing Austrian armies were forced back with heavy loss in prisoners, chiefly of discontented soldiers who

voluntarily surrendered by entire units. Lutsk was taken on June 6 and Dubno on the 8th. The Austrians were then heavily reinforced by troops from the line north of the marshes and by some German troops from Verdun and Austrians from the Trentino, who were hurried across from the other fronts by railway. The Russians reported the capture of nearly two hundred thousand prisoners and more than two hundred guns. It was believed that the principal Austrian armies had been reduced to half their former strength. The Austro-German forces commenced their counter-offensive on June 16, and continued it until the end of the first week in July, driving back the Russians for many miles. The Russians renewed their advance on July 4 with considerable success. On July 16 they again attacked and advanced on the city of Brody, which was taken on the 28th. Their other operations farther south were also successful, and they cut the railway leading from Galicia into Transylvania. On August 2 von Hindenburg was given supreme command of the Austrian and German armies on the entire eastern front, and under his able direction a vigorous effort was made to check their further progress. Indecisive fighting continued with little interruption during the remainder of that month.

On August 27 Rumania published a declaration of war upon Austria-Hungary, and made a surprise attack upon the troops guarding the passes of the mountains on the Transylvanian frontier. This step was undoubtedly accelerated by the recent Russian successes. Two days later, the Russian army of the Danube began its march southward through Rumania and crossed the Danube. On the same day Field Marshal von Hindenburg was appointed chief of staff of the German army in place of General von Falkenhayn, who took command of the Austrian and German forces assembling for operations against Rumania. The Rumanian army invaded Transylvania, and in five days advanced fifty miles. It occupied Kronstadt, the commercial capital of the province, and several other large towns. An army of Bulgarians, Germans and Turks under von Mackensen, entered the Rumanian province south of the Danube, and gained a considerable success by the capture of the fortress of Turtukai and the occupation of Silistria. Mackensen was afterwards unsuccessful in a battle lasting for five days commencing on September 16, and was compelled to retire some distance. In the beginning of October the Rumanians were expelled from Transylvania, and forced to retire into their own country. On October 23 Mackensen captured Constantza, the chief Rumanian port on the Black Sea, and advanced upon the great bridge over the Danube, at Cernavoda, which was destroyed by the Rumanians. In the middle of November von Falkenhayn's army forced the mountain passes and advanced upon Bucharest. Mackensen's troops crossed the Danube and formed a junction with the army under Falkenhayn. The Rumanians were decisively defeated in a battle on the Arges river, a few miles southwest of Bucharest on December 3. That city was occupied by the Germans three days afterwards. The remnant of the Rumanian army joined the Russian troops which had entered eastern Rumania, and took up strong defensive positions along the Sereth river.

The Italians had landed two divisions in Albania in December, 1915, and advanced as far as Durazzo, which they held until February. An Austrian army invaded Montenegro in the beginning of the year, and captured Cettinje, the capital, on January 13. Ten days later they took Scutari, and advanced towards Durazzo, which was evacuated by the Italians and occupied by the Austrians on February 26.

At a conference of the Allies it had been decided that Saloniki should be retained as an indispensable base for future operations, and a strong defensive position was prepared far in advance for the protection of the city. A large part of the allied armies engaged in the Gallipoli peninsula were after its evacuation transferred to Saloniki. The remnants of the Serbian army were taken to the island of Corfu for a long period of rest and recuperation after the privations and sufferings of their terrible retreat. These troops, numbering in all upwards of 100,000 effective men, were then transported to Saloniki, to reinforce the allied armies there. The Allies began a vigorous offensive early in September on a front of one hundred and twenty-five miles, and the Bulgarians were steadily driven back in the direction of Monastir. Fighting continued with little intermission until November 19, when that town was taken by the Allies and proclaimed as the temporary capital of Serbia.

THE WAR IN THE CAUCASUS AND MESOPOTAMIA, 1916.

The Russian army in the Caucasus was strongly reinforced in December, 1915, and January, 1916. Its offensive operations were considerably hastened by the evacuation of the Gallipoli peninsula by the allied British and French armies, by which a large Turkish force would be released for service elsewhere. In the midst of severe winter weather an advance was commenced upon Erzerum, the principal Turkish fortress in Armenia. The Turkish army assembled for its protection was routed on January 18, and the fortress evacuated by the Turks on February 16. Another army supported by a fleet on the Black sea took Trebizond on April 18, and the conquest of Turkish Armenia was practically completed by the end of August.

The British division commanded by General Townshend had been besieged at Kut-el-Amara since December 3, 1915. Several determined attacks were repulsed, and the Turks then decided to reduce the garrison by starvation. A relieving column commanded by General Aylmer, after advancing a considerable distance and driving a covering force from several positions, was finally checked on April 23. On April 25 Townshend's division, which was reduced to less than 9,000 troops, was obliged to surrender.

The effective defence of the Suez canal was an object of great importance to the Allies. Garrisons had been established at posts several miles east of the canal to keep hostile forces at a distance. Some of these were unsuccessfully attacked in the early part of the year and again in August. The British troops then began a systematic advance along the coast, building a railway and constructing a pipe line for the conveyance of water as they went. A commanding position was occupied in the heart of the Sinai peninsula, and British

aircraft bombed several Turkish military posts on the frontier of Palestine.

THE WAR IN AFRICA, 1916.

Early in February a considerable German force was driven from Cameroon into Spanish Guinea, where it was interned. The conquest of the province was completed by the surrender of the last German garrison on February 18. General Smuts, in command of the British forces in German East Africa, continued his advance with success. Another British force entered that country from Rhodesia. The Germans were defeated in several small engagements, and the seat of government surrendered on September 4. At the end of the year, only about one quarter of the province still remained in the hands of the Germans.

NAVAL WARFARE, 1916.

The command of the sea had passed absolutely into the hands of the Allies. No German merchant ship ventured to make its appearance on the high seas. The German efforts to destroy the commerce of the Allies were limited to the activity of a single light cruiser and to submarine attacks. The British Grand Fleet, having its base in the magnificent harbour of Scapa' Flow, encircled by the Orkney islands, kept undisputed possession of the North sea. The lesser channels into this fine sheet of water were blocked with impassable obstacles, the two large entrances guarded by batteries of heavy guns and a double barrier of steel nets provided with gates to admit the passage of ships. A ring of observation balloons constantly hovered over the islands. Many hundreds of mine sweepers and destroyers kept constant watch and ward without. From this secure lair, thronged with countless colliers, tenders, and store ships of all kinds, squadrons of cruisers, battle cruisers and battle ships attended by aircraft went forth periodically to scour the sea. Communication between all parts of the Grand Fleet was maintained by wireless telegraphy.

On the afternoon of May 31, the battle cruiser division of the fleet, under Vice-Admiral Sir David Beatty, consisting of six ships, sighted a squadron of five similar German vessels, which retired southeastward toward the main body of the German fleet, then out of sight. Beatty gave chase at once. It was about 2.30 p.m. Rather more than an hour later, the action began at a range of 18,500 yards. A few minutes afterwards a vast column of black smoke shot into the air to a great height from the "Indefatigable", the rear ship of Beatty's squadron. When it cleared away that vessel had disappeared. Only two men of its crew of nine hundred were picked up. Shortly afterwards some ships of the fifth British battle squadron came up and opened fire at a range of 20,000 yards, and the third ship in the German line was soon seen to be on fire. A little later the British battle cruiser, "Queen Mary", blew up from the explosion of her magazine, and only twenty of her crew of one thousand persons were saved. The action had continued on parallel courses for about an hour when three divisions of the German battle fleet were descried approaching. The British squadrons then stood away on a north-westerly course, which would bring them closer to the remainder of

their fleet, known to be coming up rapidly. As the surviving battle cruisers were ships of great speed, they easily ran ahead and crossed the course of the German fleet, with the intention of leaving a clear field of fire for their own battle ships and then striking in between the Germans and their base. The fifth battle squadron consequently had to sustain for some time the fire of four German cruisers and several of their battleships. One of the German cruisers however soon fell out of the line and took no further part in the battle. At 6.20 p.m., the third British battle cruiser squadron, commanded by Rear Admiral Hood, came in sight and rashly approached within 8,000 yards of the German battle ships. The "Invincible", Hood's flag ship, was soon sunk by a shell, and all but six of the crew perished. Sir John Jellicoe then appeared with the two remaining squadrons of battle ships which formed into line and chased the German fleet from the scene of action. Haze, mist, and dense artificial clouds of smoke assisted their escape as evening fell. During the night the German fleet was overtaken by British light cruisers and destroyers which attacked them fiercely and inflicted heavy losses in ships. These losses were carefully concealed at the time, and have never been accurately ascertained. The British battle ship "Marlborough" was struck by a torpedo, but succeeded in returning to port. Besides the ships already named, three armoured cruisers and eight British destroyers were sunk. Three German battle ships were seen to sink, and a fourth was subsequently added to the number on good authority. The next morning found the British fleet in undisputed possession of the scene of action, and the German fleet never afterwards ventured forth, except on one occasion, when it quickly retired again into port on the approach of its opponents.

The submarine activity of the Germans increased in vigour and ferocity. Thousands of small auxiliary vessels were employed in conjunction with the British fleet in detecting and chasing them, and many were destroyed. A French transport was sunk in the Mediterranean and upwards of 3,000 men perished. Two British battleships and one light cruiser were destroyed by mines or torpedoes, and on June 6, the cruiser "Hampshire", with Field-Marshal Earl Kitchener, the Secretary of War, and his staff on board on their way to Russia, was sunk west of the Orkney isles, and only a single petty officer and eleven seamen were saved out of the entire crew. The destruction of merchant shipping belonging to the Allies and neutral countries by mines and submarines attained serious proportions.

PARTICIPATION OF THE BRITISH OVERSEAS DOMINIONS AND COLONIES, 1916.

In Canada, an Order in Council passed on January 12, authorized an increase of the Canadian military forces to half a million. Great but fruitless efforts were made to reach that number by voluntary enlistment. An official statement published at the end of the year showed that the number of recruits obtained since the beginning of the war, up to November 30, 1916, aggregated 381,438 of all ranks and branches of the service. The volume of contributions for the different patriotic funds was doubled.

On November 11 Sir Sam Hughes, Minister of Militia and Defence, whose activity and energy had greatly stimulated recruiting and organization, tendered his resignation, at the request of the Prime Minister, as a result of serious differences of opinion in matters of administration. He was replaced by the Hon. A. E. Kemp, already a member of the Cabinet without portfolio. A National Service Board was established for the purpose of increasing enlistments without interfering with important industries. The Canadian troops in France were increased to three complete divisions and formed into an army corps under the command of Sir Julian Byng. Large contingents of Canadian Railway and Forestry troops were also sent to Europe. Many men enlisted for special service in mechanical transport and inland navigation. A Canadian cavalry brigade was formed and, with several batteries of horse artillery, was attached to the Fifteenth British Army corps. Garrisons of Canadian troops were maintained in Bermuda and Santa Lucia.

An official document, published by the Government of Australia, stated that 103,000 men had been recruited by voluntary enlistment in that Commonwealth and sent into the field, and that 100,000 more would be required to replace prospective casualties before July 1, 1917. A bill proposing conscription was submitted to a vote of the electors in October, but defeated by a small majority.

The Union of South Africa continued with success the task it had undertaken of expelling the Germans from that continent.

The troops from New Zealand in Mesopotamia and France were kept up to strength by voluntary enlistment.

Mr. Bonar Law, in a speech in September, made the statement that a larger number of men in proportion to its population had enlisted in the army and navy from Newfoundland than from any other part of the British Empire. The colony contributed, according to information furnished by the Newfoundland Department of Militia, 12,132 men out of a population of 256,290; 7,312 others volunteered their services, but were rejected.

Besides an entire army corps despatched to Mesopotamia to accomplish the relief of Kut, troops from India were sent to Egypt for the defence of the Suez canal, to East Africa, Cameroon, and southern Persia, and garrisons were furnished for Mauritius and Singapore, as well as for the defence of Aden and the new posts on the Afghan frontier. Large contributions to patriotic funds and the military services were made by native rulers and nobles.

ECONOMIC EFFECTS OF THE WAR, 1916.

The great shortage and high price of food in Austria caused serious discontent. A more stringent system of government control of provisions was established with three meatless days a week. In Germany a Food Regulation Board was appointed with extensive powers. Meat cards were made compulsory and a maximum ration of meat was established. Reports of food riots became frequent. A Munitions Department was created at the end of October, and a manpower bill enacted making all able-bodied males between the ages of eighteen and sixty subject to industrial or military service.

In France the cabinet was reorganized and the war services concentrated in the hands of a war council of five members. The post of Commander in Chief of the armies was abolished. General Joffre was appointed technical adviser to the government, but retired soon afterwards. General Nivelle was selected to command all the armies in France on December 12, and General Sarraill, in command of the army at Saloniki, was placed directly under the Minister of War. A law was passed offering bounties for the encouragement of wheat growing.

A conscription bill was passed by the parliament of Great Britain on January 24th, after a short debate. Ireland was excluded from the provisions of this bill. As a result three-quarters of a million of single men were added to the military forces.

The number of war workers had increased by July 1, 1916, to three and one-half millions, of whom 660,000 were women, and 4,000 factories, controlled by government, were producing munitions.

An economic conference of the Allied Governments was held at Paris in June, which framed many drastic proposals.

On Good Friday, April 21, a German submarine landed Sir Roger Casement, with a few companions and a small consignment of arms on the coast of Kerry, in Ireland. Casement was arrested shortly afterwards, and no body of men assembled to meet him or make use of these arms. On April 24, however, a serious insurrection took place in Dublin. Organized bodies of insurgents took possession of the post office, law courts, railway stations, and several adjacent houses. Fighting continued for several days before the rebels were subdued. Less important risings occurred at some small towns elsewhere in Ireland, which were soon put down. A number of prisoners were tried and executed by sentence of court martial. Casement was hanged in London on August 3.

The British Cabinet was re-organized in December, when the Right Hon. David Lloyd George became Premier. A war council of five members was then formed with him at its head.

On February 23, Portugal seized many German merchant ships which had remained in Portuguese ports since the beginning of the war. Four days later Germany protested against this action, and on March 9 declared war on Portugal. The Portuguese Government announced that its action had been taken "as a result of our long-standing alliance with England, an alliance that has stood unbroken the strain of five hundred years." A Portuguese force co-operated with British troops from Rhodesia in driving the Germans out of the southern portion of the German colony in East Africa. A division of Portuguese troops was despatched to France to act with the British Expeditionary Force.

OPERATIONS ON THE WESTERN FRONT, 1917.

The removal of large bodies of their troops to the Russian and Rumanian fronts had been one of the contributory causes which compelled the Germans to revert to a defensive attitude in the autumn of 1916. The month of January, 1917, was mild and the ground soft with rain, interfering materially with military operations on a large scale. Minor operations continued in several portions of

the line. A new sector on the Somme salient between Bapaume and Peronne was taken over by the British, extending their front to one hundred miles. February began with remarkably cold weather, which delayed their contemplated offensive. An attack beginning on February 17, opposite Miraumont on both sides of the Ancre river, was successful. Serre, a position of some importance, was taken on February 25, and three days later the British advanced posts were within two miles of Bapaume. On March 9 Irles near Peronne was taken with little resistance, and it became apparent that the Germans were slowly retiring in a methodical manner. Bapaume was occupied on March 16, and Peronne and Chaulnes were taken on the 18th. The German rear guards were in some degree harassed by the British cavalry, but they effectively destroyed the roads, buildings, trees, and property of all kinds as they retired. Their new line ran through Cambrai, St. Quentin, and Laon. It was twenty-five miles shorter than the old and much stronger. They had evacuated an area of six hundred square miles, including some important towns. The Canadian cavalry brigade, with three batteries of Royal Canadian Horse Artillery, attached to the Fifteenth British corps, won much distinction in this fighting. The Germans frankly announced that the chief object of their retirement was to upset the allied plans for acting on the offensive, and they carried out the devastation of the country evacuated with such systematic and ruthless thoroughness that any advance across must be very slow and difficult. The next attacks of the Allies were directed at the supporting points between which this retirement had been made. The principal objectives selected for the British Armies were Arras and Lens, while the French directed their attack upon Laon. On the morning of April 9, after two days' intense bombardment, the British delivered an attack on a front of eleven miles extending far south of Arras. The German front lines were taken with small loss. On the same day the Canadian corps attacked and carried the commanding position on Vimy Ridge near Lens, which had successfully resisted two former assaults, and was deemed impregnable by the Germans. (See the illustration facing page 14) The defenders clung desperately to several strong points until the 11th, when the Canadians gained the summit at the north end of the ridge and advanced gradually down the eastern slope. At the same time other British troops continued their advance along the road from Bapaume towards Cambrai, driving German rear-guards before them. Another attack near Arras on April 23 also succeeded. Considerable ground was gained and 3,000 prisoners were taken.

The French carried the German positions on a front of twenty-five miles between Soissons and Reims on April 16, penetrating to a depth of two miles and taking 10,000 prisoners and many guns. They continued their advance on the two following days and repelled all counter attacks. On April 23 the British attacked on an eight-mile front between Vimy and Croisilles, and gained ground at all points, although opposed by seven German divisions. The French attack was resumed on May 4 and 5, upon the German positions along the Chemin-des-Dames, or Ladies' Road, on the high ground north of the Aisne. The town of Craonne was taken but the southern

attack failed with severe loss. Between April 9 and May 12 the Allies reported the capture of fifty thousand prisoners and four hundred and forty-four guns with nearly one thousand machine guns and many trench mortars. On May 15 General Petain, who had won renown by his successful defence of Verdun, was appointed commander in chief of the French armies in France in place of General Nivelle, who took command of a group of armies under him. General Foch, who had been in partial retirement for six months, succeeded General Petain as chief of staff. Hard fighting continued near Arras where the Germans made violent counter-attacks on the British troops. An Australian division carried the salient near Bullecourt on the night of May 9, but was partially driven out next day. The position was finally taken by them on the 17th. The change of command of the French armies encouraged the Germans to assault their newly won line along the Ladies' Road, but they failed to gain much ground, and were eventually expelled from the heights overlooking the valley of the Ailette. Early on the morning of June 7 an attack was made on the salient south of Ypres on a front of nine miles by the British.

The ridge between Messines and Wytschaete had been strongly fortified with three lines of intrenchments protected by broad belts of wire entanglements and many concrete emplacements for machine guns. Nineteen deep mines had been excavated beneath this ridge from the British trenches and loaded with many hundreds of tons of high explosives. For two weeks preceding the attack an overwhelming fire of artillery directed from aircraft had been maintained against the German works, and nearly succeeded in silencing their fire. The mines were exploded simultaneously with a concussion that was felt in London and formed craters some of which were eighty feet deep and of great width. The infantry advanced at once under cover of the smoke and carried the front line in a few minutes, then moving forward against the second line. The garrisons of the two villages continued to resist obstinately until the afternoon, but the remainder of the position was taken shortly after daylight when the assailants again pressed on and penetrated the third line. Violent counter assaults were repelled during the following night, and trenches on a two mile front were captured near Souchez. More than 7,000 prisoners and twenty guns were taken.

The Allies had secured a decided ascendancy in the air and adopted a settled policy of harassing and wearing down the German resistance by continual raids and surprise attacks on different parts of their line. A great force of British artillery was concentrated near Lens on a narrow front and a violent bombardment continued for the remainder of the month of June. Constant small gains of ground were made, but the Germans resisted stubbornly from concealed positions among the mounds of slag and refuse from the mines, which are such a striking feature of the country in that locality. The British had also taken over the sector next the coast, but a heavy bombardment seriously damaged their trenches and destroyed the bridges they had thrown across the river Yser. An attack by a superior force succeeded in overwhelming a body of troops on the further side of the river whose retreat had thus been cut off. A

sudden attack by the Canadian Corps carried the trenches on a six hundred yard front south of Lens on July 22. In the latter part of the month of July the Germans assumed the offensive on the French front along the Chemin-des-Dames, employing specially selected and trained "shock troops" who gained some ground from which they were eventually expelled. On July 31 a combined attack by French and British troops began on a front of twenty miles, preceded by a tremendous bombardment and followed by the use of gas-shells on a large scale. The German front lines were rendered untenable but their troops promptly took refuge in shell craters and prepared positions for machine guns, from which they made a desperate resistance. The greater part of their second line was carried, however, and the third line penetrated. Determined counter-attacks recovered some of the lost ground. Heavy rains then seriously interfered with further operations. Fresh gains were made by the Canadian Corps near Lens. On August 15, advancing on a front of two miles, the First and Second Canadian Divisions captured Hill 70 and gained ground in some places to a depth of two miles. Violent counter-attacks were repelled and they continued to close in upon that town, a place of great importance as a great coal-mining centre from which the Germans had extracted large supplies of fuel. Several of its suburbs were evacuated by the Germans and occupied by British advanced posts. An allied attack near Ypres, preceded by a large number of tanks, was also successful and substantial advances were made. Heavy rains inundated the low country in that vicinity in the latter part of August, and delayed further active operations. The offensive was resumed by the British near St. Julien on September 18, after a prolonged bombardment. Under the protection of a devastating curtain of fire, sweeping along in front of the advancing infantry, several strong German positions were easily taken and organized for defence. Counter-attacks on these trenches were repelled a few days later. Another offensive on a front of nine miles gained further ground in the direction of the Passchendaele ridge on October 4, and five days afterwards a joint attack with the French gained ground to the west of this point. The French resumed their offensive in the vicinity of Laon on October 23, taking fort Malmaison and several neighbouring fortified villages and quarries with eight thousand prisoners. Important artillery positions were gained here and guns brought up to them, from which an enfilading fire was directed on other German intrenchments which were abandoned a few days later when they retreated across the Ailette, destroying the bridges behind them.

Sir Julian Byng was appointed to command the Third British Army, and Sir Arthur Currie succeeded him in command of the Canadian Corps on June 9.

The Canadian Corps took over the Passchendaele sector from the Australian and New Zealand divisions which had previously held it. With the usual preparation of a violent bombardment successful assaults were made on the German positions on October 26 and 30 by the Third and Fourth Divisions, and on November 6 and 10 by the First and Second Canadian Divisions, the last of which carried

the high ground northeast of the village of Passchendaele. These gains were not made without desperate fighting in which the Canadian troops engaged lost nearly fifteen thousand men.

Suddenly transferring a large striking force to his right, the British general began a surprise attack on the renowned Hindenburg Line near Cambrai. Great bodies of troops were secretly moved into an advanced position by night. No preparation by an artillery bombardment or by trench raids was made. The movement of seven infantry divisions was preceded by the advance of three hundred and sixty tanks, which took place shortly after daybreak on November 21. These powerful machines tore their way through the German entanglements and crawled over their trenches before artillery fire could be successfully directed against them. They paved the way for the advance of the infantry and cleared out many machine gun positions by an enfilading fire. Two lines of German works were carried along a front of ten miles to a depth of five miles in several places. Nearly ten thousand prisoners and more than one hundred field and heavy guns were taken. Next morning the Germans recovered Bourlon Wood, the most advanced position taken by the British in the direction of Cambrai, where the trees greatly interfered with the successful operation of the tanks. On the three following days the greater part of this forest and the neighbouring village were taken by the British, but they were unable to make further progress as the enemy had brought up a superior force of artillery and infantry which eventually compelled them to abandon the village.

Two divisions of British cavalry and two brigades of Indian cavalry with many horse artillery batteries had been massed in rear of the infantry, with instructions that if the last trench line beyond the Scheldt canal between Marcoing and Masnières was carried, they were to push forward through the gap and sweep around Cambrai on both flanks. One squadron of the Fort Garry Horse actually passed the canal on a temporary bridge under machine gun fire near Masnières before it was known that the infantry had not succeeded in carrying the heights beyond. They charged and took a German field battery and came under heavy machine gun fire by which a number of officers and men were killed or wounded. It was then growing dark and they sought shelter in a sunken road until it became evident that they were unsupported. The horses were turned loose and the remnant of the squadron made their way back on foot. Lieutenant H. Strachan and forty-three other ranks succeeded in regaining their lines bringing with them a few prisoners out of a total of one hundred and twenty-three who rode off. During this retreat they were obliged to fight their way most of the time, with rifle and bayonet, dispersing several bodies of the enemy whom they encountered. For his gallantry and leadership on this occasion Lieutenant Strachan was awarded the Victoria Cross.

The remainder of the cavalry were held back and the projected dash forward was never attempted. After the failure of their last counter-attacks near Bourlon the Germans made a sudden and much more successful effort on a front of seven miles in the bend of the river between Masnières and Villers-Guislain, where it had not

been expected. Here a strongly-organized front line was weakly held and strong masses of infantry broke through on a front of three miles. They pushed rapidly forward, seized a portion of the railway and occupied the villages of Villers-Guislain, Gouzeaucourt and Gonnellieu. The British and Indian cavalry and horse artillery were brought forward in great haste and checked the German advance. The Germans made frequent desperate assaults on these troops who were soon supported by infantry and succeeded in repelling them. Gouzeaucourt and Gonnellieu were retaken, but on December 1 the British withdrew to a stronger position behind the Scheldt at Masnières. Fighting continued in this area until the middle of December without much gain or loss of ground on either side. The Germans announced the capture of six thousand prisoners and sixty guns in this offensive, and recovered about one third of the ground they had lost. On November 25 the French attacked and gained considerable ground north of Verdun. The important successes of the Austrians and Germans on the Italian frontier caused the transfer of large bodies of British and French troops to that theatre of war. Offensive operations on their part terminated in consequence, and the arrival of reinforcements for the Germans late in the year seemed to portend an attack.

THE ITALIAN FRONT, 1917.

An Italian offensive on March 3 in the Trentino resulted in small gains. They began a bombardment on a front of thirty miles in the vicinity of Gorizia on May 12. Five days' fighting ended in the capture of several strong Austrian positions with nearly 7,000 prisoners. In this operation the Italians were powerfully assisted by British heavy artillery. On May 24 they carried another series of trenches on the Carso plateau, taking nine thousand prisoners. In conclusive fighting continued for several days, but on June 5 the Austrians made successful counter-attacks south of Jamiano taking nearly ten thousand prisoners. Another Austrian attack east of Gorizia on July 14 was repelled with heavy loss, and a lull in operations followed for several weeks. The Italians began another formidable offensive on the upper Isonzo on August 19, assisted by the fire of not less than two thousand guns distributed along a front of thirty-seven miles. Taking advantage of a dense fog bridges were thrown over the river at several points and crossings effected. Many squadrons of aeroplanes numbering in all two hundred and fifty machines, flew over the Austrian lines and bombed the troops massed in reserve. The first line of trenches was carried, and in two days' fighting the Italians took thirteen thousand prisoners. Several strong positions were subsequently evacuated by the Austrians, but they obstinately retained their ground facing Gorizia. Several German and Turkish divisions then arrived to their assistance and by counter-attacks succeeded in recovering much of the lost ground. During the first and second weeks in September an extremely numerous and well organized force was concentrated for a renewal of this offensive, containing ten divisions of veteran German troops. At the same time a very subtle and successful propaganda was carried on among

disaffected troops in the Italian army. After a short but very destructive bombardment of the Italian possessions, the attack was carried out on a front of nineteen miles and the Italians were forced to retire precipitately across the Isonzo with a loss of 10,000 prisoners. The pursuit was pressed with great energy and success, and the new Italian position was outflanked and threatened with envelopment. Gorizia was retaken on October 28. The Italian armies were constantly outflanked, and they were forced out of successive strong positions in which they attempted to retard the enemy's advance. The frontier was crossed and the invaders occupied Udine on October 29, while the disorganized Italian armies retired behind the Tagliamento. This position was held for five days when their bridge-heads were destroyed by a fierce bombardment and the Austro-German troops crossed the river. The Italians fell back behind the Livenza, another parallel stream, and thence to the line of the Piave. The capture of one hundred and eighty thousand prisoners and fifteen hundred guns was announced from Berlin in these operations which became known as the battle of Caporetto.

On November 21 the Austrians gained another considerable success on the upper Piave in the vicinity of Belluno, where they cut off and captured a body of fourteen thousand Italians. General Cadorna was replaced as commander in chief by General Diaz, and a war board, composed of Generals Cadorna, Foch and Sir H. H. Wilson, was established. British and French troops speedily arrived from France bringing with them a great force of artillery, and a strong line of defence was organized behind the Piave. Repeated efforts to cross that river were repelled and some troops who had succeeded in getting over were driven back with severe loss. British gunboats destroyed bridges on the Austrian line of communication in the Piave Delta. On December 5 the German troops resumed their efforts to turn the Italian line from the north and carried several strong positions taking a considerable number of prisoners. Repeated Austrian attacks between the Brenta and Piave failed with heavy loss and although they made considerable advances on other fronts they were unable to reach the Italian plain and turn the line of the Piave.

OPERATIONS ON THE RUSSIAN AND RUMANIAN FRONTS, 1917.

General von Mackensen continued his advance driving the Russian and Rumanian forces over the Sereth and Danube with heavy losses, and captured Focsani on January 8. Other fortified positions in that vicinity were taken by his army a few days later. The Rumanian army had been practically destroyed and the country conquered.

Desultory fighting continued along the river Aa and the marshy country near Riga, during the entire month of January, and the Austro-German forces displayed considerable activity in Galicia and Volhynia.

On March 15 a despatch from Petrograd announced the fall of the Imperial Government and the substitution of a provisional revolutionary authority. A German attack on the bridge-head of

Toboly was successful on April 6; the fortress of Brody was bombarded a week later, and the Russians retired across the Styr, destroying all bridges over that stream. The Germans then suspended operations and attempted to enter into friendly relations with the Russian troops with the object of concluding a separate peace. The Russian officers found great difficulty in maintaining even a semblance of discipline. By special orders from the revolutionary government, soldiers were instructed to cease saluting their officers and to decide by voting whether they would execute the orders they received. Three generals of great distinction resigned as a protest against the interference of the Council of Workmen and Soldiers with military operations. In June, Kerensky, the new Minister of War, visited the troops at the front, and after hearing his address, they voted for a resumption of hostilities. On July 1 Russian troops began an advance from Tarnopol in the direction of Lemberg, forcing back the Austro-German army and taking many prisoners. Halicz was taken by them on July 10, but heavy rains prevented effective pursuit of the Austrian garrison who retired behind the Lomnica river. A vigorous Austro-German counter-offensive began on July 9, which was completely successful, as many regiments of Russian troops retreated without fighting or refused to obey orders. Tarnopol was captured by the Austrians on July 24, and they crossed the Sereth without opposition. The Russian government restored the death penalty for desertion and took other drastic measures for re-establishing discipline. On August 3 the Russians evacuated Czernowitz and entirely withdrew from the province of Bukowina.

The Dvina was crossed by the Germans on September 2, when the Russian garrison evacuated Riga and retreated along the coast of the Baltic. The German fleet co-operated in the pursuit and much war material was taken from the retiring forces. General Korniloff, who was in command of one of the Russian armies, marched in the direction of Petrograd, with the declared intention of overthrowing the government. This movement failed and he was made prisoner. A Russian republic was proclaimed on September 14, with Kerensky as Prime Minister, but this government was overthrown on November 8, by the Bolsheviks, who had pronounced in favour of an armistice and a separate peace with Germany. Meanwhile the Germans had taken Jacobstadt on September 21, and occupied the islands at the entrance of the Gulf of Riga on October 12 and 13. The new Russian government shortly after its establishment opened negotiations with the Central Powers by requesting an armistice.

THE SERBIAN AND GREEK FRONTS, 1917.

During the early months of the year the allied fleets maintained a close blockade of the Greek ports. Military operations of slight importance were carried on in Macedonia and Serbia. The Italians gained ground in Albania and occupied the capital on June 10. Two days later the abdication of King Constantine of Greece, in favour of his second son, who had declared for the Allies, was announced. Soon afterwards Athens and other Greek cities were occupied by

allied troops. A French commission was appointed to aid in organizing and training the Greek army for active participation in the war.

THE WAR IN MESOPOTAMIA AND ASIA, 1917.

A British army corps continued its advance up the Tigris with Bagdad as an immediate objective. The Turks were compelled to abandon Kut on February 24 and were hotly pursued by the British and Indian cavalry who took many prisoners and guns. A great quantity of materials shipped from Germany for the construction of the Bagdad railway was also taken. General F. S. Maude, who had taken command of the British force in succession to Sir Percy Lake, advanced up the river with great rapidity, defeating the Turks in several rear-guard actions. Bagdad was taken on March 11, with the greater part of the Turkish artillery. At the same time a Russian force advanced westward through Persia to co-operate. The eighteenth Turkish corps was defeated by General Maude and the end of the railway line was occupied on April 23. Hot weather then made further operations almost impracticable. A division of Australian troops advancing from the Sinai peninsula entered Palestine early in March, and on April 22, had arrived in front of a strong Turkish position covering Gaza, where they remained stationary for the next two months. In the beginning of July General Sir E. H. Allenby took command of this force. Turkish cavalry were defeated near Beersheba on July 19. That place was not captured until the end of October when operations were renewed with great vigour. The Turkish position at Gaza was turned by cavalry on the night of November 7, and the British army advanced in two columns, one following the coast line of the Mediterranean, the other moving forward from Beersheba. Joppa was taken by the Australians on November 17. A Turkish position within five miles of Jerusalem was carried by assault three days later. The city was gradually invested and compelled to surrender on December 9. The moral effect of these operations upon the Mohammedan population was very great, and all danger of an attack upon the Suez canal was effectually removed.

THE WAR IN GERMAN EAST AFRICA, 1917.

A division of Indian troops landed in German East Africa on June 10, and took part in the operations in that colony during the remainder of the year. Early in December General Vandevanter commanding the British troops reported that the conquest of the colony was complete, the remnant of the German forces, having retreated into the adjacent Portuguese territory, where he was making active preparations to pursue.

NAVAL WARFARE, 1917.

The German High Seas Fleet remained at anchor under the protection of their strong defensive works at the Kiel canal. The few naval actions which took place occurred between light vessels engaged in patrolling or making raids. German submarines showed increased activity and did great damage. The policy of unrestricted submar-

ine warfare by which the Germans still hoped to secure the ultimate victory which they had not succeeded in gaining on land, was brought into effect on February 1. Ten vessels were sunk on that day. During the course of the year, one British and one Russian battleship, several British cruisers, destroyers, hospital ships, troop ships and a very large number of merchantmen were sunk by them. An immense number of small armed vessels of various descriptions was constantly engaged in detecting and hunting them down and many were destroyed, although the particulars of their actual destruction were not made public. One German surface cruiser succeeded in returning to her base after destroying several vessels. On May 12 a British squadron bombarded Zeebrugge and another bombarded the docks and harbour of Ostend on September 22. Two German destroyers were sunk on April 21 in an unsuccessful raid against Dover. A German submarine shelled Scarborough on September 4 and evaded pursuit.

THE ENTRY INTO THE WAR OF THE UNITED STATES, 1917.

The announcement by the German Government of the adoption of unrestricted submarine warfare on February 1, caused an immediate crisis in its relations with the United States. The German Ambassador was given his passports next day. All diplomatic relations were severed, and the President addressed the Congress on the situation with convincing force. On April 6 Congress formally adopted a resolution declaring the existence of war with Germany. The ports of the United States were thrown open to the allied fleets and the naval forces of the country placed upon a war footing. All interned German ships were seized. On April 14 Congress voted a war credit of seven billions of dollars and authorized loans of three billions to the allied nations. An act for raising troops by a select draft was passed and received the President's signature on May 18, by which all men between the ages of twenty-one and thirty were required to register by June 5. Arrangements were immediately made for recruiting and training a million of men and great camps for their accommodation were swiftly formed. The visit of British and French missions resulted in a declaration that a division of the regular army would be sent to France at an early date. The safe arrival of these troops was announced on June 22. Other contingents followed in rapid succession, and the movement of troops belonging to the National Guard began on October 15, and continued during the remainder of the year. Some battalions of United States infantry entered the French front-line trenches for training about the end of October. Their first casualties were reported to have occurred in an attack by German "shock-troops" on November 3.

PARTICIPATION OF THE BRITISH OVERSEAS DOMINIONS AND COLONIES, 1917.

Hitherto the four divisions of the Canadian Expeditionary Force serving in the field had been maintained at full strength by voluntary enlistment without much difficulty. Recruiting declined, and early in the year it became evident that the maintenance of the

force in the field by that means could no longer be relied on with certainty. In addition to the army corps and troops training in England, as reinforcements, several battalions of railway and forestry troops had been organized, who were employed under the orders of General Headquarters. Many British reservists living in Canada had rejoined their regiments at the beginning of the war, and a large number of Canadians had enlisted in the British Royal Flying Corps, the Royal Naval Aviation Service and the Auxiliary Motor Boat Patrol Service. A return completed to November 15, showed that the total number of persons who had joined the Canadian Expeditionary Force since the beginning of the war was 441,862. A Bill providing for compulsory military service was introduced in Parliament on June 11, and became law on August 29. It provided for raising 100,000 men, and the first drafts were to report on January 3, 1918. A war income tax was also imposed. The Ministry was reorganized as a Union Government on October 12, and a general election, held on December 17, resulted in favour of the new administration by a large majority. The contributions for patriotic purposes greatly increased during the year. The appointment of a food controller was made on June 21, and regulations were adopted for the sale and distribution of various food products. Prices for wheat were fixed to the end of the crop year, August 31, 1918. An Order in Council under the War Measures Act was passed on December 22, prohibiting the importation into Canada of intoxicating liquor on and after December 24, 1917.

The Imperial Expeditionary Forces from Australia and New Zealand were maintained by voluntary enlistment by the most strenuous efforts. Various methods of indirect pressure were adopted to promote recruiting. In Australia a single men's tax was introduced to compel single men and widowers without children of military age who had not enlisted to contribute ten per cent of their taxable income in addition to the ordinary income tax. A war profits tax was also imposed by the Federal Parliament. The Government of India maintained its expeditionary force at full strength and made a contribution of one hundred million pounds towards the cost of the war. Many of the ruling princes and chiefs gave further liberal gifts of money.

ECONOMIC EFFECTS OF THE WAR, 1917.

In Austria-Hungary the shortage of food caused extreme discontent and much suffering. In Bohemia and Hungary demonstrations by noisy crowds culminated in rioting and bloodshed.

The German Chancellor was forced to resign and with him retired the Imperial Minister of Foreign Affairs and the Prussian Minister of War. A reduction of the bread ration of the people caused bitter discontent followed by violent demonstrations. A strike of seventeen thousand workmen took place at the Krupp works at Essen and many others occurred at other industrial centres. Food riots were reported from Berlin. The chief Socialist newspaper printed a statement in December that forty millions of people were

on the verge of starvation and that a general collapse might be expected at any moment.

The French Ministry was twice reorganized, and on November 15 Dr. Georges Clemenceau became premier for a second time and succeeded in forming a strong Cabinet. The privations of the people from want of food increased but were generally endured with patience. A serious strike occurred in the large steel works at Harfleur and similar strikes on a smaller scale occurred elsewhere.

The lack of food in Italy also caused adverse criticism and discontent. The defeat of the Italian army followed by an alarming invasion of Italian territory brought about the defeat of the Ministry.

The adjustment of the supply of food to the needs of the people became the problem of chief importance in Great Britain. Stringent regulations were enforced respecting the manufacture of flour and use of sugar. Before the end of the year the control of all principal articles of food was taken over, and maximum prices fixed for most of them. The shortage of tea and sugar was severely felt.

The premiers of all overseas dominions had been invited at the end of the preceding year to attend meetings of the Imperial War Cabinet. Its first meeting was held at Westminster on March 20. All overseas dominions except Australia were represented. Fourteen meetings were held at which the overseas members were furnished with all information respecting the prosecution of the war in possession of the British Government.

The high cost of food and restrictions on personal liberty introduced under the War Measures Act caused considerable discontent and restlessness among the working classes. Little economic disturbance, however, was occasioned by strikes among workmen.

OPERATIONS ON THE WESTERN FRONT, 1918.

The conclusion of an armistice with the Russian Soviet Republic on December 15, 1917, left Germany at liberty to transfer to this front a force estimated to amount to more than a million of men with artillery in proportion, and the German army there was consequently increased from one hundred and fifty divisions in November, 1917, to one hundred and ninety-six in March, 1918. A considerable numerical preponderance was accordingly regained and combined with the enormous advantage of the unified command of a homogeneous force acting upon interior and therefore shorter lines. A deficiency in the necessities of life had however produced serious discontent and suffering among the people, and the conviction was growing daily stronger that decisive success was no longer possible; still it was decided by the governing authorities to make a final desperate effort to gain a favourable decision by an offensive on a greater scale than had yet been attempted. Preparations for this were carried on with great secrecy for many weeks, by the concentration of troops in reserve positions, the accumulation of munitions and special training of "storm troops" in the new methods of attack that had recently been developed with marked success on the eastern front by General von Hutier. As the number of American troops in France was

steadily increasing, and would increase still more rapidly when spring returned, this blow must be delivered at the earliest moment that operations became practicable. The point of junction between the British and French armies was naturally selected for the main attack with the intention of separating them and driving the British armies into the restricted area north of the Somme, where they would be hampered by want of room for manoeuvre. Forty divisions were brought forward by night marches with the utmost secrecy and held in positions concealed as far as practicable during daylight. Preceded by a short but very heavy bombardment and favoured by dull foggy weather, this attack began on a fifty-mile front extending from Arras to La F  re. The German soldiers had been assured that this would be the last battle and that a decisive victory would certainly bring peace. Emerging in dense masses from the fog which had screened them on leaving their reserve positions they flung themselves upon the British trenches with irresistible fury. They were preceded by a rolling barrage fire leaping forward at ten-minute intervals in which poisonous gas shells were mingled with shrapnel. The troops holding the advance positions were nearly annihilated and the few survivors easily overwhelmed by the rush of their assailants. The German infantry were accompanied with light cannon, portable trench mortars, a great number of machine guns and a few tanks of a cumbrous type. The two lines of defence, which had been so carefully prepared and were deemed practically impregnable, were soon pierced in four places. Both faces of the Cambrai salient were penetrated. The whole of the British Fifth Army was compelled to fall back, fighting desperately on all parts of their line where resistance seemed possible. The pursuit was carried on at first with tremendous energy, and many supporting batteries were taken or driven out of action. The retreating troops lost touch next day with the French on their right, and with the Third Army on their left. After being rallied on a second position several miles in rear, this line was broken and a further disorderly retreat took place. The Third Army had lost some ground on its right in the first attack. It was then obliged to retreat still further in the hope of maintaining contact with the Fifth Army, by whose hurried retreat a gap of eight miles was opened. This gap was hastily filled by an extemporized force of engineers, army service corps men and other details who took their place in the line at this critical moment. Peronne was evacuated on March 23 and Bapaume next day. The French were driven from Roye on March 27, and afterwards withdrew from Noyon, but continued to extend their line to the left in a vain effort to keep contact with the British Fifth Army. General von Hutier continued to press his advantage on the 27th by advancing more than ten miles and reaching Montdidier, an important railway junction. His onslaught had then spent its force and he was unable to gain further ground. To the northward the Germans regained the positions abandoned in 1916, occupying Albert on March 27. They had then advanced within fourteen miles of Amiens which thenceforth became one of their chief objectives. This great disaster convinced the Allies of the necessity of unity in command. Controversies and rivalry ceased for the moment. On March 31 it was

announced that the Allied War Council had entrusted the supreme command to Marshal Ferdinand Foch, and that the entire American force had been placed at his disposal.

The Germans had solved the problem of breaking through a strongly intrenched front, but they had accomplished it at an enormous cost and the force of the blow was exhausted until they could reorganize their forces and prepare for the delivery of another. A pause of a week then ensued. On March 23 Paris had been bombarded at intervals by a high velocity gun which opened fire at a range of more than seventy miles. The material damage occasioned was not great, until Good Friday, March 29, when a church was wrecked by a shell and many of the congregation killed or injured.

The Germans crossed the Oise on April 5, and gained considerable ground at the expense of heavy losses. The French retired behind the river Ailette. The Germans forced the passage of this river on April 8, and made some further progress. Their main attack was then suddenly shifted to Flanders, where the first British army occupied the sector of the line between Arras and Ypres. After another short, but destructive artillery bombardment, an assault was made on a front of twenty miles between Givenchy and Ypres, having Hazebrouck as its chief objective. A Portuguese division in the front line was driven out with heavy loss, and a breach made on a front of nearly ten miles. The British position at Armentières was turned on both flanks and abandoned during the night of April 10-11. Neighbouring intrenchments were lost and retaken several times, but the British line from Bethune to Arras was eventually maintained. The German advance along the Lys continued; they reached the railway and approached within five miles of Hazebrouck. The situation had become so extremely critical that on April 12 Marshal Haig published a general order calling upon his troops to "die where they stood, fighting with their backs to the wall." The German assaults were renewed with unrelenting fury. Bailleul and Wytschaete were both taken on April 16, with the entire adjacent line of heights captured by the British the year before. Fierce fighting with varying success, in which these positions twice changed hands, continued for two days. Reinforcements of British and French troops had then come up and some American battalions were brigaded with the British. A violent attack was repulsed that day, and a pause followed which lasted for a week. The Germans were reinforced by specially trained "shock" and Alpine troops, and began another attack on April 25, after a very severe bombardment on a front of seven miles in the vicinity of Mount Kemmel. Here a section of five miles of the front line had been taken over from another area by veteran French troops, against whom the whole force of the onset was directed. Mount Kemmel and the adjacent villages were eventually taken after a stubborn defence and this compelled a considerable withdrawal from the line south of Ypres. All attempts to pursue, however, were checked with great loss. Subsequent attacks on the new British position were repelled and the German troops occupying Mount Kemmel were subjected to a destructive and continuous artillery fire. The German advance in Flanders had then been

brought to a definite halt. On April 23 another offensive in the direction of Amiens made some progress, but in most places the assailants were repulsed or driven back by counter-attacks.

Finding that their efforts to force a passage to the Channel were unsuccessful and that a great body of troops had been assembled to resist them, the Germans then prepared to deliver a great attack on the French front in the direction of Paris. Twenty fresh divisions of veteran troops were brought forward by night marches with great secrecy. This attack was made along the Aisne on a front of thirty-five miles opposite Soissons and Reims. An artillery bombardment of terrific violence began at one o'clock on the morning of May 27, which continued for two hours and a half. Preceded by the usual barrage of gas shells and shrapnel, the German "storm troops," accompanied by many tanks, swept over the front line trenches. Their success was greatest on a part of the line west of Craonne, where the defenders were driven across the Aisne, then across the Vesle, and nearly annihilated. Four British divisions, which had been worn out by hard fighting elsewhere and sent to this part of the line for rest were forced to retreat in the direction of Reims. The German advance continued until the French had retired beyond the Marne, where they organized a fresh position and held their ground stubbornly. German attacks in the vicinity of Soissons and Reims met with little success. Inside of a week this offensive had lost its driving power. It had, however, been still more damaging than those preceding it, as a wide pocket was opened in the French front extending from the Aisne to the Marne, bringing the enemy appreciably nearer to Paris. The general situation had grown distinctly more serious for the Allies.

As a result of their costly experience, in attempting to resist these tremendous onslaughts on their advanced lines and in bringing up supporting troops through an exterminating barrage fire, it was decided by the Allied commanders to adopt a system of "elastic defence," which had already indeed been successfully practised by the enemy on several occasions. Secret instructions were accordingly issued to army commanders directing them no longer to hold their first positions at all costs as heretofore, but to retire to a main line of resistance a considerable distance in rear, by which great losses from gas shells and barrage fire might be avoided. This was substantially a reversion to the old doctrine by which the line of support was made the line of resistance.

On June 9 the Germans launched another attack on a front of twenty miles between Noyon and Montdidier, pushing forward in great force on both sides of the river Oise in the direction of Compiègne. They penetrated the French position to a depth of three miles and made further advances the next day. The French retired gradually to their main line of resistance among the hills south of the river Matz. The evident intention of the Germans on this occasion was to unite the two pockets they had previously formed and secure a new base of operations from which they might accomplish an effective bombardment of Paris and render that great city untenable. They failed to break through, although they used forty

divisions in this offensive and suffered enormous losses. An attack on a large scale in the vicinity of Reims on June 18 also failed with very heavy loss. A pause in operations then occurred during which a great number of British and American troops arrived in France and careful preparations were made for a counter-offensive on a grand scale.

The German artillery preparation for their fifth and last effort began at midnight, July 14-15, on a front extending for nearly sixty miles from Chateau Thierry to the western edge of the Argonne forest. Their fire was to a great extent wasted upon positions which the French had already determined to abandon, and when the infantry advanced at daybreak they were opposed by a mere curtain of troops, who retired rapidly before them. As they followed in pursuit, they were overwhelmed by the fire of batteries securely posted in the rear of the main line of defence. By using canvas boats they succeeded in crossing the Marne at several points and then establishing pontoon bridges. Their progress was definitely checked on July 16, and a vigorous counter-offensive began two days later against the exposed right flank of the German salient on the Marne. One of the secret preparations made for this counter-offensive was the construction of a very large number of light tanks on the Renault model, armed with small guns to accompany the infantry in their advance. Rain was falling heavily on the morning of July 18, when the French counter-offensive began in the region between Villers Cotterets and Soissons by an army commanded by General Mangin, whose troops had been discreetly hidden in the wooded valleys among the hills. There was no preliminary bombardment. The infantry advanced at dawn under cover of a rolling barrage, directed by the map, and accompanied by eight hundred swift "mosquito tanks." The German front line was taken by surprise and gave way. On the left the French advanced until they reached the hills overlooking Soissons, and in some places the French cavalry pressed through the gaps thus created and took part in the pursuit. When night fell the Allies were able to report that twenty thousand prisoners and three hundred and sixty guns had been taken. Three British divisions and many British tanks took part in this attack near Reims. Several divisions of United States troops also co-operated in the vicinity of Chateau Thierry, where they fought stoutly. The pressure of the Allies continued with encouraging success, driving the Germans steadily before them until they were forced to recross the Marne, and part of their troops were withdrawn to the Aisne. These advances had the effect of materially shortening the allied front, and removing the menace against Paris. Large masses of troops assembled as reserves for a projected offensive against the British front under Prince Ruprecht of Bavaria were drawn away to resist this attack and the contemplated operation was consequently abandoned.

On July 23, a secret conference was held of the allied commanders at which the methods for developing the advantages of the success already gained were discussed at considerable length. The commanders of the British, French and American armies were required to pre-

WAR IN THE AIR

Canada Year Book, 1919

pare plans for local offensives to be undertaken at an early date with definite limited objectives. The first great objective proposed on the British front was the liberation of the Amiens-Paris railway which had been rendered unworkable by the enemy's fire for several weeks.

The British forces had been greatly diminished by casualties during the two great offensives directed against them in March and April. Eight divisions had then been reduced to mere skeletons and no longer could be regarded as fighting formations. Two others which still continued in the line were greatly weakened. There had been immense losses of artillery and military stores, including two hundred tanks, material for light railways, rolling stock and motor carriages. Two months of comparative quiet had brought about a great improvement. The gaps in the ranks were more than filled by drafts from England and reinforcements from other fronts. The number of infantry divisions had been increased from forty-five to fifty-two, and the total strength of British troops employed in France was not less than 1,700,000. All losses of material had been more than replaced. The artillery was stronger than ever before and a stock of thirty-five million shells had been accumulated for its use. New lines of railway had been built and additional tracks laid on old lines in many places, totalling a length of two hundred miles. New defensive lines of great strength and remarkable complexity had been constructed which included five thousand miles of trenches. By the end of July, the British forces were wholly reorganized in France and prepared to undertake the great task imposed upon them. Reserves amounting to more than a million of men were under training in England from whom losses could be readily replaced. A decided supremacy had been secured in aerial warfare. To enable this attack to be made with sufficient force, it was decided to transfer the Canadian Corps from the area occupied by the First British Army to that held by the Fourth Army. In order to deceive the enemy as regards this move, two battalions were placed in the line in the Kemmel hill sector and wireless messages purposely sent to be intercepted, worded in such a way as to indicate the presence of Canadians in this part of the front. It was freely announced that the corps would move in the direction of Ypres, where the Second Army expected an attack. Many tanks were ostentatiously paraded near St. Pol. The transfer began on July 30, and the movement into battle-assembly positions was completed on the night of August 7-8. The concentration area lay to the southwest of Amiens, a distance of forty miles from the battle-assembly position. Every precaution was taken to conduct these movements with the greatest secrecy. The troops moved by railway, motor bus and route march, entraining and detraining being accomplished during hours of darkness. The area chosen for concentration was heavily wooded and well adapted for concealing the presence of troops. The advance of the infantry to the position of assembly was accomplished in motor lorries and buses during the night. Here woods, villages and sunken roads afforded considerable cover from overhead observation. The extensive wood of Gentelles was largely used to conceal the assembly of many tanks. Cloudy and foggy weather greatly favoured secrecy and the movement of these troops seems to have been unobserved by the enemy.

The front of attack covered twenty thousand yards. The First French Army, acting under the orders of the Commander-in-Chief of the British Army, was to attack on the right, the Canadian Corps in the centre, the Australian Corps on its left and the Third British Corps on the left of the latter. The intention was to push forward rapidly in the direction of the railway leading from Roye to Chaulnes. A large number of officers from the Australian and Canadian Corps were sent to observe demonstrations of co-operation between tanks and infantry at the training school to familiarize them with the combined tactics of these troops. After a brief bombardment on the morning of August 8 four hundred and fifteen heavy and light tanks advanced, followed by strong columns of infantry, the number of tanks allotted to each division ranging from twenty-four to thirty-six according to the nature of the ground. This movement was favoured by heavy fog which screened them from view until close to the German positions. The ground was broken and interspersed with many compact villages surrounded with gardens and orchards, and here and there small woods and copses. The German defences consisted largely of disconnected trenches with many machine gun emplacements scattered about. Their defenders were surprised and the advance was extremely rapid at first. The German positions were penetrated to a depth of more than eight miles and many villages captured. In an official report the defeat of the German Second Army on this occasion was attributed to the fact that "the troops were surprised by the massed attack of the tanks and lost their heads when the tanks suddenly appeared behind them, having broken through under the protection of natural and artificial fog." The attack was resumed on the morning of the 9th and rapid progress again made all along its front, in some places to a depth of more than six miles. During the day the resistance perceptibly stiffened and the Germans brought up fresh troops supported by a few huge tanks. The movement of the French First Army had been restricted to a demonstration in force on the 8th followed on the morning of the 9th by a heavy artillery bombardment which was discontinued about noon-day. The Germans were thrown off their guard and relaxed their vigilance in the course of the afternoon. At five o'clock when they were engaged in preparing their evening meal, the French began their principal infantry attack, moving swiftly against the German line of retreat, eastward, and ultimately surrounding the town of Montdidier which was taken about noon on the 10th. The German reserves had been moved to protect the important railway junction at Chaulnes from the British attack. Counter-attacks were repelled on August 11 and 12, and the French continued their advance all along their front from Montdidier as far as the Oise. They crossed the Matz and recaptured several villages on the further bank. Farther to the south and east other advances were made. This success brought the allied troops into the old trenches occupied by them in 1916, and the pressure of strong German reserves supported by many batteries of artillery made a further advance inexpedient. Thirteen British infantry divisions and three cavalry divisions had been engaged and in the course of four days they had captured 21,850 prisoners and four

hundred guns. Twenty German divisions were identified among the prisoners.

The French army commanded by General Mangin began a forward movement east of the river Oise on August 18. Attacking on a nine-mile front, with a large number of light tanks which enabled him to break up the German machine gun positions very easily, he made rapid progress. Resuming his advance on August 20, on a wider front, he took ten thousand prisoners and gained the line of the Ailette on August 22.

The British attack was then transferred to the north. The Canadian Corps and the Second American Corps were moved in that direction by night in railway trains and motor transport vehicles. On August 22 the Third Army under Sir Julian Byng, reinforced by these two corps, attacked in the direction of Bapaume and reached the Arras-Albert railway. The point of attack then shifted to the south of Albert. That town was captured and the assailants crossed the river Ancre. German reserves, hurried up to oppose this attack, were defeated. Montauban was taken on the 26th and on the following day the New Zealand division entered Bapaume. On August 23, another advance began from Arras along the Scarpe, which was equally successful in spite of obstinate resistance. The town of Bray was taken by another British force on August 24. On August 26 the Canadian Corps co-operating with the Seventeenth British Corps carried the German positions at Monchy-le-Preux, Wancourt and Roeux. German reserves thrown in on the following day were repulsed and a further gain of ground made. Southward of this the Australians made a swift advance in the direction of Peronne which they carried by assault on the 31st, after severe fighting from house to house, taking many prisoners. By these operations the flank of the German positions on the Somme was turned, and they were compelled to withdraw to the east bank of that river. Twenty-three divisions were engaged on the part of the Allies, and during the ten last days of August, they took 34,250 prisoners and 270 guns. They had been opposed by thirty-five German divisions.

French troops, who had been released by the shortening of their front after the success of their recent operations, moved northward and took over part of the line from the British. A successful attack was made by them on August 25. On August 27 they took Roye and next day captured Chaulnes. The Germans withdrew from Noyon on August 29 and the French pursued them closely. On September 4 Mangin commenced a new offensive in which he succeeded in crossing the Aisne near Vailly. This compelled a further retirement of the German line in that region. They fell back to their old defensive positions in advance of Douai, Cambrai, St. Quentin, and Laon. The First British Army striking eastward from Arras had made slow progress against very stubborn opposition. Experience gained in the operations near Amiens indicated that tanks should follow rather than precede the infantry. An attack was launched early on the morning of September 2 by the Canadian Corps and 17th British Corps against the Drocourt-Quéant system of defence. Preceded by an effective barrage and followed by a large fleet of tanks,

the infantry advanced on both sides of the Arras-Cambrai national road and carried the German intrenchments on a front of eight miles, in the face of a most resolute resistance by ten German divisions, holding a very strongly prepared position. This was one of the most remarkable exploits during the war. Almost 10,000 prisoners were taken and an advance made of five miles. Further progress was made next day and on September 4 the British advanced within seven miles of Cambrai. The Germans were forced to fall back on the outer defences of the Hindenburg line. As a result of these operations the Lys salient was evacuated by them. Lens, Bailleul and Kemmel Hill were abandoned and the important railway centre at Hazebrouck was freed from any further menace. Seven British divisions were engaged in this operation. Between August 26 and September 3 they took 8,850 prisoners belonging to thirteen German divisions, and 200 guns.

By the night of September 8 the Germans had retired to the general line, Vermand-Epehy-Havrincourt, and thence running northward along the east bank of the Canal du Nord. From Havrincourt southward, their main line of resistance was the system of defences known as the Hindenburg line which ran southeastward of the Scheldt canal at Bantouzelle, thence following the line of that canal to St. Quentin. In front of this main line strong detachments held well prepared advance positions about Havrincourt and Epehy, which must be taken before a final attack could be made on the Hindenburg line. On September 12 two corps of the Third British Army attacked on a front of five miles at Havrincourt, employing the New Zealand and three British divisions. These positions were carried and the line advanced. On September 17 the Ninth British and the Australian Corps captured Holnon village and a neighbouring wood. Next day, early in the morning, the Third and Fourth Armies attacked in the midst of a heavy rain on a front of seventeen miles extending from Holnon to Gouzeaucourt, accompanied by a small number of tanks. The First French Army and two American divisions co-operated south of Holnon. The British troops advanced to a depth of three miles as far as a strongly organized belt of defences formed of the old British and German lines of 1917. They were stubbornly opposed and had severe losses. Fourteen British divisions were engaged and captured 11,750 prisoners among whom fifteen German divisions were identified, and took one hundred guns. All the positions required for an attack on the main Hindenburg line were then secured. The French army had also advanced steadily on their right and on September 20 reached the Oise near Vendeuil. The fort of that name was taken by them on September 22.

The First American Army was organized in the latter part of August by the withdrawal of divisions hitherto serving with other allied armies. General Pershing was placed in command and took over a sector of the front extending from Port-Sur-Seille to Verdun, where he began independent operations. After a very fierce artillery preparation lasting for four hours in the early morning of September 12 the seven leading divisions assisted on the left by French troops advanced at daybreak against the German salient at St. Mihiel,

preceded by a number of tanks whose crews were provided with wire cutting torpedoes and other instruments for demolition of entanglements. This movement was made on a front of ten miles, and by noon some of the outer positions were taken. During the afternoon the advance was continued, and at daybreak on the following morning the retreat of a considerable body of the defenders was intercepted. Violent counter-attacks enabled a portion of the German forces to withdraw, but 16,000 prisoners and 443 guns were taken. All the ground necessary as a starting point for the projected advance down the Meuse was carried.

This series of operations is a notable example of well co-ordinated effort. It was only made possible by unity of command and a highly efficient service of supply and transport. An immense army of railway construction troops, foresters, artificers, and labourers of all descriptions was constantly employed on the lines of communication behind the advancing troops. Several hundred thousand unskilled labourers had been recruited in the African and Asiatic possessions of Great Britain and France and in China. The losses of the fighting troops had been severe, but they were rapidly replaced from the large reserves constantly pouring into France from England and the United States. The French had likewise organized and brought in from their African dominions fighting troops numbering nearly a million men.

It was next decided, after a careful discussion between the allied commanders, that four convergent and simultaneous offensives should be undertaken. These were as follows: by the Americans west of the Meuse in the direction of Mézières; by the French west of the Argonne in close co-operation with the American attack and having the same general objective; by the British on the St. Quentin-Cambrai front in the general direction of Maubeuge; by Belgian and other allied troops in Flanders in the direction of Ghent. It was anticipated that if these operations were successful the German forces opposed to the French and Americans would be forced back into the difficult hilly region of the Ardennes, while the British advance would strike at their chief lines of communication. In Flanders it was expected that the gradual weakening of the German forces would enable the Allies to clear the Belgian coast by a surprise attack. Much depended upon the success of the British advance in the centre, as the German system of defence was there most strongly developed and if it was once broken, their lines of lateral communication would be vitally menaced.

By launching these attacks in rapid succession along a front of one hundred and twenty miles, the enemy would be unable to shift about his reserves on interior lines of communication as he had done so frequently in the past with success. His troops would be nailed to their positions and if the Hindenburg line was once penetrated he would be driven from a defensive position where he had probably planned to remain during the winter.

As these operations were to commence from the right, the whole of the First American Army was transferred to the area behind the sector of the line between the Meuse and the western edge of the

Argonne forest which had been quiet for many months and was thinly held by both the opposing forces. In rear of their front lines, the Germans had, however, constructed three strongly fortified alternative positions. On the morning of September 26, the First American and Fourth French Army accordingly attacked on both sides of the Argonne between the Meuse and Suippe rivers. The right flank of the American army was covered by the Meuse; its left wing was, however, obliged to force its way through a region of hills, ravines and thick woods, obstructed by numerous entanglements and trenches. Although this movement appears to have taken the Germans by surprise to some extent, reserves were soon brought and the advance was checked. On the right the first and second lines of defence were taken with several thousand prisoners. West of the Argonne the French penetrated to the German second line, where they were held up.

The British First and Third Armies, on the evening of September 26, occupied a front extending from the village of Selency, west of St. Quentin, through Gouzeaucourt and Havrincourt to the marshy and inundated country on the banks of the Sensée river at Ecourt St. Quentin.

Between St. Quentin and Bantouzelle the main defences of the Hindenburg line lay generally on the east side of the Scheldt canal and were sited with great skill to prevent the occupation of suitable artillery positions for their attack. The canal itself was utilized to furnish cover for troops in reserve or rest and for the garrisons of the main trenches during a bombardment. Deep cuttings were numerous, being in some places sixty feet in depth, and in one case the canal passed through a tunnel for a distance of three and one-half miles. This tunnel was used to provide quarters for troops and was connected by shafts with trenches above. In the sides of the cuttings many tunnelled dug-outs and shelters of concrete had been constructed. Along the crest of the bank were numerous concealed machine gun emplacements. On the western side of the canal two well-organized lines of trenches ran parallel to it south of Bellicourt, where the canal cutting became shallow. They were protected by wide belts of wire entanglements. Many other trenches, switch lines and communication trenches, in most cases strongly wired, were constructed to strengthen weak points or gain desirable fields of fire. The entire defensive system, with numerous fortified villages, occupied a belt of country varying in width from seven to ten thousand yards, thoroughly organized with every device, revealed by four years' experience in active warfare. The northern portion of the canal was deemed too formidable an obstacle to attempt its passage in the face of the enemy. The extraordinary strength of the position made a prolonged artillery preparation necessary. This began during the night of September 26-27, along the whole front of all three armies, with the intention of deceiving the enemy as to the main point of an attack to be delivered by the First and Third Armies only. At 5.20 a.m. on September 27 the Canadian and three British corps began their advance in the direction of Cambrai, on a front of thirteen miles, extending from Gouzeaucourt northward. Assisted by sixty-

five tanks the infantry soon penetrated deeply into the German position, in the face of stubborn resistance. The passage of the canal was forced at several points and the slopes on the farther bank secured. Bridges were then quickly constructed and the leading divisions passed over. At the end of the day a substantial advance had been made all along the front of attack. Ten thousand prisoners and two hundred guns were taken. Next day the movement was continued and several fortified villages carried by assault. The bombardment begun on the morning of September 27 had been maintained along the whole front of the Fourth Army for forty-eight hours without intermission. During that day alone the British artillery fired 943,837 shells, weighing 40,000 tons. This was a greater expenditure of ammunition than had been made in the entire South African war lasting three years. The troops in the German front line were driven by this intense fire into their deep dugouts and tunnels and their provision parties were unable to bring up food and ammunition.

On the morning of September 29 an attack was made on a front of twelve miles, extending northward from Holnon by two British and one American corps, aided by a large fleet of tanks. On the right of the Fourth Army the French First Army continued the attack in the sector of St. Quentin, while on its left two corps of the Third Army also attacked. One division of the Fourth British Army stormed the village of Bellenglise on the eastern side of the canal, some troops crossing the canal on foot bridges which the enemy had not been allowed time to destroy, others equipped with life-belts and carrying mats, rafts, and scaling ladders dropped down the steep sides of the canal and swam or waded across. The German trenches with their posts in the great tunnel were carried and the garrison of the village surrounded and taken. The 46th Midland division alone took 4,600 prisoners and more than a thousand machine guns. The second American corps further north was obstinately opposed, but succeeded in carrying the main points of resistance. The Third Army captured Masnières and secured the crossings of the canal on the outskirts of Cambrai. The Canadian Corps gained ground to the northwest of that town, taking two villages. Attacks continued on all these fronts for the next two days. On September 30 the gap in the Hindenburg line was considerably enlarged. The Germans abandoned two of their main positions on the west side of the canal and retired behind it. Next day the First French Army attacked from the west, taking the greater part of St. Quentin, driving the enemy from house to house, while the Australian Corps and a British division attacked on their left, reaching the railway beyond the canal. Wet weather accompanied by high winds drenched the troops and soaked the fields, but did not stop the advance. On October 2 the French took the remainder of St. Quentin and their lines south of the town were advanced to the river Oise. South of Cambrai the New Zealand division and one British division took two fortified villages, while north of that town the Canadian corps cleared the high ground. The fighting here was extremely severe, as in the course of five days the Germans employed

eleven divisions in succession in their frantic efforts to check this attack. The advance was continued along the whole front with slow but steady success until October 8, when the Canadian Corps carried the canal crossings near Ramillies, northeast of Cambrai, making that town untenable. The Germans consequently abandoned it and fell back on the line of the river Selle. On the night of October 9 Cambrai was occupied by British and Canadian troops. In ten days of victorious fighting the last and strongest German line had been effectually smashed and the way opened for a war of movement and a thrust against their railway communications. This may be regarded as one of the most decisive operations of the war. Between September 27 and October 10 thirty-five British infantry, three British cavalry, and two American infantry divisions engaged forty-five German infantry divisions, from whom they took twelve thousand prisoners and two hundred and fifty guns. The moral effect of so damaging a defeat was of still greater importance.

Arrangements for the development of offensive operations on the Flanders front were settled at a conference held by Marshal Foch at Cassel on September 9. The large force assigned for these operations was placed under the command of the King of the Belgians. It was composed of the Belgian Army, two corps of the British Second Army, several French divisions, and two American divisions transferred from the Meuse. Without any preliminary bombardment the two British corps attacked on a front of five miles and easily carried the whole of the high ground east of Ypres, which had been so fiercely fought over the year before. The Belgian attack was made on an eight mile front from Dixmude to the north of Ypres and made an advance of about three miles. Next day, the British crossed the Lys and advanced upon Roulers, which the Belgians were likewise approaching. The Germans commenced to withdraw from La Bassée and from Armentières and Lens. A salient was driven into their lines which greatly endangered their positions on the Belgian coast. During its advance on September 28-29 the Second British Army took 4,800 prisoners and one hundred guns.

The second and final phase of the British offensive then began, having the capture of Maubeuge and the disruption of the main lateral system of the German railway communications as its chief objectives. The Fourth and Third British Armies, and the right of the First Army advanced with the left flank resting on the canal running from Cambrai to Mons and its right covered by the First French Army. North and south of the Aisne the French armies, assisted by some Italian troops, continued their forward movement. On October 8 the First French Army advanced along the Oise to the southward of St. Quentin, and French and American troops attacked in Champagne and east of the Meuse, and made important progress. The Third and Fourth British Armies advanced on a front of seventeen miles in the direction of Le Cateau, assisted by one American division. The German positions were penetrated after severe fighting to a depth of between three and four miles. Their unfinished trenches were quickly carried, and they were driven into the open country beyond. The enemy's resistance fairly broke

down; his infantry became disorganized and retired eastward. British air-scouts reported that the roads converging on Le Cateau were jammed with retreating infantry and transport vehicles. Next morning the advance was resumed and the British cavalry engaged in the pursuit. When night came the advanced troops were within two miles of Le Cateau and the Germans had been prevented from completing the destruction of the railway. On October 10 progress continued, but the German resistance perceptibly stiffened, and attempts of the British cavalry to pass the Selle were unsuccessful. The French First Army made a substantial advance east of St. Quentin. In this operation twenty British infantry, and two British cavalry divisions, and one American infantry division drove before them twenty-four German divisions and took from them 12,000 prisoners and 250 guns. Full possession was gained of the important double-tracked line of railway from St. Quentin to Cambrai, running through Busigny. By October 13 the British armies had advanced to the river Selle and established bridge-heads at several places. Another deep pocket had been driven into the German position. French and American troops had pushed forward steadily on both sides of the Argonne. The entire ridge of the Chemin des Dames was occupied by them on October 11 and 12. La Fère and Laon were entered on October 13 without opposition. The key of the old German line in France was abandoned.

At daybreak on October 14 the allied forces commanded by the King of the Belgians resumed the offensive on the whole front extending from the river Lys at Comines to Dixmude. This attack was attended by complete success. Roulers was taken, and on October 16 and 17 the allied troops entered Menin and Courtrai. The defences of Lille were turned on both flanks. The Germans removed their supplies and abandoned that city on October 16, when it was entered by the British troops. Ostend was evacuated on October 17, with the important submarine bases on the Belgian coast. The next German line of defence was established on the Selle and Scheldt rivers.

The advance of the American forces on the right was slow and difficult, owing to the hilly nature of the country, the stubborn resistance of the enemy, and to some extent to a breakdown of their transport services, which had been encumbered with an undue amount of baggage. Their staff was inexperienced and had not the advantage of satisfactory railway lines of communication. On October 4 the First American Army renewed its attack along its entire front, advancing on both banks of the Meuse and along the winding valley of the Aire, where the wooded hills of the Argonne had been skilfully fortified. Its losses were severe, but the casualties were rapidly replaced. Not until October 16, however, did this force succeed in gaining a foothold in the German third line of defence, taking the town of Grandpré, an important road junction. Here it halted for the purpose of re-organization for an effective attack on the Freya position, the last German line south of Sedan, which was its prospective objective. On the American left the French advanced on the same day, crossed the river Aisne and took the German

positions on the right bank. General Gouraud then moved along the Aisne, taking Neufchatel and other towns. Vouziers was captured on October 12, and a further advance made in the direction of Rethel. The German retreat on that part of the line had become general, but was accomplished in good order.

The communications on the British front were rapidly improved and it was soon possible to undertake further important operations. On October 17 the Fourth Army attacked on a front of ten miles from Le Cateau with two British and one American corps, acting in conjunction with the First French Army on its right. The Germans held a line running through a wooded undulating country in great strength, and were well supported by their artillery. Their resistance was obstinate, but by the night of October 19 they were driven across the Sambre and Oise canal at nearly all points south of Catillon. This success was followed up at two o'clock next morning by the advance of six divisions of the Third British Army and one division of the First Army along the line of the Selle river north of Le Cateau. Supported by a number of tanks, which succeeded in crossing the river, the infantry overcame a very stubborn resistance and repelled vigorous counter-attacks. The objectives on the high ground east of the Selle were gained while the other troops of the First Army advanced on both sides of the Scheldt canal and occupied Denain.

Another large operation was undertaken on a front of fifteen miles shortly after midnight on the morning of October 23, in which four divisions of the Fourth and the same number from the Third British Army were engaged. Next day three divisions of the First Army extended the line of attack for five miles further northward to the Scheldt. Unfavourable weather had made it difficult to locate the enemy's batteries, and their fire was heavy and well directed; still, in the course of two days' fighting, an advance of six miles was made through difficult country. Many woods and villages were stubbornly held by the opposing troops, and one of the latter was not taken until the afternoon of October 24, by an enveloping attack of two divisions. The western outskirts of the Mormal forest were reached and in the course of minor operations in the three following days, a large section of the railway running from Valenciennes to Le Quesnoy was seized. In the course of the fighting between October 17 and 25 twenty-four British and two American divisions had engaged thirty-one German divisions, from whom they took twenty-one thousand prisoners and four hundred and fifty guns, and carried their objectives at all points. It became apparent that the German infantry and machine gun troops were no longer reliable, and in several instances they retired in front of the British artillery barrage without fighting. The difficulty of replacing their heavy losses in guns, machine guns, and ammunition had enormously increased, and the German reserves of men were almost exhausted. The capitulation of Turkey and Bulgaria and the approaching collapse of Austria rendered their military situation desperate and their troops had become thoroughly disheartened. It still seemed possible that if their armies were allowed to withdraw to shorter lines near their own frontier, they might protract the contest during the winter.

To anticipate this another general forward movement was undertaken on the whole allied front.

On October 9 a second American army was formed and took over a sector of the front in the Wœvre. Twenty-one American divisions were then in the field, numbering with other army troops nearly a million men. The American First Army continued its advance slowly down the left bank of the Meuse, overcoming stubborn resistance. On November 2 it had advanced as far as Buzancy and cleared the Germans out of the Argonne. The Third Army Corps forced the passage of the Meuse at two points on November 4 and 5, and gained a footing on the right bank. On November 6, the first corps reached the river opposite Sedan, which it entered in conjunction with French troops next day. On November 8 other troops of the same army advanced to Montmedy and occupied Stenay on November 10.

After the capture of Vouziers, the French army moved against that portion of the Argonne lying north of Grandpré, which they cleared of the Germans after several days severe fighting. Another column of the same army occupied Hirson on November 9, and advanced to the Belgian frontier. Between the Aisne and Meuse, Gouraud's army advanced without opposition until it arrived on the Meuse between Sedan and Mezières, where it crossed the river and retook the latter town. Mangin's army reached the north bank of the Serre on October 25, and crossed the Aisne at various points between Rethel and Attigny on November 5. The First French Army commanded by General Debeney advanced along the Oise. They were strongly opposed at Guise which was resolutely held by the Germans until October 23.

Early on the morning of November 1, the Seventeenth Corps of the British Third Army, and the Twenty-second and Canadian Corps belonging to the First Army attacked on a front of six miles south of Valenciennes. In the course of two days bitter fighting the Germans were expelled from their positions, and the Fourth Canadian Division captured Valenciennes and advanced beyond that town. On November 3, the Germans withdrew and the line was further advanced. As information was then secured that a further retirement was under contemplation, the principal attack was accelerated. This was launched by the Fourth, Third and First British armies on November 4, upon a front of thirty miles, extending from the Sambre north of Cisy to Valenciennes. The character of the country made this an extremely difficult operation. The river had to be crossed at the start and in the centre the great forest of Mormal, obstructed by the debris of German forestry operations, presented a formidable obstacle. Further northward several streams running parallel to the line of advance must be passed and the fortified town of Le Quesnoy had to be taken. Preceded by a most effective artillery barrage the German positions were soon penetrated along the whole front, and by nightfall an advance of five miles was accomplished. The Sambre was crossed by rafts and the town of Landrecies was taken. Before dawn on November 5 fighting was resumed and the eastern edge of the forest was reached. Le Quesnoy was surrounded by the New Zealand

division, and the German garrison surrendered in the afternoon. On the British right the French First Army continued the line of attack southward to the vicinity of Guise, taking many prisoners and guns. By these operations the German resistance was finally broken. During the night they fell back on nearly their whole front, and on the three following days, in the midst of continuous rain, the victorious troops continued to press forward almost without opposition. The roads packed with the enemy's troops and carriages presented favourable targets for the airmen of the allies, who made effective use of their opportunities in spite of the weather. Many guns and vehicles were abandoned by the retreating forces. On November 8 the British troops entered the outskirts of Maubeuge, and that fortress was occupied next day. The First, Fifth and Second British Armies crossed the Scheldt in several columns. On November 10 the advance of all five British Armies continued with cavalry and cyclists operating in front of the infantry. Little opposition was encountered except in the neighbourhood of Mons, and in the early morning of November 11 that town was captured by the Third Canadian Division with small loss. (See the illustration facing page 52). The whole of its defenders were killed or taken prisoners. The great disorder of the retiring troops, the number of the abandoned trains and stores of all kinds indicated that their defeat had been decisive. At eleven a.m. on November 11, in pursuance of instructions from the Commander in Chief of the allied armies, hostilities were suspended in consequence of the conclusion of an armistice. The right of the Fourth Army had then crossed the Franco-Belgian frontier.

During this last phase of the operations which has received the name of the battle of Maubeuge, extending from November 1 to November 11, twenty-six British divisions were engaged with thirty-two German divisions from whom they took 19,000 prisoners and 460 guns. The enemy's last great line of lateral communications was broken. His positions on the Scheldt were turned and his forces separated into two distinct groups by the great natural barrier of the Ardennes.

During this long period of uniformly successful offensive enterprises beginning on July 18, the British armies had taken 188,700 prisoners and 2,480 guns, the capture of 31,537 prisoners and 623 guns being credited to the Canadian Corps; French armies had taken 139,000 prisoners and 1,880 guns; the American armies had taken 43,300 prisoners and 1,421 guns; Belgian armies had taken 14,500 prisoners and 474 guns.

The terms of the armistice provided for the evacuation by the German armies of the countries on the left bank of the Rhine, and the occupation of these territories by allied and American garrisons holding the principal crossings of the Rhine at Mayence, Coblenz, and Cologne with bridge-heads at those points having a radius of thirty kilometres on the right bank. This evacuation was to be completed in thirty-one days after the signing of the armistice. In conformity with these arrangements, it was decided that the First and Fourth British Armies should advance to the Rhine and that the

Canadian Corps should form part of the Second army. This movement began on November 17, each army advancing with two corps in front, marching in several nearly parallel columns. This long march was conducted by easy stages. The German frontier was crossed on December 4, and Cologne reached by the leading troops on December 10. The bridge-head at Mayence was occupied by French troops and that at Coblenz by Americans.

OPERATIONS ON ITALIAN FRONT, 1918.

During the early part of the year there were few engagements of much importance on this front. Austrian attempts to cross the lower Piave failed without exception.

On June 15 their long expected offensive commenced on a front of ninety miles, extending from the Asiago plateau to the shores of the Adriatic. In the sector of the Brenta they succeeded in penetrating the first three lines of Italian intrenchments taking many prisoners. Their advance was finally checked on the 17th. Elsewhere after crossing the river they were held up close to its banks. The Austrians reported the capture of 30,000 prisoners and 120 guns, and the Italians stated that they had taken 9,000 Austrians. Very heavy rains then came to the assistance of the Italians, causing a complete suspension of operations. The Piave river rose rapidly and carried away several bridges, leaving large bodies of Austrian troops on the right bank, separated from their reserves and supplies. The situation of these forces became very perilous, but they succeeded in retiring across the river on the night of June 22, at most points, not without heavy losses. In a series of successful operations on June 24 and 25 the Italians reported the capture of 18,000 prisoners. On July 6 the Austrians were forced out of positions near the mouth of the Piave which they had held since November, 1917. In October the situation on the western front had become so promising that Marshal Foch directed a general Italian offensive on the Upper Piave by which he anticipated that the Austrian forces might be separated and defeated in detail. The main attack began on the night of October 26-27, in which the Tenth British army under Lord Cavan participated in conjunction with two Italian armies. The passage of the river was forced, and after two days hard fighting, the Austrians were driven from their main positions. On October 31 the allied armies reached the line of the Livenza, advancing on a very wide front. Then the Austrians requested an armistice which was refused. They were rapidly driven across that river and their retreat practically became a rout. Udine and Belluno were retaken, and the Tagliamento was crossed on November 2 so quickly as to prevent the Austrians from taking up a new position behind that river. An armistice was concluded on November 3, by which the total demobilization of the whole Austro-Hungarian army and the evacuation of all territories invaded by them was agreed upon. During their advance the allied armies had taken three hundred thousand prisoners and five thousand guns. The overthrow of Austria as a military power was complete.

OPERATIONS ON THE BALKAN FRONT, 1918.

French and Italian troops began a series of offensive operations in Albania early in June which met with considerable success. The Greek army had been thoroughly re-organized and trained by French officers with the intention of co-operating in the recovery of Serbia, by a general attack on the Bulgarian army in the vicinity of Lake Doiran and the region of Kavadar. British, Greek, French, and Serbian troops took part in these operations, which began by a general attack on September 15. The Bulgarian lines were pierced and their forces separated and driven back on divergent roads. The pursuit was vigorously pressed, and by September 23 the Bulgarian troops became thoroughly disorganized, abandoning their trains and throwing away their arms. The victorious forces marched at once upon the capital, and the Bulgarian Government requested an armistice on September 26, which was granted on terms practically amounting to an unconditional surrender. All fighting ceased at noon on September 30. The defeat of the Bulgarians left the Austro-German forces in Serbia and Albania in such an exposed situation that a rapid retreat became inevitable. Durazzo was taken by Italian troops on October 14, and on November 3, after the conclusion of the armistice with Austria, allied forces were landed at Scutari for the occupation of the country until a treaty of peace was signed.

THE WAR IN ASIA, 1918.

After taking Jerusalem General Sir E. H. Allenby advanced slowly northward, with a view of preventing any movement against General Marshall's army in Mesopotamia by the large Turkish army assembled at Aleppo, under von Falkenhayn. An irregular force of Arabs, organized by the king of the Hedjaz, assisted him by co-operating on the east side of the Jordan. Jericho was taken on February 21, and the Turks retreated beyond the Jordan. Early in March British troops advanced in Mesopotamia, defeating an opposing force on two occasions.

The Russian army of occupation in Armenia began its evacuation of the country early in February, followed by the Turks who re-occupied Trebizond and Erzerum, and took Batum on April 16. A small British column, pushing swiftly forward from Mesopotamia, after a very difficult and trying march of nearly seven hundred miles, took possession of Baku, a city of great importance on account of its large production of mineral oil. Late in the year, when menaced by an attack from a much superior force of German and Bolshevik troops, this detachment was withdrawn. During the hot season, while active operations were suspended, General Allenby held a line extending from the Mediterranean coast to the Jordan, some fifteen miles in advance of Jerusalem, while a Turkish force exceeding 100,000 men occupied the hills of Samaria on his front. A military railway had been completed connecting Jerusalem with Cairo, and a pipe line was laid for the conveyance of water from the Nile. The Turkish position was naturally very strong and had been carefully prepared for defence. Their troops were supplied by two short railway spurs from the

Damascus line, while the main highway from Jerusalem to Damascus ran directly through their position and would form their natural line of retreat. A series of demonstrations and limited attacks was planned upon the left of their main position lying between the high-road and the Jordan river to attract their attention to that part of their line while the main attack was launched to their right near the sea coast. If this succeeded in effecting a breach the whole of the cavalry were to pour through it and endeavour to cut their lines of communication and pursue the defeated troops. A vigorous holding attack was made on the Turkish left on September 19, with the anticipated result. Next morning the main attack was launched by a very strong force of Australian, British, and French troops on a front of sixteen miles with its centre opposite Gilgal. After some hours of stubborn resistance the Turkish troops on the extreme right gave way and in the course of a vigorous pursuit were completely routed and dispersed. The whole of the allied cavalry rapidly advanced across the plain of Sharon in two columns, one of them turning immediately eastward to intercept the retreat of the remainder of the Turkish army by seizing the Damascus road and railways while the other pursued the routed enemy to Nazareth and thence turned eastward toward the Jordan. British infantry advanced by forced marches and seized the fords of that river while the Arabian auxiliaries cut the enemy's railways by a series of attacks at the same time. Seventy-five thousand prisoners and seven hundred guns were taken in this decisive victory. The Seventh and Eighth Turkish Armies ceased to exist. A cavalry column advancing from Nazareth on September 23 occupied Haifa and Acre and the country around Lake Tiberias. Allenby then advanced northward meeting with very slight opposition. His cavalry entered Damascus on October 1, taking 7,000 prisoners while a French force occupied Beirut. The junction of the Palestine railway and the main line to Aleppo was reached on October 5. Tripoli was taken on October 13, Homs on October 15, and Aleppo, the enemy's base and great railway centre, was occupied on October 26, the insignificant remnant of the Turkish army retiring without any resistance. The Turkish forces in Mesopotamia were entirely cut off from their supplies. General Marshall resumed his advance upon Mosul on October 24. Conscious of its weakness, the Turkish government despatched General Townshend, whom they still held as a prisoner of war, to the British Admiral in command in the Aegean Sea to sue for peace. The terms offered and eventually accepted were equivalent to unconditional submission. A fleet of British and French destroyers entered the Dardanelles on November 9, and British troops took possession of the forts at Constantinople. A large allied fleet arrived on November 13, with the intention of beginning active operations against the German fleet on the Black Sea, which were only prevented by the conclusion of the armistice with Germany.

EVENTS ON THE EASTERN FRONT, 1918.

After the conclusion of the armistice with the Central Powers at Brest-Litovsk, the Bolshevik Government at Petrograd was still

engaged in waging war with the new republics of Finland, the Ukraine, and the Cossacks of the Don. Negotiations with Germany were resumed on January 7, 1918, at Brest-Litovsk, and as the Ukraine republic was then represented by delegates, a peace acceptable to the Germans was concluded. The Bolshevik Government at once ordered the demobilization of all armies under their control and proclaimed that the war was over. Before these orders could be carried out a Bolshevik force had captured Kief, the capital of the Ukraine. Alleging that the Bolsheviks had failed to comply with the terms of peace and that their demobilization had not been sufficiently carried into effect, Austrian and German forces swiftly advanced to the assistance of their new allies in the Ukraine. One army crossed the Dvina on February 18, and took the important town of Dvinsk; another force marching from Kovel occupied the fortress of Lutsk. A third advanced from Riga along the Baltic coast, following the railway towards Petrograd. Kief was taken by them on March 1, but no further advance then made beyond a line extending from that city northward through Vitebsk to the Baltic near Reval. All the terms proposed were submissively accepted by the Bolshevik Government, and a treaty signed on March 3, 1918. German troops, however, continued to move southward. Odessa was taken by them with the whole of the Black Sea fleet and a force advanced eastward into the Crimea. German troops were also despatched into Finland and the Ukraine with the avowed intention of enforcing the economic provisions of the treaty of peace, particularly the shipment of food to Austria and Germany.

A remnant of the Rumanian army had been forced to retire into Bessarabia. The Allies were unable to give that force any assistance. After the conclusion of the armistice in the fall of 1917, the Rumanian Government had firmly declined to submit to the German terms of peace. It was now helpless, and on May 6, 1918, a treaty was signed between Rumania and the Central Powers by which a large cession of territory was made, the payment of a large indemnity agreed to, and a free passage guaranteed for German troops advancing into Russia. After the collapse of Bulgarian opposition allied troops crossed the Danube, and the German army retired before them. Upon the conclusion of the armistice the German forces still commanded by Field Marshal von Mackensen attempted to retire, but were interned in Hungary at the demand of the Allies. Allied troops entered Bucharest on November 17, and a British force occupied Constanza, the great Rumanian port on the Black Sea.

British and French troops and marines were landed from allied vessels at Murmansk on July 15, and at Archangel on August 4, for the purpose of assisting the local Russian garrisons in the defence of those ports, and for the protection of large quantities of military stores and other supplies landed there for the former Russian Government. A column advanced southward from Archangel and ascended the Dvina, where they were attacked by Bolshevik troops. This column was reinforced by an American brigade in September.

An allied force composed of American, British, French, and Japanese troops, landed at Vladivostok on August 4 for the protection of that port and the valuable supplies deposited there. At the request of the British Government these troops were reinforced by a body of Canadian troops, organized for that special service, and designated the "Canadian Siberian Expeditionary Force," under Major-General J. H. Elmsley. A body of Czecho-Slovak troops, formerly belonging to the Austrian army, had voluntarily surrendered to the Russians and had taken service in the Russian army under the auspices of the Kerensky Government. They were quartered near Kief when the Germans invaded the Ukraine, but retired along the line of railway from the Don to Vladivostok, after which they co-operated effectively in the operations against the Bolshevik forces in Siberia.

THE WAR AT SEA, 1918.

The British Grand Fleet continued to maintain and even strengthen its effective blockade of the ports of the Central Powers. The task of detecting and hunting down hostile submarines was pursued with greater vigour and success than ever, and although the incursions of German submarines were fitfully extended to the coasts of the United States and Nova Scotia during the summer and a number of small vessels destroyed by them or by mines they had laid, these raids had not the slightest effect in delaying the continuous movement of troops and supplies across the Atlantic. A few unimportant attacks by destroyers or submarines were also made on some British and French coast towns, in which little damage was done, as the assailants after firing a few shots took to flight. Four British hospital ships returning to England with wounded were sunk with heavy loss of life, although all of them were plainly marked to indicate their character. The German High Seas Fleet was unable to put to sea for a great battle, owing to the demoralization of the seamen which had set in immediately after the battle of Jutland. A serious mutiny occurred among them on November 3, which seems to have developed into a general revolutionary movement and accelerated the signing of the armistice, by the terms of which the surrender of the most efficient ships and all the submarines of the German navy was exacted. It had, however, already ceased to exist as an effective fighting force. It was officially announced by the British Admiralty that one hundred and fifty German and seven Austrian submarines had been sunk during the war up to August, 1918. Subsequent information shows that this estimate was considerably under the truth and that the number taken or destroyed exceeded two hundred.

A formidable base for submarine activities had been established by the Germans at the ports of Zeebrugge and Ostend on the Belgian coast soon after their occupation. From its position and comparative security from attack it had become a serious menace to the sea communications of the British army in France and the seaborne commerce of the country generally. An attack on these ports on April 13 had failed with some loss. A second enterprise on a larger scale was then carefully organized and reinforced from the French navy. Its objects

were to block the Bruges ship canal at its entrance into the harbour of Zeebrugge; to block the entrance from Ostend harbour to the sea; and to inflict as much damage as possible upon these two ports. Five obsolete cruisers were filled with concrete to be used as blocking ships. The expedition started from its secret point of concentration, sixty-three miles distant, on the afternoon of April 22, and under a cover of artificial screens of smoke and mist the vessels employed boldly entered the channels and at midnight succeeded in running alongside of the mole at Zeebrugge, where a storming party of marines and sailors was successfully landed. As a diversion to enable the blocking ships to enter the harbour, this attack was entirely successful; those vessels proceeded to their allotted stations and four of them were sunk in accordance with the plan. The entrance of the Bruges ship canal was completely blocked. The viaduct was blown up by the storming party, but the damage to the mole was not as complete as had been planned. The entrance of the Ostend channel was only partially blocked, but a second attempt made on May 9 was more successful. The old cruiser "Vindictive" was filled with concrete for the purpose and sunk in such a position as to block the entrance entirely. These daring enterprises and the establishment of an immense mine field in the North Sea extending from the Orkneys to the coast of Norway, a distance of two hundred and thirty miles, mainly carried out by the navy of the United States, contributed greatly to the defeat of the enemy's submarine campaign.

British war ships attacked the Turkish cruisers, formerly the "Goeben" and "Breslau" of the German navy, at the mouth of the Dardanelles on January 20. The "Breslau" was sunk in this action and the "Goeben" seriously damaged and driven ashore. The British lost two light monitors.

Another squadron of monitors shelled Ostend on March 22.

On May 14 Italian torpedo boats entered the harbour of Pola, and after destroying a dreadnought succeeded in making their escape. Other vessels of the same class attacked a squadron of battleships on June 10. One battleship was sunk and another seriously damaged. Still another successful attack was made in the harbour of Durazzo on October 2.

Three Russian battleships with a number of Russian and British submarines frozen up in the Baltic ports were destroyed on the approach of the Germans in April, but the remainder of the Russian fleet in that sea succeeded in escaping to Kronstadt. The whole of the Russian Black Sea Fleet was taken possession of by the Germans in June, but surrendered to the Allies on November 27. The first division of the German High Seas Fleet, in accordance with the terms of the armistice, was delivered to an allied fleet, commanded by Admiral Sir David Beatty, off the Firth of Forth. German submarines numbering one hundred and twenty-two, among them several of the largest cruiser type, were surrendered to a British squadron at Harwich.

The following table of the naval war losses of the Allies and Central Powers, although not official, has been derived from an authoritative source. All vessels lost through accident are included.

as well as those destroyed by hostile action. The comparatively small losses of the German navy, particularly in large vessels, are due to the fact that the greater part of her fleet remained in port during the war and as she had no mercantile marine at sea the service of scouting vessels and patrol boats to protect her shipping was unnecessary.

Description of vessels	Great Britain	France	Italy	Japan	United States
Battleships	13	4	3	1	
Battle cruisers	3				
Cruisers	25	5	2	4	1
Monitors	6		1		
Destroyers	94	14	10	3	2
Torpedo boats	16	2	5	1	
Submarines	50	14	2		1
Small craft	27	9			
Total tonnage	550,000	110,000	76,000	50,000	17,000

Total for the Allies—803,000 tons.

Enemy losses were as follows:

Description of Vessels	Germany	Austria-Hungary
Battleships	1	2
Battle cruisers	1	
Cruisers	24	2
Monitors		2
Destroyers	72	5
Torpedo boats	51	4
Submarines	265	2
Total tonnage	350,000	45,000

Total for the Central Powers—415,000 tons.

The total loss of the British merchant tonnage was stated by the Admiralty to amount to 15,953,386 gross tons, valued at \$3,000,000,000. According to this official statement 2,475 British ships were sunk with their crews and 3,147 sunk and their crews set adrift, and 670 fishing boats were destroyed. The total number of lives lost by the maritime waged against the British merchant marine exceeded 15,000.

Early in the year 1918 the demand that American troops should be rapidly transported to France became so urgent that a large number of British fast vessels were detailed for this service. Between May 1 and November 1 the number of troops transported across the Atlantic amounted to 1,673,000, of whom the greater part were embarked in British vessels and in many cases escorted by British cruisers and destroyers.

The action of the British fleet was unquestionably one of the most decisive factors in the war, as the blockade had brought the Central Powers to the verge of famine and deprived them of the most essential supplies for a continuation of hostilities.

It had also kept the seas absolutely free for the transportation of troops to every important theatre of war.

PARTICIPATION OF THE UNITED STATES AND THE BRITISH OVERSEAS DOMINIONS IN THE WAR, 1918.

The mobilization of the forces of the United States for active employment in the war was conducted with great energy and ability. Between the date of the declaration of war on April 7, 1917, and the conclusion of the armistice on November 11, 1918, the army of the United States was expanded from 190,000 to 3,665,000 men, of whom 1,993,000 had been actually embarked for the theatre of war.

Shortly before the re-organization of the Government of Canada on the basis of a union of political parties, Major General S. C. Mewburn became Minister of Militia in Canada in succession to Sir A. E. Kemp, who had been appointed Overseas Minister for the same Department. At a secret session of both Houses of Parliament held on April 17, the Prime Minister gave an explanation of the extreme gravity of the military situation in consequence of the marked success of the great German offensives on the western front and emphasized the necessity that every possible effort should be made to maintain the troops in the field at full strength, and increase the production of food as well as that of munitions of war. An Order in Council was passed taking the widest powers in dealing with all cases of exemption, and on April 20 all men between the ages of twenty and twenty-three were called to the colours. By the operation of the Military Service Act, large reinforcements were sent at once to the reserve battalions in England, enabling them to maintain the Canadian Corps at full strength and to augment all infantry battalions by one hundred men and add several pioneer battalions, field companies, forestry companies and other units, thereby increasing the strength of the troops in the field by nearly 19,000 of all ranks. Notwithstanding the severe losses sustained in subsequent operations, the forces engaged were constantly kept up to strength, or nearly so. Before the conclusion of the armistice, the number of troops sent overseas reached 418,052 of all ranks. The total casualties reported up to December 31, 1918, numbered 9,989 officers and 204,397 other ranks, besides 3,575 prisoners of war. The total number of deaths in service in Canada during the same period numbered 2,221 of all ranks. The total number of enlistments up to November 15, 1918, were officially reported to number 595,441. More than 350,000 men, women and children were employed in munition factories in Canada, and the value of contributions for war purposes and to patriotic funds was estimated to exceed \$90,000,000, or more than eleven dollars per head for the total population. Opposition to the Military Service Act in the city of Quebec culminated in disturbances in which a few lives were lost. These were promptly suppressed and the premier of the province and the leader of the opposition in the Federal Parliament strongly discountenanced all unconstitutional opposition to this measure. These wise counsels soon had the desired effect.

In June the Imperial War Cabinet and an Imperial War Conference met in London and were attended by the Canadian Prime Minister and two members of his cabinet.

In Australia the result of the referendum showed that a majority of the people were opposed to the principle of compulsion. The government of Mr. Hughes consequently resigned, but as it immediately became evident that no administration headed by another had any chance of remaining in power, he was asked to form a new cabinet in which he succeeded and a vote of no confidence was promptly defeated by a decisive majority. A recruiting conference was convened in April, presided over by the Governor-General, at which many labour delegates were present. As a result of its deliberations, and the success of the Germans on the western front, a vigorous recruiting campaign was started with great effect, and in the end the Australian troops in the field did not suffer materially for want of reinforcements. Australia was represented at the war conference by Mr. Hughes and Sir Joseph Cook, and the former remained in England to represent Australia.

Reinforcements for the New Zealand division in the field were also maintained by voluntary recruitment until late in the summer. In South Africa, a republican agitation became bolder and more outspoken until in March there was serious apprehension of another rising. In May, after making repeated appeals to the Nationalists for moderation, General Botha announced that the government would take the most energetic measures to suppress sedition. In July plots were discovered which made military measures indispensable. Order was quickly restored. General Smuts remained in England to assist in the vigorous prosecution of the war and, with Mr. Burton, represented the union at the Imperial War Cabinet.

India promptly responded to a stirring appeal from the Prime Minister. A war conference at Delhi was attended by representatives of all shades of popular opinion, and it was decided to take measures to raise another half million men within twelve months. The non-official members of the Viceregal Legislature approved a proposal by the Finance Minister that India should pay the expense of maintaining a much larger proportion of her troops. The forces in Mesopotamia, Syria and Palestine were strongly reinforced and losses quickly replaced.

TERMS OF PEACE IMPOSED BY THE ALLIES, 1919.

In the conference held at Versailles which continued to sit for nearly five months, thirty-two allied countries were represented by official delegates. The five great allied nations, Great Britain, France, Italy, Japan and the United States, were each represented by five delegates, while the other nations and Overseas Dominions of Great Britain, ranking as such, were represented by delegates varying in number from one to three. Dr. Georges Clemenceau, the French Prime Minister, was elected Chairman of the Conference. A Supreme Council of ten members was appointed, consisting of two delegates from each of the five great nations already mentioned. Subsequently

this council was divided and an executive council established, consisting of the Prime Ministers of France, Great Britain and Italy, and the President of the United States. The council of allied delegates met officially on January 18, 1919, to consider the terms to be submitted to the German delegation.

One of the first steps taken by this conference was to invite the representatives from the contending Russian factions to meet on Prince's Island in the Bosphorus to debate a pacific settlement of their internecine warfare. This plan was positively rejected by the Bolsheviks and met with opposition from other Russian parties. On January 24, the conference adopted a plan for the organization of a League of Nations and a committee was appointed to draft a covenant. On January 30, a plan of governing the conquered German colonies and other territories, inhabited by unprogressive races, through mandates granted to various nations subject to the direction and approval of the League, was formally adopted. The terms of the covenant were completed on February 14. A few days later, President Wilson sailed for the United States, and an unsuccessful attempt was made to assassinate Dr. Clemenceau.

A report from the International Labour Committee of the conference was adopted on April 11. Three days afterwards formal demands for reparation from Germany were approved.

The German Government was invited to send delegates to Versailles for the acceptance of the treaty. The terms of the treaty with Austria were next considered. The Italian delegates demanded the cession of the city of Fiume. In accordance with the provisions of a secret agreement between Italy and other powers before the entry of the United States into the war, Italy had been promised accessions of territories in Dalmatia in which Fiume was not included. President Wilson firmly opposed a cession of that city to Italy. The Italian delegates returned to Rome on April 24, as a protest of their dissatisfaction and did not come back to Versailles until May 7. On April 28, a revised form of covenant for the League of Nations was presented in which the Monroe Doctrine was formally incorporated.

The German delegates, headed by Baron von Brockdorff-Rantzau, presented their credentials on May 1. The treaty of peace was presented to them on May 7 at Versailles, that date being purposely selected in commemoration of the anniversary of the sinking of the *Lusitania*. It was announced at the same time that Great Britain and the United States had entered into a solemn agreement to assist France whenever attacked by Germany at any time in the future. The German delegates and other leading men declared that the treaty would not be signed, and the German Government formally proclaimed a week of mourning. From time to time notes were presented by the German delegates to the supreme council of the four great powers requesting concessions and objecting to the terms proposed. On May 16 it was announced that the treaty would become effective when ratified by Germany and three of the allied nations. On May 28, the German reply to the terms offered was presented and this was followed by several alternative proposals from the German

delegates. On June 2, the Austrian delegates arrived and were presented with the allied terms four days afterwards.

The treaty was reluctantly signed by the German delegates on June 29, and the Turkish delegates were directed to return to their own country, as it was hopeless for them to expect to save their empire from dissolution in consequence of the frightful atrocities committed by their troops during the war. The Nations concerned in the treaties of peace and the dates on which they entered the war are as follows:—

ALLIES.			
Serbia.....	July 28, 1914.	Portugal.....	Mar., 1916

		Germany.....	Aug. 1, 1914.
		Turkey.....	Nov., 1914.
		Bulgaria.....	Oct., 1915.

The treaty was divided into fifteen sections. The first contained the covenant of the League of Nations. The second described the new geographical frontiers of Germany. The third section, consisting of twelve clauses, bound the Germans to accept the political changes made by the treaty in Europe. It established two new States, Czecho-Slovakia and Poland it revised the basis of Belgian sovereignty and altered the boundaries of that country it set up new systems of government in Luxemburg and the basin of the river Saar. Alsace-Lorraine was restored to France. Germany was bound by it to recognize the independence of German-Austria and accept certain conditions respecting the new States created by the revolutionary movement in Russia. By the fourth section Germany abandoned her possessions and rights abroad. Her colonies were ceded to the Allies, together with certain rights obtained by various international conventions for regulating European influence in tropical Africa. The British Protectorate in Egypt was recognized, and the treaty of Algeciras annulled. The military, naval, and air conditions of peace were embodied in the fifth section, which limited the size of the German army and navy and abolished compulsory military service in Germany. The sixth section obliged all powers concerned to maintain the graves of soldiers who had died in the war and dealt with the release of prisoners. The seventh section dealt with responsibilities and punishment, and provided for the trial of the former German emperor. The eighth section stated the terms of reparation and restitution required from Germany. The ninth contained financial clauses relating to the previous section. The tenth dealt with economic conditions and renewed former political international treaties and conventions relating to the postal and telegraph services and sanitation. The eleventh section dealt with aerial navigation. The twelfth section contained clauses dealing with the international control of ports, canals, rivers and railways, with special provisions for the control of the Kiel canal. The labour convention was embodied in the thirteenth section. Guarantees for the execution of the treaty

were included in the fourteenth. The fifteenth contained a number of miscellaneous clauses, including the recognition of other subsequent treaties of peace and confirmed the decisions of prize courts. Its final clauses dealt with the ratification of the treaty and fixed a date for it to come into force.

Prussia was deprived of territory containing an area of 30,000 square miles and a population of 6,674,000, and the future fate of other Prussian territories, containing an area of 8,600 square miles and a population of 1,000,000, was to be determined by a plebiscite. The following disposition of the former German Colonies was adopted. German East Africa—the mandate will be held by Great Britain. German Southwest Africa—the mandate will be held by the Union of South Africa. The German Samoan Islands—the mandate will be held by New Zealand. Other Pacific possessions, those south of the equator (excluding the German Samoan Islands and Nauru)—the mandate will be held by Australia. Nauru—the mandate will be held by Great Britain. Pacific islands north of the equator—the mandate will be held by Japan. Togoland and Cameroon—France and Great Britain will make a joint recommendation as to their disposition.

THE TOLL OF THE WAR.

The loss of human life resulting from the war was truly appalling. An official estimate of the total British casualties has been submitted to parliament. Those in the Royal Navy were as follows:—

Killed.		Wounded.		Untraced Missing.	
Officers.	Men.	Officers.	Men.	Officers.	Men.
2,061	20,197	813	4,081	15	8

These figures do not include the casualties of the Royal Naval Division, but do include those of the Royal Naval Air Service to April 1, 1918, when it was transferred to the Royal Air Force.

The whole number of casualties among all military forces and in all theatres of war was as follows:—

	Killed.		Wounded.	
	Officers.	Other Ranks.	Officers.	Other Ranks.
British.....	30,807	466,331	76,132	1,532,552
Colonials and Indians.....	7,602	168,703	17,125	421,402
Total.....	38,409	635,534	93,257	1,953,954
	673,943		2,047,211	

Killed as per above table.....	673,943
Add deaths presumed through lapse of time.....	97,000
Missing, at present unaccounted for.....	64,800

Total presumed deaths including died from wounds and died from other causes..... 835,743

These figures include the losses of the Royal Naval Division and of the Royal Flying Corps up to April 1, 1918, making a grand total of casualties from all causes of 2,882,954.

The number of casualties in the Royal Air Force between April 1, 1918, and the date of the Armistice, was reported as follows:—

Killed.		Wounded.		Missing (including prisoners).		Interned.	
Officers.	Other Ranks.	Officers.	Other Ranks.	Officers.	Other Ranks.	Officers.	Other Ranks.
1,551	1,129	2,357	631	1,612	225	45	39

The casualties (including members of His Majesty's Forces) due to hostile air raids and bombardments were as follows:—

Killed, 1,570. Injured, 4,041.

The French naval losses were officially reported as numbering 5,421 killed, 5,214 missing.

The French Army is reported to have lost 1,089,700 killed and 265,000 missing, or 16.2 per cent of the immense mobilized force of 8,410,000. No report of the number of wounded in the French Army or navy has been made public; the number of prisoners was officially stated as 446,300. Italian casualties as presented in an official statement to the repARATION commissioners of the Peace Conference were as follows:—

	Army.	Navy.
Killed.....	462,391	3,169
Wounded.....	953,886	5,252

Half of the wounded men belonging to the army were stated to be permanently disabled; the total number rendered unfit for service was 4,385,487, which included 2,400,000 sick.

The Russian casualties were estimated to amount to 1,700,000 killed, 4,050,000 wounded, 2,500,000 prisoners, making a total of 9,150,000. The American losses were: dead, 53,169; wounded, 179,625; prisoners, 2,163; missing, 1,160; total, 236,117. German casualties were stated to amount to: dead, 1,600,000; missing, 103,000; prisoners, 618,000; wounded, 4,064,000; total, 6,385,000.

The Austrian losses in killed and wounded were stated to amount to 4,000,000, of whom 800,000 were killed. Official reports of the losses of other nations have not been made public.

The material losses of the countries involved practically defy computation. A statement, presented for the information of the Budget Committee of the French Chamber of Deputies, shows that the loss suffered by that country amounted to a total of 119,801,000,000 francs, made up as follows:—Damages to landed property, 35,446,000,000 f.; loss of household effects, material, cattle, securities, etc., 32,352,000,000 f.; raw materials and provisions, 28,861,000,000 f.; loss to revenue or trade, 23,242,000,000 f.

APPENDICES.

1861. Aug. 14, Great flood at Montreal. Sept. 10, Meeting of the first Anglican Provincial Synod. Nov. 2, Viscount Monk Governor in Chief. Population, Upper Canada, 1,396,091; Lower Canada, 1,111,566; New Brunswick, 252,047; Nova Scotia, 330,857; Prince Edward Island, 80,857.
1862. May 24, Sandfield Macdonald-Sicotte Administration. Aug. 2, Victoria, B. C., incorporated.
1863. May 16, Sandfield Macdonald-Dorion Administration.
1864. March 30, Taché-J. A. Macdonald Administration. Conferences on Confederation of British North America: Sept. 1, at Charlottetown; Oct. 10-29, at Quebec. Oct. 19, Raid of American Confederates from Canada on St. Albans, Vermont.
1865. Feb. 3, The Canadian Legislature resolves on an address to the Queen praying for Union of the provinces of British North America. Aug. 7, Belleau-J. A. Macdonald Administration. Oct. 20, Proclamation fixing the seat of Government at Ottawa.
1866. Mar. 17, Termination of the Reciprocity Treaty by the United States. May 31, Raid of Fenians from the United States into Canada; they are defeated at Ridgeway (June 2) and retreat

- across the border (June 3). June 8, First meeting at Ottawa of the Canadian Legislature. Nov. 17, Proclamation of the union of Vancouver Island to British Columbia.
1867. March 29, Royal assent given to the British North America Act. July 1, The Act comes into force; Union of the provinces of Canada, Nova Scotia and New Brunswick as the Dominion of Canada; Upper and Lower Canada made separate provinces as Ontario and Quebec; Viscount Monck first Governor General, Sir John A. Macdonald premier. Nov. 6, Meeting of the first Dominion Parliament.
1868. April 7, Murder of D'Arcy McGee at Ottawa. July 31, The Rupert's Land Act authorizes the acquisition by the Dominion of the Northwest Territories. Dec. 29, Sir John Young (Lord Lisgar) Governor General.
1869. June 22, Act providing for the government of the Northwest Territories. Nov. 19, Deed of surrender to the Crown of the Hudson's Bay Company's territorial rights in the Northwest. Outbreak of the Red River Rebellion under Riel.
1870. May 12, Act to establish the province of Manitoba. July 15, Northwest Territories transferred to the Dominion and Manitoba admitted into Confederation. Sept. 24, Wolseley's expedition reaches Fort Garry (Winnipeg); end of the rebellion.
1871. April 2, First Dominion census (populations at this and succeeding enumerations given in tabular form on page 101). April 14, Act establishing uniform currency in the Dominion. May 8, Treaty of Washington, dealing with questions outstanding between the United Kingdom and United States. July 20, British Columbia enters Confederation.
1872. May 22, The Earl of Dufferin Governor General.
1873. March 5, Opening of the Second Dominion Parliament. May 23, Act establishing the Northwest, Mounted Police. July 1, Prince Edward Island enters Confederation. Nov. 7, Alexander Mackenzie premier. Nov. 8, Incorporation of Winnipeg.
1874. March 26, Opening of the third Dominion Parliament. May, Ontario Agricultural College, Guelph, opened.
1875. April 8, The Northwest Territories Act establishes a Lieutenant-Governor and Council of the Northwest Territories. June 15, Formation of the Presbyterian Church of Canada.
1876. June 1, Opening of the Royal Military College, Kingston. June 5, First sitting of the Supreme Court of Canada. July 3, Opening of the Intercolonial Railway from Quebec to Halifax.
1877. June 20, Great fire at St. John, N.B. Oct., First exportation of wheat from Manitoba to the United Kingdom. Founding of the University of Manitoba.
1878. July 1, Canada joins the International Postal Union. Oct. 5, The Marquis of Lorne Governor General. Oct. 17, Sir J. A. Macdonald premier.
1879. Feb. 13, Opening of the fourth Dominion Parliament. May 15, Adoption of a protective tariff ("The National Policy").
1880. Royal Canadian Academy of Arts founded, first meeting and exhibition, March 6. May 11, Sir A. T. Galt appointed first Canadian High Commissioner in London. Sept. 1, All British possessions in North America and adjacent islands, except New foundland and its dependencies, annexed to Canada by Imperial Order in Council of July 31. Oct. 21, Signing of the contract for the construction of the Canadian Pacific Railway.
1881. April 4, Second Dominion census. May 2, First sod turned of the Canadian Pacific Railway.
1882. May 8, Provisional Districts of Assiniboia, Saskatchewan, Athabasca and Alberta formed. May 25, First meeting of the Royal Society of Canada. Aug. 23, Regina established as seat of Government of Northwest Territories.
1883. Feb. 1, Opening of the fifth Dominion Parliament. Aug. 18, The Marquis of Lansdowne Governor General. Sept. 5, Formation of the Methodist Church in Canada; United Conference.

1884. May 24, Sir Charles Tupper, High Commissioner in London. Aug. 11, Order in Council settling the boundary of Ontario and Manitoba.
1885. March 26, Outbreak of Riel's second rebellion in the Northwest. April 24, Engagement at Fish Creek. May 2, Engagement at Cut Knife. May 12, Taking of Batoche. May 16, Surrender of Riel. Aug. 24, First census of the Northwest Territories. Nov. 16, Execution of Riel.
1886. April 6, Incorporation of Vancouver. June 7, Archbishop Taschereau of Quebec made first Canadian Cardinal. June 13, Vancouver destroyed by fire. June 28, First through train on the Canadian Pacific Railway from Montreal to Vancouver. July 31, First quinquennial census of Manitoba.
1887. Interprovincial Conference at Quebec. April 4, First Intercolonial Conference in London. April 13, Opening of the sixth Dominion Parliament.
1888. Feb. 15, Signing of Fishery Treaty between United Kingdom and United States at Washington. May 1, Lord Stanley Governor General. Aug., Rejection of Fishery Treaty by United States Senate.
1890. March 31, The Manitoba School Act abolishes separate schools.
1891. April 5, Third Dominion census. April 29, Opening of the seventh Dominion Parliament. June 6, Death of Sir J. A. Macdonald. June 15, Sir John Abbott premier.
1892. Feb. 29, Washington Treaty, providing for arbitration of the Behring Sea Seal Fisheries question. July 22, Boundary convention between Canada and the United States. Nov. 25, Sir John Thompson premier.
1893. April 4, First sitting of the Behring Sea Arbitration Court. May 22 The Earl of Aberdeen Governor General. Dec. 18, Archbishop Machray, of Rupert's Land, elected first Anglican Primate of all Canada.
1894. June 28, Colonial Conference at Ottawa. Dec. 12, Death of Sir John Thompson at Windsor Castle. Dec. 21, (Sir) Mackenzie Bowell premier.
1895. Sept. 10, Opening of new Sault Ste. Marie canal. Oct. 2, Proclamation naming the Ungava, Franklin, Mackenzie and Yukon Districts of Northwest Territories.
1896. April 24, Sir Donald Smith (Lord Strathcona) High Commissioner in London. April 27, Sir Charles Tupper premier. July 11, (Sir) Wilfrid Laurier premier. Aug., Gold discovered in the Klondyke. Aug. 19, Opening of the eighth Dominion Parliament.
1897. July, Third Colonial Conference in London. Dec. 17, Award of the Behring Sea Arbitration.
1898. June 13, The Yukon District established as a separate Territory by Act of Parliament. July 30, The Earl of Minto Governor-General. Aug. 1, The British-Preferential Tariff of Canada goes into force. Aug. 23, Meeting at Quebec of the Joint High Commission for the settlement of questions between Canada and the United States. Dec. 25, British Imperial Penny (2 cent) Postage introduced.
1899. Oct. 11, Beginning of the South African War. Oct. 14, Canadian Government decides to send troops to South Africa. Oct. 29, First Canadian contingent leaves Quebec for South Africa.
1900. Feb. 27, Battle of Paardeberg. April 26, Great fire at Ottawa and Hull.
1901. Jan. 22, Death of Queen Victoria and accession of King Edward VII. Feb. 6, Opening of the ninth Dominion Parliament. April 1, Census of the British Empire, total population, 397,659,316; Canada (Fourth Dominion census), 5,371,315. Sept. 16-Oct. 21, Visit to Canada of the Duke and Duchess of Cornwall and York (King George V and Queen Mary).
1902. May 31, End of South African War, peace signed at Vereeniging. June 30, Meeting of fourth Colonial Conference in London.
1903. Jan. 24, Signing of the Alaska Boundary Convention. June 19, Incorporation of Regina. Oct. 20, Award of the Alaskan Boundary Commission.
1904. Feb. 1, Dominion Railway Commission established under the Railway Act of 1903. April 19, Great fire in Toronto. Sept. 26,

- Earl Grey Governor-General. Oct. 8, Incorporation of Edmonton.
1905. Jan. 11, Opening of the tenth Dominion Parliament. Sept. 1, Creation of the provinces of Alberta and Saskatchewan.
1906. University of Alberta founded. Oct. 8, Interprovincial Conference at Ottawa.
1907. March 22, Industrial Disputes Investigation Act passed. April 15-May 14, Fifth Colonial Conference in London. Adjustment of Parliamentary representation in Saskatchewan and Alberta. New Customs Tariff, including introduction of Intermediate Tariff. Aug. 29, Collapse of Quebec Bridge. Sept. 19, new Commercial Convention with France signed at Paris. March 31, Canadian patriotic contributions amount to \$49,271,012. April 5, Declaration of war against Germany by United States. April 9, Capture of Vimy Ridge. April 16, Wheat placed on free list. June 11, Appointment of Board of Grain Supervisors with power to fix grain prices. June 21, Appointment of Food Controller under Order in Council of June 16. July 1, Jubilee of Confederation, 1867. Aug. 15, Battle of Loos, capture of Hill 70. Aug. 29, Passing of Military Service Act. Sept. 20, Completion of structure of Quebec bridge. Sept. 20, Parliamentary franchise extended to women; Dominion Government authorized to purchase 600,000 shares of C.N.R. Oct. 4, Battle of Passchendaele. Oct. 6, Dissolution of 12th Parliament. Nov. 12, Fourth War Loan (Victory Bonds). Dec. 6, Disastrous explosion at Halifax, N.S., caused by collision between the *Imo* and the *Mont Blanc*, laden with powerful explosives. Dec. 17, General Election and Union Government sustained.
1918. Feb. 23, Appointment of Canada Registration Board. Mar. 18, Opening of first session of 13th Parliament. Mar. 21, Germans launch critical offensive on West Front. Mar. 30, Gen. Foch appointed Generalissimo. Mar.-April, Second battle of the Somme. April 17, Secret session of Parliament. May 23, Parliament prorogued. June-July, Prime Minister and colleagues attend Imperial War Conferences in London. July 18, Allies assume successful offensive on West Front. Aug. 12, Battle of Amiens. Aug. 26-28, Capture of Monchy le Preux. Sept. 2-4, Breaking of Drocourt-Quéant line. Sept. 16, Austrian Peace Note. Sept. 19, Establishment of Khaki University of Canada. Sept. 27-29, Crossing of Canal du Nord and capture of Bourlon Wood. Sept. 30, Bulgaria surrenders and signs armistice. Oct. 1-9, Capture of Cambrai. Oct. 5, Epidemic of Spanish Influenza causes closing of churches and abandonment of public meetings. Oct. 6, First German Peace Note. Oct. 20, Capture of Denain. Oct. 21, Appointment of Siberian Economic Commission. Oct. 25-Nov. 2, Capture of Valenciennes. Oct. 28, Issue of Fifth War Loan for \$300,000,000 in the form of Victory Bonds. Oct. 31, Turkey surrenders and signs armistice. Nov. 4, Austria-Hungary surrenders and signs armistice. Nov. 10, Flight into Holland of German Emperor. Capture of Mons. Nov. 11, Germany surrenders and signs

armistice. Spontaneous rejoicings throughout the Empire at the prospect of victorious peace. Dec. 1, National Thanksgiving Services for victory and peace. 1919. Feb. 17, Death of Sir Wilfrid Laurier. Feb. 20-July 7, Second Session of 13th Parliament of Canada. Mar. 7, Appointment of Government Receiver of the Grand Trunk Pacific Railway. May 1-June 15, Great Strike at Winnipeg and strikes in other Western cities. May 26, Return to Canada of Prime Minister from Peace Conference. June 23, General Election in Quebec, resulting in retention of Liberal Administration. June 28, Signature at Versailles of Peace Treaty and Protocol; Canadian Plenipotentiaries: the Hon. Charles J. Doherty and the Hon. Arthur L. Sifton. July 24, General Election in Prince Edward Island, resulting in defeat of Conservative administration. Aug. 5-7, Meeting at Ottawa of Liberal convention and election

of the Hon. W. L. Mackenzie King as leader of Liberal party. Aug. 15, Arrival at St. John, N.B., of H.R.H. the Prince of Wales for official tour in Canada. Aug. 22, Formal opening of Quebec Bridge by H.R.H. the Prince of Wales. Sept. 1, H.R.H. the Prince of Wales lays foundation stone of tower of new Parliament Buildings at Ottawa. Sept. 1-Nov. 10, Third or Special Peace Session of 13th Parliament of Canada. Sept. 15, Opening at Ottawa of the National Industrial Conference. Oct. 20, General Election in Ontario, resulting in defeat of Conservative administration and formation of Ministry by E. C. Drury, United Farmers' Organization. Issue of Sixth War Loan for \$300,000,000 in the form of Victory Bonds. Nov. 25, H.R.H. the Prince of Wales sails from Halifax, N.S., on completion of visit to Canada. Dec. 20, Organization of "Canadian National Railways" by Order in Council.

III.—PHYSICAL CHARACTERISTICS OF CANADA.

· GEOGRAPHICAL FEATURES.

General Formation.—On the eastern coast of the North American continent the Appalachian range of mountains gives shape to the eastern coast of the United States and, extending into Canada, forms the Gaspé peninsula and the Maritime Provinces. Around Hudson bay is a V-shaped plateau constituting the Laurentian highland and extending from Labrador down to the St. Lawrence river and thence northwestward to the Arctic ocean. In the west are the Cordillera ranges of the Pacific coast, extending into British Columbia and the Yukon territory. They occupy a large area in Canada, and comprise several parallel ranges. In British Columbia they are over 400 miles in width, and consist of the coast range along the coast; the Rocky mountains, properly so called, and, between them, the Selkirk, Gold, Cariboo, Cassiar and other ranges. To the north of British Columbia lies the Yukon territory, including a great mountain area drained by the Yukon river and the Klondike valley, famous for its gold. West of the Canadian Yukon lies the United States territory of Alaska. Canada may further be conveniently divided into five sections: (1) the peninsula which in Canada includes Gaspé and the three Maritime Provinces; (2) the lowlands of southern Ontario and southern Quebec, with the Great Lakes and the Ottawa and St. Lawrence rivers draining the interior into the Atlantic ocean;

(3) the Central plain; (4) the Laurentian highland; (5) the western Cordillera.

Mountains.—In the western Cordillera are found the highest mountain ranges and peaks of Canada. In the Yukon territory, and forming part of the St. Elias range, is mount Logan, 19,539 feet, the highest known point in Canada. In the Rocky mountains are many peaks rising to heights of 11,000 or 12,000 feet, and mount Robson, 13,700 feet, in the Yellowhead pass, is the highest of that range. The Selkirk range contains heights of from 9,000 feet to over 11,000 feet.

Waterways.—The waterways of Canada constitute one of the most remarkable of its geographical features. East of the Rocky mountains the southern part of the Dominion slopes northeastward towards Hudson bay; and the rivers in the south flow eastward. Thus the Saskatchewan river, with its northern and southern branches, flows eastward into lake Winnipeg and thence northward by the Nelson river into Hudson bay. On the north the Great Plain has a northerly slope, and the Mackenzie river, with its tributaries, the Slave, Liard, Athabaska, and Peace rivers, flows into the Arctic ocean. The Mackenzie, exclusive of its tributaries, but including the Slave, Peace and Finlay rivers, of which it is the continuation, has a total length of 2,525 miles. The Yukon river in the Yukon territory also flows northward, passing through Alaska into Behring strait after a course of 2,300 miles. In British Columbia, the Fraser, Columbia, Skeena and Stikine rivers flow into the Pacific ocean.

Drainage Basins.—The large drainage basins of Canada are the Atlantic (554,000 square miles), the Hudson bay (1,486,000 square miles), the Arctic (1,290,000 square miles), the Pacific (387,300 square miles) and the gulf of Mexico (12,365 square miles). Table 1 gives a list of the river drainage basins, and Table 2 gives the lengths of the principal rivers with their tributaries and sub-tributaries.

NOTE.—In the above table the tributaries and sub-tributaries are indicated by indentation of the names. Thus the Ottawa and other rivers are shown as tributary to the St. Lawrence, and the Gatineau and other rivers as tributary to the Ottawa.

St. Lawrence River System.—Most important of the lakes and rivers in Canada is the chain of the Great Lakes with their connecting rivers, the St. Lawrence river and its tributaries. This chain is called the St. Lawrence River System. The Great Lakes, separating the province of Ontario from the United States and connected by a series of artificial canals with the St. Lawrence river, allow of access from the Atlantic ocean to the interior of the Dominion at Fort William and Port Arthur, twin cities situated at the head of lake Superior.

The Great Lakes.—Table 3 shows the length, breadth, areas and elevation above sea-level of each of the Great Lakes.

3.—Area and Elevation of the Great Lakes.

Lakes.	Length.	Breadth.	Area.	Elevation above Sea-level.
	Miles.	Miles.	Sq. Miles.	Feet.
Superior.....	354	162	31,800	602
Michigan.....	316	118	22,400	581

St. Clair.....	26	24	445	575
Erie.....	239	59	10,000	572
Ontario.....	193	53	7,260	246

Lake Superior, with its area of 31,800 square miles, is the largest body of fresh water in the world. As the international boundary between Canada and the United States passes through the centre of lakes Superior, Huron, Erie and Ontario, only half of the areas of these lakes given in the above statement is Canadian. The whole of lake Michigan is within United States territory. From the western end of lake Superior to the mouth of the St. Lawrence there is, with the aid of the canal system, a continuous navigable waterway. The total length of the St. Lawrence river from the head of the St. Louis river to the Pointe-des-Monts, at the entrance of the gulf of St. Lawrence, is 1,900 miles. The tributaries of the St. Lawrence, several of which have themselves important tributaries, include the Ottawa river, 685 miles long; the St. Maurice river, 325 miles long; and the Saguenay (to head of Peribonka), 405 miles long.

Other Inland Waters.—In addition to the Great Lakes there are large bodies of inland water in other parts of Canada. Of these only the following principal lakes, with their respective areas, need be mentioned here: in Quebec, lake Mistassini (975 square miles); in Ontario, lake Nipigon (1,730 square miles); in Manitoba lake Winnipeg (9,457 square miles); lake Winnipegosis (2,086 square miles) and lake Manitoba (1,817 square miles); in Saskatchewan, Reindeer lake (2,437 square miles); in Alberta, lake Athabaska (2,482 square miles). All these are within the boundaries of the provinces as at present constituted, and are exclusive of lakes situated in the Northwest Territories, as, for instance, the Great Bear lake (11,821 square miles) and the Great Slave lake (10,719 square miles) in the Mackenzie District.

Table 4 gives a list of the principal lakes of Canada by provinces, with the area of each in square miles. The table corresponds with the constitution of the provinces as altered by the Boundary Extension Act, 1912 (2 Geo. V, cc. 32, 40 and 45).

Islands.—The northern and western coasts of Canada are skirted by clusters of islands. Those on the north are mostly within the Arctic circle. On the west, Vancouver and Queen Charlotte Islands are the largest and most important. On the east, besides the separate island colony of Newfoundland, there are the Cape Breton Island, forming part of the province of Nova Scotia, Prince Edward Island, forming one of the nine provinces of Canada, the Magdalen Islands and the island of Anticosti. To the south of Newfoundland are the two small islands of St. Pierre and Miquelon belonging to France. In lake Huron is the island of Manitoulin and the so-called Thirty Thousand Islands of Georgian Bay. In the St. Lawrence river, just below lake Ontario, are the picturesque Thousand Islands.

ECONOMIC GEOLOGY OF CANADA, 1918.

By WYATT MALCOLM, Geological Survey, Ottawa.

The purpose of this paper is to present a brief review of the most important articles treating of the economic geology of Canada published during the year 1918. References are made by numbers throughout the paper to the publishers, of whom a list is given at the end.

Bituminous sands.—An enormous deposit of bituminous sand occurs in northern Alberta and is exposed along the banks of Athabaska river and its tributaries. S. C. ELLS, who surveyed the outcrops most favourable for commercial exploitation and carried on laboratory investigations to ascertain the best methods of utilizing the deposits, presents in concise form (6) certain interesting results. To test its use for street paving it was found impossible to secure satisfactory material from any single outcrop. However, by combining the bituminous sands from two separate outcrops in proper proportion a product was obtained that gave satisfactory results. Freight charges would, however, be a serious handicap in the application of this material to road construction, as from 85 to 88 p.c. consists of sand. Experiments made by Mr. ELLS at the Mellon Institute of Industrial Research at Pittsburg on the best method of extracting the bitumen from the sand led to the conclusion that separation by water afforded the most promising chances of success and that the temperature for most efficiently treating the Alberta material lay between 315° and 330° F.

Building Stones.—A report by W. A. PARKS (2) on the building and ornamental stones of British Columbia points out that commercial production is confined to the sandstones of the islands, the granites of the Coast range, Okanagan lake and the Nelson districts and to the marbles of Kootenay lake, Texada island, and Nootka sound. The sandstone is normally of a greyish-blue colour, but it alters rapidly to buff. The granites of the Coast range vary greatly in mineral composition, colour and grain. The most important quarries, which are on the islands off the mouth of Jervis inlet, are in a medium-grained grey stone. The Nelson granites are lighter in colour than those of the Coast range and are usually coarser in grain. The Okanagan granites are of medium grain and pinkish colour; they have

been quarried to a small extent for local use. A white and blue-banded marble is quarried north of Kootenay lake and a very similar stone has been procured from Nootka sound. Dark basic rocks of Rossland and Ymir have been mentioned as sources of monumental stone. Sodalite and sodalite-bearing syenite from Ice river, slates from Queen Charlotte islands and basic rocks of the Coast range are of possible value for decorative purposes.

Clays and Shales.—The results of tests made by JOSEPH KEELE (2) show that the china clay produced at St. Remi, Quebec, is of high grade, comparing favourably with the standard brands on the market, and that the silica found associated with the kaolin is, when washed free from the latter, suitable for the manufacture of acid refractory brick of the gannister type. Valuable notes are given by Mr. KEELE on deposits of materials in Canada suitable for the manufacture of refractory goods. He also presents the results of laboratory tests made on samples of clays collected at many points, among the most interesting of which are fire clays from Missinaibi and Mattagami rivers, Ontario. A report by N. B. DAVIS (2) presents the results of field work in southern Saskatchewan and of laboratory investigations of the samples of clays collected. Clays of very fine quality are found. Very excellent grades of brick are made and material is shipped to Medicine Hat for the manufacture of sewerpipe and stoneware pottery. A first class refractory clay is also found that should produce firebrick equal to the standard firebrick imported from the United States. Mr. DAVIS has a paper (6) also setting forth the occurrence, properties and uses of refractory materials found throughout Canada. A deposit of semi-refractory clay occurring in Swan river, Manitoba, is described by W. A. JOHNSTON (1).

Coal.—BRUCE ROSE (1) describes the Crowsnest and Flathead coal fields of British Columbia. The coal occurs in the Kootenay formation. Sections measured on the west side of the Fernie basin of the Crowsnest fields show that at Morrissey there are 23 seams with an aggregate thickness of 216 feet of coal, and at Fernie 23 seams with an aggregate thickness of 172 feet of coal. A. MACLEAN (1) gives a section of the lignite-bearing formations of southeastern Saskatchewan. Analyses of Canadian coals have been compiled by EDGAR STANSFIELD and J. H. H. NICOLLS (2). The results of experiments on the carbonizing of lignites are described by EDGAR STANSFIELD and ROSS E. GILMORE in the Canadian Chemical Journal, volume 2, and in the Transactions of the Royal Society of Canada, volume 11.

Copper.—The discovery of copper deposits in northern Manitoba has attracted a great deal of attention to the possibilities of large mineral resources in that part of Canada. A deposit of chalcopyrite on Schist lake was found to be rich enough to yield a profit after paying for difficult transportation to the railway and a long rail haul to the smelter at Trail. An enormous body of low-grade ore at Flin Flon lake has been proved by diamond drilling. These deposits are described by E. L. BRUCE (1 and 6). They occur in a highly metamorphosed series of volcanic rocks and are genetically related to granitic intrusions.

A number of copper deposits lying north of Lake Huron are briefly described by W. H. COLLINS (1).

Copper deposits on Indian river near Vancouver and in the Hazelton district are described by CHARLES CAMSELL (1) and J. J. O'NEILL (1), respectively. The origin of the Hazelton deposits is discussed by V. DOLMAGE in a paper published in *Economic Geology*, volume 13. Notes on many of the copper deposits of British Columbia are given by the Resident Engineers of the Mineral Survey Districts (5).

Gold.—H. C. COOKE (1) and A. G. BURROWS (3) describe the geology of areas in the vicinity of Fort Matabechewan on Montreal river, Ontario, where development work has been done on gold claims. On one of the two most important claims gold occurs in a body of porphyritic syenite which is cut by a network of veinlets of quartz; the gold is usually found in or near these veinlets. On the other claim gold is found both in the porphyry and intruded schist. Descriptions are given by A. G. BURROWS (3) of gold discoveries in Benoit and Gauthier townships, northern Ontario, and by M. B. BAKER (3) of the general geology of Long Lake gold mine and vicinity, southwest of Sudbury. The Long Lake ore consists of quartzite impregnated with arsenopyrite and iron pyrites with minor amounts of pyrrhotite, galena, and copper pyrites. The gold is associated chiefly with the arsenopyrite, but the iron pyrites carries a small amount. More detailed information about the Kowkash gold area is given this year by P. E. HOPKINS (3). Numerous quartz veins carrying low gold values occur in the schist in many parts of the area. W. H. COLLINS (1) describes veins of quartz and ankerite carrying arsenopyrite and free gold lying north of lake Huron near the Algoma Eastern railway.

The geology and gold deposits of Wekusko lake area, Manitoba, are described by F. J. ALCOCK (1). The six most important deposits of the Wekusko lake area lie near the contact between an intrusive granite stock and earlier schists. Mr. ALCOCK and R. C. WALLACE both discuss the question of the origin of the gold (6). The results of investigations in an area east of lake Winnipeg and in the Star lake area of southeastern Manitoba are presented by J. R. MARSHALL (1).

W. E. COCKFIELD describes the gold placers of Sixtymile river valley, Yukon. The gold deposits of the Lardeau and Slocan areas, British Columbia, are described by M. F. BANCROFT (1), and CHARLES CAMSELL (1) gives notes on the occurrence of gold, silver and copper ores in the vicinity of the Pacific Great Eastern railway. Considerable information regarding the gold mines of British Columbia is contained in the reports of the Resident Engineers of the Mineral Survey Districts (5).

Graphite.—The Port Elmsley graphite deposit, Ontario, is one that was reopened during the war owing to the increased demand for the Canadian product. According to M. E. WILSON (1) the graphite ore of this deposit is merely silicated Grenville limestone in which graphite is disseminated. Low grade ores consist mainly of calcite in which silicate minerals are disseminated, and carry 4 to 6 p.c. of

graphite; high grade ores consist almost entirely of silicates carrying 15 to 20 p.c. of graphite. Short notes on graphite in Canada are presented by HUGH S. SPENCE (2).

Iron.—Volume 2 of a report by E. LINDEMAN and L. L. BOLTON (2) on the iron ore occurrences in Canada gives a succinct description of the known occurrences of iron ore throughout Canada. Many of these are without doubt of no economic value, but there are many that merit further investigation. Volume 1, previously published, contains descriptions of the principal iron mines of Canada. In a paper published in the *Journal of Geology*, volume 26, E. S. MOORE describes the geology of Belcher islands. Iron formation forms part of a thick series of sediments consisting of limestones, shales, quartzites and graywackes, and this series is intruded by sills and overlain by flows of diabase and basalt. The iron formation consists of jasper, chert, hematite, magnetite, siderite and green granules regarded as the iron silicate, greenalite. A. H. A. ROBINSON (2) gives the results of examinations made of a number of deposits of iron ore in Ontario. Analyses of samples taken and observations regarding the extent of the deposits are given. Investigations were made in the townships of Levant, Lount and Snowden and on Seine bay and Bad Vermilion lake. T. L. TANTON (1) gives brief notes on iron ore deposits lying east of lake Nipigon.

Limestone.—Samples have been taken from the limestone quarries and many of the principal limestone outcrops of Ontario by HOWELLS FRECHETTE. Analyses were made to determine the percentage of calcium carbonate, magnesium carbonate, alumina, ferric oxide and insoluble mineral matter. The results (2) show that some of the geological formations are decidedly dolomitic and that others are very pure limestone. Great numbers of samples were found to carry over ninety p.c. of calcium carbonate and several exceeded ninety-five per cent. The results of a few analyses follow: the upper 10 feet of the 16-foot face of the quarry of H. ROBILLARD and Son on lot 22, concession 1, Gloucester township, carried 95.80 p.c. of calcium carbonate and the lower 6 feet 97 p.c.; the 30-foot face of the western pit of the Standard White Lime Company at Beachville, Oxford county, carried 96.37 p.c. of calcium carbonate; the lower part of the quarries of the Solvay Process Company near Amherstburg, Essex county, carried 97.08 p.c.; and brecciated limestone of lot 8, concession A, Carrick township, Bruce county, carried 97.08 p.c. calcium carbonate.

Magnesium Sulphate.—There are two small lakes on Kruger mountain from which in recent years large quantities of magnesium sulphate have been recovered. One of these lies on the British Columbia side of the International Boundary and has an area of about 70 acres. OLAF P. JENKINS in describing this lake in the *American Journal of Science*, volume 46, says that the brine at the time of his visit was so strong that it was heavy and slimy like the white of an egg. In the latter part of the summer the solution of epsomite is so concentrated that during the cool nights the salt crystallizes out.

Manganese.—Manganese minerals both primary and secondary occur on the northeast side of the valley of Kaslo creek in the Ainsworth mining division, British Columbia. A vein carrying rhodonite cuts the group of rocks known as the Kaslo volcanics. The secondary deposits are found on valley terraces and slopes. They consist of wad of very good grade. M. F. BANCROFT (1) describes four different types: (a) Unconsolidated wad forming the surface soil, in places covered by a thin layer of wood ashes from forest fires; (b) Layers of partly consolidated wad associated with other deposits derived by chemical precipitation from mineral-bearing solutions; (c) Hummock-like deposits, found near mineral springs and having abrupt lateral limits; (d) Concentrating or lumpy ore consisting of nodules and concretions of wad in beds of unconsolidated detrital material.

Mineral Springs.—The results of investigations of the mineral springs of Canada were published in 1918. JOHN SATTERLY and R. T. ELWORTHY (2) report on the radioactivity of the springs and R. T. ELWORTHY (2) reports on their chemical composition. The radioactivity of all the Canadian springs examined is lower on the average than that of the greater proportion of European springs that are celebrated for their curative properties. Until considerable experimental work has been done on the therapeutic value of waters of low radioactivity, it is difficult to estimate the precise value of most Canadian springs from a radio-therapeutic standpoint. Many are undoubtedly valuable, however, on account of their mineral constituents. Papers by JOHN SATTERLY and R. T. ELWORTHY on mineral springs were also published in volume 11 of the Transactions of the Royal Society of Canada.

Molybdenite.—Molybdenite occurs in the vicinity of Big Squaw lake, Huddersfield township, Quebec. J. AUSTEN BANCROFT (4) finds that the occurrences were developed under the influence of intense contact metamorphism. They are the result of mineralizing fluids and probably gases which emanated from a cooling granitoid magma and permeated crystallizing sedimentary rocks. The deposits are extremely irregular and erratic. E. L. BRUCE (1) describes molybdenite deposits found near Falcon lake, Manitoba. These occur in pegmatite dykes, in equigranular granitic dykes and in quartz veins. Information regarding the known molybdenite deposits of Ontario is presented by A. L. PARSONS (3). Many of these were examined personally and are described. As a guide to prospectors it is pointed out that the most favourable locations are near the borders of granite masses, particularly when these are in intrusive contact with crystalline limestone. A study of the modes of occurrence of molybdenite deposits was made by E. THOMSON and the results are presented in *Economic Geology*, volume 18. Three types are recognized:—

1. Associated with slightly more basic segregations in the granites, syenites, or gneisses of the Laurentian.
2. In intimate association with pyroxene in the "contact pyroxenite" of the Grenville series, or in the partially digested rock of this process of silicification.

3. In pegmatite dykes.

The molybdenite deposits of the Quyon district, Quebec, are described by M. E. WILSON in the *Canadian Mining Journal*, volume 39.

Moulding Sand.—Among the sand deposits investigated by L. H. COLE (2 and 6) was a deposit of moulding sand occurring near Brockville. The results of laboratory tests and of practical tests made in foundries showed that the Brockville sand is a suitable moulding sand for stove plate and similar light work in iron, but although the heavier castings made in it were all right, it would not be advisable to use it on very heavy work, as the possibility of its failure would be greater than the coarse sands in general use, owing to the fineness of its texture, with the resultant tendency to sinter when exposed repeatedly to the molten metal. It appears to answer all requirements for use in the general run of brass foundry work. With a little care in selection and grading at the pit, several grades uniform in texture could be obtained.

Notes are given by Mr. COLE on the methods of testing moulding sand and the qualities in a sand necessary to render it suitable for foundry work. Other uses of sand, particularly that consisting of nearly pure silica, are given. Very pure material is required for the manufacture of glass, carborundum, ferro-silicon and refractory brick.

Nickel.—In an interesting paper published in the *Transactions of the American Institute of Mining Engineers*, volume 59, HUGH M. ROBERTS and ROBERT DAVIS LONGYEAR describe the discovery by drilling of a large body of nickel ore concealed under a great thickness of unconsolidated material in the township of Falconbridge. With regard to the origin of this and other Sudbury deposits it is thought that the sulphides were carried downward with the norite differentiate of a magma intruded as a laccolith along a plane of unconformity beneath the Animikie sediments. As the norite consolidated the sulphides remained in solution and with an acid component of the magma made their way to the base of the norite. The sulphides were finally precipitated along the contact and the acid component solidified into granite. The paper was discussed at some length by geologists of repute.

A contribution to the discussion of the origin of the Sudbury deposits was made by W. H. GOODCHILD in *Economic Geology*, volume 13. GOODCHILD also contributed a series of articles to *Mining Magazine*, volumes 18 and 19, entitled "The Evolution of Ore Deposits from igneous magmas." "These articles are remarkable in many ways. They not only introduce an entirely new aspect of the problems of ore genesis, but they develop many interesting physical and molecular relationships and reactions in connection with mineral and rock formation. Of these reactions, the most important in their influence are the changes in volume following chemical combination or dissociation and allotropic modifications."

The geological relations of the Alexo nickel deposit of Dundonald and Clergue townships are described by M. B. BAKER (3). The ore lies at the contact of peridotite with lavas of earlier age and consists

for the most part of pyrrhotite and pentlandite with traces of chalcopyrite and pyrite.

Peridot.—This is a beautiful green transparent form of the mineral chrysolite, which, when cut and polished, forms a semi-precious gem. JOHN D. GALLOWAY (5) describes the occurrence of this variety of the mineral on Timothy mountain, British Columbia.

Petroleum and Natural Gas.—Owing to the increasing demand for gasoline and the prospects of a still greater demand in the future much attention has been given in recent years to the oil possibilities of Canada, particularly of the Cretaceous formations of Alberta, which have not yet been thoroughly prospected.

Among the most important of recent investigations are those made and reported on by S. E. SLIPPER and J. A. ALLAN (1). These show that the Belly River series of sediments extends northwest to beyond North Saskatchewan river, that from North Saskatchewan river southeast at least to the South Saskatchewan the series does not form a broad anticline as was formerly supposed, and that the geological sections from west to east show the formations in regular succession from the Paskapoo down to the Lower Pierre.

D. B. DOWLING in a short paper published in the Transactions of the Royal Society of Canada, volume 12, describes the broad general structure of the Cretaceous sediments of Manitoba, Saskatchewan and Alberta, and directs attention to the areas of greatest promise. In another article (1) he calls attention to a favourable terrace-like structure underlying a belt extending from Saskatchewan by way of Viking northwest to Athabaska river near Athabaska and to Peace river below the town of Peace River.

A section of the Cretaceous sediments exposed along Peace river is described by F. H. McLEARN (1), who also gives notes on the oil prospecting below Peace river. A. E. CAMERON (1) describes the sedimentary formations exposed along Hay river and around the western end of Great Slave lake.

The oil fields of Ontario are being carefully studied for evidences of structure that indicate where further explorations might be carried on with a prospect of success. M. Y. WILLIAMS (1 and 6) describes the Bothwell-Thamesville and Mosa oil fields and gives the results of a number of borings carried into the Trenton formation in Dover township. A consideration of the method of estimating gas reserves and of the exhaustion of gas fields is presented by G. R. MICKLE (3). Analyses of samples of Canadian petroleum and natural gas have been made and the results compiled by EDGAR STANSFIELD and J. H. H. NICOLLS (2).

Phosphate Rock.—A bed of phosphate averaging 12 inches in thickness is found in the Rocky Mountain quartzite in Sundance canyon and at other points near Banff in the Rocky Mountain park. This bed has been traced southward by HUGH S. DESCHMID (2) as far as Tent mountain, south of Crowsnest. Outcrops were observed at the end of Goat range, Spray lakes about 20 miles south of Banff; on Kananaskis range, Highwood pass; on Brulé creek 8 miles above its junction with Elk river; at Crowsnest a quarter of a mile west of the railway station; on Tent mountain 7 miles south of Crowsnest;

and on Livingstone range, 1 mile east of Lille. The phosphate bed becomes thinner and poorer in phosphoric acid the farther south it is traced, and changes from a more or less massive form to an agglomeration of small nodules of phosphate in a sandy or quartzitic matrix. On Tent mountain it is 3 inches thick and nodular, and the purest material runs only 47 per cent tricalcic phosphate.

Radium-bearing Minerals.—Euxenite, a radioactive mineral that, if found in sufficient quantities, should be of value as a source of radium and uranium, occurs in South Sherbrooke, Ontario. WILLET G. MILLER and CYRIL W. KNIGHT (3) describe it as occurring in a granite-pegmatite dyke cutting banded gneiss of Pre-Cambrian age. The euxenite is sparsely disseminated through the dyke, but is found more concentrated near the middle.

Road Materials.—The results of field and laboratory investigations of road materials have been presented as follows: between Ottawa and Prescott and between Hull and Grenville, by L. REINECKE (1); in a portion of Vaudreuil county, Quebec, and along the St. Lawrence river from the Quebec boundary to Cardinal, Ontario, by R. H. PICHER (1). K. A. CLARK presents the results of laboratory tests made of samples of road materials collected from quarries in the city of Montreal, from other parts of the province of Quebec and from different points in Ontario. A paper by L. REINECKE in *Economic Geology*, volume 13, describes the methods of carrying out investigations of non-bituminous materials for road construction and the laboratory tests to which such materials should be subjected to determine their relative suitability.

Silver.—In a discussion of a paper by E. S. BASTIN entitled "Significant mineralogical relations of the silver ores of Cobalt" J. A. REID points out in *Economic Geology*, volume 13, that the solutions from which the minerals were deposited were deep seated, probably had their origin in the diabase magma, and were probably alkaline in reaction. The observed evidence is against enrichment by descending solutions; there is slight apparent relation of the ore bodies to the surface, either past or present. KIRBY THOMAS in the *Mining and Scientific Press*, volume 117, points to the need of more intensive exploratory work in the outlying parts of what is commonly known as the Cobalt mining district.

A brief description is given by M. F. BANCROFT (1) of the geology of the Lardeau district, where silver-bearing lead-zinc ores form the most conspicuous and characteristic deposits, and by J. J. O'NEILL (1) of the argentiferous lead-zinc deposits of the Hazelton district. Notes on the silver deposits of British Columbia are found in the annual reports of the Resident Engineers of the Mineral Survey Districts (5).

Tungsten.—A description is given by J. S. DELURY in the *Canadian Mining Journal*, volume 39, of scheelite deposits found near Falcon lake in southeastern Manitoba. The ore occurs in lenses in a schist that has been intruded by granite and probably had its genesis in the granitic magma.

Miscellaneous.—A description is given by A. MAILHIOT (4) of a zinc-lead deposit of the interior of Gaspé county, Quebec, that

may prove to be of considerable economic value. Mr. MAILHOT (4) also describes the occurrence of stibnite in Bonaventure county, Quebec.

A number of papers were published during the year setting forth the fuel situation in Canada and giving short descriptions of the various fuel resources of the country. Among the most important of these were papers by JAMES WHITE in the publications of the Commission of Conservation, by B. F. HAANEL in the Canadian Engineer, volume 34, by W. J. DICK (6), and by D. B. DOWLING (6).

Papers on the peat resources of Canada and their fuel possibilities are presented by EUGENE HAANEL in the publications of the Commission of Conservation and by B. F. HAANEL in the Canadian Chemical Journal, volume 2. Notes on investigations of peat bogs in Quebec, New Brunswick and Ontario are given by A. ANREP (2).

A description is given by W. A. JOHNSTON (1) of the superficial deposits and soils along the Hudson Bay railroad from Pas to Limestone river. Of this distance swamp soils occur along approximately 185 miles; boulder clay soils, 27 miles; lake (stoneless) clay soils, 105 miles; esker and beach sand soils, 3.5 miles; and bedrock outcrop, 28 miles. Mr. JOHNSTON (1) also describes the occurrence on Swan river, Manitoba, of quartz sand composed of 96.42 p.c. of silica and carrying only 0.17 p.c. of iron.

A paper by STEPHEN TABER in the *Transactions of the American Institute of Mining Engineers*, volume 57, deals with the genesis of asbestos and asbestiform minerals. The theories set forth by Mr. TABER are discussed by J. C. BRANNER, JOHN A. DRESSER, R. P. D. GRAHAM and GEORGE P. MERRILL. The results of a careful study of the mineralogy of the serpentine belt of the Black Lake area are presented by EUGENE POITEVIN and R. P. D. GRAHAM (1).

The development of the Canadian magnesite industry is described by HAROLD J. ROAST (6) and information is given regarding the uses made of magnesite. The occurrences of magnesite and diatomaceous earth in the valley of Fraser river are briefly described by CHARLES CAMSELL (1).

Brief notes are presented by W. H. COLLINS (1) on mica and feldspar in the Lake Huron area, Ontario, by ROBERT HARVIE (1) on the mode of occurrence of chromite in the Thetford-Black Lake area, Quebec, and by J. STANSFIELD (1) on the soils and water supply of southeastern Saskatchewan; the use of pyrite in the sulphite mill is discussed by A. W. G. WILSON in the Canadian Chemical Journal, volume 2; and C. W. DRURY (6) makes a careful survey of the known and possible sources of potash.

IV.—AREA AND POPULATION.

Area by Provinces and Territories.—Table 1 shows the total area of the Dominion in land and water and the distribution into provinces and territories.

1.—Land and Water Area of Canada by Provinces and Territories as in 1919.

Provinces.	Land.	Water.	Total Land and Water.
	sq. miles.	sq. miles.	sq. miles.
Prince Edward Island.....	2,184	—	2,184
Nova Scotia.....	21,068	360	21,428
New Brunswick.....	27,911	74	27,985
Quebec.....	690,865	15,969	706,834
Ontario.....	365,880	41,382	407,262
Manitoba.....	231,926	19,906	251,832
Saskatchewan.....	243,382	8,318	251,700
Alberta.....	252,925	2,360	255,285
British Columbia.....	353,416	2,439	355,855
Yukon.....	206,427	649	207,076
Northwest Territories.....	1,207,926	34,298	1,242,224
Total.....	3,603,910	125,755	3,729,665

The water area is exclusive of Hudson bay, Ungava bay, the bay of Fundy, the gulf of St. Lawrence, and all other tidal waters, excepting that portion of the river St. Lawrence which is between Pointe-des-Monts in Saguenay and the foot of lake St. Peter in Quebec.

Increase of Population.—According to the corrected returns of the fifth Census, the total population on June 1, 1911, was 7,206,643, representing an increase of 1,835,328 since the previous Census of April 1, 1901. For the period covered, the rate of increase, viz., 34.17 p.c., was the largest in the world, and was due to the heavy tide of immigration which set in with the beginning of the present century. The countries next in order, in respect of the percentage rates of increase during the same decade, were: New Zealand 30.5, the United States 21, Australia 18, Germany 15.2, Holland 14.8, Switzerland 13.2, Denmark 12.6, Belgium 10.9, Austria 9.3, United Kingdom 9.1, Hungary 8.5, Sweden 7.5, Italy and Norway 6.8 and France 1.6. Ontario and Quebec continued to be the most largely populated of the nine provinces, the former having 2,523,274 and the latter 2,003,232 inhabitants. None of the other provinces had in 1911 reached half a million; but Saskatchewan had the third largest population with 492,432. All the provinces showed an increase since 1901, excepting Prince Edward Island, where the population had decreased by 9,531, or 9.23 p.c. The Yukon and Northwest Territories, with relatively sparse populations, showed decreases as compared with 1901. The greatest relative increase was in the western provinces, especially in Saskatchewan and Alberta.

Table 2 shows by provinces and territories the population of Canada, as returned by each decennial census from 1871,—the first taken since Confederation,—to the last decennial census of 1911.

2.—Population of Canada by Provinces and Territories in the Census years 1871 to 1911.

Canada...	2,139,973	1,682,922	3,821,995	456,151	1,786,606	1,598,042	3,384,648	188,564

NOTE.—The sign minus (−) denotes a decrease.

Sex Ratios.—The male population of Canada was returned as 3,821,995 and the female as 3,384,618; so that the excess of males over females is 437,347—an excess percentage of 13,—or of 130 males per 1,000 females. Reciprocally the number of females per 1,000 males is 886, the deficiency of females as compared with males being greater in Canada than probably in any other country. Amongst other countries showing a similar female deficiency per 1,000 males are Ceylon

(888), the Dominion of New Zealand (896), the Commonwealth of Australia (926), the Union of South Africa (941), the United States (943) and India (953). Excepting India and Ceylon, where female infanticide has prevailed, the countries named are new, and the proportions are affected by immigration in which the male element predominates. In England and Wales the number of females per 1,000 males was 1,068 both in 1911 and 1901, and only Norway shows a greater proportion, viz., 1,069. In other European countries the number of females per 1,000 males is: Scotland 1,063, Denmark 1,061, Sweden 1,046, Italy 1,037, Austria 1,036, France 1,035, Switzerland 1,031, Germany 1,026, Holland 1,021, Hungary 1,019, Belgium 1,017 and Ireland 1,004.

The proportions by provinces in Canada are shown in Table 8 for the two census years 1901 and 1911. For the latter year the number of females per 1,000 males for each province was: British Columbia 560, Manitoba 622, Alberta 673, Saskatchewan 688, Ontario 942, New Brunswick 956, Nova Scotia 961, Quebec 980 and Prince Edward Island 991. It will be seen that the disparity is especially marked in the western provinces.

Table 9 shows the percentage proportion of females to males in the rural and urban divisions of the population, respectively, for the census year 1911. Amongst the rural population the female element is in defect for Canada by 16.48 p.c., but amongst the urban population it is so by only 5.05 p.c. The defect is most marked in the western provinces. Of the urban population, in two out of the three Maritime Provinces, in Quebec and in Ontario, there is actually an excess of the female population, such excess being as high as 17.68 p.c. in Prince Edward Island. But in the west the female deficiency is again apparent, though (except as regards Saskatchewan) not to the same extent as in the rural population.

POPULATION OF THE PRAIRIE PROVINCES.

The Census and Statistics Act, 1905, provided for the taking of a census of population and agriculture in Manitoba, Saskatchewan and Alberta in 1906 and in every tenth year thereafter, thus instituting, in connection with the general decennial census for all Canada, a quinquennial census of population and agriculture for the three Prairie Provinces. The quinquennial census of Manitoba, Saskatchewan and Alberta was therefore taken as for June 1, 1916, and the complete results were published in a Report dated January 12, 1918. A summary of the principal data was published in the Year Book for 1918, pages 105–112.

Total Population of Prairie Provinces.—The male and female population of Manitoba, Saskatchewan and Alberta (a) by provinces; (b) by the electoral districts constituted by the Representation Act, 1914 (4-5 Geo. V, c. 51); and (c) by cities, towns and villages, as compared with the population by sex for 1911 and by totals for 1901 and 1906, was published in the Year Book of 1916-17 (pp. 95-105). The total population of the three Prairie Provinces in 1916 was returned as 1,698,220, compared with 1,328,725 in 1911, 808,863 in 1906 and 419,512 in 1901. Thus the population in the three provinces has increased by 1,278,708, or 305 p.c., since the beginning of the century; by 889,357, or 110 p.c., during the last ten years; and by 369,495, or 28 p.c., during the five years ended 1916. Table 11 shows the population of the Prairie Provinces for 1901, 1906, 1911 and 1916, the population being distinguished by sex for 1911 and 1916.

11.—Population of the Prairie Provinces, 1901, 1906, 1911 and 1916.

Total.....	419,512	808,863	768,775	559,950	1,328,725	935,652	762,528	1,698,220

Population by Sex.—Table 12 gives the population by sex from 1870 for Manitoba and from 1901 for Saskatchewan and Alberta, with absolute and relative comparisons. For the three provinces as a whole, males increased by 103·6 p.c. and females by 79·8 p.c. from 1901 to 1906. At the end of the next five years (1911) the ratio of increase for both sexes was nearly equal, being 64·88 p.c. for males and 63·44 p.c. for females, whereas in the last Census (1916) females gave, for the three provinces as a whole, an increase of 202,618, as against 166,877 for males, being a gain in five years of 36·19 p.c. for the former, as compared with 21·71 p.c. for the latter. The records of 1916 show that this feature of population increase was common to each of the three provinces. The increase per cent in Alberta was: females 45·53; males 23·78; Saskatchewan, females 41·52, males 24·70; Manitoba, females 24·30, males 16·42.

Population of Principal Cities.—Table 13 gives the population of the cities of the Prairie Provinces for 1901, 1906, 1911 and 1916, with distinction by sex for 1911 and 1916. Winnipeg remains the only city in the Prairie Provinces that has a population exceeding 100,000, and this city has grown from 136,035 in 1911 to 163,000 in 1916. Two cities have, however, risen to the category exceeding 50,000, viz., Calgary and Edmonton in Alberta. In 1916 Calgary is shown to have 56,514 inhabitants, as compared with 43,704 in 1911, and Edmonton 53,846, as compared with 30,479 in 1911. In the case of Edmonton, however, the increased population includes Strathcona, now forming part of the city of Edmonton South. Two cities exceed 20,000, viz., Regina (26,127) and Saskatoon (21,048). The former has receded from a population of 30,213 in 1911, and the latter has increased from 12,004 in 1911. Of the remaining twelve cities, three exceed 10,000, viz., Moosejaw, in Saskatchewan, with 16,934; Brandon, Manitoba, with 15,215; and St. Boniface, Manitoba, with 11,021.

VITAL STATISTICS.

Vital Statistics by Provinces.—Table 14 shows by provinces (New Brunswick excepted) the number of births, marriages and deaths in each of the years 1911 to 1918, according to the latest returns of the provincial registrars. Using the census figures of population for 1911, and estimates of the Dominion Bureau of Statistics for the years 1912 to 1918 (the census figures of 1916 for the three Prairie Provinces), crude birth-, marriage-, and death-rates per 1,000 of the population living have been calculated for each year, as well as the excess of births over deaths. For Prince Edward Island no data for the year 1912 are available. The figures by provinces in this table are not strictly comparable, owing to the diversity of practice which at present prevails as between the different provincial registrars. Not only is the statistical year not uniform for all the provinces, but there is no uniformity in the practice as regards the inclusion or exclusion of still-births. Thus, in Nova Scotia, Quebec and Ontario still-births are eliminated from the calculations; but in Prince Edward Island, the Prairie Provinces and British Columbia they are included, and for these provinces the numbers of still-births, which are too small to affect materially the birth- and death-rates calculated, are given in a note at the foot of the table.

Vital Statistics of Cities.—Table 15 records the number of births, marriages and deaths by principal cities for the years 1913 to 1918 in continuation of the tables given in previous editions. In this table the natural increase per 1,000 of the population is based upon the locally estimated population in all cases where given.

14.—Number of Births, Marriages and Deaths, by Provinces, 1911-1918.

Provinces.	Births.	Birth-rate per 1,000 living.	Marriages.	Marriage-rate per 1,000 living.	Deaths.	Death-rate per 1,000 living.	Excess of Births over Deaths.

IMMIGRATION.

Immigrant Arrivals.—For the fiscal year ended March 31, 1919, the number of immigrant arrivals in Canada was 57,702, as compared with 79,074 in 1918, 75,374 in 1917, 48,537 in 1916, 144,789 in 1915, and 384,878 in 1914, the year before the war broke out. Of the total who arrived in 1918-19, 9,914, or 17 p.c., came from the United Kingdom, 40,715, or 70 p.c., came from the United States, and 7,073, or 13 p.c., came from other countries. As shown by Table 16, the decrease in the number of immigrants in 1918-19 was entirely due to the falling off in arrivals from the United States, the number of United States immigrants being 40,715, as against 71,314 in 1917-18. The arrivals from the United Kingdom and from "Other Countries" both show an increase. Table 18 records the rejections and deportations of immigrant arrivals by principal causes for the years 1903 to 1919.

Chinese Immigration.—The conditions under which Chinese immigrants have been allowed to enter Canada have been described in previous issues of the Year Book (see edition for 1915, page 110). The number of Chinese who entered Canada during the three fiscal years ended March 31, 1919, has been much reduced owing to the operation of the Order in Council (renewed every six months since December 8, 1913), under which the landing in British Columbia of skilled and unskilled artisans and labourers is prohibited. In 1918-19 the number of Chinese immigrants who paid head tax was 4,066, as compared with 650 in 1917-18, 272 in 1916-17, 20 in 1915-16, and 1,155 in 1914-15. A record of Chinese immigration from 1886 to 1919 is given as Table 23.

V.—EDUCATION.

GENERAL FEATURES OF CANADIAN EDUCATION SYSTEM.

Under the British North America Act, 1867, the right to legislate on matters respecting education was reserved exclusively to the provincial legislatures, subject to the maintenance of the rights and privileges of the denominational and separate schools as existing at the time of union or admission of provinces. In general there are two fundamental systems of education throughout Canada, one that of the Protestant communities, free from the control of religious bodies, and the other that of the Roman Catholic French and Irish communities in which education is united with the religious teaching of the Roman Catholic Church. In Ontario, Roman Catholics, Protestants and coloured people have each the right to establish "Separate Schools" for elementary education, the local rates for the support of these schools being separately levied and applied. In Quebec, the religious minority in any municipality, whether Roman Catholic or Protestant (the Jews being "Protestants" for all the purposes of the School Law), may dissent and maintain its own elementary and model schools and academies or high schools, the taxation of the minority being separate from that of the majority for the

¹ A full description, by provinces, of the Education System of Canada was included in the Canada Year Book of 1916-17, pages 118-175. A summary of the statistics of illiteracy and school attendance in Canada for 1910, as returned by the Census of 1911, was published in the Year Book of 1914, pages 92-93.

three classes of school. That is to say, the separate system is complete. In Saskatchewan and Alberta a separate school may be established by the minority, whether Protestant or Roman Catholic, subject, however, to identical regulations as to courses, certificates, inspection, etc. In the remaining provinces there are special provisions for the education of Roman Catholics in the larger cities and towns.

In all the provinces the cost of education is defrayed from the public revenues, provincial and local, and public elementary education is free to parents or guardians, except for certain small fees which are payable in parts of the province of Quebec. With the exception of Quebec all the provinces have laws of compulsory education, but under conditions that differ as between one province and another. As a rule, the provincial laws provide for uniformity in the training of teachers, the use of text books and the grading of pupils. Secondary schools or departments, and colleges or universities for higher education, exist under government control in all the provinces, and the three classes of teaching institution are more or less co-ordinated to allow of natural transition from the lower to the higher. School terms and holidays are arranged to suit climatic and other local conditions; and it is frequently possible for students to work their own way through college and university. Arrangements for the superannuation of teachers are applied in Nova Scotia, New Brunswick, Quebec and Ontario.

Recent movements in the direction of nature study, manual instruction, school gardens, agriculture, domestic science and technical education are all energetically in progress, and in the more progressive provinces the higher education of women is an important feature of university life.

HIGHER EDUCATION IN CANADA.

Higher education in Canada is provided for by a number of universities and colleges. Of the universities, Toronto, McGill (Montreal), and the University of Montreal, are the largest, and with Queen's University (Kingston, Ont.) and Dalhousie University (Halifax, N.S.) take national rank. The oldest university in Canada, viz., King's College, Windsor, Nova Scotia, dates from 1789, and claims to be also the oldest university in His Majesty's Overseas Dominions. Several of the universities are affiliated to the older universities of the mother country, viz., Oxford, Cambridge and Dublin, whilst some of the smaller Canadian universities, as well as most of the colleges, are affiliated to either Toronto or McGill. In the West, provincial universities have been established for Manitoba at Winnipeg (1877), Saskatchewan at Saskatoon (1907), Alberta at Edmonton (1906) and British Columbia at Vancouver (1907).

Some of the universities and colleges are under the control of religious denominations as follows:—

Anglican or Church of England in Canada:—King's College, Windsor, N.S.; University of Bishop's College, Lennoxville, Quebec; University of Trinity College, Toronto; Wycliffe College, Toronto; and Emmanuel College, Saskatoon.

Roman Catholic Church:—University of St. Francis Xavier's College, Antigonish, N.S.; University of St. Joseph's College, St. Joseph, N.B.; Laval University, Quebec; University of Montreal, Montreal; University of Ottawa; St. Michael's College, Toronto.

Other Denominations:—Knox College, Toronto (Presbyterian); Mount Allison University, Sackville, N.B., Victoria University, Toronto, and Wesley College, Winnipeg (Methodist); Acadia University, Wolfville, N.S., McMaster University, Toronto, and Brandon College, Brandon, Manitoba (Baptist).

EDUCATION STATISTICS OF CANADA.

There being at present no effective co-ordination of education statistics it is difficult to construct comparative tables for Canada. In the first place, the year to which the statistics relate differs according to province. Thus the school year ended June 30 is adopted for statistical purposes by New Brunswick, Quebec, Manitoba and British Columbia; the education year for Nova Scotia ends on July 31; and the calendar year ended December 31 is selected by Prince Edward Island, Ontario, Saskatchewan and Alberta.

Statistics of Public Schools.—In the tables numbered 1 to 10 an attempt is, however, made to bring together by provinces (1) the number of publicly controlled schools, teachers and pupils, with the average attendance of the pupils; (2) the number of teachers and pupils in normal and model schools for the training of teachers; (3) statistics of secondary schools so far as they are separately given; (4) the amount of receipts and expenditure for public education under the school law of each province and (5) the average annual salaries of teachers by provinces.

In Table 1 the number of schools, teachers and pupils in the three Atlantic provinces (Prince Edward Island, Nova Scotia and New Brunswick) includes both elementary and secondary schools or grades; in Nova Scotia the term "school" has a technical significance, being applied to a class with one teacher, irrespective of the number of classes in a school building. In Quebec and Ontario the statistics in Table 1 apply only to elementary schools; but again in Manitoba and in Alberta no line is drawn between the elementary and secondary Schools. In Manitoba the sex of the pupils is not separately distinguished. Statistics of secondary education are separately available for Quebec, Ontario and British Columbia, and

partially so for Saskatchewan. They are given in Tables 3, 4, 5, 6 and 7. The academiés of Quebec are generally similar to the collegiate institutes and high schools in Ontario, and the Quebec model schools are intermediate between the elementary school and the academy.

Growth of Expenditure on Public Education.—Probably the most remarkable feature of these statistics is the extraordinary growth during the present century of the expenditure upon public education. In 1901, the first year of the century, the total expenditure for the purposes of public education in Canada was \$11,751,625; in 1918, the latest year for which complete figures for all the provinces are available, it was \$61,533,520, an increase of \$49,781,895, or 424 p.c.

Statistics of Higher Education.—In Tables 11–16 are presented statistical particulars relating to the universities and colleges of Canada, which are summarized from information furnished by each of the institutions mentioned. Tables 11 and 14 give the dates of foundation, the affiliation, the faculties and degrees; Tables 12 and 15, the number of teaching staff and students, and Tables 13 and 16, statistics of property, income and expenditure. For 19 of the 22 universities in Table 13 the total value of the endowments and property in land, buildings, equipment, etc., amounts to \$50,553,186. For these 19 universities the total income amounts to \$4,324,012, of which \$898,336 are derived from fees and \$3,425,676 from investments, government grants and other sources. The total expenditure of the same universities amounts to \$4,328,276.

NOTE.—From 1901 to 1905, inclusive, the Summary for Canada comprised the seven provinces of Prince Edward Island, Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba and British Columbia. The two provinces of Saskatchewan and Alberta were formed in 1905, and from 1906 all the nine provinces are included, with the exception of Manitoba for 1912, when no Education Report was issued by that province. In 1907 and 1908 the sex of the teachers in Saskatchewan was not given, and in Manitoba the sex of the pupils was not given for any of the years. In the Summary, therefore, these defects are indicated by printing the totals in italics. A general summary for 1918 for all elementary and secondary schools under public control is given in Table 8, page 140.

¹ These classes are designed principally for the purpose of giving teachers from the United Kingdom and United States a short period of training in the special requirements of the Alberta Department of Education. In 1918 a class was added for the purpose of enabling second class teachers to train for a higher professional certificate.

Notes.—The salaries of teachers are computed in each case from the statements by the provincial reports of the number and average salary of each grade of teacher. Lay teachers only are included in calculating the average salaries for Quebec.

In applying weights in calculating partial totals, the provinces have been taken to exclude the missing provinces in each case.

Elementary and secondary "grades" here should not be confused with elementary and secondary "schools" in the preceding tables. Work of secondary grade is often taken in elementary schools.

The cost per pupil does not include debentures or promissory notes so far as these can be ascertained.

*The figures marked with an asterisk are close approximations.

			Third class.....	941	860

¹According to regulations, a teacher, though holding a first class license, can draw first class pay only if he be a principal of a first class school, or a vice-principal of a school of six or more departments. All other first class teachers receive only second class pay. This arrangement lowers considerably the average salaries of teachers of the highest class.

² In the figures for Quebec lay teachers only are included.

³ In Saskatchewan only elementary school teachers are included.

¹ 1917-18.

VI.—CLIMATE AND METEOROLOGY.

THE WEATHER OF CANADA DURING THE YEAR 1918.

Information furnished by the Dominion Meteorological Service, Toronto.

JANUARY.

Temperature.—In the Yukon the mean temperatures were from 5° to 9° above normal and in the greater part of British Columbia 3° to 6° above normal. In the Prairie Provinces the mean temperature was 3° to 6° below normal, except near the Hudson Bay where it was normal. In the Peninsula of Ontario the deficiency was 12° . In Western Quebec the temperatures were 3° to 6° below normal but on the North Shore of the Gulf were above normal.

Precipitation.—Much more than the normal precipitation occurred from Central British Columbia eastward to Manitoba. Over the greater portion of Ontario and Western Quebec there was a deficiency of 5 to 35 per cent. In the East Central Counties of Ontario and the Lower St. Lawrence and Gulf region the precipitation was 40 to 50 per cent in excess. In the Maritime Provinces approximately two-thirds of the normal were recorded.

Winds and Bright Sunshine.—On the British Columbia Coast there were gales on 2 to 6 days and the general direction was easterly. In the Great Lakes region there were gales on 2 to 6 days; the prevailing direction was southwesterly. Gales occurred on 12 days in the Bay of Fundy region, and elsewhere in the Maritime Provinces and in Quebec on 3 to 9 days, the prevailing direction west to northwest.

In southern British Columbia the amount of bright sunshine was nearly normal or slightly below. From Edmonton to Winnipeg less than the normal amount was recorded, the deficiency being generally more than 10 per cent. In Ontario there was an excess of 5 to 20 per cent, elsewhere there was generally a small deficiency.

FEBRUARY.

Temperature.—In the southern districts of the Prairie Provinces the mean temperatures were from 2° to 7° above normal. In British Columbia and the north districts of the Prairie Provinces temperatures lower than normal were recorded. The deficiency was especially marked from Lake Winnipeg to Port Nelson. In Southern Ontario the difference from average was small, as was also the case in Western Quebec. In Northwestern Ontario and Northern Quebec temperatures lower than 7° below normal were recorded. In New Brunswick and Prince Edward Island the deficiency was for the most part 3° to 6° .

Precipitation.—Over the greater portion of the Dominion considerably more than the normal precipitation was recorded, the exceptions being Eastern and Northern Quebec, New Brunswick, Manitoba and Northern Saskatchewan.

Winds and Bright Sunshine.—On the coast of British Columbia gales occurred on 3 to 6 days and the prevailing direction was east to southeast. West and northwest winds prevailed over the remainder of the country except in Nova Scotia, where the prevailing direction was southwest. Gales occurred in the Great Lakes region on 3 to 6 days and in Quebec and the Maritime Provinces from 5 to 15 days. In British Columbia there was a general excess of bright sunshine and elsewhere in the Dominion a general deficiency.

MARCH.

Temperature.—In Southern British Columbia mean temperatures were 3° to 5° below normal and in Northern British Columbia and in the Yukon 7° to 13° below normal. Over the greater part of the Prairie Provinces there was a very large excess over normal temperature amounting to 15° to 18° in Southern Manitoba. Eastward the excess diminished to zero in Middle Quebec. In Lower Quebec and the Maritime Provinces there was a deficiency from 3° to 6° .

Precipitation.—In British Columbia, Central Alberta, Northwestern Saskatchewan and the far North of Manitoba precipitation was considerably in excess. From Southern Manitoba to the Atlantic Coast there was a general and considerable deficiency.

Winds and Bright Sunshine.—On the Southern British Columbian Coast gales occurred on 4 to 7 days, in the Prairie Provinces on 1 to 6 days, and in Quebec and the Maritime Provinces on 4 to 9 days in most districts. The prevailing direction in Quebec and the Maritime Provinces was northwest, elsewhere it was very irregular. In Alberta, Western Manitoba and the Maritime Provinces there was a small excess over the normal amount of sunshine and in the greater part of Ontario a considerable excess; elsewhere there was a small deficiency.

APRIL.

Temperature.—In Southern British Columbia and Southern Alberta the temperature was nearly normal, but in Northern British Columbia, the Southern Yukon and the Mackenzie basin was from 2° to 6° below normal. In Saskatchewan and Manitoba, the Qu'Appelle and Assiniboine and North and South Saskatchewan basins recorded temperatures 2° to 6° higher than normal. The Nelson and Albany basins were normal or slightly cooler. New Brunswick, the Gaspé basin, and the Peninsula of Ontario were also normal, but the Moose River and the Abitibi regions were 2° to 5° warmer than normal. In Nova Scotia and Prince Edward Island the deficiency was 2° to 4°.

Precipitation.—There was a deficiency over the most of the Dominion, which was quite marked in British Columbia and the Peace River region, the Ottawa Valley and Nova Scotia. In Saskatchewan there was a large excess over normal.

Winds and Bright Sunshine.—Winds attained the force of a gale on comparatively few days and the prevailing direction was either northeast or northwest. In British Columbia and Alberta and Northern Ontario there was a considerable excess of bright sunshine. Elsewhere there was a general but small excess.

MAY.

Temperature.—Temperatures very much lower than normal were recorded in the Nelson and Athabaska regions, but elsewhere west of Lake Superior the differences from average although negative were small. East of Lake Huron there was a general excess of 2° to 4°.

Precipitation.—In Alberta, Saskatchewan, Southern British Columbia, the Red River basin of Manitoba and in Nova Scotia there was a deficiency of 35 to 50 per cent of the normal. In Quebec, New Brunswick and the Dauphin district of Manitoba there was an excess amounting to 20 to 40 per cent.

Winds and Bright Sunshine.—In the St. Lawrence Region there were gales on 5 to 7 days, elsewhere few or none. South and southwest winds predominated from Southern Ontario to the Atlantic. Except at Victoria where the excess was 20 per cent of the normal there were no large differences from the normal amount of sunshine. Except in Alberta and British Columbia the differences were negative.

JUNE.

Temperature.—In Southern Saskatchewan, Southern Alberta and the Lower Fraser Valley temperatures were generally 3° to 6° above normal. Elsewhere the differences from normal were negative and in the Lower Nelson and the Mackenzie region ranged from 5° to 9°.

Precipitation.—In Nova Scotia the precipitation was normal; and in Quebec and New Brunswick and locally in Ontario exceeded the normal. The excess in Quebec was large. Elsewhere in Canada there was a very general deficiency, which amounted in Alberta, Saskatchewan and Southern Manitoba to 20 to 75 per cent.

Winds and Bright Sunshine.—In Quebec and the Maritime Provinces there were gales on 4 to 9 days. From Southern Ontario to the Atlantic the winds were

for the most part from the southwest and in Western Canada from the northwest except in Northern districts, where the northeast and southwest directions predominated. In British Columbia and Southern Alberta there was a notable excess of bright sunshine.

JULY.

Temperature.—The temperature of July did not greatly differ from average except in the far northern districts of the Prairie Provinces and of Ontario and Quebec where there was a deficiency of 4° to 7° . Elsewhere differences were generally less than 2° .

Precipitation.—The deficiency of rainfall continued large over the greater area of the Prairie Provinces and was still larger in Southern Ontario.

Winds and Bright Sunshine.—There were few gales during this month and the direction of the wind was very variable. In the interior valleys of British Columbia, and in the Maritime Provinces there was a considerable deficiency of bright sunshine and a less marked deficiency in Manitoba.

AUGUST.

Temperature.—Locally in Southern Ontario the mean temperatures were 4° or 5° above normal. Elsewhere the differences from normal were generally less than 2° .

Precipitation.—August was very wet in British Columbia and considerably more than the normal rainfall was recorded in Manitoba, Southern Ontario and locally in Alberta. Over a great part of Saskatchewan and in Quebec and the Maritime Provinces there was a deficiency.

Winds and Bright Sunshine.—Gales were few and of local occurrence in August. There were no large differences from the normal amount of bright sunshine except locally in Southern Ontario, where there were excesses of 10 to 20 per cent.

SEPTEMBER.

Temperature.—In British Columbia and Western Alberta mean temperatures were 2° to 8° above normal, the largest differences occurring in Southern British Columbia. The basin of the Saskatchewan River was normal, but east of this temperatures were below normal and over a great part of Ontario were 8° lower than normal. In Quebec the deficiency was 2° to 4° , while parts of Nova Scotia were warmer than is normal.

Precipitation.—In British Columbia, Alberta and Saskatchewan and most of Manitoba there was a large deficiency, while from Southern Ontario to the Atlantic there was an equally large excess.

Winds and Bright Sunshine.—In the Lower St. Lawrence region and in the Maritime Provinces gales were recorded on 3 to 6 days. In British Columbia and Northern Alberta there was a very large excess of bright sunshine, and in Ontario, Quebec and New Brunswick a large deficiency.

OCTOBER.

Temperature.—In the James Bay region of Ontario, the basins of the Athabaska, Peace and Mackenzie, the mean temperatures were 2° to 5° below normal, but elsewhere in Canada they were generally in excess of the normal by the same amount.

Precipitation.—In British Columbia and the Maritime Provinces there was a considerable excess over normal. In Alberta, Western Saskatchewan and the Red River basin of Manitoba there was a considerable deficiency as also in the peninsula of Ontario, and the Lower St. Lawrence and Gulf region of Quebec. In Northern Ontario, the Ottawa and Upper St. Lawrence Valleys there was a large excess.

Winds and Bright Sunshine.—There were gales on 2 to 6 days on the British Columbian coast and on 1 or 2 days on the Great Lakes. They were of general occurrence on 2 to 6 days in the St. Lawrence and Maritime region and of local occurrence more frequently. In British Columbia, Ontario, Quebec and New Brunswick there was a fairly general deficiency of bright sunshine.

NOVEMBER.

Temperature.—With the exception of the Maritime Provinces and Southern British Columbia, November was considerably warmer than normal throughout the Dominion. In the Prairie Provinces and Northwestern Ontario there were large areas with mean temperatures 8° to 10° above normal and in Southern Ontario and Northwestern Quebec 4° to 6° above.

Precipitation.—In Manitoba and the adjoining region of Ontario there was a considerable excess over normal precipitation. In the Maritime Provinces the normal amount was recorded. Elsewhere there was a fairly general deficiency.

Winds and Bright Sunshine.—Gales occurred on 3 to 8 days on the British Columbian coast, on 3 days in the Lakes region, and on 3 days on the St. Lawrence, and were of general occurrence on the 14th, 19th and 26th in the Maritime Provinces, while local gales were recorded on several days. Bright sunshine was very irregularly distributed, areas of excess and areas of deficiency occurring in all provinces.

DECEMBER.

Temperature.—From Western New Brunswick to the Rocky Mountains temperatures were higher than normal. In the Prairie Provinces the excess was 3° to 9° .

Precipitation.—In most districts of Western Canada there was more than the normal precipitation, but in Lower Quebec and the Maritime Provinces most districts reported a deficiency.

Winds and Bright Sunshine.—Gales occurred on the British Columbian Coast on 2 to 6 days, on the Great Lakes on the 2nd and 10th, in Quebec and New Brunswick on the 1st and 25th, and on three or four days in Nova Scotia. Gales of more local occurrence were recorded on several other days on the Atlantic Coast. The amount of bright sunshine was deficient by 10 per cent locally in Alberta, Eastern Saskatchewan, Manitoba, and Prince Edward Island, and in excess by the same amount in Southern Vancouver Island and in the Lower Fraser Valley.

TEMPERATURE AND PRECIPITATION.

TEMPERATURE.—At the Stations of the Dominion Meteorological Service the highest and lowest temperature in each 24 hours, termed respectively the maximum and the minimum, are recorded by self-registering thermometers. For any month the sum of the daily maxima, divided by the number of days of the month, is the mean maximum temperature of that month. The mean minimum temperature is obtained in a similar manner. The half sum of the mean maximum and the mean minimum is called the mean temperature. The averages of these results for any particular month over a period of years are the average means for that period and are used as normal means or temperatures of reference. The highest and lowest temperatures recorded during the whole period of years are termed the extreme maximum and extreme minimum respectively. These latter figures are of course to be regarded as extraordinary, the more unlikely to recur the longer the period from which they have been derived. Temperatures below zero have the minus sign (—) prefixed. The mean winter temperature is based on the records of January, February, March, November and December, and the mean summer temperature is based on those of June, July and August.

PRECIPITATION.—Under the collective term "precipitation" is included all moisture which has been precipitated from the atmosphere upon the earth: rain, snow, hail, sleet, etc. The amount of moisture is conveniently measured by determining the depth to which it has accumulated upon an impervious surface, and is always expressed in inches of depth. The total depth of snow is tabulated separately, but is added to the depth of rain after division by ten. An extended series of experiments in melting and measuring snow having been collated, the rule was deduced that a given fall of snow will, in melting, diminish on the average to one-tenth of its original depth. This rule is used in practice. All solid forms of precipitation other than snow are included in the tables of rain.

WEATHER OF THE YEAR 1918.

VII.—PRODUCTION.

In this section are included the statistics of agriculture, forestry, fisheries, minerals, manufactures and water powers.

AGRICULTURE.

Field Crops, 1915-19.—The agricultural statistics of 1919 for all the nine provinces of Canada were collected in co-operation with the Provincial Governments under the system applied for the first time in 1917. In general, therefore, the reports of both the Dominion and Provincial Governments on the crops of 1919 record identical results. In Table 1 are presented for Canada and by provinces estimates of the area, yield, quality and value of the principal field crops for each of the five years 1915 to 1919. In consulting this table it should be remembered that comparability is affected by the new and improved methods applied in 1917 for the provinces of Quebec, Saskatchewan, Alberta and British Columbia, and in 1918 and 1919 for all the provinces. In many cases the areas, as established by the new method, show considerable increases, and it is not possible to ascertain to what extent these may be due to actual expansion. Probably the larger part of the increase shown in each case is the result of greater accuracy in the method of collection.

Season of 1918.—At first, conditions were favourable, as an early spring and good weather enabled seeding to be completed in excellent time, whilst the area sown to wheat, viz., 17,353,902 acres, was the largest on record. In the West, however, May was exceptionally cold, with heavy frost retarding growth. In June, drought and high winds caused drifting, and large areas had to be resown. The drought in the West continued until towards the end of July, and serious damage to wheat in the blossom stage was caused by heavy frosts from July 23 to 25. In the Maritime Provinces, Quebec and Ontario, the conditions were generally favourable, and the harvest was good. Ontario, especially, had an excellent season for the second year in succession.

Season of 1919.—The season opened tardily and practically no seeding had been done in the Maritime Provinces and Quebec at the end of April. In Ontario very little had been done, as heavy snowfalls during the last week of April had left the land too wet for tillage. In the Prairie Provinces, although the spring opened late, about 60 p.c. of seeding was completed by May 1st. At the end of June the condition of the principal grain crops indicated that for the fourth successive year the yields of the Dominion would be below the average of the previous ten years. In Manitoba and Ontario warm rains and generally favourable weather gave promise of a good harvest. In the Maritime Provinces and Quebec the conditions also were generally favourable and the harvest was good. In consequence of a continuation of the drought throughout July the condition of the

grain crops in Alberta and Saskatchewan was lower at the end of July than at the end of June. The results of harvesting showed poor to very poor yields in the southern parts of these provinces, and poor to good in the northern districts.

Yield of Field Crops.—The total yield of wheat for all Canada in 1919 was returned as 193,260,400 bushels from 19,125,968 acres, an average yield of 10 bushels per acre. In 1918 the corresponding figures were 189,075,350 bushels from 17,353,902 acres, a yield per acre of 11 bushels. The yield of oats in 1919 was 394,387,000 bushels from 14,952,114 acres, an average of $26\frac{1}{4}$ bushels, as compared with 426,312,500 bushels from 14,790,336 acres, an average of $28\frac{3}{4}$ bushels per acre. Barley gave a return in 1919 of 56,389,400 bushels from 2,645,509 acres, an average per acre of $21\frac{1}{4}$ bushels, as compared with 77,287,240 bushels from 3,153,711 acres in 1918, an average of $24\frac{1}{2}$ bushels per acre. Of the remaining crops the total yields in 1919 were in bushels as follows, (the figures in 1918 being given within brackets): Rye, 10,207,400 (8,504,400); peas 3,406,300 (4,313,400); beans 1,388,600 (3,563,380); buckwheat 10,550,800 (11,375,500); mixed grains 27,851,700 (35,662,300); flax 5,472,800 (6,055,200); corn for husking 16,940,500 (14,205,200); potatoes 125,574,900 (104,346,200); turnips, mangolds, carrots, etc. 112,288,600 (122,699,600). In 1919 there were produced 16,348,000 tons of hay and clover, as compared with 14,772,300 tons in 1918. Fodder corn gave a yield of 4,942,760 tons in 1919, as against 4,787,500 tons in the previous year. The yield of sugar beets increased from 180,000 tons in 1918 to 240,000 tons. The area devoted to the growing of alfalfa has increased from 196,428 acres in 1918 to 226,869 acres in 1919 and the yield from 446,400 tons to 494,200 tons. The average yields per acre of these crops in 1919, (with 1918 averages in brackets), were, in bushels, as follows: Rye $13\frac{1}{2}$ ($15\frac{1}{4}$); peas $14\frac{3}{4}$ ($18\frac{1}{4}$); beans $16\frac{1}{2}$ ($15\frac{3}{4}$); buckwheat $23\frac{1}{2}$ ($20\frac{3}{4}$); mixed grains 31 ($38\frac{3}{4}$); flax 5 ($5\frac{3}{4}$); corn for husking $64\frac{1}{2}$ ($56\frac{3}{4}$); potatoes $153\frac{1}{2}$ (142); turnips, etc., 354 ($377\frac{1}{2}$). Hay in 1919 gave an average yield of 1.55 ton per acre, fodder corn of 9.75, sugar beets of 9.80 and alfalfa of 2.20 tons, as compared with 1.40 ton for hay, 9.50 for fodder corn, 10 for sugar beets and 2.25 tons for alfalfa in 1918. Table 2 is a statement of the average yields per acre for each of the years 1915 to 1919, with the decennial averages for 1909-18 and 1910-19.

Values of Field Crops.—The average values per bushel of grain crops at point of production, for Canada in 1919, according to the prices returned by crop correspondents, were as follows: Fall wheat \$1.97, as against \$2.08 in the two previous years; spring wheat \$1.88, as against \$2.02 in 1918 and \$1.93 in 1917; all wheat \$1.89, as compared with \$2.02 in 1918 and \$1.94 in 1917; oats 80 cents in 1919, 78 cents in 1918 and 69 cents in 1917; barley \$1.37, as compared with \$1 and \$1.08 in 1918 and 1917; rye \$1.40, as compared with \$1.49 in 1918 and \$1.62 in 1917; peas \$2.86, as compared with \$3 in 1918 and \$3.54 in 1917; beans \$4.48, as compared with \$5.41 and \$7.45 respectively in 1918 and 1917; buckwheat \$1.50, as compared with 1.58 in 1918 and \$1.46 in 1917; flax, \$4.13, as against \$3.13 in

1918 and \$2.65 in 1917; and corn for husking \$1.30, as against \$1.75 and \$1.84 in 1918 and 1917 respectively. The price per bushel of potatoes in 1919, as returned on October 31, was 95 cents, as against 98 cents in 1918 and \$1.01 in 1917; turnips, etc., are placed at 50 cents per bushel, as compared with 43 cents in 1918 and 46 cents in 1917. Hay and clover were valued at \$20.72 per ton in 1919, as against \$16.25 per ton in 1918 and \$10.33 in 1917; fodder corn at \$6.92 in 1919, as compared with \$6.15 in 1918 and \$5.14 in 1917; sugar beets \$10.86 per ton, as compared with \$10.25 in 1918 and \$6.75 in 1917. The price of alfalfa in 1919 per ton is \$21.85, as compared with \$17.84 in 1918 and \$11.59 in 1917. The values of grain are based upon average prices reported by crop correspondents in December, those of potato, root and fodder crops were reported at the end of October.

The total values on farms in 1919 of the principal field crops were estimated as follows, the corresponding values for 1918 being given within brackets: Wheat \$364,857,000 (\$381,677,700); oats \$317,097,000 (\$331,357,400); barley \$77,462,700 (\$77,378,670); rye \$14,240,000 (\$12,728,600); peas \$9,739,300 (\$12,899,100); beans \$6,214,800 (\$19,283,900); buckwheat \$15,831,000 (\$18,018,100); mixed grains \$37,775,400 (\$40,726,500); flax \$22,609,500 (\$18,951,000); corn for husking \$22,080,000 (\$24,902,800); potatoes \$118,894,200 (\$102,235,300); turnips, etc. \$54,958,700 (\$52,252,000); hay and clover \$338,713,200 (\$241,277,300); fodder corn \$34,179,500 (\$29,439,100); sugar beets \$2,606,000 (\$1,845,000); alfalfa \$10,800,200 (\$7,963,500).

The aggregate value of all field crops in 1919 was estimated at \$1,452,437,500, as compared with a total value of \$1,372,935,970 in 1918 and of \$1,144,636,450 in 1917. Both the acreage under crops and the value of crops produced was the highest on record. The aggregate value of all field crops exceeded that of 1918 by \$79,501,530, or $5\frac{3}{4}$ p.c., and that of 1917 by \$307,801,050, or 27 p.c.

Wheat, Oats, Barley and Flax in the Prairie Provinces.—In the three Prairie Provinces of Manitoba, Saskatchewan and Alberta, the production of wheat in 1919 was estimated at 165,544,300 bushels, as compared with 164,436,100 bushels in 1918; of oats at 235,580,000 bushels, as compared with 222,049,500 bushels; of barley at 36,682,400 bushels, compared with 47,607,400 bushels, and of flaxseed at 5,232,300 bushels, compared with 5,776,000 bushels. The estimated wheat production of 1919 in Manitoba was 48,191,100 bushels from 2,983,702 acres, in Saskatchewan 117,921,300 bushels from 8,273,250 acres and in Alberta 34,575,000 bushels from 4,282,503 acres.

Comparative Value of Field Crops, 1918 and 1919.—

Table 5 gives the results of calculations intended to show for each of the principal field crops the increase or decrease in total value for 1919 as compared with 1918 that was due to (a) difference in price and (b) difference in quantity. Thus, for wheat, the actual value in 1919 was \$364,857,000. If the prices of 1918 had continued to prevail in 1919 the value would have been \$390,612,000, or \$25,755,000 more than it actually was. The production being somewhat larger in 1919 than in 1918, the value from this cause was more by \$8,944,000; so that the net decrease of value in 1919 was \$16,811,000. Similarly, with regard to the total value of all the field crops, their value in 1919 was \$1,452,438,000, as compared with \$1,372,927,000 in 1918. At the prices of 1918, the value in 1919 would have been \$1,365,842,000, a decrease of \$7,085,000 instead of a net increase of \$79,511,000. Of the net difference, \$86,596,000 was an increase due to higher prices and \$7,085,000 was a decrease due to smaller quantities. The actual increase was in the percentage ratio of 5.8; the increase due to higher prices was 6.3 p.c. and the decrease due to smaller quantities was at the rate of 0.5 p.c.

5.—Field Crops of Canada, compared as to Quantity and Value, for 1918 and 1919. ("000" omitted.)

Quality of Grain Crops, 1910-1919.—Table 6 gives the average weight per measured bushel for each of the principal grain crops from 1910 to 1919, with the ten-year average for the period. It shows that for fall wheat the weight in 1918 and 1919 was about 61.2 lb., which is above the decennial average of 60.22 lb. For spring wheat the average, 59.11 lb., was reached or exceeded in six years out of the ten and for all wheat seven years out of the ten, the average being 59.38 lb. The average of 35.17 lb. for oats was reached or exceeded for seven years out of the ten and for barley (average 47.23 lb.) five years out of the ten. For the remaining crops the decennial averages are as follows, the number of times the average was exceeded being placed within brackets: Rye 55.22 lb. (5); peas 59.57 lb. (8); beans 59.50 lb. (7); buckwheat 47.68 lb. (4); mixed grains 44.90 (5); flax 55.03 lb. (4); corn for husking 56.00 lb. (6).

Farm Live Stock.—Statistics of the numbers of farm live stock in Canada in 1919 were collected from individual farmers throughout Canada in June and July last, and the replies received form the basis for the estimation of total numbers. The schedule embraced all descriptions of farm live stock including poultry, horses and cattle being classified by ages. In Table 7 are given, by provinces, the totals, as jointly estimated by the statistical authorities of the Dominion and Provincial Governments for the year 1919, with comparative figures of the previous year. For horses and cattle the numbers for 1919 constitute the highest on record. Sheep show a further very satisfactory increase since the annual decline in numbers was arrested in 1917. This total for 1919 is the highest on record, and compares with 3,155,509, the number recorded in 1871 by the first Census after Confederation. Swine show a decrease of 249,612, as compared with the record number of 4,289,682 in

1918. In Table 8 are given the comparative totals for horses, cattle, sheep and swine for the six years 1914 to 1919. It should be observed that the figures of 1917, 1918 and 1919, for the provinces of Quebec, Saskatchewan, Alberta and British Columbia, and the figures of all the provinces for 1918 and 1919, cannot be regarded as strictly comparable with those of previous years, owing to the change in the methods of collection and estimation. It is not possible to distinguish clearly between actual changes and changes due to the statistical reform.

7.—Numbers of Farm Live Stock in Canada, by Provinces, 1918 and 1919.

CLASSIFICATION.—Horses: Stallions, 2 years old and over; Mares, 2 years old and over; Geldings, 2 years old and over; Colts and Fillies, under 2 years. Cattle: Bulls for breeding; Milch Cows; Calves, under 1 year; Steers, 2 years old and over; all other cattle.

Values of Farm Live Stock and of Wool.—Table 9 shows the average values per head of farm animals, as estimated from the reports of crop correspondents of the Dominion Bureau of Statistics, for the year 1919, as compared with the five years 1914 to 1918. Horses and cattle other than milch cows are divided according to age, and the unit value for swine is 100 lb. live weight. The table gives also an estimate of the value per lb. of unwashed and washed wool. The downward trend of the value of horses from the high mark of 1917 was again in evidence in the figures of 1919; the values of milch cows continue to advance, while the value of other horned cattle, sheep and swine, was either stationary or slightly lower. For the Dominion as a whole, the average price of horses under 1 year old was \$55, as against \$56 in 1918 and \$57 in 1917; for horses 1 year old to under 3, the average value per animal was \$108 as against \$112 in 1918 and \$116 in the previous year; for work horses the price per animal was practically the same in 1919 as in 1918 (\$161 and \$162). The continued upward trend of the value of milk products was reflected in the average price of milch cows, which was placed at \$92 per head in 1919, as compared with \$87 in 1918, \$62 in 1915 and \$42 in 1910. The average value of other cattle under 1 year was \$25, as compared with a similar figure in 1918, while those of three years old and over dropped in value from \$88 per head in 1918 to \$83 per head in 1919. Sheep averaged \$15 as against \$16 in 1918. Swine were valued at \$26 as against \$25 in 1918. Wool showed a drop of from 62 cents per lb. to 55 cents for unwashed, and from 80 cents to 70 cents for washed. Correspondents were requested to report from the best possible information available the average value per head of each kind of farm animal in their district, and the averages thus obtained were compiled and employed in the calculations of total values according to the number of farm animals as returned in June 1919 (see Table 10). The resulting totals for the Dominion are as follows, the figures for 1918 being given in brackets: Horses, \$435,070,000 (\$459,155,000); milch cows, \$327,814,000 (\$307,244,000); other cattle, \$381,007,000 (\$398,814,000); all cattle, \$708,821,000 (\$706,058,000); sheep, \$50,402,000 (\$48,802,000); swine, \$102,309,000 (\$112,751,000). The total value for farm live stock in Canada in 1919 is therefore estimated at \$1,296,602,000, as against \$1,326,766,000 in 1918 and \$1,102,261,000 in 1917. Table 11 shows the estimated total values of farm live stock in Canada by provinces for each of the six years 1914 to 1919.

Average Values of Farm Land.—Table 12 shows the average values per acre of farm lands in Canada, as estimated by crop correspondents in each of the years 1910 to 1919. The average value of farm land for the Dominion, including improved and unimproved land, together with the value of dwellings and other farm buildings, was placed at \$52 per acre, as compared with \$46 in 1918, \$44 in 1917, \$41 in 1916, \$40 in 1915 and \$38 in 1914 and 1910. This shows an enhancement in value of farm lands of \$14, or 36.8 p.c. in five years. By provinces, the value was highest in British Columbia, being \$174 as compared with \$149 per acre in 1917 and 1918. Ontario, with an estimated average value of \$66 per acre, and Quebec with \$72 per acre, were above the average for the Dominion. In 1918 Ontario and Quebec gave each the average value of farm lands at \$57 per acre. In Prince Edward Island the average value of farm lands rose from \$44

per acre, the highest previous value, to \$51. Nova Scotia also shows an increase from \$36 per acre in 1918 to \$41 in 1919. New Brunswick valued its farm land at \$19 per acre in 1910, \$29 in 1916 and 1917, \$35 in 1918 and \$32 in 1919. The value of farm lands in Manitoba, while fluctuating between \$29 in 1910 and \$32 in 1918, rose to \$35 per acre in 1919. In Saskatchewan farm lands were valued at \$32, as compared with \$29 per acre in 1918 and \$24 in 1914, and Alberta lands increased in value from \$21 per acre in 1914 to \$27 in 1917 and \$29 in 1919.

12.—Average Values per acre of Occupied Farm Lands in Canada, as estimated by Crop Correspondents, 1910, 1914-1919.

Average Wages of Farm Help.—The average wages paid for farm help in 1919 again showed a considerable increase. For Canada as a whole, according to Table 13, the wages per month during summer, for males, inclusive of board, was \$78 and for females, \$43 per month; the value of board, \$24 per month for males and \$19 for females, is included in the above estimate. In 1918, the cost of farm help during summer months was estimated, for males, at \$70, including \$21 per month for board, and for females at \$38 per month, including \$17 per month for board. By the year, including board, males received \$764 in 1919, as compared with \$681 in 1918 and \$323 in 1914; females received \$465 in 1919, as compared with \$416 in 1918 and \$189 in 1914, being an annual average increase of over 136 p.c. for men and 146 p.c. for women from 1914 to 1919. Compared by provinces, the average wages per month for male and female help respectively in the summer season, including board, were in order of value in 1919 as follows: British Columbia \$96 and \$64, Alberta \$95 and \$58, Saskatchewan \$94 and \$55, Manitoba \$89 and \$52, New Brunswick \$79 and \$35, Quebec \$76 and \$37, Ontario \$70 and \$40, Nova Scotia \$69 and \$34, and Prince Edward Island \$51 and \$28. In 1918 the position of the provinces as regards wages of males was the same, British Columbia coming first for both males and females and Prince Edward Island last in both cases. The net earnings of farm help in the summer months for females was highest in British Columbia, \$37, followed by Alberta with \$34, Saskatchewan and Manitoba, \$32, Ontario and Quebec, \$22, New Brunswick, \$20, Nova Scotia, \$18, and Prince Edward Island, \$15, while for males it was highest in Alberta with \$67 per month and Saskatchewan, \$66, followed by British Columbia \$65, Manitoba \$63, New Brunswick \$56, Quebec \$53, Ontario \$48, Nova Scotia \$47 and Prince Edward Island \$33 per month.

DAIRYING.

Creameries and Cheese Factories, 1916, 1917 and 1918.—

The total number of creameries and cheese factories making returns in Canada in 1918 was 3,373, as compared with 3,418 in 1917, and 3,446 in 1916. Of the total in 1918, 990 were creameries, 1,885 were cheese factories, 476 were combined factories making butter and cheese, and 22 were condensed milk factories. The great majority both of creameries and cheese factories were in Quebec and Ontario. In Quebec there were 628 creameries, 900 cheese factories, 425 combined factories and 1 condensed milk factory. In Ontario, creameries numbered 164, cheese factories 910, combined factories 37 and condensed milk factories 15. The total number of patrons (i.e., farmers supplying milk and cream) was 252,416 in 1918, as compared with 250,505 in 1917, and 221,192 in 1916. In 1918, the patrons numbered 80,011 in Quebec and 92,397 in Ontario. The total value of the capital invested in the creameries and cheese factories of Canada in 1918 was \$23,131,620. The number of employees was 10,155, and their salaries and wages amounted to \$6,221,457. The amount paid to patrons was \$83,637,391, the total expenditure was \$101,364,912, and the value of products was \$107,340,850, as compared with an expenditure of \$86,488,260 and a value of products of \$93,879,326 in 1917.

Production and Value of Creamery Butter.—The total production of creamery butter in 1918 (Table 14) was 93,298,348 lb., value \$41,859,156, as compared with 87,526,939 lb., value \$34,274,218, in 1917, and 82,564,130 lb., value \$26,966,355, in 1916. Quebec and Ontario together produced about 71 p.c. of the total creamery butter in Canada. The production of Quebec in 1918 was 36,761,057 lb., value \$16,364,950, as compared with 34,392,562 lb., value \$13,689,310, in 1917, and 34,323,275 lb., value \$11,516,148, in 1916. Ontario in 1918 produced 29,452,422 lb., value \$13,163,938, as compared with 28,756,758 lb., value \$11,236,839, in 1917, 24,680,109 lb., value \$8,031,997, in 1916. For all Canada the average wholesale price of creamery butter worked out at 45 cents per lb. in 1918, as compared with 39 cents per lb. in 1917 and 33 cents in 1916.

Production and Value of Factory Cheese.—The total production of factory cheese in 1918 (Table 15) was 174,878,313 lb., value \$39,456,532, as compared with 194,904,336 lb., value \$41,180,623, in 1917 and 192,968,597 lb., value \$35,512,622, in 1916. Ontario and Quebec together produce 97 p.c. of the total factory-made cheese in Canada. In Ontario the quantity produced in 1918 was 107,886,724 lb., value \$24,356,019, as compared with 121,173,086 lb., value \$25,771,944 in 1917, and 126,015,870 lb., value \$23,312,935, in 1916. The average wholesale price of factory-made cheese for Canada was, for 1918, 22.53 cents per lb., as compared with 21.16 cents in 1917, and 18 cents in 1916. For 1918 the highest price per lb. was in British Columbia, 24.34 cents, and in the other provinces the average price was close to 22 or 23 cents per lb.

15.—Production and Value of Creamery Butter and Factory Cheese, 1900, 1907, 1910, and 1915-1918.

Year.	Estab-lish-ments.	Creamery Butter.		Factory Cheese.	
	No.	lb.	\$	lb.	\$
1900	3,576	36,066,739	7,240,972	220,833,269	22,221,430

1910	3,625	64,698,165	15,645,845	199,904,205	21,587,124
1915	3,513	83,991,453	24,385,052	183,887,837	27,097,177
1916	3,446	82,564,130	26,966,352	192,968,597	35,512,622
1917	3,418	87,526,939	34,227,218	194,904,336	41,180,623
1918	3,373	93,298,348	41,859,156	174,878,313	39,456,532

Comparative Statistics, 1900-1918.—In Table 16 the production and value of creamery butter and factory cheese for all Canada is compared for the years 1900, 1907 and 1910 and for the years 1915 to 1918. For 1900 and 1910 the figures shown are those of the decennial census; for 1907 they are those of the special postal census of that year, and for 1915 to 1918, they are as collected by the Dominion Bureau of Statistics in co-operation with the Provincial Governments.

Total Value of Dairy Products, 1918.—In addition to the value of the production of butter and cheese, other products were manufactured to the value of \$26,025,162; so that the total value of the products of dairy factories in 1918 amounted to \$107,340,850.

Cold Storage of Perishable Products.—Under the Cold Storage Act, 1907 (6-7 Edw. VII, c. 6), subsidies have been granted by the Dominion Government towards the construction and equipment of cold storage warehouses open to the public: the Act and regulations made thereunder being administered by the Department of Agriculture. Table 17 shows for 1919 the number of cold storage warehouses in Canada, with the refrigerated space. This amounts to 33,247,774 cubic feet, of which 4,928,304 cubic feet apply to warehouses subsidized under the Act and 28,319,470 cubic feet apply to non-subsidized warehouses.

PRICES OF CANADIAN GRAIN.

Tables 18 and 25 consist of records of the average prices of Canadian grain. From 1917, the prices of wheat at Winnipeg and Fort William have been fixed under various Orders of the Board of Grain Supervisors and, from July 31, 1919, under Orders of the Canadian Wheat Board. Tables 18 and 20-24 give the weekly range of prices of the different grades of wheat, oats, barley and flax at Winnipeg and Fort William; these prices are for the weeks ended Saturday. Tables 19 and 24, constructed from previous records, compare the average monthly prices for a series of years. Table 25 gives the prices in British markets of Canadian wheat for the seven years 1913-19, the English currency, weights and measures having been converted into Canadian equivalent denominations.

MISCELLANEOUS AGRICULTURAL STATISTICS.

Production of Flax Fibre in Ontario, 1918.—According to information furnished by the Economic Fibre Production Division of the Dominion Experimental Farms, 20,000 acres were grown for flax fibre production in Ontario in 1918, giving an average of 310 lb. of pure line fibre per acre, valued at 55 to 70 cents per lb., according to grade. The fibre was of fair quality, but short and not quite so uniform as the 1917 crop. There were 900 tons of tow, which was graded at prices ranging from 8 to 20 cents per pound. Under an Order in Council dated October 23, 1918, all Canadian seed of fibre variety, amounting to 110,000 bushels, was commandeered and shipped to Ireland, the price realized being \$27.50 per sack of 182 lb. Table 26 gives an approximate estimate of the area, production, and value of flax grown for fibre in Ontario for each of the four years 1915-18.

26—Flax grown for Fibre in Ontario, 1915-18.

Description.	1915.	1916.	1917.	1918.
Area..... acres	4,000	5,200	8,000	20,000
Yield of fibre per acre..... lb.	200	57	350	310

Total value of tow..... \$	2,800	5,000	—	270,000
Value of seed per bushel..... \$	1-60	3	5-50	8-50 ¹
Total value of seed..... \$	76,800	75,000	396,000	930,769 ¹

¹ Seed of fibre quality shipped to Ireland.

In 1916, there were in addition about 800 tons of flax straw, valued at \$15 per ton, or \$12,000. The total value of the products for 1918 was about \$2,285,750, exclusive of the value of seed not of fibre quality.

Tobacco.—In Quebec, statistics of the area and yield of tobacco in 1919 were jointly collected and compiled by the Quebec Bureau of Statistics and the Dominion Bureau of Statistics. The results show a great expansion in the cultivation of tobacco in Quebec, due to the large increase in selling price. The area planted to tobacco in Quebec in 1919 was 22,360 acres, as compared with 12,257 acres returned for 1910 by the Census of 1911. At an estimated average yield per acre of 750 lb., the total yield of tobacco in Quebec amounted to 16,770,000 lb., representing, at the average rate of 40 cents per lb., a total value of \$6,708,000. For Ontario, according to information furnished by the Tobacco Division of the Dominion Experimental Farms, the total yield of tobacco was 10,609,400 lb. from 9,226 acres, representing an average yield per acre of 1,150 lb. The Ontario crop was harvested without damage by frosts. It was the largest and the best crop that had been grown in Ontario since the Tobacco Division began the issue of an annual statistical crop report. In 1911 the production was larger if tradition be correct, but no figures are available for that year. There is a tendency for a general expansion of tobacco growing in all the Ontario district including the southwestern peninsula. The prices paid for the tobacco crop in Ontario in 1919 were still higher than those of 1918. There was a real rush at buying time between the competing manufacturers, and the whole of the Ontario crop was purchased in less than a week. The average price paid for White Burley may be placed at about 50 cents per lb., while most of the flue-cured tobacco sold at prices ranging from 55 to 65 cents per lb.

Placing together the results for the two provinces of Ontario and Quebec, and comparing them with the published estimates for the two previous years, the totals are as shown in Table 27.

27—Area and Yield of Tobacco in Canada, 1917-1919.

Provinces.	1917.	1918.	1919.	1917.	1918.	1919.	1917.	1918.	1919.
	acres.	acres.	acres.	lb.	lb.	lb.	lb. per acre.	lb. per acre.	lb. per acre.
Quebec.....	5,000	6,903	22,360	5,000,000	7,732,000	16,770,000	1,000	1,120	750
Ontario.....	2,930	6,500	9,226	3,495,000	6,500,000	10,609,400	1,192	1,000	1,150
Totals and averages.	7,930	13,403	31,586	8,495,000	14,232,000	27,379,400	1,071	1,062	867

Taking the average price of tobacco in Ontario at 52 cents per lb., the total value of the crop of 1919 in that province was about \$5,561,730, making the total value of the tobacco crop of 1919 for the whole of Canada to be \$12,269,730.¹

Wool Production of Canada, 1915-19.—There are no definite statistics of the annual wool clip of Canada, except as regards wool sold through the co-operative associations. For the years 1915, 1916 and 1917, the wool clip was roughly estimated at 12,000,000 lb., the total values, at the rate of 28 cents per lb. in 1915, 37 cents in 1916 and 59 cents in 1917, being for 1915 \$3,360,000, for 1916 \$4,440,000 and for 1917 \$7,000,000. It is usually estimated that the average weight of wool per sheep is 6.5 lb. The rise in the price of wool during recent years has stimulated production, and the quantity of wool produced is now much higher than it was a few years ago. Applying the average of 6.5 lb. to the number of sheep in Canada in 1918 (3,052,748) and 1919 (3,425,958), the result is an estimated total production of 19,842,862 lb. for 1918 and 22,247,727 lb. for 1919. Assuming 20 million lb. of wool to be the production for each of the two years, and taking the average price per lb. at 60 cents, the estimated value of the Canadian wool clip for each of the two years 1918 and 1919 is \$12,000,000. The figures for the years 1915 to 1919 therefore stand as in Table 28.

28—Estimated Production and Value of Wool in Canada, 1915-19.

Year.	Production.	Average Price per lb.	Value.

1915.....	12,000,000	28	3,360,000
1916.....	12,000,000	37	4,440,000
1917.....	12,000,000	59	7,000,000
1918.....	20,000,000	60	12,000,000
1919.....	20,000,000	60	12,000,000

Agricultural Instruction Act.—Under the Agricultural Instruction Act (3 Geo. V, c. 5), appropriations are annually payable by the Dominion Government to each of the Provincial Governments of Canada for the encouragement of agriculture "through education,

¹ For a more detailed report on the tobacco crop of 1919, see Monthly Bulletin of Agricultural Statistics, December, 1919 (Vol. 12, No. 136), pp. 316-318.

instruction and demonstration carried on along lines well devised and of a continuous nature" and for the purpose of assisting in the work of veterinary colleges established in the provinces. The provincial allocation of the payments under this Act for the four years 1916-17 to 1919-20 are shown in Table 29. A Report on the Agricultural Instruction Act for the year 1918-19 was published in 1920 [No. 15a].

On March 31, 1920, the quantity in Canada of wheat, and wheat flour expressed as wheat, was about 77,306,000 bushels, as compared with 118,543,000 bushels in 1919, about 77 million bushels in 1918 and 126 million bushels in 1917. The total for 1920 comprises 36,197,000 bushels in elevators and flour mills, 34,837,000 bushels in farmers' hands and 6,272,000 bushels in transit by rail. Of oats, including oat products expressed as grain, the total quantity returned as in Canada on March 31, 1920, was 144,492,000 bushels, as compared with 164,747,000 bushels last year and 155,582,000 bushels in 1918. The total for 1920 comprises 17,004,000 bushels in elevators and flour mills, 123,090,000 bushels in farmers' hands and 4,398,000 bushels in transit by rail. The total quantity of barley in Canada on March 31, 1920, is returned as 15,730,000 bushels, as compared with 30,574,000 bushels last year and 16 million bushels in 1918. The figures for 1920 comprise 4,127,000 bushels in elevators and flour mills, 11,024,000 bushels in farmers' hands and 579,100 bushels in transit by rail. Of flaxseed the total quantity in Canada on March 31, 1920, is returned as 2,094,000 bushels, as compared with 2,271,000 bushels last year and 2,420,000 bushels in 1918. The total for 1920 comprises 589,000 bushels in elevators and mills, 1,400,500 bushels in farmers' hands and 104,000 bushels in transit by rail. As compared with 1919 the quantities in stock at the end of March are considerably less in the case of wheat, oats and barley. For flax the quantity is about 177,000 bushels less.

Agricultural Wealth of Canada.—Table 33 presents the results of calculations of the gross total value of the annual agricultural production of Canada for each of the years 1915 to 1919. The values are calculated from the average prices received by farmers. They are necessarily gross values, because it is impossible to distinguish between the use of crops as materials for other kinds of production such as the feeding of live stock, or to allow for the costs of production.

33.—Value of the Annual Agricultural Production of Canada, 1915-19.

Description.	1915.	1916.	1917.	1918.	1919.
	000\$	000\$	000\$	000\$	000\$
Field crops.....	825,371	886,495	1,144,637	1,372,936	1,452,437
Farm animals.....	73,958	110,201	156,569	191,129	180,084
Wool.....	3,360	4,440	7,000	12,400	11,000
Dairy products.....	146,005	152,816	232,822	248,908	252,320
Fruits and vegetables.....	35,000	35,000	40,000	40,000	40,000
Poultry and eggs.....	35,000	35,000	40,000	40,000	40,000
Gross total value.....	1,118,694	1,223,952	1,621,028	1,905,373	1,975,841

If to the estimated value of agricultural production in 1919, viz., \$1,975,841,000, be added for land \$2,792,229,000, for buildings \$927,548,000, for implements \$387,079,000 and for farm live stock \$1,296,602,000, the total estimated agricultural wealth of the Dominion of Canada for 1919 amounts to \$7,379,299,000.

World's Production of Cereals and Potatoes.—Table 34, which is compiled from the Bulletin of Agricultural and Commercial Statistics of the International Institute of Agriculture, with metric weights and measures converted into Canadian equivalents, shows the areas and yields of wheat, rye, barley, oats, corn and potatoes in various countries of the world for the years 1917 and 1918 in the northern hemisphere and for the years 1917-18 and 1918-19 in the southern hemisphere, (Argentina, South Africa, Australia and New Zealand). The table also includes, for purposes of comparison, the average acreages and yields for the five years 1912-16 (1912-13 to 1916-17 for the southern hemisphere) and the areas and yields of 1918 in the form of percentages of 1917 (1917-18) and of the five-year averages. Owing to the war, the table does not include data of Austria, Belgium, Bulgaria, Hungary, Rumania, Russia, Serbia and Turkey; but Germany re-appears for the first time since the conclusion of peace.

For wheat the data comprise 24 countries which in 1918 produced a total of 2,617,160,000 bushels from 185,014,000 acres, as compared with 2,276,861,000 bushels from 164,601,000 acres in 1917 and 2,550,137,000 bushels from 171,240,000 acres, the quinquennial average. As compared with 1917, the area under wheat in 1918 was 12.4 p.c. more, and it was 8 p.c. more than the five-year average; the yield in 1918 was 14.9 p.c. more than that of 1917 and 2.6 p.c. more than the average. The average yield per acre for all 24 countries was about one-third of a bushel more than in 1917, but was three-quarters of a bushel less than the five-year average. In the case of rye, the total production in 1918 of 12 countries was 494,321,000 bushels from 25,078,000 acres, as compared with 409,112,000 bushels from 22,110,000 acres in 1917 and with 553,915,000 bushels from 22,598,000 acres, the five-year average. The area of 1918 is more than that of 1917 by 13.4 and than that of the average by 11 p.c., whilst the total yield is 20.8 p.c. more than that of 1917, but 10.7 p.c. less than the average. The average yield per acre is about $1\frac{1}{4}$ bushel more than in 1917, but is $4\frac{3}{4}$ bushels under the average.

The total production in 18 countries of barley in 1918 was 763,687,000 bushels from 30,523,000 acres, as compared with 681,260,000 bushels from 28,649,000 acres in 1917 and 728,567,000 bushels from 26,905,000 acres, the five-year average. In area the crop of 1918 was 6.5 p.c. above 1917 and 13.4 p.c. above average, whilst in yield the percentage was 12.1 above 1917 and 4.8 above the average. The yield per acre in 1918 was $1\frac{1}{4}$ bushel above 1917, but 2 bushels below the average.

Oats in 19 countries gave a total production in 1918 of 2,725,955,000 bushels from 82,630,000 acres, as against 2,657,961,000 bushels from 80,168,000 acres in 1917 and 2,620,621,000 bushels from 74,285,000 acres, the quinquennial average. The figures for 1918 represent as to area percentages of 3.1 above 1917 and 11.2 above average. The yield per acre was about 33 bushels in 1917 and 1918, or $2\frac{1}{4}$ bushels below the five-year average.

¹Not included in totals.

Corn in eight countries gave a total yield in 1918 of 2,730,195,000 bushels from 115,879,000 acres, as compared with 3,219,175,000 bushels from 125,514,000 acres in 1917 and with 2,938,171,000 bushels from 113,836,000 acres, the five-year average. In 1918 the acreage was 7.7 p.c. below that of 1917 and 1.7 p.c. above average, whilst the yield was 15.2 p.c. below that of 1917 and 7.1 p.c. below average. The average yield per acre was about $23\frac{1}{2}$ bushels in 1918, or 2 bushels less than in 1917 and $2\frac{1}{4}$ bushels less than the five-year average.

Of potatoes, the yield in 1918 for 13 countries was 2,492,156,000 bushels from 18,583,000 acres, as compared with 2,807,094,000 bushels from 17,940,000 acres in 1917 and 3,043,964,000 bushels from 18,662,000 acres, the five-year average. The acreage in 1918 was 3.6 p.c. above that of 1917, but 0.4 p.c. below average. The average yield per acre in 1918, viz., 134.11 bushels, was $22\frac{1}{4}$ bushels below 1917 and 29 bushels below the five-year average.

AGRICULTURAL EXPERIMENT STATIONS OF CANADA.

Dominion Experimental Farms and Stations.

Central and Branch Farms.—Inaugurated in 1886 by Act of Parliament, the Dominion Experimental Farms system was at first made up of the Central Farm at Ottawa and four branch Farms: one at Nappan, Nova Scotia, for the Maritime Provinces; one at Brandon for Manitoba; one at Indian Head for the Northwest Territories and one at Agassiz for British Columbia.

35.—Dominion Experimental Farms and Stations, 1919.

The opening up and rapid settlement of the Dominion has led to a corresponding increase in the number of Experimental Farms and Stations.¹ These now total 21, with a total acreage of 11,850, as compared with the original five Farms, having a total acreage of 3,472, as established in 1886. Table 35 shows the present number of Farms and Stations with the acreage of each and the date of establishment.

In addition there are eight sub-stations, viz.: Salmon Arm, B.C.; Swede Creek, Yukon Territory; Fort Vermilion, Grouard and Beaverlodge, Alberta; and Forts Smith, Resolution and Providence, Northwest Territories. Experimental work under the Division of Illustration Stations is conducted on 15 farms in Saskatchewan, 17 in Alberta and 19 in Quebec.

Organization of the System of Experimental Farms.—The Central Farm at Ottawa, as its name implies, is the centre or headquarters of the system. Thereat are situated the Director, having control and general supervision of the whole, and the chief technical officers, having charge each of his special line of work, both at the Central and branch Farms. At Ottawa, the policy to be pursued throughout the system is settled by agreement after discussion by the Director, the technical officers and the Superintendents on whose branch Farms the work is to be conducted. The technical staff at Ottawa supervise the actual experimental work at the Central Farm. At the branches, the Superintendents are in charge of the carrying out of the various lines of general experiment and also conduct experiments which are of local importance.

The Divisions at Ottawa, which also represent the different lines of work carried on throughout the system, and which have each a technical officer in charge, are as follows: (1) Animal Husbandry; (2) Bees; (3) Botany; (4) Cereals; (5) Chemistry; (6) Extension and Publicity; (7) Economic Fibre Production; (8) Field Husbandry; (9) Forage Plants; (10) Horticulture; (11) Illustration Stations; (12) Poultry and (13) Tobacco. Briefly the main lines of the work of these Divisions are as follows:—

Animal Husbandry.—This Division comprises work with beef cattle, dairy cattle and dairying, horses, sheep and swine, and undertakes experiments in the breeding, feeding, housing and management of each of these classes of live stock.

Bees.—The Bee Division covers the breeding, feeding and manipulation of bees, and the study of bee products, including their marketing.

Botany.—The work of this Division falls into the two classes of Economic Botany and Plant Pathology. The former includes the study of medicinal, poisonous and economic plants. Different varieties and strains of fibre plants are also studied, and special attention is given to the life history and control of weeds. The Division has also charge of the Arboretum at the Central Farm. In Plant Pathology, in addition to the pathological laboratory at Ottawa, there are

¹ The five original farms established in 1886 are known as "Experimental Farms"; those added since are styled "Experimental Stations." No distinction in the work is expressed by these titles.

laboratories at Charlottetown, P.E.I., Fredericton, N.B., St. Catharines, Ont., Brandon, Man., and Indian Head, Sask. Investigations are being conducted into diseases affecting forest trees, fruit trees, cereals, small fruits, potatoes, vegetables and tobaccos.

Cereals.—In the Cereal Division, the work comprises the production, by cross-breeding and selection, of new varieties of grains and the testing of these as to their suitability for various parts of Canada. Approved varieties are grown on a larger scale, and samples are distributed free to applicant farmers. Among the more recent varieties produced in this Division and now widely grown in Canada are the Arthur pea and the Huron, Marquis and Prelude wheats. Two interesting varieties now being introduced are the Ruby wheat, ripening not quite so early as Prelude but yielding better, and the Liberty Hull-less oat, which should greatly widen the field of usefulness of this cereal and simplify the processes of its manufacture into food for man and beast. The Division also carries on extensive milling and baking tests.

Chemistry.—The work of the Division of Chemistry comprises the analysis of fodders and feeding stuffs, fertilizers, soils, well waters, insecticides, fungicides, etc. It also assists other Divisions in chemical problems and does a large amount of analytical work for other branches of the Department and for military and civilian use abroad. Field tests with various kinds and quantities of fertilizers are carried on by this Division at a number of the branch Farms and Stations.

Extension and Publicity.—This Division acts as a connecting link between the Experimental Farms and the farmer by making the work of the former as widely known as possible. Two chief means used are the placing of an exhibit at as many fairs as possible each year and the extension of the Departmental mailing lists.

Economic Fibre Plants.—The Division studies the areas in Canada suitable for fibre production, the best varieties and strains of seed of fibre plants, cultural methods, harvesting, retting and scutching processes, etc. A fully-equipped flax mill is operated at the Central Farm.

Field Husbandry.—This Division tests or applies, under field conditions, the results obtained by other Divisions more directly engaged in scientific research. Some of the main lines of work under way are tests of fertilizers, methods of drainage, rotations and cultural methods. Data of cost of production of field crops are gathered in connection with this work.

Forage Plants.—The Division has for its work the variety testing of grasses, leguminous forage plants, field roots and Indian corn; plant breeding with these; the collection of genera and species likely to be of value as forage plants; the study of the possibilities and methods of growing root seed, including sugar beets, in Canada, and the distribution for trial of seed of varieties newly obtained and not available commercially.

Horticulture.—The work of the Division of Horticulture falls under four main heads: vegetable gardening, orcharding and small fruits, ornamental gardening and plant breeding. In the three first named, the testing of varieties is a main feature, with a view to

ascertaining the hardiest, earliest, best-yielding and most disease-resistant sorts. In plant breeding, the aim is the improvement of existing sorts by cross-breeding. Greenhouse work is also given special attention at Ottawa. Canning experiments and demonstrations are carried on.

Illustration Stations.—This Division forms another connecting link between the Experimental Farms and the farmer. These Stations are now 51 in number. Each is located on the farm of a representative farmer, who does the work according to directions framed to illustrate the best rotations, the best varieties of crops, and the best cultural methods, as determined by the work of years on the Experimental Farms.

Poultry.—The scope of work of the Poultry Division has been greatly extended during the last few years. It now covers the following main lines of investigation: artificial and natural incubation, poultry breeding, systems of breeding and rearing, production of heavy-laying strains, feeding for eggs and table and housing of poultry. Poultry survey work, i.e., the endeavour to get groups of farmers in various localities to keep accurate records of their poultry costs and returns, is already showing results in the better housing, breeding and care of the farm flock. Egg-laying contests and record of performance work are carried on.

Tobacco.—The Tobacco Division deals with the breeding, variety tests and cultural methods, the warehousing and marketing of tobacco. A complete analysis of the soils of the tobacco-producing regions of Canada is being made. During the growing season, inspectors examine the tobacco fields of as many growers as possible, with a view to suggesting the best cultural methods and means of combating diseases and insect pests.

In addition to the work done by the Divisions of Extension and Publicity and Illustration Stations, the results of the work of the Experimental Farms are made available to the farmer (1) by correspondence, (2) by publications. Practically all lines of agricultural effort are covered by the Experimental Farms' publications and they embody the best thought and latest results of the experimental work. (3) "Seasonable Hints," now in its fifth year, a 16-page pamphlet brought out every four months, is filled with brief, timely articles and notes on farm topics, and each issue is distributed to the entire mailing list of some 300,000 names. It is issued in two editions, one for Eastern Canada and British Columbia, the other for the Prairie Provinces. (4) "Press Articles." An average of three short, pithy and timely articles is sent out to the Canadian press each week. The Farm officers devote considerable time each year to lecturing, demonstrating, judging at fairs and assisting at Short Courses in Agriculture. Excursions to the various Farms are also a valuable means of bringing the work to the attention of the farmer.

Provincial Experimental Farms and Stations.

NOVA SCOTIA.

College of Agriculture, Truro.—About 430 acres are devoted to general farming, gardening and investigations. Conducted pri-

marily as a college and distributing station for pure-bred live stock and seeds, investigational work does not occupy so prominent a position as it does at a purely experimental station. Nevertheless, practical experiments are being carried on amongst which the following are the most important. Experiments were commenced seven years ago in the use of ground limestone, this being applied to plots of several acres each side by side with corresponding plots receiving no limestone. Complete results cannot be announced until the lapse of two rotations of four years; but meanwhile positive results indicate marked improvement in clover and in the control of club root in turnips, cabbage, etc. Upon a run-out farm, purchased in 1917, experiments have been instituted with a view to ascertain and demonstrate the relative value of basic slag with high and low percentages of soluble phosphoric acid, with acid phosphate, bone meal, ground limestone and with the addition to all of these of nitrate of soda. On the same land, an experiment has been commenced to determine the returns of potatoes from applications of various quantities of potash. A permanent pasture experiment, commenced five years ago, is designed to determine the value of top dressing with commercial fertilizer. Suitable fodder crops for ensilage in a district like that surrounding the College, where the summers are short and rather cool, are being experimented with. At present main reliance is placed upon a mixture of oats, peas and vetches, popularly called "O. P. V." In chemical, entomological and botanical laboratories, experiments relate to the control of insects and fungi, the study and treatment of soils and other similar lines of investigation.

QUEBEC.

Macdonald College, Ste. Anne de Bellevue.—The College is situated about 20 miles west of Montreal and is incorporated with McGill University. The College property comprises 786 acres divided as follows: main farm, 584 acres; cereal husbandry plots, 75 acres; poultry department, 17 acres; orchards, 35 acres; vegetable gardens, 25 acres; the campus, including driveways, lawns, trees, shrubs, flower-beds, school garden and recreation fields for students of both sexes, 50 acres. On the College Stock Farm a "Fordson" tractor has on the whole given good satisfaction, being used chiefly for ploughing, discing, cultivating and for loading hay. Upon a total disced and cultivated area of 300 acres, the average cost per acre works out to a trifle over \$1 per acre. The experiments indicate that the possibilities of the tractor lie rather in the amount and rapidity of the work accomplished than in cheapness of power. Numerous other researches and experiments are being conducted in the departments of biology, cereal husbandry, agricultural chemistry, horticulture, physics, and with farm poultry. More complete information respecting the work of the College will be found on record in the Canada Year Book of 1916-17, pp. 241-242, and 1918, pp. 235-237. The College Annual Report for 1918-19 may also be consulted.

Oka Agricultural Institute.—This, situated on the Lake of Two Mountains, about 20 miles from Montreal, is one of the oldest

experimental farms in Canada, and is fitted to board 150 pupils. A large number of dairy cattle is kept, and experimental work is carried on with these and with swine, poultry and bees. Horticulture is practised largely; the growth of apples and small fruits is a specialty. The famous Oka cheese, made at this Institute, is sold widely in North America. The Institute was affiliated to the Laval University (now University of Montreal), on March 25, 1908.

School of Agriculture, Ste. Anne de la Pocatière.—The School is situated on the southeastern side of a shady hill from which it overlooks large farms and homesteads. Being less than one mile from the Intercolonial railway station, it is easily accessible, and attracts hundreds of visitors desirous of acquiring information. Students are divided into two classes: (1) pupils of the Agronomy Course, who are under instruction for four years, and (2) pupils of the Agricultural Course, who receive a special practical training of two years. The School is affiliated to the Laval University of Quebec, which awards the degree of B.S.A. (Bachelor of Science in Agriculture) to successful students of the first class. Other successful students receive a Certificate of Agricultural Proficiency (Brevet de Capacité Agricole). Outside the School, short courses are held in different parishes of Lower Quebec, and special courses are provided for farmers at the School itself. Addresses, demonstrations and instruction in farm management are undertaken by the professors as well as various cultural experiments and mechanical trials.

ONTARIO.

Ontario Agricultural College and Experimental Farm, Guelph.—The College and Experiment Station were established in 1874 to train young farmers in the science and practice of agriculture and to conduct agricultural experiments for the benefit of the province. The land property consists of a little more than 700 acres of average loam soil. The farm property consists of 500 acres: experimental plots of about 100 acres and campus and woodlots form the remainder. The growth of the institution as an educational centre has been very rapid. Academic work at the present time requires the space and equipment of sixteen large buildings for dormitories, class rooms and laboratories. Courses offered include a four year course for the degree of B.S.A. (Bachelor of Science in Agriculture,) a two-year course for the Associate Diploma, winter courses for farmers and farmers' sons, summer courses for teachers of the province and domestic science courses at Macdonald Institute. The teaching and experimental staff consists of about seventy-five members. In 1874 the College opened with 28 students. The total enrolment in long and short courses in the academic year 1918-19 was 1,535. More complete information respecting the researches and experimental work undertaken at the College will be found on record in the Canada Year Book of 1916-17, pp. 243-245, and 1918, pp. 238-241. Also reference may be made to the Forty-fifth Annual Report of the College, covering the year 1919.

MANITOBA.

Manitoba Agricultural College, Winnipeg.—The Field Husbandry Experimental work has been divided into five divisions: Forage Crop Improvement, Cereal Crop Improvement, Soil Management, Crop Management and Co-operative Experiments. The work in the Cereal division consists in making variety tests and endeavouring to improve the standard varieties by selection and hybridization. The object of the Forage division is to secure and improve plants for the production of pasture, hay, and fodder for live stock. The improvement is being brought about by importation, selection and hybridization. Among the crops under this experiment, good results are being obtained with alfalfa, sweet clover, red clover, timothy, western rye grass, brome, meadow fescue and meadow foxtail. Some work is also under way in the improvement of fodder corn and field roots. The experiments in crop management were outlined to answer the questions that farmers are asking in regard to the management of their crops. In Soil Management, work has been undertaken in soil cultivation, soil fertility and crop rotation.

The Co-operative Experimental work consists in carrying on the soil and crop management work on various farms throughout the province. The Departments of Botany, Horticulture, Animal Husbandry, Physics, Chemistry, and Engineering are also doing considerable investigational work.

SASKATCHEWAN.

University of Saskatchewan, Saskatoon.—The College of Agriculture has over 1,300 acres of land at the University and another 560 acres about 35 mile distant which were bequeathed to the College by a pioneer settler, an ex-student of the University of Cambridge, England. Of the 1,300 acres, 210 acres are set aside for experimental work in field husbandry and horticulture. Two hundred and seventy acres of prairie were purchased in 1918, 100 acres of which have been broken for the Field Husbandry Department. The remaining 800 acres are operated as a general farm with great diversification of crops. The buildings, paddocks, etc., are located on an adjoining half section of land designated as the campus or building plot. The College offers a four year course leading to the Degree of Bachelor of Science in Agriculture (B.S.A.), and a three year associate course for farmers' sons intending to make farming their life work. Short courses in general agriculture, tillage, crops, live stock, poultry, dairying and engineering, are held for adult farmers during the winter months, both at the College and at various points throughout the province.

Practical experiments are undertaken in the departments of field and animal husbandry, as well as a variety of scientific investigations in the departments of chemistry, physics, biology, engineering, etc.

ALBERTA.

College of Agriculture, Edmonton South.—A College of Agriculture has been established at the new University of Alberta, Edmonton South. Students completing two years at the provincial

Schools of Agriculture enter the College for a three-years course leading to the degree of Bachelor of Science in Agriculture. Over 100 acres of land are available for experimental work in cereals, grasses, clovers, hoed crops, small fruits, vegetables and flowers. Amongst the leading breeds of live stock, now maintained by the Department of Animal Husbandry, are Percheron and Clydesdale horses, Shorthorn, Hereford, Holstein-Friesian and Jersey cattle, Hampshire, Oxford, Suffolk, Shropshire and Leicester sheep and Berkshire, Duroc-Jersey, Poland, China and Tamworth swine. In co-operation with leading breeders of beef cattle in Alberta, the University is fitting a steer herd for the Chicago International Live Stock Show of 1920, thus providing for students a special opportunity for thorough training in beef cattle. Important live stock experiments are being conducted in this department.

Experimental work at each of the three provincial schools of Agriculture at Claresholm, Olds and Vermilion are carried on by the Alberta Department of Agriculture. These schools are attended principally by young men and women who intend to go back to the farm. Details respecting these schools were recorded in the Canada Year Book of 1918, pp. 244-245.

BRITISH COLUMBIA.

Department of Agriculture.—Experiments are being carried out by the Live Stock and Horticultural branches. Experiments on the control of potato diseases under field conditions have been undertaken at Chilliwack, Sardis, Cloverdale and Sullivan for the last two years, their chief purpose being to ascertain whether it is possible, by later sprayings only, beginning about the end of July or early in August, to control Late Blight, which is very destructive. In only one case were direct results obtained, viz., in 1918, at Sardis, where the sprayed potatoes remained clean until cut down by frost and gave a minimum increased yield of 50 p.c. in marketable potatoes, all remaining practically sound. The unsprayed parts were completely dead by August 28, and the potatoes on the unsprayed area averaged at least 12 p.c. of badly infected tubers. Other experiments have been undertaken on the control of apple tree anthracnose, or Black Spot Canker, on apple scab, aphids, cover cropping, lime tests and control of the Codling moth.

University of British Columbia.—Considerable progress has been made with the clearing and preparation of land for experimental and general farm purposes. The investigational results obtained by the Departments of Agronomy and Horticulture are becoming increasingly valuable, especially for farmers and gardeners cultivating upland coast soils. In the Department of Animal Husbandry, excellent foundation stock has been purchased, consisting of Jerseys, Ayrshires and Shorthorns. The University has also acquired good Clydesdale mares and Yorkshire and Berkshire pigs. Departments of dairying and poultry have been organized. In addition to the teaching and investigational work at the University, the members of the Faculty of Agriculture, in co-operation with the Dominion and Provincial Governments, have organized and conducted considerable extension work throughout the province.

FORESTRY.

Up to and including the year 1916 the annual statistics of forest products were collected and published by the Forestry Branch of the Department of the Interior. For 1917 and 1918 the statistics in Tables 36-41 have been collected and compiled by the Dominion Bureau of Statistics in collaboration with the Forestry Branch of the Department of the Interior, and have formed part of the annual Census of Industry. The three diagrams on page 240 illustrate graphically by provinces, the production in Canada during 1917 and 1918 (1) of pulpwood, (2) of wood pulp and (3) of paper. To the statistics of production have been added two tables showing (Table 42) the quantity and value of exports of wood pulp, by countries, for the fiscal years 1912-19 and (Table 43) the quantity and value of wood, blocks and other, exported to the United States for the fiscal years 1904-19.

FISHERIES.

Capital Invested.—The total capital invested in the fisheries amounted in the calendar year 1918 to \$60,212,863, as compared with \$47,143,125 in 1917, these figures including, contrary to the practice of former years, investments of \$20,366,701 in 1917 and \$30,334,129 in 1918, in fish canning and fish-curing establishments. Of the total for 1918, the sum of \$26,083,473 was invested in connection with the sea fisheries and \$3,804,261 in connection with the inland fisheries. Table 44 shows the distribution of capital amongst the various descriptions of vessels, boats, nets, traps, etc., used in both sea and inland fisheries, and in fish canning and curing establishments, for the calendar years 1917 and 1918. A statement of the value of vessels, boats and fishing materials for each of the years 1880 to 1910-11 was given in the Year Book for 1911, p. 390. For subsequent years similar information has appeared in the Year Book annually.

Number of Employees.—According to Table 45, the total number of persons employed in the fisheries of Canada in the calendar year 1918 was 87,070, as compared with 95,122 in the calendar year 1917. Of this number, 58,807 in 1918 were engaged in sea fisheries, 9,709 in inland fisheries, and 18,554 in fish canning and curing establishments¹.

Fishing Bounties.—Under an Act of 1882 (45 Vict., c. 18), passed for development of the sea fisheries and encouragement of the building of fishing vessels, provision was made for the distribution in bounties of \$150,000 annually among the owners of fishing vessels and fishermen engaged in fishing from boats in the deep sea fisheries of Canada. An Act of 1891 (54-55 Vict., c. 42) increased the amount to \$160,000. By Order-in-Council of January 30, 1919, made under the provisions of the Revised Statutes of 1906, c. 46, the distribution of the appropriation of \$160,000 for the year 1918-19 was made on the following basis: \$1 per registered ton to owners of vessels, not to exceed \$80 for any one vessel, \$6.25 to each vessel fisherman, \$3.80 to each boat fisherman and \$1 per boat to owners of fishing boats. The number of vessels which received bounties in 1918 was 784. The number of boats on which bounties were paid was 13,655. The total number of fishermen in vessels and boats to whom bounties were paid in 1918 was 29,841, an increase of 332, as compared with

¹For a description of the extent of Canadian Fisheries and the methods of capture, see Canada Year Book, 1914, page 230.

the previous year. The number of claims filed in 1918 was 14,452, a decrease of 80 from 1917, and the number paid was 14,440, or 84 less than in the previous year. The total fishing bounties paid in 1918 amounted to \$159,975.

Table 46 shows by provinces the number of fishermen who received bounties and the amount of the bounties paid to them during each of the fiscal years 1915-1918.

44.—Number and Capital Value of Fishing Vessels, Boats, Nets, Traps, etc., used in the Fisheries of Canada, 1917 and 1918.

Inland Fish Markets.—Other government assistance to the fishing industry takes the form of encouraging the development of markets for fresh fish in the interior of the country by payment of one-third of the ordinary express charges on shipments of fresh fish

from the Atlantic coast to points as far west as the eastern boundary of Manitoba and from the Pacific coast as far east as that boundary. Cold storage cars by fast freight are placed at the disposal of shippers from the Atlantic seaboard, and aid is rendered in the building of small cold storage establishments for the storing of bait. Fish-breeding is carried on by the Dominion Government upon an extensive scale, the expenditure for this service in 1918-19 amounting to \$241,212. The hatcheries in operation number altogether 45, including ten subsidiary hatcheries; there are also retaining ponds for Atlantic salmon. The hatcheries are situated in Prince Edward Island (1), Nova Scotia (5), New Brunswick (7), Quebec (5), Ontario (8), Manitoba (3), Saskatchewan (1), Alberta (2) and British Columbia (13). In addition, there is one hatchery in British Columbia, which is operated by the British Columbia Packers' Association.

Production and Value of Fisheries.—The total value of the products of the Canadian fishing industry in the calendar year 1918 was \$60,250,544, as compared with \$52,213,044 in 1917. For 1918 the value was the largest on record. The increase of \$7,938,500 was, however, in the main due to higher prices rather than to larger quantities, as is shown by Table 54, wherein out of a total increase in the value of fish exported in 1918 of \$7,713,000 as compared with 1917, only \$618,000 was due to increase in quantities exported, while \$7,095,000 was due to higher prices.

MINERALS.

Mineral Statistics.—The results of the census of mineral production, taken in 1911, were published in the Year Book of 1913 (pages 196-199). In the present edition the Canadian statistics given are limited to those of the Dominion Government and of the Departments of Mines of the Provincial Governments. To the statistics of production in this section have been added statements of the imports of Portland cement (Table 76), of the imports of anthracite and bituminous coal (Table 77) and of the exports of coal (Table 78).

Dominion Department of Mines.—According to the annual report of the Division of Mineral Resources and Statistics of the Dominion Department of Mines, the total value of the metal and mineral production of 1918 was \$211,301,897, as compared with

\$189,646,821, the finally revised figures of 1917. This is an increase of \$21,655,076, or 11 p.c., over 1917, and is the highest figure on record. In this calculation, and throughout the tables which follow, the term "production" signifies the quantity sold or shipped. Mineral products not sold or shipped at the end of the year are not, except in the case of pig-iron, included as "production". Values of metallic minerals, whether refined in Canada or not, are calculated on the basis of the average price of the metal in some recognized market, usually New York, though for lead Montreal prices are now used. The value of non-metallic minerals is given as at the mine or point of shipment.

The production of metallic minerals increased from \$106,455,147 in 1917 to \$114,549,152 in 1918, an increase of \$8,094,005, due in the main to increases in the quantities of cobalt, lead nickel and zinc produced, and in the values of cobalt and silver. The production of gold declined both in quantity and value, while in the case of copper an increase in quantity was more than offset by a reduction in price.

The production of non-metallic minerals (other than structural materials and clay products) increased from \$63,354,363 in 1917 to \$77,621,946 in 1918, an increase of \$14,267,583, due in the main to a small increase in quantity and a very large increase (\$11,993,065) in the value of coal produced, and to a large increase in the value of asbestos. The production of natural gas showed, on the other hand, a considerable decrease both in quantity and value.

While the two classes of mineral production already mentioned showed large increases in value of products, the third class—that of structural materials and clay products—showed, as between 1917 and 1918, an appreciable decline from \$19,837,311 to \$19,130,799. This decrease was mainly due to the fact that, especially in the last year of the war, capital was not available for building operations, and as a result there was little demand for building materials.

Minerals compared as to Quantity and Value.—Table 57 gives the results of calculations intended to show for each mineral product the increase or decrease in total value for 1918, as compared with 1917, that is due (a) to difference in price and (b) to difference in quantity. Of the net increase in the value of the total mineral production in 1918, viz., \$21,656,000, the sum of \$15,681,000 was due to higher prices and \$5,975,000 was a decrease due to smaller quantities. For the total mineral production the actual increase was in the percentage ratio of 11·42; the increase due to higher prices was 8·02 p.c. and the decrease due to smaller quantities was 3·15 p.c. Table 77 makes similar comparisons with respect to the exports of mineral products. It shows that the total increase in the value of mineral products exported in 1918 as compared with 1917 was \$3,754,000. The increase due to higher prices was the sum of \$9,988,000, whilst \$6,234,000 was a decrease due to smaller quantities exported, the percentages being 5·09 net increase, 14·79 increase due to higher prices and 8·45 decrease due to smaller quantities.

Iron Blast Furnaces in Canada in 1918.—Of 20 furnaces 15 were in blast in 1918 for varying periods of time. The total daily capacity of the 20 furnaces is about 4,890 gross tons. The operating companies, with numbers and capacities of furnaces, were as follows:—

DOMINION IRON & STEEL Co., Sydney, C.B.: Six completed furnaces; one of 350 tons capacity and five of 250 tons capacity each per day; three operated practically throughout the year; one for 337 days and one for 49 days; one furnace idle throughout the year.

NOVA SCOTIA STEEL & COAL Co., LTD., New Glasgow, N.S.: Two stacks and one set of stoves at Sydney Mines, C.B., of 250 tons capacity; operated throughout the year.

LONDONDERRY IRON & MINING Co., LTD., Londonderry, N.S. (in liquidation); one furnace of 100 tons capacity idle throughout the year—not operated since 1908.

MIDLAND IRON & STEEL Co., LTD., Midland, Ont. Taking over Midland blast furnace plant of Canada Iron Foundries, Ltd., of Montreal Que.: one furnace of 130 tons capacity at Midland, Ont., operated 82 days.

STANDARD IRON Co., LTD., Deseronto, Ont.: one furnace at Deseronto with a daily capacity of 55 tons, operated 312 days; one furnace of 65 tons at Parry Sound, idle throughout the year, not operated since 1913—sold to and being re-built by the Parry Sound Iron Co., Ltd., Midland.

THE STEEL COMPANY OF CANADA, LTD., Hamilton, Ont.: Two furnaces—one of 260 tons capacity, operated for 313 days, a second furnace of 430 tons capacity, operated 365 days.

ALGOMA STEEL CORPORATION, LTD., Sault Ste. Marie, Ont.: four furnaces at Steelton, near Sault Ste. Marie: two of 300 tons capacity each; one of 500 tons and one of 400 tons. No. 1 in blast 565 days; No. 2, 309 days; No. 3, 281 days, and No. 4, 278 days.

THE ATKOKAN IRON Co., LTD., Port Arthur, Ont.: one furnace of 175 tons capacity idle throughout the year, not operated since 1911.

THE CANADIAN FURNACE Co., LTD., Port Colborne, Ont.: one furnace of 325 tons capacity operated 365 days in 1918.

Electric Furnace Plants in Canada in 1918.—The plants are engaged in making pig-iron from scrap metal, chiefly steel following turnings.

FRASER, BRACE & Co., LTD.: Furnace plant at Shawinigan Falls, Que.: one single phase 6-ton non-tilting furnace.

ELECTRO FOUNDRIES, LTD., Orillia: one 6-ton three phase type non-tilting electric furnace.

WM. KENNEDY & SONS, Collingwood: one 4½-ton three phase non-tilting electric furnace.

TURNBULL ELECTRO METALS, LTD., St. Catharines, Ont.: one 6-ton three phase non-tilting electric furnace.

BRITISH FORGINGS, LTD., Toronto, Ont.: an electric steel furnace plant comprising ten 6-ton Heroult furnaces some of which were used for the production of pig-iron during a portion of 1917 and 1918.

TIVANI ELECTRIC STEEL CO., LTD., Belleville, Ont.: this electric steel plant which includes three small furnaces was operated for the production of ferro-molybdenum during 1917, but in March 1918, began the production of pig-iron.

BOWMANVILLE FOUNDRY CO., LTD., Bowmanville, Ont.: one ½-ton Gronwall Dixon electric furnace.

HULL IRON & STEEL FOUNDRIES, HULL, Que.: one 6-ton three phase tilting type electric furnace—first production in April, 1918.

ELECTRIC SMELTING CO., Brantford, Ltd.: Hull, Que.: one 4-ton electric furnace—first production in June, 1918.

COLUMBIA IRON & STEEL CO., LTD., Port Moody, B.C.: one 6-ton Heroult-electric furnace—first production in May, 1918.

TUDHOPE ELECTRO-METALS, LTD., Vancouver, B.C.: one 5-ton stationary three phase electric furnace, first operated Dec. 29, 1918.

Other Electric Furnace plants were used in 1918 for the production of ferro-alloys, the ferro-alloy plants being as follows:—

CANADIAN FERRO-ALLOYS, LTD., Shawinigan Falls, Que.: one 1½-ton stationary type electric furnace producing 50 p.c. ferro-silicon.

LEASIDE MUNITIONS COMPANY, LTD., Beupré, Que.: three stationary type electric furnaces with capacity of 10 gross tons per 24 hours each producing 50 p.c. and 85 p.c. ferro-silicon.

ELECTRO-METALS, LTD., Welland, Ont.: plant includes 8 electric furnaces producing ferro-silicon of 25 p.c., 50 p.c., 75 p.c., and 85 p.c. grades.

TIVANI ELECTRIC STEEL CO., LTD., Belleville, Ont.: small electric furnaces comprising three units of two furnaces each making ferro-molybdenum in 1917 and for a few months only in 1918.

INTERNATIONAL MOLYBDENUM CO., LTD., Orillia, Ont.: two small electric furnaces producing ferro-molybdenum in 1917, and for a few months only in 1918.

ALGOMA STEEL CORPORATION, Sault Ste. Marie, Ont.: producing spiegeleisen in blast furnace.

The following firms were also engaged during 1918 in recovering low grade ferro-silicon as a by-product in the manufacture of artificial abrasives in electric furnaces from bauxite: D. A. BRENNER, LTD., Hamilton, Ont.; NATIONAL ABRASIVE CO., Niagara Falls, Ont.; THE EXOLON COMPANY, Thorold, Ont.; THE NORTON COMPANY, Chippewa, Ont.; THE CANADIAN ALOXITE CO., Niagara Falls, Ont.

Mines Departments of Provincial Governments.—In addition to the Mines Department of the Dominion Government, from whose reports the foregoing tables and information have been compiled, there are Departments of Mines of the Provincial Governments of Nova Scotia, New Brunswick, Quebec, Ontario and British Columbia, as well as the Mines Branch of the Department of Public Works of the Provincial Government of Alberta.

Nova Scotia.—In Nova Scotia, the principal mining product is coal; and according to the annual report of the Department of Public Works and Mines the quantity of coal raised in the year ended September 30, 1918, was 5,265,404 long tons, as compared with 5,803,661 tons in 1917, and 6,496,472 tons in 1916, a decrease of 538,257 tons as compared with 1917, and of 1,231,068 tons as compared with 1916. The shortage of men in the collieries and inadequate means of transportation were acutely felt during the

fiscal year 1918. The production of other minerals in 1918 was, in short tons, as follows, the corresponding figures of 1917 being given within round brackets: pig iron 415,808 (437,354); steel ingots, 512,377 (515,538); limestone 407,048 (411,575); coke 584,891 (645,327); gypsum 56,816 (298,108); building stone 6,163 (24,711). The number of bricks made was 13,379,600, as compared with 13,598,075 in 1917, and the production of drain-pipe and tile was 1,001,792 feet, as against 959,933 feet in 1917. The production of gold was 1,279 oz., as compared with 2,296 oz. in 1917.

One of the most serious colliery explosions in the history of Nova Scotia, took place on January 23, 1918, in the Allan Shafts Mine of the Acadia Coal Company, at Stellarton, Pictou Co., when 88 lives were lost.

New Brunswick.—The annual report for the year ended October 31, 1919, of the Minister of Lands and Mines, shows that the quantity of coal mined in the year 1918-19 was 155,598 long tons, as compared with 229,617 tons in 1917-18 and 164,617 tons in 1916-17. The decrease in 1918-19 is attributed to the stoppage of war orders after the cessation of hostilities in November, 1918. Of gypsum the Hillsboro quarries produced in 1918, 27,425 tons, about 1,600 tons of which were exported to the United States in crude form, the remaining 25,825 tons being manufactured in the Hillsboro Mill and distributed throughout Canada and the United States.

Quebec.—The annual report of the Quebec Superintendent of Mines shows that the value of the mineral production of the province for the calendar year 1918 amounted to \$18,707,762, as compared with \$16,189,179, the revised total for 1917. The figures for 1918 are the highest on record. Of the total, the products of the mines proper are valued at \$13,366,775, and building materials at \$5,340,987; the former show an increase of 23.5 p.c. and the latter an increase of 2 p.c. Amongst the principal products, with their respective values in 1918, are asbestos (\$9,019,899); cement (\$3,003,534); copper and sulphur ore (\$1,319,691); limestone and marble (\$666,046); magnesite (\$1,016,764); brick (\$595,719); chromite (\$770,955); lime (\$438,673); mica (\$202,149); zinc and lead ores (\$175,094); molybdenite (\$383,252); tiles, drain-pipes, etc., (\$319,722); granite (\$224,861). Table 71 shows the annual value of the mineral production of Quebec for the years 1900 to 1918.

71.—Value of the Mineral Production of Quebec, 1900-18.

Year.	\$	Year.	\$	Year.	\$
1900.....	2,546,076	1906.....	5,019,932	1912.....	11,187,110
1901.....	2,997,731	1907.....	5,391,368	1913.....	13,119,811
1902.....	2,985,463	1908.....	5,458,998	1914.....	11,732,783
1903.....	2,772,762	1909.....	5,552,062	1915.....	11,465,873
1904.....	3,023,568	1910.....	7,323,281	1916.....	13,287,024
1905.....	3,750,300	1911.....	8,679,786	1917.....	16,189,179
				1918.....	18,707,762

Ontario.—Figures compiled by the Ontario Bureau of Mines show that the total value of the mineral production of Ontario in the calendar year 1918 was \$80,308,972, as compared with \$72,093,832

in 1917, \$65,303,822 in 1916, and \$54,245,679 in 1915. The value for 1918 is the highest on record. Of the total value in 1918, \$66,178,059 represents the value of the metallic and \$14,130,913 the value of the non-metallic production. Gold shows a production of 411,878 oz., of the value of \$8,502,480, a decrease as compared with 1917 of 9,015 oz., or \$196,255. The total shipments of silver amounted to \$17,738,153 fine oz., of the value of \$17,415,882, as compared with 19,479,692 oz. in 1917, of the value of \$16,183,208. Thus the considerable decrease of production, viz., 1,741,539 oz., is more than made up for the increase in prices, the smaller quantity produced in 1918 being worth \$1,232,674 more than the larger quantity produced in 1917. The increase in the value of silver has naturally been of great advantage, not only to the mining companies of Cobalt, but also to their employees, whose wages advance automatically with price. Table 72 shows the total production and value of silver at the Cobalt camp each year from 1904 to 1918. The total for the 14 years is 292,462,325 oz., of the value of \$169,376,443. The value of the output of non-metallic products for 1918, \$14,130,913, was 8 p.c. less than in 1917 when it amounted to \$15,261,975. Of the items in the non-metallic list, sand-lime brick, lime, gypsum, iron pyrites, salt, sand and gravel show decreased production but increased value. Arsenic, brick fancy and dressed, bricks common, Portland cement, corundum, graphite, mica, natural gas, tile (drain and building), pottery, sewer pipe and stone, also declined in value. Actinolite, feldspar, fluorspar, petroleum, quartz, talc, increased in both quantity and value, to which may be added barite and mineral water, which appear for the first time in the production table.

72.—Production of Silver at the Cobalt Camp, Ontario, 1904-18.

Alberta.—The Mines Branch of the Department of Public Works states that the total production of coal in Alberta during the calendar year 1918 was 6,148,620 short tons, as compared with 4,863,414 tons in 1917, an increase of 1,285,206 tons. The production in 1918 of coke was 32,858 tons, as compared with 31,630 tons in 1917 and of briquettes 100,470 tons, as compared with 93,818 tons. Of natural gas the production in the province was, according to the Mines Department of the Dominion Government, 6,318,389,000 cubic feet, as compared with 6,744,130,000 cubic feet, the finally revised quantity for 1917.

British Columbia.—According to the Annual Report for 1918 of the Provincial Mineralogist, the total value of the mineral production of British Columbia from 1852 to 1918 was \$637,353,581, distributed among the different mineral products as follows: Placer gold, \$75,436,103; lode gold, \$97,121,786; silver, \$46,839,631; lead, \$42,294,251; copper, \$145,741,069; zinc, \$13,278,058; coal and coke, \$187,147,652; building stone, bricks, etc., \$28,843,272; miscellaneous minerals, etc., \$651,759. Table 73 shows the value of the total mineral production of the province from 1852 to 1918, inclusive. The value of the total mineral production for the calendar year 1918 was \$41,782,474, an increase from that of the previous year of 1917 of \$4,772,082, or 12.9 p.c. The principal mineral products of British Columbia are gold, silver, lead, copper, zinc and coal. Table 74 shows the quantity and value of the mineral production of British Columbia for the three calendar years 1916-1918. The gross value of the metallic minerals recovered in 1918 was \$27,910,278, as compared with \$27,284,474 in 1917.

The increased value of mineral products in 1918 as compared with 1917 was due in the main to a slight increase in the quantity of coal produced—from 2,149,975 long tons to 2,302,245 long tons—combined with a large increase in its value from \$7,524,913 to \$11,511,225. Thus coal alone accounts for more than four-fifths of the total increase in the value of products.

World's Production of Gold and Silver.—Table 75, which is taken from the Annual Report for 1918 of the Director of the United States Mint, gives by countries the quantity and value of the world's production of gold and silver for the calendar years 1917 and 1918. For 1918 the total production of gold amounted to 18,416,386 fine oz., of the value of \$380,700,489, as compared with 20,289,546 oz., of the value of \$419,422,092 in 1917. By countries, the Transvaal, Cape Colony and Natal lead with a total production of 8,418,377 oz., the United States being second with 3,320,784 oz., followed by Australia third with 1,282,135 oz., Mexico fourth with 813,895 oz., Canada fifth with 699,681 oz. and Rhodesia sixth with 631,357 oz. The gold production of the British Empire in 1918 was 12,126,088 oz., constituting 66 p.c. of the world's total of 18,416,386 oz. The world's total production of silver in 1918 was 197,494,279 fine oz., of the value of \$194,067,250, as compared with 174,187,774 oz., of the value of \$154,139,904 in 1917. By countries, the lead in silver production is taken by the United States with 67,810,100 oz. in 1918, followed by Mexico with 62,517,000 oz. and Canada with 21,383,979 oz. The silver production of the British Empire in 1918 was 35,128,-479 oz., or 18 p.c. of the total of 197,494,279 oz.

MANUFACTURES.

Statistics of the manufactures of Canada are comprised in Tables **80** to **87** of this section. Table **80** gives, by principal items of the schedule, the total results for Canada of the census of manufactures for the year 1917, as compared with 1915, and also the absolute and percentage increases, the table including all establishments irrespective of the number of employees. Table **81** gives the statistics of manufactures for the same years, by provinces, also including all establishments. In Table **82** are given the comparative figures, by provinces, for the years 1900, 1905, 1910 and 1915, the comparison being limited to establishments employing five hands and over. In Table **83** are consigned the statistics of manufactures for the year 1917, by groups and kinds of industries, for the whole of Canada, the figures covering all establishments irrespective of the number of employees. Table **84** shows the number of establishments with the total and average production by groups of values. Tables **85** to **87** relate to wage-earners, Tables **86** and **87** being based upon returns for 28,095 industrial establishments out of a total of 34,392 reporting. Dairy and sawmill establishments were not required to report on classified weekly wages, and other establishments operating on piece work basis were unable to furnish the information required.

Under the new organization of the Dominion Bureau of Statistics, the Census of Manufactures is taken annually instead of quinquennially, as in the past. The last of the quinquennial censuses of manufactures under the old system was taken in 1916 for the calendar year 1915, and the first of the annual censuses of manufactures was taken in 1918 for the calendar year 1917. In the tables comparisons are made where possible with the corresponding results for 1915.

In the making of such comparisons the differences in the method of taking the census must first of all be borne in mind. The statistics for 1915 included only establishments whose limit of output was placed at \$2,500 or over, irrespective of the number of persons employed, except in the case of flour and grist mills, butter and cheese factories, fish preserving factories, saw-mills, brick and tile yards, lime kilns and electric light plants, in which cases there was no limitation on the value of output. In the census of industry of 1917, the limit of output was withdrawn and all establishments reporting to the Bureau were included, the effect being an increase in the number of establishments included from 21,306 to 34,392—an increase due to change of method, rather than to a change in the actual number of industrial establishments existing in the Dominion. As however the establishments included for the first time in the 1917 census were exclusively those carrying on operations on a small scale, their inclusion affects only to a minor extent the statistics of those engaged in production and of the value of products.

When the results of the two censuses are placed in juxtaposition, certain striking changes which took place in the manufactures of Canada in the two years between 1915 and 1917 are at once evident. First of these is the very large increase of capital investment—an increase from \$1,994,103,272 to \$2,786,649,727, which is \$792,546,455, or 39·74 p.c. This increase was no doubt partly due to higher valuations placed upon equipment in 1917 than in 1915, as a consequence of the general rise in prices.

Next and most important of these changes is the large increase in both the gross and the net value of Canadian manufactures—that is, in the gross value of products and in the gross value of products less the cost of materials—in the short space of two years. Whereas in 1915 the gross value of products was \$1,407,137,140, in 1917 it had leaped forward to \$3,015,577,940, an increase of \$1,608,440,800, or 114·31 per cent, a quite unprecedented increase in such a brief period. Similarly, the value added in the process of manufacture rose from \$605,001,278 in 1915 to \$1,409,847,300 in 1917, an increase of \$804,846,022, or 133·03 p.c. These increases were, of course, largely due to higher prices, but also indicate an unexampled growth in actual production.

Accompanying the growth in the value of products and quite as remarkable, is the increase both in the total amount of wages paid and in the average wages paid per employee. The total amount paid in wages increased from \$225,580,998 in 1915 to \$455,199,823

in 1917, an increase of \$229,618,825, or 101.79 per cent. As the number of employees on wages increased only from 444,487 to 601,305, an increase of 156,818, or 35.28 per cent, there was a large increase in the wage of the average individual employee—an increase from \$507.50 per annum in 1915 to \$757.02 per annum in 1917, being an increase of \$249.52, or 49.16 p.c.

Employees on salaries fared comparatively worse during the two-year period than employees on wages. Their numbers increased from 52,683 in 1915 to 73,605 in 1917, an increase of 20,922, or 39.71 per cent. During the same period the amounts paid in salaries increased from \$60,308,293 to \$94,992,246, an increase of \$34,683,953, or 57.51 per cent. Dividing the total of salaries paid in each year, by the number of employees in each year, it is found that the average salary increased during the two years from \$1,144.73 to \$1,290.56, an increase of \$145.83, or 12.73 per cent, as against an increase of 49.16 per cent in the case of wage-earners. Not only was the relative increase much less in the case of the salaried employee, but the absolute increase was smaller—\$145.83 per annum as against \$249.52.

The gross value of the products of Canadian manufacturing industries, as stated above, has been more than doubled in the two-year period. This increase is shown in Table 79 to have been fairly evenly distributed throughout the provinces. With the exception of New Brunswick and Manitoba, all the provinces have doubled the gross value of their products of manufactured commodities, and of these Manitoba lacks but a very little of having done so. Ontario, in 1917 as in 1915, produced more than half of the gross production of manufactured goods in the Dominion.

In the census of manufactures, the industries of the Dominion are divided into fifteen classes. In Table 81 are given the statistics of production for these fifteen classes in 1917. For the comparative statistics of 1915, reference may be made to Table 72 on page 285 of the Year Book of 1916-17. The statistics of 1917, as compared with those of 1915, show clearly the effects of the war upon certain industries. The iron and steel industry, which was in fifth place among Canadian industries in value of products in 1915 with a product of \$120,422,420, took second place in 1917 with a product of \$400,385,086. The chemical industry, which in 1915 occupied eleventh place with a product of \$45,410,486, in 1917 rose to ninth place with a product of \$133,618,658. The manufacture of vessels for water transportation rose from fifteenth place to thirteenth, with an increase of product from \$8,419,648 to \$37,244,678. The liquor and beverage industry also experienced the effects of war, but in the opposite direction. From thirteenth place it fell to fifteenth, its products showing an absolute decline in value from \$34,859,927 in 1915 to \$29,935,226 in 1917.

As for the other great industries of the Dominion, the manufacture of food products, as is natural in a predominantly agricultural country, took in 1917 as in 1915 first place, with a product of \$754,637,940 in the latter year, as compared with \$388,815,362 in the former. The textile manufacture, though its products increased

from \$144,686,605 to \$265,448,565, fell from second to fourth place. The manufacture of vehicles for land transportation, rose from eighth to sixth place among Canadian industries, with an increase in product from \$73,878,212 to \$197,488,770. Other industries, though showing a large absolute increase in value of production for so short a period, did not materially change their relative positions.

The comparison here made between the growth of different classes of industries might with advantage be expanded to deal with the growth of individual industries during the period under consideration. It is suggested that those who are interested in particular industries should compare the statistics of such industries, as given on pages 286 to 293 of the 1916-17 Year Book, with the figures of Table 83 on pages 277 to 283 of the present volume.

WATER POWERS OF CANADA.

By J. B. CHALLIES, C.E. (Tor.), M.E.I.C., Director of Water Power, Department of the Interior, Ottawa.

During the past few years the fuel situation throughout the world has become chaotic. Coal, which formerly was obtainable almost everywhere at reasonable rates, has become very expensive and the supply uncertain. In order to obtain essential supplies of energy, and to combat the rising costs which are strangling industrial progress, there has been during the war years a very marked development of water power and a general stock-taking of water power resources. Table 88 gives a summary of the area, population, available and developed water power in the countries of the British Empire as derived from the most reliable sources.

The table includes only those British Possessions known to possess water resources, although in some cases the column headed "Available" has been left blank, as no estimates of the totals have yet been made. The best informed authorities place the Empire's water power resources in the countries listed in the table at from 50 to 70 million horse-power. There are other British possessions not listed in the table having an aggregate area of 2,282,400 sq. miles and a population of 23,268,000, regarding which there is no water power information, although it is reasonable to suppose that water power resources exist. From this total, small island areas such as those of Hong Kong, Bermuda, etc., have been omitted. It should also be noted that no

This brief summary of the water power situation in the British Empire and in foreign countries indicates the extent of the world's water power resources, and gives some idea of the great part that water power will be called upon to play in industrial and domestic circles. Canada is everywhere recognized as the Empire's pioneer in water power matters, for not only are its water power resources greater than those of any other country in the Empire, but nearly 81 p.c. of the total water power developed lies within its confines.

¹Includes only Hydro-electric stations which develop power for sale.

²Includes only power owned by pulp and paper companies. A further 100,000 H.P. or upwards is purchased by pulp and paper companies from central electric stations.

In a country so large as Canada estimates as to available power are necessarily approximate, but Table 90 summarizes briefly the water power situation in Canada by provinces, and it should be observed that no estimate of available water power has been made for the Northwest Territories, where there are undoubtedly great water power resources. The information in this table regarding the power developed in Canada is obtained from the recent census taken by the Dominion Water Power Branch in co-operation with the Dominion Bureau of Statistics. This census also reveals the fact that practically 90 p.c. of the central station power in Canada is derived from water power, and that in Manitoba, Ontario and Quebec, provinces which have to import their coal supplies from other provinces or from the United States, the proportion is practically 95 p.c. It is therefore obvious that Canada as a whole, and central Canada in particular, owes much of its prosperity and many of the amenities of civilization to its water power resources. It is all the more gratifying therefore to observe that only a comparatively small proportion of the water power resources have so far been developed, and that there are still ample resources available for future progress. All that is necessary is wise and co-operative investigation, development and administration of these resources for domestic, industrial, electro-chemical and transportation requirements. Such a policy has already been inaugurated, and its continuance and development will go far to ameliorate conditions arising out of the increasingly difficult coal situation.

VIII.—TRADE AND COMMERCE.

Included in this section are tables showing the exports and imports of Canada in different categories and for varying periods. These are followed by grain statistics and statistics relating to bounties, patents and copyrights, trade marks, etc.

Import and Export Tables.—Table 1 is designed to present a general view of the aggregate trade of Canada from 1868 to 1919. In the Year Book for 1916-17 (p. 297) and 1918 (p. 285), the corresponding table was constructed to show the total trade of Canada as made up of imports of merchandise entered for home consumption and of total exports, including exports of foreign produce. The reasons for the changes there made in the construction of the table, as compared with previous years, were explained in the Year Book for 1916-17, pp. 294-5. In connection with a further examination of the customs data, and especially with a reclassification recently effected by the Dominion Bureau of Statistics, it is considered that a truer presentation of the trade statistics of Canada will be made by omitting altogether from the values representing the total trade the amounts of foreign produce. This is especially the case in connection with Table 4, showing values per capita, because if foreign produce be included with the total exports it should in strictness be also included with the total imports. Accordingly, the aggregate trade of Canada, as shown in the last column of Table 1 (p. 290), consists of the value of the imports entered for home consumption (column 4) and of the exports of Canadian produce (column 5). At the same time, the value of the exports of foreign produce is given in

TRADE AND COMMERCE

AGGREGATE EXTERNAL TRADE OF CANADA, 1901-1919.

Each vertical line represents one year from 1901 to 1919, and each horizontal line represents \$50,000,000 from zero to \$2,500,000,000.

column 6 and that of the total exports in column 7. The values of coin and bullion, the movement of which during the past five years represents fiduciary transactions rather than trading exchanges, are recorded separately in Table 2 for the years 1868-1918. The duties collected on exports and imports are given in Table 3, and Table 4 shows the ratio of exports to imports and the per capita value of Canadian trade. From Table 4 it will be observed that the so-called "balance of trade" has been against Canada (i.e., the imports for home consumption have exceeded the exports of Canadian produce) in forty-three years out of the fifty-two years since Confederation, and that this adverse balance reached its highest point in 1913 just before the war. After 1913 the unfavourable trade balance diminished, and in 1916, for the first time since 1898, it gave place to a favourable balance of trade, which has continued down to the present time. For 1916 the exports of Canadian produce were 146.03 p.c., for 1917 136.20 p.c., for 1918 159.99 p.c., and for 1919 132.73 p.c. of the imports for home consumption. The value of the aggregate trade per capita is shown by Table 4 to have risen from \$34.28 in 1868 to \$241.41 in 1919. Tables 12 and 13 show, for the fiscal years ended 1915 to 1918, the exports the produce of Canada and the imports for home consumption to or from the United Kingdom, the United States and all countries, according to the special classification by principal articles which has been made annually for the purposes of the Year Book since 1905. These tables close the series, as a new classification of commodities, prepared by the External Trade Division of the Dominion Bureau of Statistics, came into force during the fiscal year ended March 31, 1920. With a view to including in this edition of the Year Book the latest trade figures available, the quantities and values of the principal imports and exports for the year ended March 31, 1919, are given in Table 14, as abridged from the detailed classification in the Annual Report of the Trade of Canada for 1919.

Aggregate External Trade.—As shown by Table 1, the aggregate external trade of Canada (including only the imports for home consumption and the exports of Canadian produce) for the year ended March 31, 1919, was \$2,132,873,141, as compared with \$2,502,571,534 for 1917-18, \$1,996,732,074 for 1916-17, \$1,249,427,797 in 1915-16, and \$864,865,148 in 1914-15. A considerable proportion of the increased value of Canadian exports during the past five years has been due directly to the war, large increases being shown for grain, hay, boots and shoes, and especially large increases for cartridges, explosives and fulminates, metals, minerals, iron and steel and manufactures thereof. After the armistice was signed, the European demand for war commodities ceased, and as a consequence there was a great falling off in the value of exports of Canadian produce in 1918-19, as compared with the previous year. In 1918-19 the total trade of the Dominion with the United Kingdom was \$613,786,095, as compared with \$926,804,352 in 1917-18. With the United States it was \$1,201,793,824 in 1918-19, as compared with \$1,209,139,412 in 1917-18, while the trade with countries other than these two was \$317,293,122 as compared with \$366,627,770 in the previous year. For the calendar year 1918 the total value of Canadian trade (imports for home consumption and exports of Canadian produce) amounted

to \$2,106,591,363, exclusive of coin and bullion, as compared with \$2,552,412,571 in 1917, a decrease of 17.47 p.c. Exports of Canadian produce in 1918 amounted to \$1,199,636,463, as compared with \$1,547,340,855 in 1917, and imports to \$906,954,900, as compared with \$1,005,097,119 in 1917.

Totals.....	119,458,662	161,247,746	205,734,164	241,115,311

The articles in Tables 15 and 16 are usually grouped as natural products, as has been done in Table 7 under the heads of agricultural, animal, fisheries, forest and mineral produce, as well as in Table 12. But by some authorities they are grouped with manufactured products, and they have been abstracted here to show the kinds and values of articles to be added to manufactures in those several tables, if so classified. If added to the exports of manufactures as given in Table 7, page 297, or in Table 12, pages 312-3, the total values would be \$204,998,163 for 1915, \$403,282,744 for 1916, \$683,133,840 for 1917 and \$877,717,827 for 1918. Added to the exports of manufactures to the United Kingdom in Table 7, page 297, the total value for 1918 would be \$420,913,087, to the United States \$219,816,202, and to other countries \$236,988,538, and the total increase in the period from 1915 to 1918 would be over 328 p.c. But the chief component value of these exports is that of raw material.

GRAIN STATISTICS.

A description of the arrangements for the storage, inspection, grading and shipment of Canadian grain has been given in previous issues of the Year Book (see pp. 454-457 of the edition of 1914). Tables 33 to 37 give the principal grain statistics for a series of years. For the year 1918-19 the total storage capacity of the 3,777 grain elevators in Canada was 221,279,964 bushels, these figures representing an increase from a total of 523 elevators and warehouses with a capacity of 18,329,352 bushels in 1900-01. Under the Canada Grain Act, 1912, the Dominion Government has power itself to erect and operate terminal grain elevators. Five such elevators are already in operation, and are situated respectively at Port Arthur (Ont.), Saskatoon (Sask.), Moosejaw (Sask.), Calgary (Alberta) and Vancouver (B.C.).

Table 33 shows, for the crop years 1901 to 1919, the number of railway stations at which elevators are placed, the number of elevators and warehouses and their total storage capacity, the figures being given by provinces for the country elevators of the West, and by description of elevators for the rest of the country. Tables 34 and 35 give statistics of the inspection of grain for the years 1917, 1918 and 1919, and Tables 36 and 37 of the shipment of grain by vessel and rail for 1918 and 1919.

33. Number and Storage Capacity of Canadian Grain Elevators in the crop years 1901-1919.

BOUNTIES.

The only bounties now being paid are for crude petroleum and zinc. Bounties on iron and steel ceased in 1911 and on lead in 1918. A deferred payment on lead of \$51.92 on 86,528 lb. was paid in 1918-19, which makes the total paid on lead bounties from 1899 to 1918 amount to \$1,979,216 for 1,187,169,878 lb. of lead, as in Table 38. For crude petroleum the amount paid in 1919 was \$162,187.24 on 10,812,482 gallons, making the total paid from 1905 to 1919 \$2,914,124 on 194,274,947 gallons. Zinc bounties are granted under provisions of the Act, 8-9 Geo. V, c. 51, not to exceed \$400,000 to 31 July,

1920. The bounty to be paid equals the difference between the standard market price of zinc and 9c. per lb. There was paid in 1918-19 the sum of \$108,563.32 on 10,107,704 lb. of zinc sold.

The total amount of bounties paid from 1896 to 1919 was \$22,155,692; of this amount \$16,785,827 was for iron and steel; \$1,979,216 for lead; \$2,914,124 for crude petroleum; \$367,962 for manila fibre; and \$108,563 for zinc. The Year Book of 1915, pages 459 and 460, gave a description of the bounties that have been payable since 1883, as well as tables showing for each commodity the quantities on which bounties were annually paid, and the amounts of such bounties for the years 1896 to 1915 inclusive.

PATENTS, COPYRIGHT, TRADE MARKS, ETC.

Patents.—Applications for patents in Canada from inventors in other countries were first received in 1872. In that year the total number of applications for patents made to the Canadian Patent Office, Department of Agriculture, was 752, and the total fees amounted to \$18,652. The business of the Office has continued gradually to expand, and the number of applications and total fees have increased each year without a break since the beginning of the present century

until the fiscal year ended March 31, 1913, when 8,681 applications were received, and the total fees amounted to \$218,125. For the fiscal year ended March 31, 1918, the number of patents granted was 7,233, of which 5,631, or 78 p.c. of the total, were issued to United States inventors. Patents to Canadian inventors numbered 973, the other principal countries in order of the number of patents granted being the United Kingdom 318, Australia 53, France 34, New Zealand 35 and Sweden 47. For the fiscal year ended March 31, 1919, the number of patents granted was 6,052, the decline from the previous year in spite of an increased number of applications being attributed to the orders and regulations made under the War Measures Act, 1914, and to the request of the British and United States Patent Offices, where the publication of the patent might assist the enemy. Of the patents granted, 4,569, or 75 p.c., were issued to United States inventors, 875 to Canadian and 314 to British patentees, while Sweden with 59 and Australia with 51 patents came next in number of patents issued. Table 40 shows the distribution of the Canadian patentees by province of residence for the years 1910 to 1919.

40.—Number of Canadian Patentees, by Province of Residence, for the fiscal years 1910-1919.

It will be seen from the table that the more populous provinces of Ontario and Quebec obtained the largest absolute number of patents; but a calculation of the number of patentees in relation to population shows that for the fiscal year 1918 the greatest relative inventiveness was displayed in British Columbia. Thus in this province, in 1918, one patent was granted to every 4,728 persons, the other provinces as regards the number of persons to each patent granted being placed in order as follows: Manitoba, 5,006; Saskatchewan, 5,862; Alberta, 6,142; Ontario, 6,339; Yukon, 8,512; Quebec, 9,105; New Brunswick, 25,134; Nova Scotia, 27,352 and Prince Edward Island, 31,242. For 1919 the number of persons to each patent was as follows: Alberta, 4,995; British Columbia, 5,607; Saskatchewan, 6,479; Ontario, 6,537; Manitoba, 6,903; Quebec, 11,652; Nova Scotia, 23,444; New Brunswick, 39,099.

Copyright, Trade Marks, Etc.,—The report for the year ended March 31, 1919, of the Copyright and Trade Marks Branch of

the Department of Trade and Commerce shows that the fees received for copyrights, trade marks, industrial designs and timber marks amounted to \$47,973 for the fiscal year 1918-19, as compared with \$41,472 in 1917-18, and \$35,829 in 1916-17. Registrations of copyright in 1918-19 numbered 1,436 against 1,440 in 1917-18 and 1,384 in 1916-17, of trade marks 919 against 987 in 1917-18, of industrial designs 169 against 177 and of timber marks 121 against 31.

IX.—TRANSPORTATION AND COMMUNICATIONS.

Statistics of transportation and communications comprise those of steam and electric railways, motor vehicles, express companies, shipping, canals, telegraphs, telephones, and the Post Office¹.

RAILWAYS.

Steam Railways.—The increase in the railway mileage of Canada for the year ended June 30, 1918, was 275, as compared with 1,170 in 1917, 1,852 in 1916, 4,787 in 1915, 1,491 in 1914 and 2,577 in 1913, the increases respectively over the mileage of the previous year. The increase in mileage was thus the smallest of recent years, owing to the growing pressure of the war and the scarcity of capital. The total railway mileage in actual operation on June 30, 1918, was 38,879. The railway year runs from July 1 to June 30, and the railway statistics throughout this section are for the years ended June 30. Table 1 records the steam railway mileage in Canada annually from 1835 to 1918, and Table 2 the steam railway mileage of Canada by provinces for each of the eight years 1911 to 1918.

Capital Liability of Steam Railways.—The capitalization of railways in operation during the year ended June 30, 1918, was \$1,999,-880,494, an increase of \$14,760,503 for the year. Of the total capitalization, \$877,600,613 are stocks, \$216,284,882 are consolidated debenture stock of the Canadian Pacific Railway and \$905,994,999 are funded debt.

Statistics of Individual Companies.—Table 5 gives the mileage, capital, aid paid up, earnings and operating expenses of the steam railways of Canada for the year ended June 30, 1918. It shows that the aggregate earnings were \$330,220,150, an increase compared with 1917 of \$19,448,671, or 6.2 per cent. Operating expenses in 1918 amounted to \$273,955,436, an increase of \$51,064,799, or 22.9 per cent. The ratio of operating expenses to gross earnings was 82.96 per cent, as compared with 71.7 per cent in 1917. The total aid paid up, as given in Table 5, amounting to \$160,294,331, includes \$117,682,628 paid by the Dominion Government, \$29,940,865 paid by the Provincial Governments and \$12,670,838 paid by municipalities.

¹ The statistics of railways and canals, telegraphs, and telephones are taken from the Reports for the year ended June 30, 1918, of the Department of Railways and Canals, especially the Reports of the Comptroller of Statistics (Nos. 20, 20a, 20b, 20d, 20f, 1919). The statistics of express companies are furnished by the Comptroller of Railway Statistics. The shipping statistics are taken from the Report of the Department of Marine and the Trade and Navigation Returns. The postal statistics are from the Report of the Post Office Department.

Passengers and Freight.—Table 6, giving the statistics of steam railways from 1901 to 1918, shows that in 1918 the steam railways of Canada carried 50,737,294 passengers and 127,543,687 tons of freight, a decrease of 3,012,386 passengers, or 5.6 per cent, and an increase of 5,627,415 tons of freight, or 4.6 per cent, as compared with 1917. The volume of freight traffic in 1918 was again the largest in the history of Canadian railways. The distribution of freight as between different classes of products is shown in Table 15. The proportions per cent are for 1918 as follows: Agriculture, 18.72; animals, 3.34; mines, 36.99; forests, 16.35; manufactures, 17.54; merchandise, 3.96 and miscellaneous, 3.10.

Government Aid to Railways.—The railways of Canada have been built largely under different forms of Government aid. Tables 4 and 9 to 11 show its nature and extent. The principal forms of aid granted have consisted in land grants, cash subsidies, loans, the issue of debentures and the guarantee of bonds or interest. Aid has been granted both by the Dominion and Provincial Governments and also by municipalities. Table 4 shows the areas of the land granted as subsidies to steam railway companies by the Dominion and Provincial Governments, with the names of the companies in the case of the Dominion Government. The total area so granted up to June 30, 1918, extends to 55,740,249 acres.

Canadian Government Railways.—As a condition of Confederation the Government of the Dominion undertook the completion of a line of railway between the old province of Canada and the ice-free Atlantic ports of Nova Scotia and New Brunswick. This railway, known as the Intercolonial, was completed in 1876. In 1903, the Dominion Government undertook the construction of the eastern division of the National Transcontinental Railway from Moncton, N.B., to Winnipeg, to be leased to the Grand Trunk Pacific Railway Company for a period of 50 years. On the failure of the latter company to take over the operation of the road when completed, at an expenditure up to March 31, 1918, of \$164,488,237 (Table 13), the Government itself undertook its operation. The Prince Edward Island railway, opened in April, 1875, is also the property of the Dominion Government. Thus, on March 31, 1918, the Canadian Government railways had a total mileage of 5,150.08, comprising the Intercolonial railway, 2,305.23 miles; St. John and Quebec railway (leased), 127.72 miles; Prince Edward Island railway, 313.82 miles; and National Transcontinental railway, 2,403.31 miles. On June 1, 1918, several short company-owned branch lines in New Brunswick, aggregating 143 miles, were taken over for operation, pending completion of purchase. Further, in pursuance of an Act passed in 1917 (7-8 George V, c. 24), intituled an Act providing for the acquisition by His Majesty of the capital stock of the Canadian Northern Railway Company, and an agreement entered into under the Act, the Government acquired the entire capital stock of the Canadian Northern Railway Company, except five shares issued in exchange for Canadian Northern Railway income charge convertible debenture stock. Having thus acquired control, the Government, in September,

1918, appointed a new board of directors of the Canadian Northern Railway Company. This board, under Order in Council of November 20, 1918, became also a board of management of the Canadian Government railways, with all the powers theretofore vested in the general manager of the Canadian Government railways. The use of the general term "Canadian National Railways" to describe both systems was authorized by Order in Council of December 20, 1918, the corporate entity of each system being, however, preserved. The Canadian Northern system, at the time of its acquisition by the Government, had a total mileage of 9,566.5 miles. In addition, the Quebec and Saguenay railway, with 62.3 miles of lines, when offered for sale, was purchased by the Government under statutory authority, and by Order in Council of September 24, 1918, placed under the jurisdiction of the board of directors of the Canadian Northern Railway Company. The Lotbinière and Megantic railway, again, about 30 miles in length, was acquired by the Dominion Government under authority of an Order in Council of December 1, 1919, and is to be operated as part of the Canadian Government railways system by the board of directors of the Canadian Northern railway. The Hudson Bay railway, with 334 miles completed at the end of 1919 out of its total of 424, has been declared to be comprised in the Canadian Government Railways, and is being operated to a limited extent by the board of directors of the Canadian Northern railway.

Aid to Railways by Dominion Government.—From 1851 up to June 30, 1918, as shown analytically in Table 10, the total value of public aid granted to steam railways in Canada, exclusive of the capital of two government railways (I.C.R. and P.E.I.R.), amounted to \$274,067,049. Of this sum \$218,714,318 represents aid granted by the Dominion Government, \$37,437,895 that granted by the Provincial Governments, and \$17,914,836 that granted by municipalities. During 1918 the total cash subsidies paid to railways amounted to \$720,404, paid wholly by the Dominion Government. Table 11 shows for each year from 1901 to 1918 the amount of aid to date given to steam railways by the Dominion Government. The total at June 30, 1918, of \$372,252,310 is made up of the capital of the two government-owned lines, amounting to \$153,537,992, and \$218,714,318, representing the aid granted by the Dominion Government to other railways. The latter includes in 1912 the sum of \$4,994,417 paid to the Grand Trunk Pacific Railway Co. under the implement clause of the agreement between the Government and the Company, increased in 1916 to \$6,263,716. This clause provides that the Government shall make up the difference between the amount realized by certain bonds and their par value. In each year since 1886 the aid granted to other railways includes the sum of \$10,189,521 paid by the Government to the Canadian Pacific Railway Company for land taken over by the Government from the Company's land subsidy. From 1885 to 1909 the amounts in the third column represent the accumulated annual payment by the Dominion to the Quebec Government of interest at 5 p.c. on a sum of \$2,394,000 and amounting to \$119,700 on account of the transfer of the Quebec, Montreal, Ottawa

and Occidental Railway. The item of \$5,160,054 in 1909 includes the payment of the principal. From 1910, the amounts include the loan of \$10,000,000 made to the Grand Trunk Pacific Railway Company under federal legislation of 1909 (8-9 Edw. VII, c. 19). During the year ended June 30, 1918, loans of \$25,000,000 were made to the Canadian Northern Railway, and of \$7,500,000 to the Grand Trunk Pacific Railway by the Dominion Government.

Dominion and Provincial Guarantees.—Guarantees of bonds have been substituted in large measure for other forms of aid during recent years, and in 1918 the total value of the guarantees authorized by the Dominion and Provincial Governments was \$405,444,992. Of this value, the sum of \$189,666,539 represents bonds authorized by the Dominion Government and the sum of \$215,778,453 bonds authorized by the Provincial Governments. Of the total value of bonds authorized, viz., \$405,444,992, bonds to the value of \$358,488,395 have been executed and the sum of \$342,317,649 represents the value of guarantees earned. Grand Trunk Pacific bonds of the value of \$33,116,000, purchased by the Dominion Government, are included in the amount of guarantees authorized, although in this case the guarantee does not apply.

Hudson Bay Railway.—The route of the Hudson bay railway lies between Pas, Manitoba, where connection is made with the Canadian Northern Railway, and Port Nelson on Hudson bay, a total distance of 424 miles. The work of construction was placed under contract in August, 1911. The entire line has now been graded and track laid from Pas north to the second crossing of the Nelson river at Kettle rapids, a distance of 334 miles, to which point also telegraphic communication has been established. All bridges up to and including that at Kettle rapids, have been completed. Between this point and Port Nelson two bridges have yet to be constructed. Considerable progress has been made on railway terminals, docks and other harbour works at Port Nelson. The total expenditure up to March 31, 1919, was \$20,796,445.

Quebec Bridge.—The Quebec Bridge was built by the Dominion Government to replace the structure which fell during the erection in 1907. The contract for the substructure was let in 1909, and for the superstructure in 1911. The bridge was opened for traffic in October, 1917, although not entirely completed until August, 1918. It was officially opened by H.R.H. the Prince of Wales, on August 22, 1919. The main span is the longest in the world, being 1,800 feet centre to centre of piers, or 100 feet longer than that of the Forth Bridge in Scotland. The total cost of this structure was in the neighbourhood of \$15,000,000. The bridge is of the cantilever type and carries a double track railway and accommodation for foot traffic, but no highway. The bridge forms a connecting link in the Canadian National Railways system, and is operated as a part of such system

NOTE.—The mileage shown in the United States relates entirely to lines which cross American territory in passing from one point in Canada to another; such lines, although not heretofore included in Canadian mileage, are operated wholly for the purposes of Canadian traffic. There is a large additional mileage in the United States, which is owned and operated by Canadian Railways, but of which no account is taken in these statistics.

Electric Railways.—During 1918 the total capital liability of electric railways, which for the most part consist of urban street tramways, was increased from \$161,234,739 to \$167,253,093. Of this amount, \$73,864,820 are in stocks, and \$93,388,273 are in funded debt. The number of fare passengers carried in 1918, was 487,365,456. Comparisons cannot be made with preceding years, owing to the

omission of facts relating to the Montreal Tramways and several other units. The freight hauled in 1918 was 2,497,530 tons, as compared with 2,335,539 tons in 1917. Gross earnings were \$24,299,890, as against \$30,237,664 in 1917, and operating expenses were \$17,535,975, against \$20,098,634 in 1917. These and other particulars, with comparative figures, are set out in Tables 20-24. The number of employees in the service of electric railways on June 30, 1918, was 11,646, as compared with 11,696 in 1917. The total salaries and wages for the year 1918 were \$11,840,864, as against \$9,451,685 in 1917. The total mileage of electric railways computed as single track in 1918 was 2,276, as compared with 2,278 in 1917.

MOTOR VEHICLES.

The use of motor vehicles has increased so rapidly during recent years that this means of transportation has now become one of the most important in Canada. In 1904 the number of motor vehicles registered in Ontario was only 535; in 1919 the number was 144,804. In Quebec province the number has grown from 254 in 1907 to 33,547 in 1919. For Saskatchewan the number of registered cars has increased from 8,020 in 1914 to 56,855 in 1919. For Alberta the number of registered cars in 1906 was 41; in 1919 the number was 34,000. As will be seen from Table 25 there has been a great increase in the number of motor vehicles registered in each of the provinces, whilst the total number of motor vehicles registered for all Canada in 1919 is 341,316, as compared with 69,598 in 1914, an increase of 390.4 per cent in 5 years. The following is a brief synopsis of the laws and regulations in force in each province, and Table 26 summarizes the legal speed limits by provinces under the varying conditions specified.

Prince Edward Island.—Under the Motor Vehicles Act, 1913, with amendments and regulations, all cars must be registered in the office of the Provincial Secretary. In addition to the registration fee an annual tax is payable on the 1st of May, but this is not required of non-residents unless the car is used in the province during more than four weeks in one year. All drivers of cars, owners included, must be eighteen years old and must be licensed. Every car must have a lock, or other device, to prevent it from being operated when left unattended. The speed limits are, in cities, towns and villages $7\frac{1}{2}$ miles an hour, in places which are closely built up 10 miles, where there is not a clear

view of the road for at least 200 yards 12 miles, and in all other places 15 miles an hour. The number of cars registered in 1919 (up to November 1) was 967.

Nova Scotia.—The Motor Vehicle Act, 1918, requires cars to be registered by the Provincial Secretary, who issues permits renewable annually on January 1. Cars belonging to persons residing out of Nova Scotia need not be registered if cars are registered in the place where owners reside, and if owners do not reside or carry on business in Nova Scotia for more than three months in each year. No person under 16 may operate a motor vehicle, and paid chauffeurs must be at least 18 and must take out licenses. Cars must have devices which will prevent their operation when left unattended and must also have mufflers. The speed limits are, in cities, towns and villages and in places where there is no clear view of the road for at least 50 yards 15 miles an hour, at cross-roads and bridges 15 miles, and in other places 25 miles an hour. During 1918 the number of permits issued for cars was 8,247.

New Brunswick.—Under the Motor Vehicle Law, 1915, as amended May, 1917, the registering and licensing authority is the Department of Public Works. Cars must be re-registered every third year, and besides the registration fee, an annual fee is payable on January 1. Non-residents may operate cars registered in another province or state during not more than 21 days in any year without registration in New Brunswick. The driver of a car must be 18 years old, and must be the owner or a member of his household, a licensed chauffeur or a person accompanied by a chauffeur; all chauffeurs must take out licenses and must pass a qualifying examination before issue of the license. The speed limits are, in cities, towns and villages 12 miles an hour, in places which are closely built up 15 miles an hour, and in other places where the road cannot be seen clearly for 200 yards 20 miles an hour.

Quebec.—The law as to motor vehicles is contained in the Revised Statutes, 1909, chapter 4, s. xxi and amending Acts. Cars must be registered in the office of the Provincial Treasurer and re-registered annually on March 1, save in the cases of taxi-cabs and auto-busses or similar vehicles which run daily or periodically between the province and neighbouring provinces or states. No registration in the province is required of cars registered outside the province, provided that similar exemption is granted by law of the state or province in which the tourist resides. All drivers of cars must be licensed and must be not less than 18 years old. Cars, when left unattended, must be locked in such a way as to prevent their use, and all cars must have mufflers. The speed limits are, in cities, towns and villages 16 miles an hour, on highways where the land is closely built up 16 miles an hour, at bridges and cross-roads 8 miles an hour, and in open country 25 miles an hour. Motors must stop for street cars which are standing to take on or discharge passengers.

Ontario.—The Acts concerning motor vehicles are the Motor Vehicles Act, R.S.O., 1914, ch. 207, the Highway Travel Act, R.S.O., 1914, ch. 206, with amending Acts, and the Load of Vehicles Act,

1916. The registering authority is the Department of Public Highways, which issues permits that remain in force for the calendar year. Cars may be used without registration for not more than three months in one year, if registered in some other province, or for 30 days in one year if registered in certain of the United States which have entered into agreement with the province of Ontario. No person less than 16 years old may drive a car, and those between the ages of 16 and 18, as well as all paid chauffeurs, must be licensed. Cars must be equipped with mufflers. The speed limit in cities, towns and villages is 20 miles an hour, in other places 25 miles an hour. A motor may not pass a street car which has stopped for passengers to get on or off. At street intersections a vehicle approaching from the right has the right-of-way.

Manitoba.—Under the Motor Vehicle Act, cars must be registered in the office of the Municipal Commissioner, and the registration is renewable annually on January 1. A person not resident in the province may operate an unregistered car for not more than thirty days. Chauffeurs must be not less than 18 years old, and must have licenses; other drivers must be not less than 16, if male, or 18 if female. Cars must have mufflers and devices to prevent their use when left unattended. The speed limits in cities, towns or villages are 10 miles an hour at street intersections and 15 miles an hour elsewhere. There is also a limit of 20 miles an hour in certain rural municipalities. Motors must stop when behind standing street cars.

Saskatchewan.—The licensing authority under the Vehicles Act is the Provincial Secretary. Licenses expire annually on December 31. On and after January 1, 1919, every motor vehicle, except motor cycles, must expose two number plates: one on the front and one on the rear. Motor cycles must carry lights at night. Motor liverymen must be licensed. Non-residents may use cars for 30 days under permit from the Provincial Secretary without registration in the province. No person under the age of 16 may drive a car, and paid chauffeurs must take out licenses. A chauffeur's license may be granted to applicants over 16 and under 18 on passing special examination test. Cars must have mufflers. There are no speed limits, but special precautions are prescribed against accidents. Motor vehicles must stop for street cars which are taking on or discharging passengers.

Alberta.—The law relating to motor vehicles is contained in the Motor Vehicle Act, 1911, and amending Acts, and the Highways Act, 1911. Cars must be registered in the office of the Provincial Secretary, who issues certificates which are renewable annually on January 1. Paid chauffeurs must be licensed, and all drivers must be not less than 16 years old, if male, or 18 years, if female. Cars must be equipped with mufflers. The speed limits are, 20 miles an hour in cities, towns and villages and 10 miles an hour at street crossings and bridges. A motor car may not pass a street car which has stopped for passengers to get on or off. Regulations may be made by the Lieutenant-Governor in Council providing for permits to a resident of the United States or of any province in Canada who has complied with provi-

sions of the law regarding registration of his motor vehicle in the state or province in which he resides, to operate an unregistered car in Alberta, such exemption or privilege shall apply to such persons only to the extent to which under the laws of the said state or province similar exemptions or privileges are granted with respect to motor vehicles registered under the laws of and owned by residents of Alberta. The same applies to drivers' licenses. The Provincial Secretary may revoke or suspend the license of any chauffeur convicted under the provisions of the Liquor Act of selling or having for sale intoxicating liquor.

¹Limit in certain specified rural municipalities.

British Columbia.—Under the Motor Traffic Regulation Act, and amending Acts, cars are required to be registered with the Superintendent of Provincial Police. Licenses expire on December 31. Foreign registered cars may be used for touring in the province under a touring license issued by the Superintendent of Provincial Police. Cars registered outside the province may be used for 60 days free. No person under the age of 17 may drive a car, and paid chauffeurs must take out licenses. Every car must have a lock or device to prevent its use when left unattended. The speed limits are, in cities,

towns and villages 15 miles an hour, in wooded country 15 miles and in open country 25 miles an hour. A motor may not pass a standing street car at more than 4 miles an hour and must stop if it overtakes the car while taking on or discharging passengers.

Yukon Territory.—The Motor Vehicle Ordinance, No. 14, 1914, requires all cars to be registered in the office of the Territorial Secretary, who issues certificates, renewable annually on July 15. A non-resident may operate an unregistered motor for not more than 90 days. No male under 16 and no female under 18 years of age may drive a motor. In cities, towns and villages the speed limit is 15 miles an hour, or 10 miles an hour at street intersections.

EXPRESS COMPANIES.

There are five distinctly Canadian express companies, viz., the Canadian Express Co., the Canadian Northern Express Co., the Central Canada, the Dominion Express Co. and the British America Express Co. They are organized under powers conferred by Acts of the Dominion Parliament, and their business consists in the forwarding of parcels through the railway companies, in the transfer of luggage and in the issue of money orders, travellers' cheques, letters of credit and other forms of financial paper. Three other express companies situated in the United States, but consolidated during the war period, like the United States railways, under the operation of a single management appointed by the United States Government, and referred to here as "American Railway", also do business in Canada. The total capital liability of the five Canadian companies on June 30, 1918, stood at \$4,852,000. The total operating mileage of all nine express companies in Canada for the year ended June 30, 1918, was 62,546, as compared with 59,880 in 1917. The gross operating receipts were \$18,680,092, compared with \$16,836,374 in 1917, an increase of \$1,843,718. A deduction of \$8,875,181 for express privileges, that is, the amount paid to railways, steamboat and stage lines for the carrying of express matter, leaves \$9,804,911 as the operating revenue for the year. Operating expenses amounted to \$9,354,667, as compared with \$7,687,656 in 1917, and the net operating revenue to \$450,244, as compared with \$1,096,112 in 1917.

CANALS.

Canal Systems.—There are six canal systems under the control of the Dominion Government in connection with navigable lakes and rivers. They consist of the canals (1) between Port Arthur or Fort William and Montreal; (2) from Montreal to the international

boundary near Lake Champlain; (3) from Montreal to Ottawa; (4) from Ottawa to Kingston and Perth; (5) Trenton, Lake Ontario, to Lake Huron (not completed); and (6) the St. Peter's canal from the Atlantic ocean to Bras d'Or lakes, Cape Breton. The total length of the waterways comprised within these systems is about 1,594 statute miles, the actual mileage of canals constructed being 117.2.

Canal Traffic.—For the calendar year 1918 the total volume of traffic through the canals of the Dominion amounted to 18,883,619 tons, as compared with 22,238,935 tons in 1917, 23,583,491 tons in 1916, 15,198,803 tons in 1915, 37,023,237 tons in 1914 and 52,053,913 tons in 1913, the record year. The total tonnage in 1918 was made up of 15,514,142 tons of American traffic, as compared with 16,274,566 tons in 1917, and of 3,369,477 tons of Canadian traffic, as compared with 5,964,369 tons in 1917. In 1918 the American traffic represented 82.2 p.c. of the total, as compared with 73.2 p.c. in 1917, and the Canadian traffic represented 17.8 p.c. of the total, as against 26.8 p.c. in 1917. Of Canadian wheat the total quantity moved in 1918 through the canals of Canada and the United States at Sault Ste. Marie was 62,299,271 bushels, of which 19,987,255 bushels passed through the Canadian canal and 42,312,016 bushels passed through the American canal. In addition, 1,569,314 barrels of wheat flour representing, at $4\frac{1}{2}$ bushels per barrel, 7,061,913 bushels of wheat passed through the canals; so that the total movement of Canadian wheat by canal in 1918 was 69,361,184 bushels. Of oats 10,120,625 bushels, of barley 3,470,358 bushels and of flaxseed 1,588,052 bushels passed through the Canadian and American canals at Sault Ste. Marie in 1918.

Expenditure and Revenue for Canals.—In Table 38 are given the annual expenditure and revenue for canals from the beginning up to the year 1918. The column for expenditure chargeable to capital (\$1,781,957 in 1918) includes all the items for canals specified. For 1918 the expenditure chargeable to income, amounting to \$111,553, includes \$21,297 chargeable to canals in general. The expenditure chargeable to revenue, \$149,859 in 1918, is for canals in general only. The items for 1918, \$743,857 for staff and \$540,331 for repairs, are for canals specified. The sum of these totals, viz., \$3,327,557, represents the aggregate expenditure on canals for the year ended March 31, 1918. The total expenditure on canals up to March 31, 1918, is \$167,468,291.

Panama Canal.—In the Year Book of 1914, page 680, particulars were given of the Panama Canal in connection with its formal opening to commercial traffic on August 15 of that year. In Tables 40 and 41 of this section are given statistics of the traffic through the canal by months from January, 1918, to June, 1919, with yearly totals since 1914. Table 40 shows that for the calendar year 1918 there passed through the canal from the Atlantic to the Pacific and from the Pacific to the Atlantic, a total of 7,253,419 long tons of cargo, as compared with 7,542,496 long tons in 1917.

SHIPPING.

Administration of the general shipping interests of Canada is divided between the Marine Department and the Department of the Naval Service.¹ The Marine Department includes the control, regulation, management and supervision of various services, chief amongst which are (1) administration of the Canada Shipping Act and other Acts of the Dominion Government relating to marine transportation; (2) pilotage; (3) the construction and maintenance of lighthouses, lightships, fog alarms, buoys and beacons; (4) ports, harbours, piers, wharves and breakwaters; (5) the Meteorological Service of Canada; (6) sick and distressed seamen, and the establishment, regulation and management of marine and seamen's hospitals; (7) river and harbour police; (8) inquiries into the causes of shipwrecks and casualties and the collection of wreck statistics; (9) the inspection of steamboats; (10) the construction and maintenance of the St. Lawrence River Ship Canal and (11) the maintenance of winter communication between Prince Edward Island and the mainland. The net revenue of the Marine Department for the fiscal year ended March 31, 1918, derived principally from fees, was \$288,812, and the expenditure for the same period was \$4,361,498.

¹ For information relating to the Department of the Naval Service, see page 611.

Canadian Government Merchant Marine.—Early in 1918 the Dominion Government, realizing the need for a mercantile fleet to develop Canadian export trade, placed orders with Canadian shipbuilding firms for 45 ships of a total deadweight tonnage of approximately 263,950 tons. These steamers are being operated by a company under the charter name of the "Canadian Government Merchant Marine, Limited", the directors of which company are members of the board of directors of the Canadian Northern railway. With the boats so far delivered the following services have been established: Between Montreal and St. John's, Newfoundland, Cuba, the West Indies, South America and various United Kingdom ports, which services will continue from Halifax or St. John during the winter months. Cargoes have been carried to French ports and from Vancouver to United Kingdom ports via the Panama canal, and a service from Vancouver to Australia has been established. Additional services have been arranged for as soon as further-vessels are delivered by the builders.

Of the following statements, Tables 42-49 are compiled from the Reports of the Department of Customs, and Tables 50-57 are from the Reports of the Department of Marine.

¹Nine months.²Includes \$493,000 sale of steamer "Earl Grey" sold to Russian Government.**TELEGRAPHS.**

The Canadian telegraph systems include lines owned and operated by the Dominion Government and lines, owned and operated by railway and telegraph chartered companies. The Government telegraph service for the year ended March 31, 1919, had a total length of 12,094 $\frac{1}{4}$ miles of lines, of which 336 knots, calculated as statute miles, were submarine cables. During the year 1918-19, 46 miles of new lines were constructed. The number of offices was 1,122, and the messages sent numbered 507,027, as compared with 448,797 in 1917-18. Details as to the location of the lines and points connected are given in the Report for the year ended March 31, 1919, of the Minister of Public Works (No. 19, 1920). The total expenditure on the Government telegraph lines for the year was \$739,707, and the receipts were \$231,332, signal service messages, meteorological service messages and fisheries bulletins being handled free. Table 58 gives the telegraph statistics for the years ended June 30, 1910-19, of the chartered companies, as compiled from information supplied to the Dominion Bureau of Statistics.

Telegraph Statistics.—As reported by the Transportation Division of the Dominion Bureau of Statistics, the number of land messages handled by telegraph organizations in the year ended June 30, 1919, was 13,095,788, as compared with 12,377,754 in 1918 and 11,817,517 in 1917. Cablegrams numbered 869,344, as compared with 1,021,853 in 1918 and 1,084,956 in 1917. Employees in the service of telegraph organizations numbered 7,705 (7,212 in 1918), of whom 4,214 (3,894 in 1918) were male and 579 (503 in 1918)

were female operators; other officers and employees numbered 2,912 (2,815 in 1918). Salaries and wages amounted to \$4,939,514, as compared with \$3,937,651 in 1918. The aggregate of salaries and wages in 1919 was equal to 71.50 p.c. of operating expenses (\$6,900,649) as compared with 67.6 p.c. in 1918.

58.—Telegraph Statistics of Chartered Companies, 1910-1919.

¹These are telephone lines and are used for both despatching and commercial business.

²Statistics of lines in Ontario, Quebec and New Brunswick not included.

³Number of messages and offices included in returns from the Grand Trunk Pacific Telegraph Company.

⁴The decrease in wire mileage is due to the elimination of over 500 miles of metallic train despatching telephone circuits which are not used for the transmission of commercial messages.

Wireless Telegraph Coast Stations.—Table 59 shows the name, situation and range in nautical miles of the radiotelegraph or wireless telegraph coast stations, as operated by the Department of the Naval Service, and Table 61 the number of messages and words handled and the cost of maintenance for the stations of the east and west coasts and of the Great Lakes. For the year 1918-19 the total number of messages was 279,981, as compared with 207,399 in 1917-18 and of words handled 5,805,771, as compared with 3,866,300 in 1917-18. Table 60 gives the names of the Canadian Government steamers that are equipped with radiotelegraphic apparatus, with the range of miles for each steamer. A transatlantic wireless service is carried on by the Glace Bay, N.S., and Newcastle, N.B., Stations, which work with Clifden and Ballybunion, Ireland, respectively. A commercial wireless service is maintained via the Glace Bay Station, the charge being 16 cents per word as against 25 cents by cable. A commercial wireless service is maintained with Bermuda, via the Canadian Government wireless station at Barrington Passage, N.S., the rate charged per word being 28 cents as against 42 cents by cable.

TELEPHONES.

The report for 1919 of the Dominion Bureau of Statistics on Telephone Statistics shows that the number of telephones in Canada in 1919 was 724,500, as compared with 622,330 in 1918, 604,136 in 1917 and 548,421 in 1916, and the wire mileage was 1,951,562 in 1919, as against 1,848,467 in 1918, 1,708,202 in 1917 and 1,600,564 in 1916. In 1919 the gross revenue from telephones was \$24,600,536 as against \$22,753,290 in 1918, and the net revenue \$8,432,544, as against \$9,108,766. The number of telephone employees was 19,057, as compared with 17,336, and the salaries and wages amounted to \$13,048,055, as compared with \$10,410,807 in 1918. The general progress of telephones in Canada since 1916 is shown in Table 62.

POSTAL STATISTICS.

The Post Office Department reports an increase in the fiscal year 1918-19 of 163 miles in the system over which the mails are carried by railway, thus bringing the total actual track mileage for the carriage of mails to 35,384 on March 31, 1919. The total mileage of mail conveyance by railway in the fiscal year 1919 was 37,292,931. The expenditure of the Department increased by \$1,227,026 and there was a surplus from the operations of the service of \$3,329,129. At the end of the fiscal year 1919 there were 3,705 rural mail delivery routes, on which were erected 181,505 boxes; the corresponding figures for the fiscal year 1918 were 3,674 routes and 173,150 boxes.

in the Labour Gazette. In 1917 the Department published reports containing the text of the labour laws of the Dominion and provinces of Canada. The year 1915 was chosen as a starting point, and a compilation of the labour laws (federal and provincial) existing in Canada at the end of that year was made from the most recent Revised Statutes and the subsequent annual volumes of statutes up to 1915. A brief introduction explaining the plan adopted in the selection and arrangement of material precedes the text of the laws, and an index completes the report. It is planned to print a volume of this nature every five years, and in the intervening period to issue annual reports covering the labour legislation for the year immediately preceding that of publication. The annual reports contain, in addition to the text of the laws, an introduction in which the legislation for the year is summarized under subject headings, and each report is fully indexed. Reports on the labour laws of 1916, 1917 and 1918 have appeared in due course.

Labour Organization.—The total trades union membership reported at the end of 1918 was 248,887, in 2,274 local branches of trade union organizations of all types. The membership reported at the close of 1917 was 204,630, in 1,974 branches. There was, therefore, an increase of 44,257 members and 300 branches during the year. Of the total trade union membership for 1918, 201,432 were members of international organizations, which have 1,897 local branches in Canada. The remaining 47,455 were members of national and independent bodies. There was a gain of 36,536 in the membership of international organizations, a gain of 5,585 among national unions, and an increase of 2,136 in independent bodies. A report on Labour Organization has been published annually by the Department from 1911 to 1918.

Industrial Disputes.—The number of strikes and lockouts in Canada reported to the Department of Labour during 1918 was 196, as compared with 148 in 1917. The 196 strikes of 1918 involved 766 employers and 68,489 workpeople, with resultant time losses estimated at 763,341 working days. There was an increase in 1918 over 1917 of 52 in the number of employers and 20,160 in the number of employees involved. There was a decrease in time losses of 371,629 working days. The number of strikes which began in 1917 was 191, five strikes having been carried over from 1917. The industry most affected by strikes during 1918 was metals, machinery and conveyances, 45 strikes being recorded, involving 22,069 employees, whose time losses were estimated at 229,574 working days. Thirty-six strikes affecting 13,850 workers, with time losses reckoned at 163,585 working days, were reported as affecting the mining industry. Thirty-three strikes affecting 15,342 workers and resulting in a loss of 114,748 working days were reported in the transportation industry. Nineteen strikes in the building and construction trades, involving 1,912 workers, were reported. Among the provinces, Ontario led in the number of strikes, as 71 strikes, causing time losses estimated at 134,234 working days, were reported there. Alberta came next with 31 strikes, British Columbia followed with 26 strikes, causing time losses estimated at 201,355 working days. There were 18 strikes in

Manitoba, 15 in Quebec, 13 in Nova Scotia, 8 each in Saskatchewan and New Brunswick and 6 strikes which were interprovincial.

Table 1 shows the time losses involved in the various classes of industries from 1901 to 1918, Table 2 the number of disputes year by year from 1901 to 1918, the number of establishments and employees concerned, and the approximate time losses in working days, and Table 3 the number of disputes, classified by industries, from 1901 to 1918.

Proceedings under the Industrial Disputes Investigation Act.—A review of the proceedings under the Industrial Disputes Investigation Act from its enactment in March, 1907, to the end of the year 1918 shows that 365 applications were received for the establishment of boards of conciliation and investigation, as a result of which 279 boards were established. In 75 cases the matters in dispute were adjusted by mutual agreement, whilst steps were pending for the establishment of boards, or in some other way the necessity for procedure disappeared. In a few cases applications were received where the disputes did not fall within the scope of the statute. In the remaining 11 cases royal commissions, appointed under the Inquiries Act, dealt with the disputes. The number of employees affected by these 365 disputes was approximately 536,798. Of disputes referred under the Act during this period, there were 24 cases in which strikes were not averted or ended through its instrumentality. Eleven of these 24 strikes occurred in the mining industry, 10 in connection with transportation, two in the operation of municipal electric works and one in war work. During the calendar year 1918, 93 applications were received for boards, certain proceedings also taking place in connection with six applications received prior to the beginning of the year. In 58 cases boards were established, and in 28 cases the disputes were either of a nature not falling within the scope of the Act or were adjusted without the necessity of establishing boards. In the remaining seven cases royal commissions dealt with the disputes under the Inquiries Act. Only two strikes occurred after the matters in dispute had been referred to a board under the Act. During 1918, 23 disputes were adjusted in industries performing war work, these being brought within the scope of the Act by amendment of March 22, 1916.

Fair Wages Branch.—The Fair Wages Branch of the Department of Labour is charged with the preparation of schedules of

minimum wage rates, which are inserted in Dominion Government contracts, and must be adhered to by contractors in the execution of the respective works. The number of fair wages schedules prepared since the adoption of the Fair Wages Resolution in 1900 up to the end of the year 1918 is 3,163, of which 101 were prepared during the calendar year 1918.

PRICES OF COMMODITIES IN CANADA.

Wholesale Prices.—Statistics as to wholesale prices in Canada have been published annually by the Department of Labour since 1910. A special report covering the twenty years, 1890 to 1909, issued in 1910, was followed until 1917 by annual reports bringing the statistics up to date, while a résumé of the movement each month appears in the "Labour Gazette." Annual reports on the subject are not now issued, but statistics are printed monthly in the "Labour Gazette." The changes in prices are measured by index numbers which are percentages of the average prices during the decade 1890 to 1899. The list included 230 commodities from 1890 to 1909, 272 from 1910 to 1914, and 271 from 1915 to 1918. Tables 4 and 5 and the accompanying diagrams show the course of prices by the groups into which the list has been divided for each month of 1918 and by years back to 1890. It will be seen that the advance was not quite so great during 1918 as in the previous year, but considerable advances appeared in all groups.

COURSE OF WHOLESALE PRICES IN CANADA, 1918.

Number of Commodities: 271. Average Prices 1890-1899 = 100.

COURSE OF WHOLESALE PRICES IN CANADA, 1890-1918.

Number of Commodities: 272. Average Prices 1890-1899 = 100.

Retail Prices.—The "Labour Gazette" has published each month since January, 1910, the retail prices of some thirty foods, and of coal, wood, coal oil and the prevailing rates for the rent of a six-roomed house in some 60 localities in Canada having a population of 10,000 or over. Similar returns were secured for December, 1900, and December, 1905, for the Board of Inquiry into the Cost of Living in Canada, 1914 and 1915. From these figures calculations of typical weekly expenditures have been made in terms of the average prices for each year and each month. Tables 6 and 7 show the results for 1918 and for previous periods for the Dominion and for each province.

¹Coal, wood, and coal oil. No allowance is made for the varying extent to which these are used in the different localities and provinces.

Employment Service of Canada.—While provincial public employment offices have existed in Quebec from 1910, and in Ontario (in consequence of a recommendation of the Ontario Commission on Unemployment) from 1916, as well as in Saskatchewan, the extension and standardization of such offices was provided for by the Employment Offices Co-ordination Act, 1918 (8-9 Geo. V., Chap. 21), which empowered the Minister of Labour to aid and encourage the organization and co-ordination of public employment offices throughout Canada, in order to establish a Dominion-wide employment service; so that in all parts of the country employers might be informed of applications for work and employees of vacancies for labourers. Under this Act, sums aggregating \$50,000 in 1918-19, \$100,000 in 1919-20, and \$150,000 in subsequent years (amounts afterwards increased), were appropriated to be paid to Provincial Governments in proportion to their expenditures on employment offices, to assist them in organizing and extending their services. Agreements with the provinces were entered into whereby their

employment offices reported applications for work and vacancies for labourers to the clearing houses for labour established by the Dominion Government at Halifax, Ottawa, Winnipeg and Vancouver. As a result of this legislation, the number of free public employment offices in Canada was increased from 26 at the beginning of 1919 to nearly 100 at the end of the year. That the Employment Service of Canada was of material assistance during 1919 in alleviating the congestion of the labour market resulting from demobilization and the transition from war to peace, will be evident from an examination of Table 8, recording the regular and casual placements during the first ten months of the operation of the service, regular placements referring to work which was expected to be of more than one week's duration, and casual placements to employment likely to be of less than one week's duration. The regular placements during the ten months numbered 267,968, or at the rate of about 1,000 per working day throughout the period.

XI.—FINANCE.

Under the general heading of Finance in Section XI are grouped statistics relating to the public accounts of the Dominion Government, including revenue and expenditure, public debt, assets and liabilities and inland revenue. Tables have been added showing the receipts and expenditure of each of the nine provincial governments of Canada, and these are followed by financial statistics of the Ontario Hydro-Electric Power Commission, values of building permits and statistics of currency, banking, insurance and loan and trust companies. A chapter on rural credit is also included in this section.

PUBLIC ACCOUNTS.

Public Revenue.—For the fiscal year ended March 31, 1919, the revenue on Consolidated Fund Account attained the record total of \$312,946,747; the expenditure was \$232,731,283, leaving a surplus of \$80,215,464. The revenue received enabled the Government to meet all ordinary and capital outlays, including interest and pensions, and to apply the surplus to war expenditures. For the year 1917-18 the corresponding figures were: revenue \$260,778,953, expenditure \$178,284,313, and surplus \$82,494,640. Table 1, which gives the main items of the revenue and expenditure for each of the five fiscal years 1915 to 1919, shows that the revenue from customs in the fiscal year 1919 amounted to \$147,169,188, which is nearly half of the total for the year, and more than what the total revenue was for the fiscal year 1915.

Tables 4 and 5 relate to war tax revenue, Table 4 showing for each of the five fiscal years ended 1919 the revenue collected under the various legislative enactments of the Dominion Parliament for the raising of revenue for the purposes of the war. The total war tax revenue raised during the five years amounts to \$101,578,486, of which \$4,629,992 was paid by banks, \$1,119,134 by trust and loan companies, and \$1,921,600 by insurance companies. The sum of \$66,747,663 represents the amount collected under the Business Profits Tax Acts; \$9,349,720 is the amount of income tax collected during the first year of its imposition, and the extra war taxes collected through the Inland Revenue Department amounted to \$17,810,377, of which \$11,888,508 were collected in 1919. The yearly war tax revenue has grown from \$98,059 in 1915, the first year of the war, to \$56,177,508 in the last year ended March 31, 1919, the amount raised in 1919 being 121 p.c. more than that of 1918. Table 5 gives the taxes collected by the Inland Revenue Department during the fiscal year 1919, representing for the most part the extra taxes imposed during the legislative session of 1918. The total for the year amounts to \$11,888,508, as compared with \$2,227,390 in 1918.

Public Debt.—On March 31, 1919, the net public debt of Canada as shown by Table 7, was \$1,574,531,032, as compared with \$1,191,884,063 on March 31, 1918. Before the war, on March 31, 1914, the amount stood at \$335,996,850. On the basis of the estimated population at March 31, 1919, viz., 8,835,000, the per capita indebtedness is \$178, as against \$43 in 1914.

Arrangement of Tables.—Most of the tables in this section have been arranged to provide for presentation of comparative figures of the last five years, in accordance with the plan explained in the edition of 1918 (p. 475). Corresponding figures of the years before 1914 may be consulted by reference to the Year Book of 1916-17, pages 506 to 522, or to similar tables in the earlier issues.

Provincial Subsidies.—Tables 11 and 12 show the amounts of the subsidies and other payments made by the Dominion to the Provincial Governments for each of the years 1914 to 1919 (Table 10), and the totals paid from Confederation to date (Table 12). The

Provincial subsidies payable by the Dominion Government were originally settled by the British North America Act, 1867 (30 and 31 Vict., c. 3, s. 118), but were revised by the British North America Act, 1907 (7 Edw. VII, c. 11). Under the revised settlement each Provincial Government receives (a) a fixed grant according to population and (b) a grant at the rate of 80 cents per head of the population up to 2,500,000, and at the rate of 60 cents per head of so much of the population as exceeds that number. The province of British Columbia received an additional grant of \$100,000 per annum for a period of 10 years from 1907.¹ An additional grant of \$100,000 per annum is payable to Prince Edward Island under an Act of 1912 (2 Geo. V., c. 42), and the payments to Manitoba were revised by the Extension of Boundaries (Manitoba) Act (2 Geo. V., c. 32). Other payments to the Provincial Governments by the Dominion Government consist of special grants, as compensation for lands and allowance for buildings, allowances in lieu of debt, etc.

³ Allowance in lieu of debt.

INLAND REVENUE.

Under the Inland Revenue Act (R.S. 1906, c. 5), the Department of Inland Revenue until 1918 had the control and management of the collection of excise duties, of stamp duties, internal taxes, standard weights and measures and of the collection of bridge and ferry tolls and reuts. It administered the statutes which deal with the adulteration of food and other articles, electricity and gas inspection, patent medicines, petroleum, naphtha and the analysis of fertilizers and feeding stuffs. The Department also established the food standards, which were put into force from time to time by Orders-in-Council under the authority of Section 26 of the Adulteration Act. For the year ended March 31, 1919, the total inland revenue of the Dominion amounted to \$42,505,989, as compared with \$29,962,365 in 1918. By Order-in-Council, dated May 18, 1918, the Department of Customs and the Department of Inland Revenue were amalgamated and combined under the name of the Department of Customs and Inland Revenue under one Minister of the Crown. By Order-in-Council dated June 3, 1918, the administration of the Gas, Electric Light and Weights and Measures Inspection Acts, the Adulteration of Food, Commercial Feeding Stuffs, Fertilizers, Proprietary and Patent Medicine and Inspection of Water Meters Acts was transferred to the Department of Trade and Commerce as from September 1, 1918.

Canadian Excise Tariff.—The following is a statement of the Canadian excise tariff, as amended by Parliament during the session of 1918 (8-9 Geo. V., c. 28):

Spirits—		Tobacco, per lb.....	\$0.20
When made from raw grain, per proof gal.....	\$2.40	Cigarettes, weighing not more than 3 lb. per m, per thousand.....	6.00
When made from malted barley.....	2.42	Cigarettes, weighing more than 3 lb. per m, per thousand.....	11.00
When made from imported molasses or other sweetened matter free of Customs duty, per proof gal.....	2.43	Foreign raw leaf tobacco, unstemmed, per standard lb.....	0.40
Malt, per lb.....	0.03	Foreign raw leaf tobacco, stemmed, per standard lb.....	0.60
Malt, imported, crushed or ground, per lb.....	0.05	Canada twist tobacco, per lb.....	0.20
Malt liquor, when made in whole or part from any other substance than malt, per gal.....	0.15	Canada raw leaf tobacco, per standard lb.....	0.05
Vinegar, per proof gal.....	0.04	Snuff, per lb.....	0.20
Acetic acid, per proof gal.....	0.04	Cigars, per m.....	6.00
		Cigars, when put up in packages of less than 10 each, per m.....	7.00

Consumption of Alcohol and Tobacco.—The separate sources of inland revenue for the years 1914 to 1919 are set out in Table 13. The two largest sources of inland revenue are spirits and tobacco, which together accounted for about 64 p.c. of the total in 1919 and over 80 p.c. of the total in 1913. Tables 18 and 19 in the edition of 1916-17 showed that the consumption of alcoholic liquors and of tobacco tended annually to increase, both absolutely and relatively per head of the population up to the year 1913. For the year 1912-13 the consumption of spirits reached its highest point, viz., 1.112 gallon per head. For the year 1913-14 the consumption of malt liquor rose to its highest point, viz., 56,060,846 gallons, or 7.2 gallons per head.

But under the influence of the war and resulting legislation a marked decrease is apparent, and for the year 1915-16 the consumption of spirits fell to 0.745 gallon per head, as against 0.872 gallon per head in 1914-15 and 1.061 gallon per head, in 1913-14. For 1916-17 the consumption per head, viz., 0.698 gallon, was the lowest since 1899, when it was 0.661 gallon, while the consumption per head for the fiscal years 1918 and 1919 was 0.699 and 0.391 gallon respectively. The consumption per head of wine was 0.025 gallon in 1919, as against 0.061 gallon in each of the two preceding years. In the case of malt liquor, the consumption in the fiscal year 1919 was 2.948 gallons per head of beer, as against 3.414 gallons per head in 1918. Of tobacco, the quantity consumed in 1919 was 24,640,853 lb., as compared with 26,774,298 lb. in 1918. The number of cigars consumed was 220,590,175 in 1919, as against 254,445,945 in 1918. The consumption per head of tobacco, including cigars, was 3.109 lb. in 1919, as against 3.612 lb. in 1918 and 3.818 lb. in 1913, in which year the highest point was reached.

Electric Light and Power.—Electric light and power companies are subject to registration and inspection under the Electricity Inspection Act, 1907 (6-7 Edw. VII, c. 14), and the production of electrical energy for export is regulated by the Electricity and Fluid Exportation Act, 1907 (6-7 Edw. VII, c. 16). Both Acts were administered by the Department of Inland Revenue until September 1, 1918, when by Order-in-Council of June 3, 1918, their administration was transferred to the Department of Trade and Commerce. The statistics published in connection with these Acts are given in Tables 18 and 19.

¹For first three months of fiscal year.

PROVINCIAL PUBLIC ACCOUNTS.

In previous issues of the Year Book, dating from 1912, statements showing the yearly receipts and expenditures of the Provincial Governments have been reproduced as printed in the Provincial Public Accounts. These statements, owing to different methods of accountancy employed by each province, were not intercomparable either as regards revenue or expenditure. By way of illustrating the numerous anomalies and difficulties experienced in the preparation of comparable data as between one year and another and as between one province and another, it may be mentioned that in one year certain receipts, such, for instance, as licenses, might be included under those of the Provincial Secretary, whilst in the following year, for departmental reasons, they would reappear under the receipts of the Office of the Attorney General. Certain provinces charge their entire expenditures on agricultural colleges to "Agriculture"; others include only administration expenses under that heading, charging buildings, maintenance of grounds, etc., to "Public Works." Expenditures on hospitals, charitable institutions and correction schools are in one province dealt with under the item "Public Works," in another under the item "Provincial Secretary," and in another under the item "Attorney General," whilst a fourth divides them between all three.

With a view to remedying the confusion thus entailed, the public accounts of the Provincial Governments have been subjected to exhaustive, detailed analysis in the new Finance Division of the Dominion Bureau of Statistics, all doubtful points having been cleared up by correspondence between the Bureau and the local authorities concerned. The various items of receipts and expenditure have been classified under appropriate headings, and a terminology has been adopted that is common to all the provinces. The result is given in Tables 21 and 22, which present for each of the three provincial fiscal years 1916, 1917 and 1918 summary statements of the ordinary receipts and expenditures of all the Provincial Governments, as classified under principal headings.¹ From these statements it is possible to ascertain the amount received and expended under each heading for every province and for the nine provinces as a whole, the figures thus given being, for the first time, strictly intercomparable. The fiscal years of the provinces do not,

¹ By "ordinary" receipts and expenditures are meant receipts on account of current revenue and expenditures that are not of capital nature. These are at present the subject of further study by the Dominion Bureau of Statistics.

however, coincide. In Prince Edward Island, Manitoba, and Alberta the fiscal year ends with December 31; in Nova Scotia with September 30; in New Brunswick and Ontario with October 31; in Quebec with June 30; in Saskatchewan with April 30; and in British Columbia with March 31.

Table 20 gives the total and per capita annual revenue and expenditure for each of the three provincial fiscal years ended 1917-18. The total ordinary revenue of the nine provinces for the latest fiscal year available, viz., 1918, is \$69,010,108, as compared with \$58,150,691 in 1917, and the total ordinary expenditure is \$67,491,704, as compared with \$59,872,829. The largest revenue for 1918 is that of Ontario, \$19,270,122, Quebec being next with \$13,806,392, and British Columbia third with \$8,882,845. In the total expenditure for the same year that of Ontario was highest, \$18,899,199, Quebec being second with \$11,671,830 and British Columbia third with \$9,023,269. Per capita the largest revenues are in Alberta, \$13.90, British Columbia, \$13.35, and Manitoba, \$11.30, and the largest expenditures in Alberta, \$14.99, British Columbia, \$13.57, and Manitoba, \$12.28.

ONTARIO HYDRO-ELECTRIC POWER COMMISSION.

The Canada Year Book of 1910 (p. xliii) described the installation on October 11, 1910, at Berlin, now Kitchener, Ontario, of electrical energy generated by the Niagara Falls, and the initial work carried out by the Ontario Hydro-Electric Power Commission for the supply of electrically generated power to 15 municipalities. During the last nine years the operations of the Commission have rapidly extended, until in 1919 about 143 Ontario municipalities derive electrical power from the Niagara Falls and other Ontario water systems of the Commission. Table 25, on pages 506 to 511, gives for 1917 the financial statistics of the electrical installations of 143 municipalities. It shows that the total cost of the plant erected was \$20,077,935, that the cost of operations for the year 1917 was \$5,077,491, and that the revenue was \$6,070,065, leaving a surplus of \$992,574, less a depreciation charge of \$607,206, making the net surplus to be \$385,368. The total number of consumers in the 143 municipalities for 1917 was 170,916, as compared with 148,732 in 1916. Of the total in 1917, 137,486 were domestic, 28,161 were commercial light and 5,269 were power consumers. The total horsepower taken in December, 1917, was 157,048 for 143 municipalities, as compared with 120,768 for 128 municipalities in December, 1916. Table 23 is a detailed statement of the assets and liabilities of the

Building Permits.—Table 26, from the Labour Gazette of February, 1920, shows the value of the building permits issued by 35 cities for each of the years 1917, 1918 and 1919. For the year 1919 the total value of the building permits in the table was \$77,113,413, as compared with \$36,838,270 in 1918, an increase of \$40,275,143.

26.—Values of Building Permits taken out in 35 Cities in 1917, 1918 and 1919.

CURRENCY AND BANKING.

Gold.—Gold is used only to an insignificant extent as a circulating medium in Canada, its monetary use being practically confined to reserves. Until 1912 there were no Canadian gold coins, authority to issue such having been first conferred in 1910. By the Currency Act, 1910 (9–10 Edw. VII, c. 14), British sovereigns and other gold coins, and the 5 dollar, 10 dollar and 20 dollar gold coins of the United

States, are legal tender. These, however, are almost entirely divided between the Dominion Government and the banks as reserves, and the chief circulating medium of the country is provided by paper and token currency. The gold coinages of the Ottawa Branch of the Royal Mint, which was opened on January 2, 1908, are given in Tables 27 and 28. It is of interest to note the different proportions of British and United States gold coins held in reserves in Canada. Table 29, compiled by the Dominion Comptroller of Currency, gives the form in which the gold has been held by the Government in recent years. The American gold, it will be seen, greatly preponderates, and there is a considerable additional amount held by the banks, as it is legal tender in both countries.

Token Currency.—Silver and bronze coinages for Canada are shown in Tables 27 and 30.

Dominion Notes.—The foundation of the Canadian monetary system is the paper currency of the Dominion Government. Under the Dominion Notes Act, 1914 (5 Geo. V, c. 4), the Dominion Government is authorized to issue notes up to and including \$50,000,000 against a reserve in gold equal to one-quarter of that amount.¹ Notes may be issued to any additional amount in excess of \$50,000,000, but (except as provided by Finance Act, 1914), an amount of gold equal to the excess must be held. Thus Dominion notes are under normal conditions gold certificates. Under the Act, the Government issues notes of the denominations of 25 cents, \$1, \$2, \$4, \$5, \$50, \$100, \$500, \$1,000. In addition, "special" notes of the denominations of \$500, \$1,000, \$5,000 and \$50,000 (first issued September, 1918), are issued for use between banks only, the purpose being to safeguard against theft. Table 31 shows how the different denominations have run during the past six years in the circulation. Dominion notes are redeemable normally in "specie," which practically means gold, silver being legal tender only to the amount of \$10. Table 33 gives the main statistics of Dominion note circulation and the reserve on which it has been built since 1890.

¹ The following is an outline of Canadian legislation respecting the issue of notes. After Confederation, by an Act of 1868 (31 Vict., c. 46), authority was given for the issue of notes to the extent of eight million dollars. The reserve was fixed at 20 p.c. up to a circulation of five millions; beyond that, 25 p.c. to be held as reserve. The law of 1870 (33 Vict., c. 10), authorized a limit of nine million dollars. The reserve was fixed at 20 p.c., but the nine millions were only to be issued when the specie amounted to two millions. Dollar for dollar was to be held beyond nine millions. In 1872 (35 Vict., c. 7), the reserve for the excess over nine millions was fixed at 35 p.c. in specie. This was amended in 1875 (38 Vict., c. 5), by requiring dollar for dollar beyond twelve millions; for the reserve between nine and twelve millions 50 p.c. in specie was to be held. In 1878 the law respecting Dominion notes was extended to the provinces of Prince Edward Island, British Columbia, and Manitoba. In 1880 (43 Vict., c. 13), the basis of the present standard was established. A reserve of 25 p.c. in gold and guaranteed debentures was required, of which 15 p.c. at least must be in gold. The limit was raised to twenty million dollars. In 1894 (57-58 Vict., c. 21), the limit was raised to twenty-five millions, but this was found unworkable and was repealed in 1895 (58-59 Vict., c. 16), and authority was given to issue notes to any amount over twenty millions, on holding dollar for dollar beyond that sum. In 1903 (3 Edw. VII, c. 43), the Minister of Finance was required to hold gold and guaranteed debentures of not less than 25 p.c. on Dominion notes issued and outstanding up to thirty million dollars; beyond thirty millions he was required to hold gold equal to the excess. In 1914 (5 Geo. V, c. 4), this amount was raised to fifty millions. The Finance Act, 1914 (5 Geo. V, c. 3), makes provision, in case of war, panic, etc., for the issue of Dominion notes against approved securities.

Bank Notes.—The circulating medium chiefly in use in Canada is in the form of bank notes. Under the Canadian Bank Act, the banks are authorized to issue notes of the denominations of \$5 and multiples thereof to the amount of their paid-up capital. These notes are not legal tender. In case of insolvency, however, the notes of a bank are a first lien upon the assets. They are further secured, in case of insolvency, by the Bank Circulation Redemption Fund, to which all banks contribute on the basis of 5 p.c. of their average circulation. In addition, during the period of the movement of the crops (September 1 to February 28–29), the banks may issue “excess” circulation to the amount of 15 p.c. of their combined capital and “rest or reserve,” i.e., surplus funds. In the event of war or panic the Government may permit the “excess” to run all the year. The banks pay interest on the excess at 5 p.c. If the bank desires to exceed its circulation it may do so since 1913 by depositing dollar for dollar in gold or Dominion notes in a central gold reserve. The figures of bank note circulation are given in Table 32. Table 34 brings together the results obtained above as to the quantity of the circulating medium in the hands of the Canadian public.

¹Dominion Notes of larger denominations in hands of banks not included.

Chartered Banks in Canada.—Table 35 affords some measure of banking progress in Canada by a comparison of the number of branches at different periods. The number has grown from 123 at Confederation to 3,440 as at December 31, 1918, besides 132 branches in other countries. Table 36 gives the number of branches by provinces as at December 31, 1918, this information having been furnished by the Canadian Bankers' Association. Table 37 shows that the total assets of the chartered banks at December 31, 1919, were \$2,967,373,675, as compared with \$2,689,835,181, in 1918. The total liabilities were \$2,706,715,918, as compared with \$2,448,251,632, in 1918. Deposits by the public in Canada were \$1,841,478,895 at December 31, 1919 (Table 38), as compared with \$1,669,507,617 in 1918. On March 31, 1919, the total at the credit of the depositors in the Post Office and Dominion Government Savings Banks was \$53,057,018, as compared with \$53,460,762 in 1918 (Table 50).

Bank Reserves.—The Bank Act contains no specific provisions as to the amount of gold to be held either against note circulation or the general business of the bank. It requires, however, that 40 p.c. of whatever reserve a bank finds expedient to carry shall be in Dominion notes. A second provision instructs the Minister of Finance to arrange for the delivery of Dominion notes to any bank in exchange for specie. Thus the gold reserve against Dominion notes, to the extent that the notes are held by the banks, is reserve against banking operations, the Dominion Government being the custodian of the gold for the banks. The other gold element in bank reserves is specie in hand. The sum of the two represents the gold basis of the Canadian banking system. In addition to the reserves above mentioned the Canadian banks carry three other kinds of asset which are regarded as reserves, being funds more or less immediately available for the liquidation of liabilities. These are (1) cash balances in banks outside of Canada; (2) call and short loans in New York; and (3) easily marketable securities. These are shown together with the total and net liabilities in Table 46. In Table 47 the ratio to net liabilities of each element of the reserve is shown.

Deposits and Loans and Discounts.—The above represents the foundations upon which the banking credit of Canada rests. The expansion of that credit is shown by the figures of deposits and loans and discounts in Tables 40 and 41. The deposits payable on demand, with these payable after notice or on a fixed day (Table 40) are probably a good index of the deposits which are subject to cheque, and which therefore constitute the basis of credit as circulating medium, for although notice is required by law before the greater share

of these deposits can be withdrawn this right is seldom or never claimed, and even savings accounts are chequed against to a considerable extent. Certain deductions ought, however, to be made for deposits which are regarded as investments rather than as accounts to be drawn upon.

LOAN AND TRUST COMPANIES.

Loan and Trust Companies.—Up to and including the year 1913 tables were given in the Year Book of the assets and liabilities, with comparative figures for a series of years, of loan companies and building societies. These tables were taken from the "Annual Report of the Affairs of Building Societies, Loan and Trust Companies in the Dominion of Canada," as issued by the Department of Finance. The statistics in this Report were compiled by the Department of Finance partly from the statements required to be furnished under legislation of the Dominion Parliament and partly from returns voluntarily made by corporations operating under provincial charters. The laws relating to loan and trust companies incorporated by Acts of the Parliament of Canada were revised by the Loan and Trust Companies Act of 1914 (4-5 Geo. V, cc. 40 and 55), and since the passing of these Acts the Annual Report issued by the Department of Finance up to and including the year 1913, has been replaced by

51.—Liabilities and Assets of Loan Companies, 1914-1918.

RURAL CREDIT IN CANADA.

About nine years ago a movement was started in the United States for the improvement of credit facilities in rural districts. This became a national issue in 1912. In 1913 two commissions from the United States visited various countries in Europe and studied the conditions of rural credit prevailing therein. One of these commissions, called the "American Commission of Agricultural Co-operation", was assembled under the auspices of the Southern Commercial Congress, and was composed of delegates from different states, as well as of representatives of various associations; and upon this commission were also seven delegates representing the four Canadian provinces of Nova Scotia, Ontario, Saskatchewan and Alberta. The purpose of this commission was the investigation in European countries of co-operative agricultural finance, production, distribution and rural life. In addition to this commission, the United States Congress appointed a commission to "co-operate with the American Commission, to investigate and study in European countries co-operative land mortgage banks, co-operative rural credit unions and similar organizations and institutions devoting their attention to the promotion of agriculture and the betterment of rural conditions." The two commissions carried out this work in Europe from May to July, 1913, and after their return presented reports which formed the basis of parliamentary discussions leading to legislation both in the United States and in Canada¹.

In the United States, legislation took shape in the Federal Farm Loan Act of 1916. In Canada the Legislative Assemblies of Ontario, Manitoba, Saskatchewan, Alberta and British Columbia passed measures in 1917 empowering the provincial governments to provide money for loans to farmers. The following is a brief description of the provincial laws of Canada that are now operative in respect of rural credit facilities.

Nova Scotia.—The Act for the Encouragement of Settlement on Farm Lands (chapter 10 of 1912) provides that, if any loan company advances to a farmer, on a mortgage of farm land or buildings, an amount not exceeding 80 p.c. of the value of said property, the Lieutenant Governor in Council may, after having the property inspected, authorize a guarantee to be made of an amount not exceeding the difference between 40 p.c. of the value of the property and the total amount of the loan, together with interest on the same. Repayments of the principal of the loan are to be applied firstly to the reduction of the guarantee or advance which may have been made by the government. The Lieutenant Governor in Council is empowered to guarantee the bonds of any loan company to the extent of the advances made by it under the Act.

The amount guaranteed by the government up to September 30, 1918, has been reduced to \$47,796.00. Chapter 11 of the Statutes

¹ See *Agricultural Co-operation and Rural Credit in Europe*, U.S. Senate, 63rd Congress, 1st Session, 4to., Washington, 1913. Report of the Agricultural Credit Commission of the Province of Saskatchewan, 8vo., Regina, 1913. Report of the Alberta Commissioners on the American Commission for the Study of Agricultural Credit, 8vo., Edmonton, 1914.

of 1917 authorizes the Lieutenant Governor in Council to make grants, not exceeding \$3,000 in any year, to assist municipalities, societies and persons to buy power machines for agricultural purposes. Under chapter 12 of 1917 about \$20,000 has been expended to encourage and assist in the erection and operation of modern roller process mills for cereals, and of creamery and dairying machinery. During the war the wheat growing area of the province has more than doubled.

New Brunswick.—By the Act to Encourage the Settlement of Farm Lands (chapter 28 of 1912), a Farm Settlement Board is created with powers to buy and sell real estate, and personal property in connection therewith, and to erect, buy and sell buildings. Sales are to be made to bonâ fide settlers only, and payment may be made by instalments. The Lieutenant Governor in Council is empowered to borrow money for the purpose of carrying out the objects of the Act.

Under the Act more than 345 farms have been bought, of which 333 were re-sold to farmers for \$275,644, the cost price.

Quebec.—Under the Quebec Syndicates Act and amending Acts (R.S.Q. 1909. 6762-6811, 1 George V, 2nd session, c. 43 and 5 George V, c. 68), co-operative syndicates may be established to carry on business within limited territories, which are usually parishes or groups of parishes, for the benefit of the labouring classes. An association of this kind is to be composed of persons domiciled in the syndicate's territory, but members who change their residence may remain members without being eligible for office in the syndicate. All transactions which yield profits are to be confined to the members.

The control of the syndicate's business is divided between three boards. The Board of Management, of at least five members, has charge of general management, makes contracts, invests the syndicate's funds, etc. The Board of Supervision, of at least three members, supervises and audits the accounts, guarantees and securities. The Committee of Credit, of at least three members, has entire control of the loans made by the syndicate, subject to the by-laws, and investigates the credit and securities of applicants for loans. Members of the two last-mentioned boards are not allowed to borrow money from the syndicate or give security for borrowers. The members of all three boards are to receive no payment for their services, but the manager may be paid a salary.

Every credit society must apply at least 10 p.c. of its net annual profits to one or more reserve funds, until such funds are equal to its maximum liabilities, and thereafter it is advisable to apply at least 5 p.c. of such profits until the amount of the reserve funds is double that of the liabilities. Every syndicate operating under the Act is required to report annually to the Provincial Secretary and to the clerk of the municipality in which it carries on business.

One hundred and thirty-one co-operative People's Banks (Caisses Populaires) have been established in the province in accordance with the terms of the Act, and on the system instituted by Mr. Alphonse Desjardins of Levis. Out of that number 105 are still in operation.

Every borrower or depositor must hold at least one share in the bank. The value of each share is \$5, which is re-payable on demand if the holder has repaid all loans received from the bank. Interest is paid on shares, usually at a higher rate than on deposits, but a small entrance fee has to be paid on the purchase of each share in addition to the price of the share. The amounts received from entrance fees are applied to one of the reserve funds.

The reports sent by these banks to the Provincial Secretary are summarized in the Statistical Year Book of Quebec. For 1918, 98 banks reported having 27,593 shareholders, 20,672 depositors and 8,056 borrowers. The savings deposits amounted to \$2,513,405.97, the capital stock to \$907,857.42 and the outstanding loans to \$2,901,517.54. The rates of interest paid varied on shares from 4 to 7½ p.c. and on savings deposits from 3 to 4 p.c. During 1918, 14,293 loans were granted, amounting to \$2,623,095.92, showing an average value of \$183.38. Of these, 9,571 amounting to \$409,184.09 were between \$1 and \$100,—2,926 amounting to \$560,460.79 between \$100 and \$300,—1,430 amounting to \$729,673.39 between \$300 and \$1,000 and 366 amounting to \$923,777.65 were above \$1,000.

Ontario.—The Farm Loans Act of 1917 (chapter 25) authorizes the Provincial Treasurer to lend money to the municipal corporation of any township to enable the corporation to make loans for farming purposes in the township. These loans are to be made only for erecting farm buildings, draining and fencing land and for such other purposes in aid of farming as may be approved in the regulations to be made under the Act, but at least half of every loan must be used for permanent improvements. The Provincial Treasurer is to take debentures of the township for the amount lent, and these are to be paid off by equal annual instalments for principal and interest. Each municipal council wishing to borrow money under the Act must pass a general by-law authorizing the issue of debentures for this purpose and a special by-law for each loan, every such by-law to provide for meeting the annual charges by the levy of a special rate on the land on which the money is lent. Upon registration of the by-law, the loan is to become a first charge on the land concerned. No loan is to be made on encumbered land without the consent of the mortgagee or encumbrancer. The amount of a loan is not to exceed 60 p.c. of the assessed value of the land on which it is charged, and the terms of loans and the rates of interest are to be fixed by regulations which may be made from time to time by the Lieutenant Governor in Council. Subject to the regulations a borrower may pay off his loan at any time.

The Northern and Northwestern Ontario Development Act of 1912 (chapter 2), with amending Acts of 1915, 1916 and 1918, authorizes the appointment of a Commissioner to administer the Act, under whose direction loans may be made to settlers in the Northern and Northwestern districts, not exceeding \$500 to any one settler, for the purpose of improvement and development of land. The intending borrower must give a description of his land and state the purpose for which the money is to be used. The Provincial Govern-

ment takes a lien on the borrower's land. The government is also empowered to buy seed grain, implements, live stock, land and buildings for re-sale under the terms of the Act, and to erect creameries, grist-mills, etc. The Act of 1918 authorizes a loan of \$5,000,000 for the purposes of the Act.

Manitoba.—The Manitoba Farm Loans Act (chapter 33 of 1917) establishes a body corporate under the name of The Manitoba Farm Loans Association to be managed by a Manitoba Farm Loans Board of five members appointed by the Lieutenant Governor in Council. One of the members of the board is to be Commissioner of Manitoba Farm Loans, and is the chief executive officer of the board, one member may be nominated by the Union of Municipalities of the province and one by the Grain Growers' Association. The Commissioner will receive a salary, the other members may receive fees for attendance, but not more than \$600 each in any year.

The capital of the Association is to be \$1,000,000 in shares of \$5 which may be held only by His Majesty the King in right of the province,—who may subscribe for not more than 50 p.c. of the stock,—and by borrowers under the Act. The purposes for which the board may lend money are:—Acquiring, cleaning and improving land for agriculture, erecting farm buildings, purchasing live stock and implements, and discharging liabilities incurred for increasing land productiveness. No loan is to exceed \$10,000, nor 50 p.c. of the value of the land and improvements on which it is charged and the rate of interest shall not exceed 6 p.c. per annum. Land valuers are to be appointed by the board.

Every applicant for a loan must be a shareholder to the amount of 5 p.c. of the desired loan, and, if the loan is granted, the borrower must buy one share of stock for every \$100 of the loan, such share or shares to be held by the association as collateral security and paid off and retired on repayment of the loan. Every loan is to be secured by a first mortgage on farm land, and the mortgager is to pay off the loan in thirty equal annual instalments. The Association gives the borrower the privilege of paying off the loan on any interest-due date after five years without notice or bonus. The rate of interest is to be such as will pay the interest on the securities issued by the association in addition to one per cent for expenses. All buildings which are part of the security for a loan must be insured for at least 50 p.c. of their value.

The association is given the right to receive deposits, with or without interest, from persons or corporations, and the Lieutenant Governor in Council may authorize the issue of bonds and stocks by the association and may guarantee the same. The funds and securities of the association are to be free from provincial taxes, except succession duties.

Under the Manitoba Rural Credits Act (chapter 73 of 1917), a Rural Credit Society may be incorporated by the Lieutenant Governor in Council on the petition of not less than 15 persons engaged in or purposing to engage in farming in a municipality or locality within the province. A society is not to start business till it has received

subscriptions from at least 35 shareholders to the amount of not less than \$3,500, of which 10 p.c. must be paid up. The provincial government may subscribe for shares up to one-half of the amount subscribed by individual shareholders, and one or more municipal corporations may subscribe for a total amount not more than one-half of that subscribed by individuals. Every society is to have a board of nine directors, of whom three are to be elected by the individual shareholders, three by the municipality or municipalities subscribing for shares and three by the Lieutenant Governor in Council. One of the three last mentioned must be a graduate in agriculture and a government officer engaged in agricultural work or instruction. Only the secretary of the society is to be paid a salary.

The objects of a society formed under the Act are: to procure short term loans for its members for the purpose of purchasing seed, feed, implements, etc.; to pay the cost of agricultural operations and prepare land for agriculture; to act as agents in buying supplies for members and selling their products; to promote co-operation among farmers in the district. The directors are to make arrangements with chartered banks or with private individuals for the loans which may be required. An applicant for a loan is to state the date on which he proposes to make repayment, which must be not later than the 31st of December next following, but the directors, with the consent of the lender, may grant a renewal of a loan for not more than twelve months at any one time. The lender or the society may require the borrower to sign a note or notes for the amount of his loan, and the society shall endorse such notes. Interest on loans is not to exceed 7 p.c., and one-seventh of the interest is to be rebated by the lender to the society for its expenses. A society may pay dividends on its stock at a rate not higher than 6 p.c.

All property bought with the proceeds of the loan, together with the offspring of live stock and crops grown from seed bought with these proceeds, are subject to lien to the amount of the loan, and the directors may further obtain a lien on all the personal property of a borrower. They are also empowered to take mortgage security or assignments of agreements of sale if they think it necessary. Societies formed under the Act are given the right of using municipal, provincial and school buildings for their meetings free of charge. The Lieutenant Governor in Council is empowered to appoint a supervisor of rural credit societies.

The growth of these societies has been rapid both in number and credits. The following are the statistics to date:

Year.	Societies Operating.	Credits Granted.
1917	1	\$ 16,000
1918	10	215,580
1919	33	1,000,000

The Settlers Animal Purchase Act (chapter 3 of 1916) applies only to the part of the province between lakes Winnipeg and Manitoba. Under it the Minister of Agriculture may spend money, granted for the purpose, on the buying and raising of cows and heifers

for re-sale to settlers, wholly or partly on credit. Applications for animals are to be made by organizations, each of ten settlers, every member giving his bond as security for one-tenth of the value of all animals delivered to each member. Inquiries are to be made as to the ability of every purchaser to pay and care for the animals for which he applies, and not more than five animals are to be delivered to one settler at any one time. The term of payment is to be not more than five years and the rate of interest not less than 6 p.c., and the government is to hold a lien on the animals sold and their progeny and is to have the right of inspecting the animals and resuming possession of them if they are not properly cared for. Until payment in full has been made the farmer must send any milk and cream of all his cows, which he does not require for his own use, to any co-operative creamery or cheese-factory that may be established by the government in his locality. The Minister may apply the money payable for the milk and cream to payment for the animals sold to the farmer.

Saskatchewan.—The Saskatchewan Farm Loans Act (chapter 25, 1st session, and chapter 65, 2nd session of 1917) enacts that there shall be appointed a Saskatchewan Farm Loan Board, consisting of a commissioner and two other members, the commissioner to be the salaried managing member of the board. The working capital of the board is to consist of money advanced by the Provincial Treasurer, and, for this purpose, the Lieutenant Governor in Council is authorized to raise by loan not more than \$10,000,000. Loans are to be made by the board on first mortgages only, for amounts not exceeding 50 p.c. of the board's valuations of the properties on which the loans are made, and for a term, in each case, of thirty years. Repayments are to be made in equal annual instalments, and the interest charged is to be such as will pay the interest on and the cost of raising the money obtained, together with the board's expenses.

Loans are to be expended on permanent improvements to the property mortgaged, on productive purposes connected with its development, on the payment of liabilities incurred for such purposes, or, with the special approval of the board, on the acquisition of land for agricultural purposes.

The Board has loaned to December 31, 1918, the sum of \$1,758,288. Applications for further loans have been approved at said date which when made would bring the total amount of loans up to approximately \$3,000,000.

By the Municipalities Seed Grain Act, 1917 (second session, chapter 47), which amends and consolidates the Acts of 1912 and later dates, municipalities are authorized to borrow money for the purchase of seed grain to supply to farmers who are unable to procure it. Sums not exceeding \$2,000 may be raised for this purpose under the authority of a resolution of the municipal council, but for larger sums a by-law must be submitted to the electors. The grain is to be issued, against promissory notes of the farmers, in quantities of not greater value than \$250 for each quarter section. Money is not to be advanced to farmers for the purchase of grain. A municipality

is to have a lien on the crops grown with the seed, and any sum unpaid by a farmer is to be a charge on his land. The price of the seed grain is to be enough, but not more than enough, to cover the cost of the grain and the expenses of purchase and distribution. A municipality may also borrow money to supply feed to farmers on the same terms as seed grain, but in quantities of value not greater than \$75 per quarter section.

The Live Stock Purchase and Sale Act, passed in 1913, gives power to the Department of Agriculture to purchase cattle, sheep and swine. These animals are re-sold to farmers at cost under eight different options, varying according to the class of stock and the amount of cash paid down. An applicant for stock under the Act must be a member either of the local grain growers' association or of an agricultural society, a shareholder of a co-operative creamery or of a registered agricultural co-operative association, and his application must be approved by the president and secretary of the organization of which the applicant is a member, recommending him as a suitable person to whom stock may be supplied. Notes are taken for the unpaid balance, which are payable at various times under the different options, and bear interest at six p.c. before, and eight p.c. after maturity. The department holds a lien on all animals sold and their progeny, and also has the right to inspect the animals and to re-possess them in case they are not properly cared for. Where a purchaser is a patron of a creamery, amounts not exceeding 50 p.c. of the value of his dairy products sold to the creamery may, on his order, be deducted, until the whole liability for stock purchased is discharged.

Alberta.—The Alberta Farm Loan Act (chapter 10 of 1917) creates a body corporate called the Alberta Farm Loan Board, of not less than three nor more than five persons, to whom salaries may be paid. A Commissioner of Farm Loans, appointed by the Lieutenant Governor in Council, is to be the general manager of the board's business. The board may make loans for 30 years, on first mortgages of farm lands, for acquiring land for agricultural purposes, for purchasing live stock and equipment, for erecting buildings and making improvements, for discharging liabilities and for any purpose which will in the opinion of the board increase the productiveness of the land.

No loan is to be for an amount greater than 40 p.c. of the appraised value of the land which is mortgaged as security, nor for more than \$5,000 to any one person, nor is a loan to be made to any person who is not actually engaged in or intending to be engaged in farming. Every borrower's mortgage shall contain a covenant to pay off the capital and interest of the loan by equal annual instalments, and the rate of interest is to be sufficient to cover the interest payable by the board, the cost of raising the money and the board's expenses. The mortgager has the right of paying off the loan after one year with a bonus of six months' interest, or after five years without bonus.

The board's working capital is to consist of money raised by the issue of its bonds and sums appropriated for the purpose by the Legislature, \$10,000 being so appropriated in the Act.

Under the Alberta Co-operative Credits Act (chapter 11 of 1917), a co-operative credit society may be organized, under the authority of the Lieutenant Governor in Council, on the petition of not less than 30, nor more than 100 persons engaged in or agreeing to engage within one year in farming in a municipality within 30 miles of the society's place of business. Each such person must have subscribed for at least \$100 of the society's stock, and subscriptions must have been made for stock of a par value not less than \$3,000, of which 20 p.c. must have been paid in cash. The Lieutenant Governor in Council may guarantee the securities of a society to the extent of one-half of the amount of the subscribed stock, and the council of any municipality may guarantee to the same extent. Of the directors of a society four are to be elected by the subscribers, two nominated by the Lieutenant Governor in Council and two by the guaranteeing municipality, or, if there be more than one such municipality, one director may be nominated by each of them. Only the secretary-treasurer of a society is to receive a salary.

The objects of a society are to be: to procure short term loans for its members for paying the cost of farming operations of all kinds and increasing agricultural production; to act as agents for its members in purchasing commodities required by them and in selling their produce; to promote co-operation among its members. On the application of a member for a loan, the directors, if they approve of the application, are to obtain the loan from a bank, company, firm or person. The borrower is required to sign a note or notes for the amount of the loan and the lender may require the society to endorse any such note. Interest is to be paid at a rate to be agreed upon between the society and the lender, and is to include an amount which is to be paid to the society for meeting its expenses and for maintaining a reserve fund. Every loan will be repayable not later than January 31 next following, but a loan may be renewed by the directors, with the consent of the lender, for not more than twelve months. The borrower must give the society a description of all goods, animals, etc., bought with the proceeds of his loan, and the amount of the loan is to constitute a lien on all such goods, etc.

A society may pay to its shareholders dividends not exceeding 6 p.c. A shareholder whose loans are all fully paid may retire and withdraw the amount paid for his shares, if his retirement does not reduce the number of shareholders below the required minimum.

The Live Stock Encouragement Act (chapter 9 of 1917) provides that any association of five or more persons engaged in practical farming may apply to the Live Stock Commissioner for a loan for the purchase of live stock. The amount of such a loan is not to exceed \$500 for each purchaser. The money is to be spent on the purchase of cows and heifers but, with the consent of the commissioner, not more than 10 p.c. of a loan may be spent on a pure-bred bull. The money is to be lent by a bank, company, firm or person

by arrangement with the commissioner, on the joint and several notes of the members of the association. No loan is to be for a longer term than five years, and the rate of interest is to be not higher than 6 p.c. A fee of 1 p.c. is to be paid to the commissioner for his expenses. Live stock bought with the money lent, and the offspring of such live stock, must be branded with a brand registered in Alberta, and must not be sold or disposed of till the loan is paid, without the consent of the commissioner. The Act has been in operation since the spring of 1917, and more than \$1,000,000 have been lent under its provisions.

Under the Municipal Districts Seed Grain Act (chapter 10 of 1918), any municipal council may borrow money at a rate of interest not higher than 8 p.c. in order to supply seed grain to farmers resident in its district. The consent of the electors to the by-law for the loan is not necessary, and the loan is not to limit the other borrowing powers of the municipality. The Lieutenant Governor in Council may guarantee the repayment of any such loan. No money is to be advanced to farmers, but the municipality is to buy and distribute seed to a value not exceeding \$300 on any quarter section, and not more than \$300 is to be owing for seed grain in respect of any one quarter section. Every farmer purchasing seed is to give a promissory note bearing interest at a rate not higher than that paid by the municipality, and, further, a written agreement for a lien on all crops grown during the year in which the note is given.

The Seed Grain Act, 1919, (chapter 10), provides only for the year 1919. It empowers the Provincial Treasurer to make agreements with any chartered bank or other person to guarantee loans of seed-grain or of money for buying seed-grain to the amount of not more than \$300 on any one quarter section. Applications for grain or for money with which to buy it must be made to the Minister of Agriculture. The advance is to be a lien on all crops grown on the land for which the advance is made, and the Provincial Treasurer, or the lender, may take a promissory note or mortgage as further security.

British Columbia.—The Land Settlement Board of British Columbia, consisting of not less than three members, operating under authority of the Land Settlement and Development Act (chapter 37 of 1917) and amendments thereto, and under the direction of the Minister of Agriculture, is authorized to make loans to persons or associations, on first mortgages of agricultural land, for acquiring and improving land, erecting buildings, purchasing live stock, machinery, etc., discharging liabilities incurred for such purposes, and for other similar uses which may be approved by the board. Where a prior charge exists on the land for a loan by a municipality for drainage or other improvements, the board may take a mortgage concurrent with the prior charge.

The amount of a loan is not to exceed 60 p.c. of the value of the land offered as security, nor is it to be less than \$250 nor more than \$10,000 to any one borrower. A loan may be either long-dated or short-dated. A long-dated loan is to be repaid in 15, 20 or 25 years by equal half-yearly instalments for principal and interest. A short-

dated loan must be for not less than 3 months nor more than 10 years, and need not be repayable by instalments. The amount of a short-dated loan to an individual shall not exceed \$5,000, but a loan of this kind made to an association may, subject to approval by Order-in-Council, exceed \$5,000 but not \$10,000. Up to November 5, 1919, 842 loans had been granted of an aggregate amount of \$1,632,300. Of these loans 47, amounting to \$95,600, had been repaid in full. Only 27 loans were in arrears for more than 6 months, and no foreclosures or seizures had taken place.

The interest on loans is to be, as nearly as is practicable, at such a rate as will be not more than $1\frac{1}{2}$ p.c. in excess of the rate paid by the Provincial Government on the net amount realized by the sale of securities to raise the funds used for the loan. Additions may be made to existing loans up to a total amount equal to 60 p.c. of the value of the property, on which the loan is a charge at the time of the application for an additional loan. If a loan is made to the pre-emptor or purchaser of Crown land, the value of the land is to be taken as the amount actually paid for it together with the value of improvements made by the purchaser.

The general policy of the Land Settlement Board is to reduce the money-lending feature to the minimum necessary, and to promote land settlement and development work to the fullest extent, along lines consistent with sound business principles, in accordance with the letter and spirit of the Land Settlement and Development Act, and with a view to stimulating the rapid and judicious development of the agricultural areas of the province. In furtherance of these objects, it is the aim of the Board—

(a) To direct efforts to the settlement and development of those agricultural areas situated conveniently for transportation facilities and available for production at the smallest possible cost;

(b) To adopt the necessary measures to establish community settlements in the areas suitable for mixed farming, fruit-growing and all branches of agriculture requiring intensive cultivation;

(c) To cultivate the active and sympathetic co-operation of the Faculty of the University of British Columbia and all other reliable authorities in determining the products for which specific areas are best adapted;

(d) To foster the co-operation of the Department of Lands, the Public Works Department and all other branches of the public service in harmonizing and co-ordinating public expenditure in the areas affected.¹

The Seed Grain Act (chapter 75 of 1918) authorizes the expenditure by the Minister of Agriculture of not more than \$50,000 in any one year for the purchase of seed grain and its distribution to occupiers of land, who may either pay cash for it or give as security promissory notes, bearing interest at a rate not higher than 7 p.c. per annum. The Minister is also to take as further security a charge against the lands owned by the debtor.

Under the Land Settlement Board, cattle clubs have also been formed, and up to 5th November, 1919, over 750 head of cattle, principally dairy stock, had been purchased with \$68,000 advanced to the farmers for this purpose. The terms of repayment are 15 p.c. cash,

¹See First Annual Report for the year ending December 31 1917, of the Land Settlement Board, Victoria, B.C., 1918.

balance payable in 1 and 2 years at $7\frac{1}{2}$ p.c. per annum, secured by joint lien notes endorsed by at least six members of the cattle club of recognized standing.

Reclamation projects are also under way under the authority of the Land Settlement Board. These include the draining of Sumas lake, 60 miles from Vancouver, by which it is expected to reclaim 12,000 acres now practically under water, besides rendering an additional 18,000 acres secure from the Fraser valley floods. The execution of the project is expected to take three years and to cost \$1,500,000. Other smaller projects are also under way.

COMMERCIAL FAILURES.

Commercial Failures in Canada, 1919.—According to Bradstreet's of January 15, 1920, the total number of Canadian failures reported during the calendar year 1919 was 625, with liabilities of \$10,054,668 in 1919, as against 814, with liabilities of \$12,413,536 in 1918. In number there was a decrease in 1919 of 23.22 p.c., as compared with 1918, while the liabilities decreased by 19 p.c. Dun's Bulletin of the same date gives the total number of Canadian insolvencies in 1919 as 755, as compared with 873 in 1918, whilst liabilities reached in 1919 the total of \$16,256,259, as compared with \$14,502,477 in 1918. Tables 54 and 56 give the statistics from both authorities, those from Bradstreet's (Table 54) being classified by provinces for the calendar years 1918 and 1919, and those for Dun's Bulletin, including Newfoundland, being classified by branches of business for the calendar years 1917 to 1919 (Table 55) and by classes and provinces for the calendar year 1919 with totals for the years 1908 to 1918, including Newfoundland (Table 56).

NOTE.—Newfoundland included in totals 1908-1918.

Analysis of Commercial Failures.—In Tables 57 and 58 Bradstreet's and Dun's records of commercial failures are analysed according to the method suggested by Kemmerer. First the total number of concerns doing business is indicated, and secondly the number of failures with the percentage of these to the whole, the latter being stated in the form of an index number of which the base is 100 as representing the figures of 1900. Thirdly, the assets and liabilities are set forth and analysed. It will be noted that the average liability for each year is indicated; this is necessary because the extent of demoralization caused by business failures is proportioned to the size of the failure, the failure of one large concern often causing a stronger business depression than the failure of scores of small ones. The relation of liabilities to assets is also significant. Lastly as a rough balancing of results the index number indicating the proportion of failures to the number of concerns in business and the index number of the size of the concerns failing are averaged, and the result given as the barometer of business depression. This number reversed is a barometer of business confidence. The records of Bradstreet and Dun are not on the same basis, but the general tendency of the two records is the same, the differences in results being usually only a matter of degree.

GOVERNMENT ANNUITIES.

Under the Government Annuities Act, 1908 (7-8 Edw. VII. c. 5), His Majesty the King, represented by the Minister (at present the Postmaster General), may sell to persons domiciled in Canada immediate or deferred annuities of not less than \$50 nor more than \$1,000 (1) for the life of the annuitant; (2) for a term of years certain, not exceeding twenty years, provided the annuitant shall so long live; (3) for a term of years certain, not exceeding twenty years, or for the life of the annuitant, which ever period shall be the longer; and (4) an immediate or deferred annuity to any two persons domiciled in Canada during their joint lives, and with or without continuation to survivor. The property and interest of any annuitant in any contract for an annuity is neither transferable nor attachable. Except upon the occurrence of invalidity or disablement of an annuitant, no annuity on a separate life is payable unless the annuitant has reached the age of 55. The purchaser may contract that in the event of the death of the annuitant before the date fixed for the annuity to begin all money paid shall be refunded to the heirs with interest at the rate of three p.c., compounded yearly.

Statistics of the annuities in force on March 31, 1919, are given in Tables 59-61. From September 1, 1908, to March 31, 1919, 4,630 annuities have been issued, of which 234 have been cancelled on account of death, leaving on March 31, 1919, 905 immediate annuities and 3,491 deferred annuities, a total of 4,396 contracts in force. The total value of these annuities is \$1,000,088.56, and the amount received for annuities purchased is \$3,971,626.44.

59.—Number of Immediate Annuities of each amount paid in full from September 1, 1908, to March 31, 1919.

INSURANCE.

Insurance Statistics.—Insurance companies doing business throughout the Dominion of Canada are licensed by the Dominion Government under Acts administered by an Insurance Department under the Minister of Finance. The insurance statistics in Tables **62-82**, which are restricted to companies doing business under license from the Dominion Government and do not therefore include the business of companies operating under license from the Provincial Governments, are compiled from the Reports of the Superintendent

of Insurance, and are divided into three classes relating (1) to insurance against fire; (2) to life insurance and (3) to insurances of a miscellaneous character covering risks of accident, guarantee, employer's liability, sickness, burglary, hail, steam boilers, tornado, weather, inland transportation, automobiles, sprinkler leakage, live stock and title. They refer in all cases to the calendar year. Complete statistics of these three classes of insurance up to the year 1918 have been published by the Insurance Department, and are included in this section of the Year Book for 1919.

Fire Insurance.—Fire insurance was carried on in 1918 by 116 companies, as compared with 96 companies in 1917. Of the 116 companies in 1918, 28 were Canadian, 36 British and 52 foreign. The gross amount of fire policies, new and renewed, taken during the year 1918, was \$4,606,035,056, which is greater by \$556,975,057 than the amount taken in 1917. Premiums charged in 1918 amounted to \$48,770,112, as compared with \$43,515,822 in 1917. The net amount at risk in 1918 was \$4,523,514,841.

Life Insurance.—The business of life insurance in Canada was transacted in 1918 by 45 active companies, including 26 Canadian, 8 British and 11 American. Notwithstanding the difficulties arising out of the war, the total amount of policies in Canada taken during the year 1918 was \$312,896,556, as compared with \$282,120,430 in 1917. For the Canadian companies the amounts effected were \$179,429,315 in 1918, as compared with \$172,703,621 in 1917, for British companies \$5,969,013 in 1918, as compared with \$5,109,183 in 1917 and for American companies \$127,498,228 in 1918, as compared with \$104,307,626 in 1917. The total amount of life insurance in force through life companies for the year 1918, at the date of the statements rendered, was \$1,785,061,273, as against \$1,585,042,563 in 1917, these figures being distributed among the three different classes of company as follows: Canadian \$1,105,503,447 (\$996,699,282 in 1917); British \$60,296,113 (\$58,617,506 in 1917); American \$619,261,713 (\$529,725,775 in 1917).

Life Insurance on the Assessment Plan.—Table 78 gives the statistics of life insurance on the assessment plan, that is, insurance effected through fraternal or friendly societies by assessments on the members thereof and with annual dues to meet expenses. The statistics in these tables relate, however, only to the six societies reporting to the Insurance Department of the Dominion Government, viz., the Alliance Nationale, the Artisans Canadiens, the Catholic Mutual Benefit Association, the Commercial Travellers' Mutual Benefit Society, the Independent Order of Foresters (whose statistics include sick and funeral departments) and the Woodmen of the World.

War Claims incurred by Insurance Companies in Canada 1914-18.—With a view to ascertaining the extent to which the life insurance companies in Canada have been affected by the war, a circular was sent by the Superintendent of Insurance to each company asking for the figures showing the war claims incurred during each

of the five years 1914 to 1918. The claims were further classified in each year according as they were incurred under policies held by (a) enlisted soldiers killed in action or dying from wounds; (b) enlisted soldiers dying from other causes; (c) other persons engaged in war service or civilians dying as a result of military operations. The results of the inquiry are given in Table 79, which shows the total war losses to Dominion and Provincial licensees during the five years 1914-18 as \$20,510,804. As illustrating the comparative effects of war and epidemic upon insurance companies, it may be noted that the death claims due to influenza, pneumonia or grippe during the last three months of 1918 amounted to \$9,803,306, or nearly half of the total war losses. Canadian companies also incurred claims under policies held by British and foreign policy holders as follows: 1914, \$55,827; 1915, \$175,260; 1916, \$293,848; 1917, \$293,774, and 1918 \$438,385, making in all a total of \$1,257,094.

Insurance other than Fire or Life.—Insurance business other than fire or life was carried on in Canada in 1918 by 96 companies: 24 Canadian, 24 British and 48 foreign. In 1917 the corresponding figures were: 26 Canadian, 17 British and 41 foreign, a total of 84. Fifty-five of these companies in 1918 (49 in 1917) likewise transacted fire insurance, and 3 companies in 1918 (1 in 1917) transacted life insurance. In addition there were in 1918 6 fraternal orders or societies which carried on sickness insurance and also life insurance. Of the 24 Canadian companies in 1918 (26 in 1917), 12 (18 in 1917) transacted miscellaneous classes of business only. The combined assets of the 12 companies amounted at the end of 1918 to \$5,724,861, as compared with liabilities of \$1,620,793, the excess of assets thus amounting to \$4,104,068.

Insurance under Dominion and Provincial Licenses combined.—The measures adopted by the Superintendent of Insurance to collect statistics of the business transacted by companies holding licenses from the Provincial Governments of Canada, or permitted by provincial laws to transact business without a license, were described in the Year Book of 1916-17, pages 576 and 577. Tables 83 to 87 give particulars of insurance business transacted respectively by Dominion and provincial licensees. According to these tables, the total fire insurance (Table 83) effected in 1918 on property situated in Canada was \$5,328,836,262, including \$4,606,035,056 with Dominion licensees, \$404,037,486 with provincial licensees and \$318,763,720 with unlicensed companies (Table 87). The total net amount of life insurance in force at December 31, 1918 (Table 88), was \$2,153,243,236, of which \$1,914,117,046 was with Dominion licensees. The bulk of the life business of the provincial licensees is transacted by fraternal companies. On business other than fire and life (Table 85), the net premiums received in 1918 were \$16,558,299 and the net losses paid were \$8,040,249. Of these amounts the net premiums were \$13,918,136 for Dominion and \$2,640,163 for provincial licensees; the net losses paid were \$6,471,312 for Dominion and \$1,568,937 for provincial licensees.

62.—Fire Insurance Business transacted in Canada, 1918.

XII.—ADMINISTRATION.

PARLIAMENTARY REPRESENTATION.

Representation by Provinces.—The four original provinces of the Dominion were Ontario, Quebec, Nova Scotia and New Brunswick, which were given parliamentary representation according to Section 37 of the British North America Act, 1867. By Imperial Orders in Council the provinces of British Columbia and Prince Edward Island were admitted into the Dominion, the former on July 20, 1871, by Order dated May 16, 1871, and the latter on July 1, 1873, by Order dated June 26, 1873. An Act of the Dominion Parliament of May 12, 1870 (33 Vict., c. 3), provided for the formation of the province of Manitoba out of Rupert's Land and the Northwest Territories, so soon as these should be admitted into the Dominion of Canada, which admission was effected by Imperial Order in Council dated June 23, 1870, taking effect on July 15, 1870. In consequence of doubts as to the legal validity of the Dominion Act of 1870 (33 Vict., c. 3), the Imperial Parliament passed an Act in 1871 (34-35 Vict., c. 28) making the Canadian Act valid and effectual.

Parliament of Canada.—The Parliament of the Dominion of Canada consists of the Senate with 96 members and of the House of Commons with 235 members, senators being appointed for life by the Governor-General and members of the House of Commons being elected by the people. The ordinary legal limit of duration for each parliament is five years; but by Act of the Imperial Parliament (6-7 Geo. V., c. 19), passed June 1, 1916, and intituled an Act to amend the British North America Act, 1867, the duration of the 12th Parliament of Canada was extended until October 7, 1917. The 12th Parliament was dissolved by proclamation of the Governor General on October 6, 1917; and the 13th Parliament of Canada was elected on December 17, 1917. A Redistribution Act passed after each census readjusts the number of representatives in the House of Commons in accordance with rules laid down in Section 51 of the British North America Act, 1867, of the Imperial Parliament (30-31 Vict., c. 3). These rules provide that the province of Quebec shall always have the fixed number of 65 members, and that there shall be assigned to each of the other provinces such a number of members as will bear the same proportion to the number of its population (ascertained by the census) as the number 65 bears to the population of Quebec. However, by an amendment to the British North America Act passed in 1915, (5-6 Geo. V., c. 45), it was enacted that "notwithstanding anything in the said Act, a province shall always be entitled to a number of members in the House of Commons not less than the number of senators representing such province." As a consequence of this amendment the representation of Prince Edward Island has remained at 4 members.

The Senate.—The numerical representation of the Senate by provinces is as follows: Prince Edward Island 4, Nova Scotia 10, New Brunswick 10, Quebec 24, Ontario 24, Manitoba 6, Saskatchewan 6, Alberta 6, British Columbia 6. Total 96.

House of Commons.—The representation of the people in the House of Commons has been governed by Acts of the Dominion Parliament passed in 1903, 1904 and 1907 (3 Edw. VII, c. 60; 4 Edw. VII, c. 35; 6-7 Edw. VII, c. 41). The provinces of Saskatchewan and Alberta were created by Acts of the Dominion Parliament passed in 1905 (4-5 Edw. VII, cc. 3 and 42), and after the Northwest Census of 1906 the Representation Act was amended by an Act of April 27, 1907 (7 Edw. VII, c. 41), which gave Saskatchewan ten members and Alberta seven members after the next ensuing election of October 26, 1908. The seven additional members thus given to Saskatchewan and Alberta brought the representation of Canada in the House of Commons up to 221. The Representation Act, 1914 (4-5 Geo. V, c. 51), which was assented to on June 12, 1914, came into operation for the election of the 13th Parliament of Canada. An amending Act (5 Geo. V., c. 19), and the Imperial Act 5-6 (Geo. V., c. 45), provide that the House of Commons shall consist of 235 members, distributed by provinces as follows: Prince Edward Island 4, Nova Scotia 16, New Brunswick 11, Quebec 65, Ontario 82, Manitoba 15, Saskatchewan 16, Alberta 12, British Columbia 13 and Yukon

Territory 1. Table 1 shows the representation in the House of Commons according to the districts of the Representation Act, 1914, and of the amending Act (5 Geo. V., c. 19).

¹Second term.

HONORARY ADVISORY COUNCIL FOR SCIENTIFIC AND INDUSTRIAL RESEARCH.

In the Canada Year Book for 1918, pp. 581 to 584, a general account was given of the work for that year of the Advisory Research Council. During the year 1919 two changes have taken place in the membership of the Council. Tancrède Bienvenu, Vice-president and General Manager of the Banque Provinciale du Canada, Montreal, and S. F. Kirkpatrick, M.E.I.C., Professor of Metallurgy, Queen's University, Kingston, have resigned. To fill these vacancies Sir George Garneau, Kt., B.A.Sc., 2 Cook Street, Quebec, P.Q., and W. L. Goodwin, B.Sc., D.Sc., F.R.S.C., Dean of the Faculty of Science, Queen's University, Kingston, were appointed, and they with the other members whose names were given in the Canada Year Book for 1918, form the Honorary Advisory Council for Scientific and Industrial Research as at present constituted.

Studentships and Fellowships.—During the past year the supply of students for the twenty-five studentships and fellowships instituted by the Research Council was even less than during the previous year, only three fellowships and five studentships being awarded. Three of these were awarded to students who were released from the military forces of Canada, and accordingly began their studentships after January 1, 1919. Now that the war has ended, it is expected that the number of qualified applicants will very greatly increase and that they in turn will help to relieve the scarcity of scientific researchers.

Bursaries.—The demonstration on the part of any candidate for a studentship of capacity for research implies a year or so in post graduate study. As a rule few of those who have just graduated are in a position to afford the additional expense involved and consequently they may be unable to qualify for studentships. The Council, therefore, decided to institute bursaries, ten of which will be awarded during 1919-20 to graduates whose attainments in science justify such an award. The value of a Bursary is \$500 and it is tenable only for a year, but if the holder, during that time, demonstrates the possession of a capacity for research, he may be awarded a studentship for the following year.

Assisted Researches.—Under certain conditions the Council may grant financial assistance for research into industrial processes and methods. During the fiscal year 1918-19 twelve such grants were awarded, ranging in amount from \$200 to \$7,000. One of these grants was made to assist in an investigation of the reduction of low grade iron ores. There is but a small supply of high grade iron ore in the Dominion, 96 p.c. of all the iron ore smelted in Canada being imported. The total quantity of available high grade iron ore on the globe is diminishing rapidly, and it will eventually be necessary to turn to iron ore of lower grades for the production of iron and steel. If the smelting could be effected on an industrial scale at a reduction in the cost, it would offset the disadvantage at present attending the utilization of this lower grade iron ore which would make available

immense quantities of such ore in Canada. This investigation has advanced to a stage which promises important results bearing on the utilization of these ores. An investigation on wheat genetics has been carried on for the past two years, and a variety of wheat has been produced which ripens two weeks earlier than the Marquis. Also varieties have been produced, some of which are wholly rust resistant. An endeavour is being made to produce a hybrid of these which will ripen early, be completely rust resistant, give a good yield per acre, and have the necessary milling and baking qualities. Another grant was made to provide for preliminary investigations on the cause of the discoloration of canned lobster. This trouble results in an annual loss to the lobster industry of many thousands of dollars and, as the success of this important industry depends on a high grade of product, a thorough and prolonged research on the problems affecting the industry must be systematically planned and carried out. A Fish Canner's Guild for Research is in process of organization, and it is expected that when it is fully organized it will undertake and continue the support of this investigation. Grants have also been made to provide for researches on the chemistry and bacteriology of fish curing; an investigation on the character and amount of the sugars in sulphite liquor from pulp mills with a view to the utilization of these sugars in the manufacture of industrial alcohol; the flotation of Canadian ores by waste oils from wood distillation; the utilization of ultra-violet rays; experiments on fog signalling apparatus; investigations on a unit storage battery, on a laboratory scale, of the oxy-hydrogen type.

Utilization of Fish Waste.—The question of the utilization of fish waste has been under consideration by the Research Council for the last eighteen months. A thorough survey was made, and the Council ultimately came to the conclusion that a project for the utilization of the offal could be successfully carried out; they recommended to the Sub-Committee of the Privy Council on Scientific and Industrial Research and to the Reconstruction and Development Committee of the Privy Council that a plant be established. Eventually a private company was organized to engage in this industry.

Industrial Alcohol.—Denatured alcohol is very extensively used abroad as a chemical agent, a precipitant, a solvent, a cleanser in many industrial processes, especially in the chemical industries; and it is also used as a motor fuel to replace gasoline and for illumination purposes. In Canada the consumption is a meagre one. In 1917, if it had been in proportion to the population, as compared with the United States, the amount would have been about twenty times as great as it was. One of the reasons for this very limited consumption in Canada is the exceedingly high cost, and this is due principally to the conditions under which denaturation is carried out, to the present bonding system and to the high cost of corn and other raw materials used to produce it. If raw materials, which are at present merely industrial waste, were employed in the production of alcohol, the price might eventually be considerably reduced. It has

been estimated that from the waste sulphite liquor of Canadian pulp mills, 5,000,000 gallons of alcohol of 95 p.c. strength could be obtained yearly at a cost of under 35 cents per gallon. It is also a well-known fact that wood waste from our saw mills could be utilized for this purpose. This method should be particularly profitable in British Columbia, where it is estimated that several thousand tons of wood waste are burned daily. In view of these and other facts, and as a result of the representations of various bodies interested in the Canadian chemical industries, the Research Council gave prolonged and careful consideration to this question, and formulated definite recommendations to the Sub-Committee of the Privy Council on Scientific and Industrial Research.

Western Lignites.—After making a thorough survey on the subject of the utilization of the low grade lignites of Western Canada as domestic fuel, the Research Council recommended the Dominion Government to erect a demonstration carbonizing-briquetting plant capable of turning out 30,000 tons of briquettes per year, practically equivalent in thermal value to anthracite. After extended consideration of the proposal, the Federal Government, in co-operation with the Governments of the provinces of Manitoba and Saskatchewan, agreed to make an appropriation of \$400,000 and to put the conduct and control of the experiment in charge of a Board which was appointed on August 22, 1918, and which has, since its organization, been carrying on investigations and tests preliminary to the erection of the demonstration plant in Saskatchewan.

Industrial Fatigue.—In modern industry the question of the efficiency of the worker in relation to the hours of labour, in conjunction with the amount of his output and the conditions under which he operates, is one to which a great deal of attention has been given in Great Britain, France, and the United States. This is a question which affects in a large measure the social welfare of the entire industrial population and, while much may be learned from investigations carried on elsewhere, there are special conditions which must be considered in Canada, such as differences in climate, food, etc. Realizing the importance of this work, the Research Council has appointed a Committee under the chairmanship of Prof. J. J. R. Macleod, of the University of Toronto, to carry on investigations in Canada on industrial fatigue. This Committee will also endeavour to co-operate with similar organizations abroad in order to prevent duplication of effort.

Forestry.—The Research Council regards forestry investigations as of fundamental importance in determining the data which must be ascertained regarding the rates of growth and the possible quantity of reproduction of our more valuable timber trees, in order that a comprehensive and successful attack on the problem of reafforestation in Eastern Canada may be undertaken. The results already obtained through the Petawawa Forest Survey, which has been conducted on behalf of the Research Council by the Forestry Branch of the Department of the Interior, have enabled this Branch to elaborate a system of forest organization which is specially adapted to conditions in Eastern Canada and which will permit of the inauguration of the

best silvicultural practice to provide efficiently for reafforestation. This investigation is still in progress. The Research Council has placed before the Sub-Committee of the Privy Council for Scientific and Industrial Research and the Reconstruction and Development Committee of the Privy Council a report recommending the establishment, of a National Research Institute. This report has been accepted by the two Committees, and the subject is still under consideration.¹

PUBLIC LANDS.

Dominion Lands.—The crown lands of the Dominion of Canada are situated in the Prairie Provinces, in the Dominion Railway Belt of British Columbia, and in a block in northern British Columbia, containing 3,500,000 acres known as the "Peace River Block". All lands within 15 miles of a railway are reserved for soldier settlement; other lands are offered in free grants as homesteads for settlers. Every person who is the sole head of a family and every male who has attained the age of eighteen years and is a British subject or declares intention to become a British subject, is entitled to apply for entry for a homestead. The lands are laid out in townships of 36 sections. Each section contains 640 acres, and is divided into quarter-sections of 160 acres. A quarter section of 160 acres may be obtained as a homestead on payment of an entry fee of \$10 and fulfilment of certain conditions of residence and cultivation. To qualify for the issue of the patent a settler must have resided upon his homestead for at least six months in each of three years, must have erected a habitable house thereon, must have at least 30 acres of his holding broken, of which 20 acres must be cropped. A reduction may be made in the area of breaking where the land is difficult to cultivate on account of scrub or stone. Provision is made for residence in the vicinity on certain conditions, in which case the area of cultivation must be increased.

Disposal of Dominion Lands in Manitoba, Saskatchewan and Alberta.—According to figures supplied by the Department of the Interior, a total area of 117,865,100 acres, equal to 5,115 townships, or 184,164 square miles, has been alienated from the Crown. The total number of acres surveyed to January 1, 1919, was 199,439,436, of which 24,395,300 acres were available for homestead entry. Table 6 shows the distribution of the surveyed area for each of the three Prairie Provinces, as at January 1, 1919.

In addition to the surveyed area, there are large tracts of land in the northern parts of these provinces, which have, as yet, been explored only in a very partial way. The total area of this unsurveyed tract is 286,203,262 acres, of which 22,419,370 acres are water-covered. Pamphlets on the resources and developments of the various provinces of Canada have been issued by the Natural Resources Intelligence Branch of the Department of the Interior. Recent publications dealing with the Prairie Provinces relate to the new mining district

¹ A list of the publications of the Honorary Advisory Council for Scientific and Industrial research will be found in the statement of Government publications on page 637. Copies of these publications will be sent gratis to persons interested on application to the Secretary of the Council.

of Manitoba, the Peace River district of Alberta; the province of Saskatchewan, and a statistical compilation on the natural resources of Manitoba, Saskatchewan and Alberta. This Branch also publishes lists with the names and addresses of the owners of unoccupied and uncultivated lands in the provinces of Manitoba, Saskatchewan and Alberta, being lands which are not cultivated because the owners are either non-resident or are not interested in farming.

¹ Area not available for cultivation.

Railway Lands.—Table 7 is a record for the three fiscal years 1917, 1918, 1919 of the sales of lands by the Hudson's Bay Company and by railway companies having government land grants. The total sales in the fiscal year 1919 (the year ending March 31st, 1919) amounted to 1,038,657 acres at a price of \$18,148,736, as compared with 1,116,237 acres at a price of \$20,887,600 in the previous fiscal year. The 1919 prices average \$17.47 per acre, as against \$18.71 in the preceding year.

Homestead Entries.—In 1918, the total number of ordinary homestead entries for lands of the Dominion Government was 4,378 as compared with 8,768 in 1917, 12,568 in 1916, 17,532 in 1915 and 25,623 in 1914. In 1918, 873 entries were made in Manitoba against 1,618 in 1917, 2,616 in 1916, 4,113 in 1915 and 4,252 in 1914; 1,273 in Saskatchewan against 2,957 in 1917, 4,519 in 1916, 6,349 in 1915 and 9,752 in 1914; 2,163 in Alberta against 3,982 in 1917, 5,169 in 1916, 6,584 in 1915 and 10,722 in 1914; and 69 in British Columbia against 211 in 1917, 264 in 1916, 486 in 1915 and 847 in 1914. The number of pre-emptions under the Dominion Lands Act was 69 in 1918 (55 in Saskatchewan and 14 in Alberta) against 870 in 1917 (612 in Saskatchewan and 258 in Alberta). The number of purchased homesteads under the Act was 21 in 1918 (15 in Saskatchewan and 6 in Alberta) against 207 in 1917 (121 in Saskatchewan and 86 in Alberta).

Provincial Public Lands.—In the Maritime Provinces, in Quebec, Ontario and British Columbia, the public lands are administered by the Provincial Governments.¹ In Prince Edward Island all the land is settled. In Nova Scotia there are now no free grants of land; but, under conditions prescribed by the Crown Lands Act of the Provincial Assembly (10 Edw. VII, 1910, c. 4, s. 26), and an amending Act of May 3, 1912, Crown lands, not exceeding in each case 150 acres, may be granted for agricultural or grazing purposes to applicants of not less than 18 years of age at the price of \$1 per acre, in addition to the expenses of survey. Leases and grants of Crown lands may also be obtained upon conditions prescribed. The total area of the Crown lands in Nova Scotia as of 1918 is approximately 876,974 acres.

¹ For copies of the detailed regulations governing the disposal of provincial Crown lands, application should be made as follows: Nova Scotia, to the Secretary for Industries and Immigration, Halifax; New Brunswick, to the Deputy Minister of Lands and Mines, Fredericton; Quebec, to the Deputy Minister of Lands and Forests, Quebec; Ontario, to the Deputy Minister of Lands and Forests, Toronto; British Columbia, to the Deputy Minister of Lands, Victoria.

The area of the Crown lands in New Brunswick is about 7,250,000 acres. Probably not more than one-quarter of this area is suitable for agriculture. Under the provisions of Acts of the New Brunswick Legislative Assembly, lots of 100 acres each may be granted to settlers of 18 years of age or over, subject to conditions which include the clearance and cultivation of ten acres, the building of a house, three years' residence on the lot and payments or labour in aid of the construction of roads and bridges. The Government of New Brunswick has commenced a survey with a view to the separation of agricultural lands from those suitable only for timber and to the opening up of homestead lands through which roads will be built, assisted by the province. Some special facilities are offered for the taking up of Crown land in New Brunswick for settlement purposes only by those who have served either in the army or navy during the European War. An application for 100 acres of land under those conditions may be sent either to the Soldier Settlement Board of Canada at St. John, N.B., or to the Deputy Minister of Lands and Mines at Fredericton, N.B.

In Quebec the area of public lands subdivided and unsold on June 30, 1917, was 7,297,471 acres. During the year ended June 30, 1918, 128,720 acres were surveyed; 75,646 acres reverted to the Crown; 297,468 acres were sold, the receipts, including arrears, being \$151,350. Adding to the acreage available at June 30, 1916, the areas surveyed and the areas that reverted and deducting sales and grants, there remained subdivided and unsold on June 30, 1918, 7,204,369 acres. Agricultural lands in 100 acre lots are available for settlement upon prescribed conditions at the price of 60 cents per acre.

In Ontario the public lands which are open for disposal are chiefly situated in the districts of Muskoka, Parry Sound, Nipissing, Sudbury, Algoma, Timiskaming, Thunder Bay, Kenora and Rainy River, and in the counties of Haliburton, Peterborough, Hastings, Frontenac, Lennox and Addington and Renfrew. In northern Ontario which comprises the territory lying north and west of the Ottawa and French rivers, the townships open for sale are subdivided into lots of 320 acres, or sections of 640 acres, and a half lot or quarter section of 160 acres is allowed to each applicant at the price of 50 cents per acre, payable one-fourth cash and the balance in three annual instalments with interest at 6 p.c. The applicant must be a male (or sole female) head of a family, or a single man over 18 years of age. The conditions of purchase include occupation by the purchaser within six months from date of purchase, the erection of a house, the clearance and cultivation of at least 10 p.c. of the area and three years' residence. Proxy regulations enable an individual to purchase a half lot of 160 acres and place an agent in residence, but the duties to be performed before issue of patent are double those required in ordinary purchases. Free grants and homesteads are available on lands within the districts of Algoma, Nipissing, Thunder Bay, Sudbury, Rainy River and Kenora, and between the Ottawa river and the

Georgian bay, comprising portions of the counties of Renfrew, Frontenac, Addington, Hastings, Peterborough and Haliburton and the districts of Muskoka and Parry Sound. Grants of 160 acres are made to either single or married men in free grant territories where the land is subdivided in sections of 320 acres. In the Huron and Ottawa territory an allowance for waste lands may increase the grant of a single man to an area not exceeding 200 acres, while heads of families may secure 200 acres free and purchase an additional 100 acres at 50 cents an acre. The settlement duties for free grants are as follows: (a) at least 15 acres to be cleared and brought under cultivation, of which 2 acres at least are to be cleared and cultivated annually during the 3 years; (b) a habitable house to be built at least 16 by 20 feet in size; (c) actual and continuous residence upon and cultivation of the land for 3 years after location and thence to the issue of the patent. The mines and minerals and all timber other than pine, and in some cases the pine, are covered by the patent.

Ranching lands of prospective quality may be obtained on reasonable terms in waste and wooded areas, the valley of the Trent river lying between lake Ontario and the Georgian bay affording good opportunities for cattle and sheep raising.

Ontario includes 230,000,000 acres of land, of which only 13,500,000 acres are under cultivation. More than 20,000,000 acres of the very finest arable land await the plough. Ontario is $3\frac{1}{2}$ times as large as the British Isles and $1\frac{1}{2}$ times as large as Texas. From east to west its borders are 1,000 miles apart, and from north to south, 1,075 miles. Recent railway construction and colonization road building have made accessible vast tracts of untilled farm land and virgin forests in northern Ontario.

Loans are made to settlers in the northern and northwestern districts of Ontario. The maximum amount of any loan to be made to a settler is \$500, with interest at 6 p.c. per annum, upon such terms and conditions as the Loan Commissioner may approve. The Government of Ontario is anxious that all bonâ fide settlers shall take full advantage of the opportunity provided to secure any needed loan, and full information with respect to same may be secured on application to the various Crown Lands Agents, or direct from the Settlers' Loan Commissioner, Parliament Buildings, Toronto.

Special legislation has been enacted to apply to returned soldiers, whereby instructional depots and farm colonies may be established, loans advanced, stock provided and co-operative arrangements effected for the purchase and sale of goods, produce, etc., to assist the returned soldier on his road to successful settlement. Subsequent to a course at a training depot, during which wages for work done are paid, or as soon as the soldier is sufficiently competent to go upon a farm and work for himself, 100 acres of land, with 10 acres cleared thereon, will be allotted to him. The necessary machinery and farm tools and such stock as may be determined upon to the value of \$500 will be supplied. Such advance will be repayable in twenty years at 6 p.c., but no payment either on principal or interest will be required

until after the expiration of 3 years. After 5 years' residence to date from the acceptance of the application, the soldier may, provided he has 20 acres cleared—10 acres in addition to what is done by the Crown—and a house 16 feet x 20 feet erected, secure a patent from the Crown.¹

In British Columbia there are large areas of free grant lands. Any British subject being the head of a family, a widow, a femme sole who is over 18 years of age and self-supporting, a woman deserted by her husband, a woman whose husband has not contributed to her support for 2 years, a bachelor over 18 years, or any alien on his making a declaration of his intention to become a British subject, may pre-empt free 160 acres of the unoccupied and unreserved Crown lands, not being an Indian settlement. The fees payable include \$2 for recording, \$2 for certificate of improvement and \$10 for the Crown grant. Of the total area of the province 206,796,495 acres are at the disposal of the Crown through the Provincial Government. Of this area 190,826,624 acres are unsurveyed and unencumbered Crown lands, 13,378,004 acres are reserved for various purposes and 2,397,978 acres have been surveyed for pre-emption by settlers.

By the Soldiers' Land Act of 1918, provision is made for free grants of land to returned soldiers, free from taxation for five years and subject only to reasonable residence and improvement duties. This Act provides also for the conveyance to the Dominion Government free of cost, but subject to reasonable residence and improvements, of suitable lands for the settlement thereon of British Columbia soldiers by the Soldier Settlement Board appointed by the Dominion Government. The Lands Department has already thrown open one block of land for settlement by returned soldiers only, and is examining as rapidly as possible other areas in various sections of the province to determine their suitability for the same purpose.

DEPARTMENT OF THE SECRETARY OF STATE.

Charters of Incorporation.—The number of companies incorporated under the Companies Act and amending Acts during the fiscal year 1918-19 was 512, with a total capitalization of \$214,326,000, and the number of existing companies to which supplementary Letters Patent were issued was 117, of which 69 increased their capital stock by \$67,583,625, and 11 decreased their capital stock by \$2,115,985, the remaining 37 being granted supplementary letters patent for various purposes, such as changing names, extending powers, etc.

There were also issued 37 charters of association (without share capital) under the Companies Act Amendment Act, 1917, making a total of 666 charters and supplementary charters issued during the year, an increase of 15 as compared with the previous year, while the total capitalization of new companies and the increased capital of existing companies amounted to \$279,793,640.

Canada Temperance Act.—This Act prohibits the sale of intoxicating liquors in places that have adopted it and is administered by the Department of the Secretary of State. No votes or changes have taken place since the last statement, page 591, Canada Year Book, 1918.

Naturalizations.—The naturalizations effected under the Naturalization Act (R.S. 1906, c. 77), for the 12 months ended December 31, 1917, numbered 9,029. Of these, 5,192 were formerly citizens of the United States. Table 10 shows by principal nationalities the number of naturalizations effected in Canada during the years 1908 to 1917 under the Act. This Act was repealed as from January 1, 1918. Naturalization is now granted solely under the Naturalization Act, 1914. The naturalizations granted under this Act in the years 1915, 1916, 1917 and 1918 are given in Table 11.

¹ Under Section 4 of the Naturalization Act, 1914, the Secretary of State is authorized in his discretion to grant a special certificate of naturalization to any person with regard to whose nationality as a British subject a doubt exists.

INDIAN AFFAIRS.

Department of Indian Affairs.—By section 5 of the British North America Act, 1867, the Indians of Canada and the lands reserved for them came under the control of the Dominion Government, and in 1873 an Act of the Canadian Parliament (R.S., c. 81) provided that the Minister of the Interior should be Superintendent General of Indian Affairs and as such have the control and management of the lands and property of the Indians in Canada. The aim of the Department of Indian Affairs is the advancement of the Indians in the arts of civilization, and Agents have been appointed to encourage the Indians under their charge to settle on the reserve and to engage in industrial pursuits.

Tables **12-19**, compiled from the Reports of the Department, give for the years named particulars respecting population, religion, education, agriculture and financial status. Table **19** shows that during the year 1918 crops to the value of \$3,142,046 were raised by the Indians; the corresponding value in 1917 was \$2,351,807. Educational advantages are provided for the Indians in day, boarding and industrial schools, and for educational purposes appropriations were made by Parliament for the year 1918-19 amounting to \$735,505. Several bands of Indians assist, and during the fiscal year 1918-19 the sum of \$33,919 was available from this source. As shown in Table **15**, the total number of Indian children enrolled as attending school during the fiscal year 1918 was 11,952, and the average attendance was 7,532.

The total parliamentary appropriation of the Indian Department for the year 1918-19 is \$1,673,898. On March 31, 1919, the Indians had to the credit of their trust funds \$9,238,787, derived from sales of lands and timber and from rentals of grazing and other lands. The amount named represents an increase of \$573,650 over that of the preceding year.

PUBLIC WORKS.

Since Confederation and before, the Department of Public Works has been known as the constructing department. In 1879, the railways and canals were placed under control of a new department, the building and maintenance of penitentiaries were transferred to the Department of Justice, the maintenance and construction of lighthouses to the Marine and Fisheries Department and the smaller drill halls and armouries to the Department of Militia and Defence. The work of the Department of Public Works is now divided into three principal branches, viz., Engineering Branch, the Architect's Branch and the Telegraph Branch.

Engineering.—The Engineering Branch comprises the construction and repair of wharves, piers, breakwaters, dams, weirs, bank and beach protection works; the improvement of harbours and rivers by dredging; the construction, maintenance and operation of government dredging plant; the construction and maintenance of graving docks; the construction, maintenance and working of slides and booms; the construction and maintenance of interprovincial bridges and approaches thereto, and of bridges on highways of federal importance in the Northwest Territories and the maintenance of military roads; also hydrographic and ordinary surveys and examinations, inclusive of precision levelling and geodetic measurements which are required for the preparation of plans, reports and estimates; the testing of cements, etc. The Branch has charge of about 1,700 harbour works, 4 graving docks, 4 slide and boom works, interprovincial bridges, 51 dredges and 84 tugs and other dredging plant.

Architecture.—The Architect's Branch builds and maintains government buildings, post offices, custom houses, examining ware-

houses, and constructs quarantine, immigration and experimental farm buildings, armouries and drill halls, land offices and telegraph offices. The most important public building now under construction is that of the new Houses of Parliament at Ottawa. For an account of the progress of this work, see pages 677 and 678.

Telegraphs.—The Telegraph Branch has control over the construction, repair, and maintenance of all government-owned telegraph lines and cables. These lines are located in the provinces of Nova Scotia, New Brunswick, Quebec, Ontario, Saskatchewan, Alberta, British Columbia, and the Yukon, and statistics relating to them are given on page 463.

Graving Docks.—There are four graving or dry docks completed and owned by the Canadian Government. The dimensions of these docks are shown in Table 20. The dock at Kingston, Ontario, is under lease to the Kingston Shipbuilding Company. The dock at Levis, Quebec, east of the old dock, is 1,150 feet long, divided into two parts (650 and 500 feet, respectively), and 120 feet wide; it has a depth at high water of 40 feet. It cost about \$2,750,000. Under the Dry Dock Subsidies Act, 1910 (9-10 Edw. VII, c. 17),¹ several docks have been subsidized by payments of 3 or 3½ p.c. per annum on the original cost for a given number of years, as shown by Table 21.

¹For description of this Act, see Canada Year Book, 1910, p. xxviii.

Expenditure and Revenue.—Table 22 shows the expenditure and revenue for the fiscal years 1915–19 of the Public Works Department of the Dominion Government. For the fiscal year 1919, the expenditure was \$21,395,500, as compared with \$14,055,208 in 1918, an increase of \$7,340,292, more than covered by the increase in the extraordinary expenditure for Military Hospitals. The revenue for the year shows an increase of \$108,991.

HARBOUR COMMISSIONS.

Certain of the more important Canadian harbours are controlled by Harbour Commissions, constituted by special act of the Dominion Parliament for each case. The number of commissioners varies, but is, in most cases, three. In every case the property of the harbour is vested in the commission, which has authority to administer the harbour, appoint the harbour master, make by-laws and regulations concerning the harbour and ships using it, fix and collect dues payable for the use of the harbour and control the expenditure of the revenue received from this source. For the purpose of harbour construction and improvements a commission may, with the consent of the Governor-in-Council, expropriate land and borrow money on debentures issued against security of the real and other property of the harbour. In the cases of Quebec and Montreal, money has been advanced by the Dominion Government against such debentures. The commissions are under the inspection of the Marine Department and

make reports to the Minister of Marine. The harbours at the following places are administered by commissions, the date given in each case being that of the Act of Parliament under which the commission received its present constitution and powers: Pictou (1879); Quebec (1899); Three Rivers (1882); Montreal (1894); Belleville (1889); Toronto (1911); Hamilton (1912); Winnipeg and St. Boniface (1912); Vancouver (1913); New Westminster (1913); North Fraser (1913).

NATIONAL GALLERY.

The National Gallery of Canada was the outcome of the establishment in 1880 by the Marquis of Lorne and H.R.H. Princess Louise of the Royal Canadian Academy of Arts, which required the elected Academicians to deposit their diploma pictures in the National Gallery at Ottawa. The collections of pictures, statuary and other works of art now occupying premises in the Royal Victoria Museum in Ottawa consist of purchases made by means of the annual grants voted by the Dominion Parliament, the diploma works of the members of the Royal Canadian Academy and gifts and loans by persons interested in art. In 1907 an Advisory Arts Council of three members was appointed by authority of an Order in Council, and in 1913, under the National Gallery of Canada Act (3-4 Geo. V., c. 33), the Advisory Arts Council was constituted the Board of Trustees for the management of the National Gallery and the administration of its annual grants.

Amongst the collections of oil paintings now in the National Gallery are works by such old masters as Caravaggio, Andrea del Sarto, Bartholomaeus de Bruyn, Luca Giordano, Cima da Conegliano, Frans Floris, Chardin, Hogarth, Snyders, Daniel Mytens. The more modern schools include representative works by the great English masters: Reynolds, Hoppner, Beechey, Lawrence, Gainsborough, Millais, Leighton, Holman Hunt. The French masters include J. F. Millet, Claude Monet, Alfred Sisley and a number of others, while the contemporary British school is strongly represented by fine examples of the work of such artists as Arnesby Brown, Laura Knight, Glyn Philpot, W. Orpen, D. Muirhead, G. Henry, Austen Brown and many others. The Gallery includes an excellent and representative exhibition of the work of Canadian artists both past and present.

PUBLIC DEFENCE.

Military Forces.—Before the outbreak of the war, the Canadian Militia consisted of a Permanent Force, which on March 31, 1914, numbered 3,000 officers, non-commissioned officers and men, and an Active Militia, which at the same date numbered 5,615 officers and 68,991 non-commissioned officers and men. Since the outbreak of the war on August 4, 1914, successive contingents of troops of all arms have been recruited, equipped, trained and despatched by the Canadian Government to Great Britain for active service as part of the Imperial

forces. When hostilities ceased on November 11, 1918, there had been sent overseas for active service in the Canadian Expeditionary Force about 418,000 officers, non-commissioned officers and men.¹

Table 23, showing the Militia expenditure and revenue for the five fiscal years 1914 to 1918, is taken from the Report for the year ended March 31, 1918, of the Militia Council. This table shows that the ordinary expenditure of the Department of Militia and Defence for the year ended March 31, 1918, was \$3,887,838, as compared with \$4,301,785 for 1917, \$4,681,502 for 1916, and \$9,991,817 for 1915. The ordinary revenue amounted to \$86,354 for the year ended March 31, 1918, as compared with \$169,254 for 1917, \$292,273 for 1916 and \$125,785 for 1915.

Expenditure on Account of War Appropriation.—Table 24 shows that the total expenditure on account of war appropriation for the year ended March 31, 1918, was \$343,836,802, of which \$316,669,785 (\$125,580,780 paid out in Canada and \$191,089,005 paid out Overseas) was expended by the Department of Militia and Defence and \$27,166,930 was expended by other departments. To these sums may be added the expenditure on account of war appropriation prior to April 1, 1917, viz., \$533,437,046, of which \$511,901,061 (\$340,763,207 paid out in Canada and \$171,137,854 paid out Overseas) was expended by the Department of Militia and Defence and \$21,535,985 by other departments. Altogether, therefore, the grand total to March 31, 1918, amounted to \$877,273,761, of which \$828,570,846 was expended by the Department of Militia and Defence and \$48,702,915 by other departments. The details of the war expenditure to March 31, 1915, were given in Table 23 of the Year Book of 1915, pp. 649 and 650, for the year ended March 31, 1916, in Table 24 on pp. 642 and 643 of the edition of 1916-17, and for the year ended March 31, 1917, in Table 24 on pp. 603-605 of the edition of 1918.

War Pensions.—A Board of Pension Commissioners for Canada, consisting of three members, was created by Order in Council of June 3, 1916, (P.C. 1,334) with exclusive jurisdiction and authority to deal with the granting and payment of naval and military pensions and other allowances to persons in the Canadian Naval Forces and the Canadian Expeditionary Force and to their dependents. There is no appeal from the decisions of the commission, but applicants may appear in person or by counsel before the commission to present complaints. The scale of pensions has been revised by various Orders in Council up to January 2, 1919. Under the existing

scale, twenty classes are provided ranging from 5 p.c. disablement up to 100 p.c., or total disablement. The pensions range for the rank and file, according to the class of disablement, from \$30 up to \$600 per annum, and for disablement from \$600 for rank and file up to \$2,700 for persons of and above the rank of commodore or brigadier-general. Further annual allowances are made for children, which, for all men below the rank of commander or lieutenant-colonel, range, according to class of disablement, from \$6 up to \$144. Married men, not above the rank of naval sub-lieutenant or lieutenant of militia, receive an additional allowance which ranges, for all ranks, from \$4.80 up to \$96. Men of these same ranks may also receive an addition not exceeding \$300 if totally disabled and helpless. In the case of dependents of deceased sailors and soldiers, payments to widows are made only until re-marriage, and to dependent parents and brothers and sisters only when there is no widow or child. The age limit for the payment of pensions to children is 16 for boys and 17 for girls. The scale of pensions, as revised to date is set out in tables 25 and 26.

25.—Scale of Annual Pensions granted to Dependents of Deceased Sailors and Soldiers of the Canadian Naval Forces and the Canadian Expeditionary Force, as effective on September 1, 1919.

Royal Military College.—The Royal Military College of Canada was founded in 1876, during the governor-generalship of the Marquis of Dufferin, and when the Hon. Alexander Mackenzie was premier. Since the foundation of the College some 1,540 gentlemen cadets have been enrolled; of this number 156 are now in attendance, 50 have been discharged since the signing of the armistice, and approximately 150, though their names appear on the college roll as having been admitted, either did not actually join, or, if they did, were only at the College for a very short time. Of the remainder, some died previous to August 4, 1914. Over 900 took part in the Great War, 142 of whom laid down their lives for king and country. Some 750 British and 75 foreign decorations have been awarded to ex-cadets, and many have risen to high rank in the service of their country. Three of the Canadian divisions serving in France were commanded by ex-cadets, and an ex-cadet also commanded one of the Australian divisions

at Gallipoli. The establishment of the College, as stated in the Act of 1874, (37 Vict., c. 36), was "for the purpose of imparting a complete education in all branches of military tactics, fortifications, engineering and general scientific knowledge in subjects connected with and necessary to a thorough knowledge of the military profession, and for qualifying officers for command and for staff appointments." In addition to the foregoing the course of instruction is such as to afford a thorough, practical and scientific training in civil engineering, surveying, physics and chemistry. English and French. Strict discipline, combined with physical training, riding, drill and outdoor games, forms part of the curriculum.

The College is situated on a beautiful peninsula one mile from Kingston, with the Cataraqui river on one side, emptying into the St. Lawrence river at its juncture with lake Ontario, and Navy bay on the other. The grounds include about 66 acres, on which are situated the Educational Building and a new Educational Building in course of construction. The College is under the supervision of Militia Headquarters, who annually appoint a board of visitors composed of leading Canadian citizens both civil and military. The staff is composed of a commandant and a staff adjutant, assisted by a competent staff of civil and military professors and instructors. A four years' course leads to a "Diploma with Honours," "Diploma" and "Certificate of Discharge". To graduates are annually offered a number of commissions in the Canadian permanent force as well as commissions in the Royal Artillery, Royal Engineers, and other branches of the Imperial Service. Positions in the Public Works Department, Hydrographic Surveys, etc., are also available for graduates. The McGill and Toronto Universities admit graduates to the third year in their Science Faculties, and the Law Schools also offer privileges.

Naval Service.—The Naval Service of Canada was established by the Naval Service Act, 1910 (9 10 Edw. VII., c. 43), the main provisions of which were described in the Year Book of 1910, pp. xxvi-xxix. The Department of the Naval Service, then created, now consists of eight branches: (1) Naval, (2) Fisheries, (3) Fisheries Protection, (4) Tidal and Current Survey, (5) Hydrographic Survey, (6) Radio-telegraphy, (7) Patrol of Northern Waters and (8) Life-Saving Service. The total financial appropriation of the Department for the year 1918-19 was \$2,949,150.00, of which the sum of \$2,020,245.74 was expended to March 31, 1919. The appropriation for the Naval Branch was \$600,000.00, of which \$228,728.08 was expended to March 31, 1919. In addition to the foregoing, the sum of \$11,298,999.46 was expended for the same period out of the war appropriation.

Royal Naval College.—The officers of the Royal Naval College continue to report most favourably, both as to their mental and physical progress, on the cadets in attendance during the past year. The midshipmen who have been serving in ships of the Royal Navy and the Royal Canadian Navy have also been favourably reported upon, and have proved themselves capable and efficient. There are

at present fifty-five officers of the Royal Canadian Navy who have been lent to the Royal Navy for service. They include twenty-four lieutenants, two engineer lieutenants, fifteen sub-lieutenants, two Engineer sub-lieutenants and twelve midshipmen. Five naval officers, graduates of the Royal Naval College of Canada, lost their lives whilst on active service in ships of the Royal Navy during the war. At the examinations held in May, 1919, seventeen cadets were successful and joined the Royal Naval College of Canada. The course of the Royal Naval College at Esquimalt corresponds to that of the Royal Military College at Kingston, except that it is on a naval basis. Graduates of the Naval College have the option of adopting a seafaring career, of accepting positions in the Canadian Government, in the Hydrographic or Tidal and Current Surveys, or of entering the course of applied science in the second year at the Universities of McGill and Toronto. Arrangements have been made with the Admiralty whereby eight graduates of the Royal Naval College of Canada may be entered yearly in the Royal Navy. The same rules that govern other officers of the Royal Navy apply to entrants from the Canadian Naval College.

Northwest Mounted Police.—The Royal Northwest Mounted Police are distributed in Manitoba, Saskatchewan, Alberta, the Northwest Territories and the Yukon Territory, with headquarters at Regina, Saskatchewan, and the operations of the force for the year ended September 30, 1918, are described in the Commissioner's Report dated November 18, 1918. On September 30, 1918, the strength of the force was 40 officers, 443 non-commissioned officers and constables and 597 horses, a decrease of 13 officers, 160 non-commissioned officers and constables and 78 horses, as compared with the previous year. On February 1, 1920, under authority of an Act to amend the Royal Northwest Mounted Police Act (10 Geo. V, c. 28), the name of the force was changed to "Royal Canadian Mounted Police," and the headquarters were transferred to Ottawa.

CRIMINAL STATISTICS AND PENITENTIARIES.

The criminal statistics of Canada are collected, compiled and published annually by the Dominion Bureau of Statistics under statutory authority of the Statistics Act, 1918 (8-9 Geo. V., c. 43). They relate to the year ended September 30, and the last issued annual report is for 1918. The statistics are divided into two classes of (1) indictable offences and (2) summary convictions, the former comprising all cases tried by police or other magistrates and the latter all cases of minor importance disposed of by justices of the peace under the Summary Convictions Act.

Indictable Offences.—Table 29 shows by provinces in respect of indictable offences the number of charges and convictions and the percentage of acquittals for the years 1916, 1917 and 1918. There were 21,747 charges and 17,370 convictions for indictable offences throughout Canada during the year ended September 30, 1918, as compared with 19,454 charges and 15,559 convictions in 1917, an increase of 2,293, or 11.78 p.c., for charges and of 1,811, or 11.64 p.c., for convictions during the year. As shown by the table, an increase in the number of charges is found in every province east of Saskatchewan and decreases in all provinces west of and including Saskatchewan.

Summary Convictions.—The number of summary convictions—that is, the total number of convictions for all offences less the number of convictions for indictable offences—in 1918 was 105,899, as compared with 98,452 in 1917. This represents an increase of 7,447, or 7.56 p.c.

Death Sentences.—During 1918, 20 persons were sentenced to death for murder, as compared with 15 in 1917. Death sentences in 1918 were carried out in 10 cases, compared with 7 in 1917, and were commuted to a term of years or life imprisonment in 10 cases in 1918, compared with 8 in 1917. Four persons were sentenced in 1918 to be imprisoned for life, as compared with one person in 1917.

Decrease of Drunkenness.—The number of summary convictions for drunkenness in Canada was 21,026 in 1918, as compared with 27,882 in 1917, a decrease of 6,856, or nearly 24.60 p.c. Table 36 shows the number of convictions by provinces for the five years 1914 to 1918, with increases and decreases for 1918 as compared with 1917, from which it will be seen that drunkenness, at least as measured by statistics of summary convictions, decreased during the year 1918 in every province except Manitoba and Alberta. From this table it will also be observed that the number of convictions for drunkenness throughout the whole of Canada fell from 60,067 in 1914 to 21,026 in 1918, being a decrease of 39,041 or 64.99 p.c. during the five years.

36.—Convictions for Drunkenness for the five years 1914-1918.

Penitentiaries.

The statistics of penitentiaries given in Tables 38-41, are compiled from the annual reports to the Minister of Justice of the Inspectors of Penitentiaries. The report for the fiscal year 1918-19, in reference to the parole system, states that the total number of paroles granted during a twenty year operation is 11,846. A total of 10,434 men have completed their probation on parole and occupy positions in good citizenship to-day, and 701 prisoners are now reporting and have in prospect the completion of their probation on parole. The total delinquency for non-compliance with conditions of license is 437, or 3.69 p.c., and for subsequent conviction 273, or 2.30 p.c., making a total delinquency of 5.99 p.c.

NOTES.—In Prince Edward Island only one divorce has been granted from 1868 to 1918; the divorce was granted in 1913. In British Columbia, in addition to the divorces, 13 judicial separations have been granted; one in 1892, one in 1893, one in 1899, two in 1900, two in 1903, three in 1913, three in 1914; "Decree Nisi" has been granted in 20 cases; four in 1900, two in 1909, six in 1912, five in 1913, and three in 1914. ¹Includes one judicial separation. ²Includes one not effective till court costs are paid.

ORGANIZATION OF CANADIAN OFFICIAL STATISTICS.

The Dominion Bureau of Statistics was established under the Statistics Act, 1918, (8-9 George V, c. 43). The Act requires the Dominion Statistician to present an annual Report on the work of the Bureau during the preceding year. The first annual Report, covering the fiscal year ended March 31, 1919, has accordingly been issued, and from it are derived the following particulars respecting the present organization of the Bureau. The report takes occasion to sketch the history of statistical progress in Canada, and more particularly the conditions of the past decade which led to the passing of the Act. This Act was designed to give practical effect to the suggestions made by the Departmental Commission on the Official Statistics of Canada, which was appointed on May 12, 1912, and which presented its report on November 30 of the same year. Structurally it is a consolidation of previous statistical legislation of the Dominion Government, including the Census, General Statistics, Railway Statistics, and Criminal Statistics Acts, with additions to render the scheme comprehensive. At the close of its initial year on March 31, 1919, the Bureau was organized in eleven main Divisions as follows: I, Administration; II, Population and the Census; III, Agriculture; IV, Industrial Census, comprising fisheries, furs, forestry, dairy factories, mines, central power stations, general manufactures and construction; V, External Trade (Exports and Imports); VI, Transportation; VII, Internal Trade, including prices, etc.; VIII, Finance, including public and private finance, wealth, debt and taxation; IX, Administration of Justice; X, Education; and XI, General Statistics and the Canada Year Book.

Considerable progress has already been made in various directions since the appointment of the Dominion Statistician in 1915 and the establishment of the Bureau under the Act of 1918. The annual Report, already referred to, describes these in detail; but mention may be made specifically of the establishment throughout Canada of an uniform system of annual vital statistics and of the inauguration of annual statistics of the areas under field crops and of the numbers of farm live stock. Other important work completed or in progress comprises a revision of the trade classification of exports and imports, the organization of statistics of education, the reorganization of statistics of transportation, the collection of statistics of internal trade and the co-ordination and enlargement of statistics of finance, including the public accounts of the Dominion and Provincial Governments, municipal statistics, and statistics of currency, banking, loan and trust companies, insurance and studies relating to national wealth, income, debt and taxation.

The following concluding observations are reproduced from the Report:

As will be evident at many points, the organization of the Bureau is still in process, though the outline has been traced and certain sections filled in. Especially will it have been remarked that the Bureau has been concerned thus far rather with the scope of the statistics to be secured and the means of securing them, than with the methods of presentation and publication. Prominently in mind also has been the point of view so strongly emphasized during the war that statistics are not merely a record of what has been, but are for use in planning what shall be—that it is the duty of a statistical organization to assist

DOMINION BUREAU OF STATISTICS

(1919-1920)

directly in the day-to-day problems of administration, as well as to provide their theoretic background. Work of this kind can never achieve finality, for the field is too enormous and the need of adjustment to changing conditions is constant. It is believed, however, that the Bureau now embraces the fundamental subjects of what might be termed a national system of statistics, organized to meet the ordinary requirements of the Government and at the same time permitting—as a matter of logical expansion and with the minimum of derangement—the superimposing of such new approaches or new directions of development as occasion may dictate. This preliminary and foundational organization, it is hoped, will be completed during the year 1919–20, so that the census of 1921 may proceed from a sound basis.

Perhaps the culminating advantage in a centralized statistical system lies in the related view it permits and encourages of economic and social phenomena. The social and economic body is one, not several—often conditions in a particular field can be illumined best through another field altogether—and its observations should be on that basis. The Government is more than a congeries of departments vested with a series of administrative functions; it is a single agency for the direction of national policy, to fulfil which duty a broad and analytical outlook upon current trends is indispensable. Such outlook a central statistical bureau from the amplification of experience which it promotes is especially adapted to provide. The organization of the "General Economic Department" of the United Kingdom Board of Trade and the activities of certain universities in endowing economic research are suggestive here. There is need for a national "laboratory" for the observation and interpretation of economic and social phenomena on behalf of the Government and the production of monographs on features thrown from time to time into prominence. It is noteworthy that recent tendencies in scientific thought are away from purely deductive reasoning and strongly in the direction of the testing of such reasoning by inductive verifactory data. On no foundation could such a service be better built than on that which is now provided by the Bureau of Statistics.

On page 626 is also reproduced a diagram showing the organization of the Dominion Bureau of Statistics in the eleven Divisions, with their respective detailed ramifications.

List of the Principal Acts of Parliament administered by Departments of the Government of the Dominion of Canada, as compiled from information supplied by the respective Departments.

(Numbers within parentheses denote the chapter of the Revised Statutes of Canada, 1906—R.S.C. 1906.)

Justice.—Department of Justice (21); Solicitor General's (22); Northwest Territories (62); Yukon (63); Dominion Police (92); Judges (138); Supreme Court (139); Exchequer Court (140); Admiralty (141); Petition of Right (142); Criminal Code (146); Penitentiary (147); Prisons and Reformatories (148); Identification of Criminals (149); Ticket of leave (150); Fugitive Offenders' (154); Extradition (155); Juvenile Delinquents (7–8 Edw. VII, c. 40, 1908).

External Affairs.—The functions and duties of this Department are defined by the Department of External Affairs Act, 1912 (2 Geo. V, c. 22) and by the International Boundary Waters Treaty Act (1–2 Geo. V, 1911, c. 28), as amended by the statute of April 3, 1914 (4 Geo. V, c. 5).

Customs and Inland Revenue.—Customs Tariff; Customs; Canada Shipping (in part); Infectious and Contagious Diseases affecting Animals (in part); Destructive Insect and Pest (in part); Export; Copyright (in part); Petroleum and Naptha; Inland Revenue; Special War Revenue, 1915.

Post Office.—Post Office; Government Annuities; Pacific Cable; Parcel Post.

Agriculture.—Experimental Farm Stations; Inspection and Sale, Part IX (Fruit and Fruit Marks); Dairy Industry; Cold Storage; Cold Storage Warehouse; Milk Test; Seed Control; Live Stock Pedigree; Live Stock and Live Stock Products; Animal Contagious Diseases; Meat and Canned Foods; Destructive Insect and Pest; Agricultural Instruction.

Interior.—Department of the Interior; Immigration; Dominion Lands; Dominion Lands Surveys; Forest Reserves and Parks; Irrigation; Railway Belt; Railway Belt, Water; Yukon; Yukon Placer Mining; Dominion Water Power; Land; Titles; Northwest Game; Northwest Territories; Ordnance and Admiralty Lands; Reclamation; Seed Grain.

Finance.—Department of Finance and Treasury Board: Appropriation; Civil Service; Superannuation and Retirement; Contingencies; Consolidated Revenue and Audit; Currency; Ottawa Mint; Dominion Notes; Provincial Subsidies; Bank; Savings Bank; Penny Bank; Quebec Savings Banks; Loan Companies; Trust Companies; Bills of Exchange; Interest; The Special War Revenue Act, 1915 (in part); The Business Profits War Tax Act, 1916, and amendments; Income Tax Act, 1917 and 1918 and amendments; Finance Act; Ottawa Improvement Commission Act.

Militia and Defence.—Militia and Defence of Canada; Royal Military College; Militia Pension; An Act to enable Canadian Soldiers on active military service during the present war to exercise their electoral franchise; The Military Voters Act; The Air Board Act.

Public Works of Canada.—Public Works (39) and amendments (8-9 Geo. V, 1918, c. 37); Government Harbours and Piers, s. 5 (112); Navigable Waters Protection, s. 7 (115) and amendments (8-9 Geo. V, 1918, c. 33); Telegraph Secrecy (126); Dry Dock Subsidies (9-10 Edw. VII, 1910, c. 17); An Act to amend the Navigable Waters Protection Act (9-10 Edw. VII, 1910, c. 44); An Act to authorize the payment of a subsidy to the Collingwood Shipbuilding Co., Ltd. (2 Geo. V, 1912, c. 17); An Act to amend the Dry Dock Subsidies Act, 1910 (2 Geo. V, 1912, c. 20); An Act to amend the Government Works Toll Act, R.S.C., 1906, c. 40, (2 Geo. V, 1912, c. 26); An Act to incorporate the National Gallery of Canada (3-4 Geo. V, 1913, c. 33); An Act to authorize the payment of a subsidy to the Western Dry Dock and Shipbuilding Co., Ltd., (3-4 Geo. V, 1913, c. 57); Acts to amend the Dry Dock Subsidies Act, 1910 (4-5 Geo. V, 1914, c. 29, 7-8 Geo. V, 1917, c. 27 and 9-10 Geo. V, 1919, c. 51).

Trade and Commerce.—Canada Grain; Cullers; Copyright; Electricity and Fluid Exportation; Electric Light Inspection; Electrical Units; Fertilizers; Gold and Silver Marking; Gas Inspection; Inspection and Sale; Inspection of Water Meters; Lead Bounties; Petroleum Bounty; Patent; Statistics; Trade Mark and Design; Timber Marking; Weights and Measures Inspection; Zinc Bounties.

Labour.—Conciliation and Labour (96); Industrial Disputes Investigation (6-7 Edw. VII, 1907, c. 20); Fair Wages Resolution of the House of Commons; White Phosphorus Matches (4-5 Geo. V, c. 12); Employment Offices Co-ordination Act (8-9 Geo. V, c. 21); The Technical Education Act (9-10 Geo. V, c. 73).

Secretary of State.—Companies; Naturalization; Canada Temperance; Board of Trade; Trade Unions; War Charities, 1917.

Naval Service.—Naval Service (9-10 Edw. VII, 1910, c. 43); Radiotelegraph (3-4 Geo. V, 1913, c. 43) and Regulations issued thereunder; Fisheries (4-5 Geo. V, 1914, c. 8) and Regulations issued thereunder; Fish inspection (4-5 Geo. V, 1914, c. 45); Meat and Canned Foods (as amended 1908, 1910 and 1917) respecting Inspection of Fish and Shellfish Canneries.

Railways and Canals.—Department of Railways and Canals (35); Government Railways (36); Intercolonial and P.E.I. Railway Employees' Provident Fund (6-7 Edw. VII, c. 22); The Government Railways Small Claims (9-10 Edw. VII, c. 26) and their amendments; Acts to amend the National Transcontinental Railway Act (4-5 Geo. V, c. 43 and 5 Geo. V, c. 18) and to amend the Government Railway Act and authorize the purchase of certain Railways (5 Geo. V, c. 16); An Act to incorporate Canadian National Railway Company and respecting Canadian National Railways (9-10 Geo. V, c. 13); An Act to provide Compensation where employees of His Majesty are killed or suffer injuries while performing their duties (8-9 Geo. V, c. 15 and amending Act (9-10 Geo. V, c. 14); the Canada Highways Act (9-10 Geo. V, c. 54).

The Railway Act, 1919, (Companies) (9-10 Geo. V, c. 68) confers certain powers upon the Minister of the Department. In the case of subsidized Railways the authorizing Acts are carried out under the Department, which has also certain jurisdiction where Government guarantee has been given.

Marine.—Department of Marine and Fisheries; Government Vessels Discipline; Government Harbours and Piers; Canada Shipping and amending Acts (6-7 George V, cc. 12 and 13); Navigable Waters Protection; Quebec Harbour and River Police; Live Stock Shipping; An Act to amend the Vancouver Harbour Commissioners' Act (6-7 George V, c. 9); An Act transferring Rights and Powers in Harbour

of St. John, N.B., to a Board of three Commissioners approved by Order in Council; The Vancouver Harbour Advances Act, 1919; An Act fixing the rate of interest to be paid on loans by His Majesty to the Harbour Commissioners of Montreal and Quebec; An Act to amend the Canada Shipping Act (Transfers and Mortgages of Ships).

Indian Affairs.—The Indian Act, 1906, with amendments to date.

King's Printer and Controller of Stationery.—Public Printing and Stationery (80).

Mines.—Geology and Mines (6-7 Edw. VII, 1907, c. 29).

Commission of Conservation.—Conservation Act (8-9 Edw. VII, c. 27, 1909) and amending Acts (9-10 Edw. VII, c. 42, 1910; 3-4 Geo. V, c. 12, 1913).

List of Principal Publications of Departments of the Government of the Dominion of Canada, as compiled from information supplied by the respective Departments.

Customs and Inland Revenue.—Annual Report containing Tables of Imports, Exports, Customs and Inland Revenue. Annual Report of Shipping.

Post Office.—Annual Report of the Postmaster General. Official Postal Guide. Regulations as to parcel post, rural mail delivery and government annuities.

Agriculture.—The Agricultural Gazette of Canada, Subscription, \$1 per year (monthly). Annual Reports of the Minister, of the Experimental Farms and Stations, of the Dairy and Cold Storage Commissioner, of the Veterinary Director General and of the Entomological Branch. Bulletins, pamphlets, circulars and Seasonable Hints of the Experimental Farms Branch on a great variety of agricultural subjects, including publications of the following nine divisions: Field Husbandry; Animal Husbandry; Horticulture; Cereal; Chemistry; Forage Plants; Botany; Poultry and Tobacco. Guides to the Experimental Farms and Stations. Bulletins on the Dairy and Cold Storage Branch relating to the history of the dairying and cold storage industry in Canada; the making of butter and cheese, cow-testing, dairying experiments; co-operation, etc. Reports, bulletins, pamphlets, etc., of the Live Stock Branch, on cattle, sheep, swine, poultry, marketing of eggs, wool, etc. Bulletins of the Health of Animals Branch, with regulations as to contagious abortion; rabies; sheep scab; actinomycosis; anthrax; glands; hog cholera; *maladie du coit*; tuberculosis; foot-and-mouth disease; quarantine and meat inspection. Bulletins and Reports of the Seed Branch as to Seed-testing, the production and use of seed grains and the Seed Control Act. Bulletins and Circulars of the Entomological Branch and instructions to importers of nursery stock. Reports of the Canadian Seed Growers' Association. Fodder and Pasture Plants, by George H. Clark, B.S.A., and M. Oscar Malte, Ph.D., 143 pages, 27 plates, price 50 cents. Bulletin on the Maple Sugar Industry; Agricultural War-Book; Agricultural Instruction Act; Publications Filing System.

NOTE.—The foregoing is a selection from the publications of the Department. A complete list of publications available for distribution is issued, and so long as the supply lasts copies of publications will be sent free on application to the Publications Branch, Department of Agriculture, Ottawa.

Interior.—Annual Report, including Reports from the Dominion Lands, Immigration, Surveys, Dominion Parks, Forestry, Irrigation and Water Power Branches. Pamphlets, reports, bulletins, etc., of the respective branches:—

Immigration Branch: Canada West (English, French, Danish, Norwegian, Swedish); Atlas of Canada (English and French); Country Called Canada (English). What Irishmen say of Canada; Canada as seen through Scottish Eyes; Canada—The Land of Opportunity (English); Where Should You Go? Settling on Canada's Free Land; Classes Canada Calls for; Homestead Regulations; Women's Work in Canada; Prince Edward Island; Nova Scotia Pamphlet; New Brunswick Pamphlet; Eastern Quebec—Region de Lac St. Jean, etc. (French and English); Western Quebec—Timiskaming, etc. (French and English); Eastern Townships of Quebec; Ontario—Canada's Farthest South; Ontario—Improved Ontario Farms; Ontario—The Heart of Canada; Ontario—Thunder Bay; Kenora and Rainy River Districts of New Ontario; Rivière de la Paix; Prairie Provinces in 1912; British Columbia—Canada's Western Heritage; Canadian Winter; Law and Regulations respecting

Immigration and Immigrants; Immigration Facts and Figures. *Topographical Surveys*: (1) Annual Report of the Topographical Surveys Branch, and accompanying maps; (2) Manual of Instruction for the Survey of Dominion Lands. Price 50c. Supplement to the Manual. Price 50c. (3) Rules and Regulations of the Board of Examiners for Dominion Land Surveyors, and programme of the subjects of the various examinations. (4) The Selkirk Range (in two volumes), by A. O. WHEELER, F.R.G.S. Price \$1. (5) Copying Camera of the Surveyor General's Office. (6) Photographic Methods Employed by the Canadian Topographical Survey, by A. O. WHEELER, F.R.G.S. (7) Precise Measuring with Invar Wires and the Measurement of the Kootenay Base, by P. A. CARSON, D.L.S. (8) Report on Levelling Operations, from 1908 to 1914, by J. N. WALLACE, D.L.S. Price 35c. (9) Triangulation of Part of the Railway Belt of British Columbia, by H. PARRY, D.L.S. (10) Description, Adjustments and Methods of Use of the 6" Micrometer Block Survey Reiterating Transit Theodolite, by W. H. HERBERT, B.Sc. (11) Papers on Descriptions for Deeds. (12) Description of the townships surveyed in the different Provinces, issued yearly since 1909. (13) Description of the surveyed townships in the Peace River District. (14) Descriptions of lands comprised within the Fort Pitt Sectional Map, consisting of townships 49 to 56, ranges 15 to 28, west of the third meridian. (15) Description of Surveyed Lands in the Railway Belt of British Columbia (in three parts). (16) Extracts from Reports on townships east of the principal meridian, received from surveyors to July 1, 1914. (17) Extracts from Reports on townships 1 to 16 west of the principal meridian, received from surveyors to July 1, 1914. (18) Extracts from Reports on townships 17 to 32 west of the principal meridian, received from surveyors to July 1, 1914. (19) Extracts from Reports on townships 33 to 88 west of the principal meridian, received from surveyors to March 31, 1915. (20) Extracts from reports on townships 1 to 16 west of the second meridian, received from surveyors to March 31, 1915. (21) Explanation of the Astronomical Field Tables for the use of the Land Surveyors of Canada. (22) Tests of small telescopes at the Laboratory of the Dominion Lands Survey. (23) Alberta and British Columbia Boundary, Part 1, 1913 to 1916. Price 50c. Report and Atlas, \$1. (24) Description of, and Guide to Jasper Park, 50 cents. (25) The Testing of Aneroid Barometers at the Laboratory of the Dominion Lands Survey, Bulletin 42. (Publications of the Topographical Surveys Branch may be obtained on application to the Distribution Office, Department of Public Printing and Stationery, for No. 1; to the Secretary, Board of Examiners for Dominion Land Surveyors, for No. 3; to the Secretary, Department of the Interior, for No. 4; and to the Surveyor General for the other Nos.) *Dominion Observatory*: Annual Reports of Chief Astronomer for years 1904 to 1911. Publications of Dominion Observatory, Vol. 1—No. 1, Stereographic Projection Tables, by OTTO KLOTZ, LL.D., F.R.A.S.; No. 2, Precise Levels, by D. H. NELLES, D.L.S.; No. 3, Precise Levelling, by F. B. REID, D.L.S.; No. 4, Orbit of 88 β Tauri, by W. E. HARPER, M.A.; No. 5, Earthquake of April 28, 1913, by OTTO KLOTZ, LL.D., F.R.A.S.; No. 6, Spectrum of Nova Geminorum, by J. S. PLASKETT, B.A., F.R.S.C.; No. 7, Experiments regarding Efficiency of Spectrographs, by J. S. PLASKETT, B.A., D.Sc., F.R.S.C.; No. 8, Precise Levelling, by F. B. REID, D.L.S.; No. 9, Orbit of ρ Geminorum, by W. E. HARPER, M.A.; No. 10, Orbit of β Persei, by J. B. CANNON, M.A.; No. 11, Orbits of the Spectroscopic Components of ϑ Bootis, by W. E. HARPER, M.A.; No. 12, Radial Velocity of ρ Leonis, by W. E. HARPER, M.A.; No. 13, Orbit of E Persei from the H and K Lines, by J. B. CANNON, M.A.; No. 14, Orbit β of Coronæ Borealis, by J. B. CANNON, M.A.; No. 15, Measures of λ Aquarii, by J. B. CANNON, M.A.; No. 16, Measures of σ Leonis, by J. B. CANNON, M.A.; Vol. 2—No. 1, Precise Levelling, by F. B. REID, D.L.S.; No. 2, Spectroscopic Binary λ Tauri, by J. S. PLASKETT, B.A., D.Sc., F.R.S.C.; No. 3, Orbit ω of Cassiopeia, by R. K. YOUNG, Ph.D.; No. 4, Orbit of 136 Tauri, by J. B. CANNON, M.A.; No. 5, Orbits of the Spectroscopic Components of 50 Draconis, by W. E. HARPER, M.A.; No. 6, Orbit of ζ Andromeda, by J. B. CANNON, M.A.; No. 7, A Meteor Star Atlas, by R. K. YOUNG, Ph.D.; No. 8, Orbit of the Spectroscopic Binary 1149 Groombridge, by W. E. HARPER, M.A.; No. 9, Orbit of the Spectroscopic Binary 23 Cassiopeia, by R. K. YOUNG, Ph.D.; No. 10, Gravity, by F. A. McDIARMID, B.A.; No. 11, Tests made to ascertain where conditions were most suitable for the 72-inch Reflector, by W. E. HARPER, M.A.; No. 12, Mean Distance of Stars whose Radial Velocities, Proper Motions and Parallaxes have been determined, by R. K. YOUNG, Ph. D.; No. 13, Orbit of B.A.C. 5890, by T. H. PARKER, M.A.; No. 14,

Orbit of μ Persei, by J. B. CANNON, M.A.; No. 15, Orbit of Boss 3323, by J. B. CANNON, M.A. Vol. 3—No. 1, Earthquake of Feb. 10, 1914, by OTTO KLOTZ, LL.D., D.Sc., F.R.A.S.; No. 2, Seismological Tables, by OTTO KLOTZ, LL.D., D.Sc., F.R.A.S.; No. 3, The Spectroscopic, Orbit of 12 Lacertæ, by R. K. YOUNG, Ph.D.; No. 4, Orbit of Spectroscopic Binary A. Bootis, by R. K. YOUNG, Ph.D.; No. 5, Orbit of the Spectroscopic Binary α Trianguli, by W. E. HARPER, M.A.; No. 6, Precise Levelling, by F. B. REID, D.L.S.; No. 7, Orbit of the Spectroscopic Binary 14 Aurigæ, by W. E. HARPER, M.A.; No. 8, Precise Levelling, by F. B. REID, B.A.Sc., D.L.S.; No. 9, Gravity, by F. A. McDIARMID, B.A.; No. 10, Orbit of the Spectroscopic Binary Boss 6142, by R. K. YOUNG, Ph.D.; No. 11, Orbits of the Spectroscopic Components of Boss 2484, by W. E. HARPER, M.A.; No. 12, Orbit of the Spectroscopic Binary 125 Tauri, by J. B. CANNON, M.A.; Vol. 4, No. 1, Orbit of the Spectroscopic Binary χ Aurigæ and a note on 12 Lacertæ, by R. K. YOUNG, Ph.D.; No. 2, Measures of Radial Velocity of Boss 4826, 7 Virginis, Boss 4721, 59 Herculis and μ Virginis, by J. B. CANNON, M.A.; No. 3, Orbit of the Spectroscopic Binary 2 Sagittæ, by R. K. YOUNG, Ph.D.; No. 4, Orbit of the Spectroscopic Binary π Arietis, by R. K. YOUNG, Ph.D.; No. 5, Orbit of the Spectroscopic Binary Boss 5996, by R. K. YOUNG, Ph.D.; No. 6, Orbit of the Spectroscopic Binary 40 Aurigæ, by R. K. YOUNG, Ph.D.; No. 7, Orbit of the Spectroscopic Binary 29 Canis Majoris, by W. E. HARPER, M.A.; No. 8, Orbit of the Spectroscopic Binary Boss 3138, by J. B. CANNON, M.A.; No. 9, Orbits of the Spectroscopic Components of 20 π Cassiopeïæ, by W. E. HARPER, M.A.; Vol. 4, No. 10, Orbit of the Spectroscopic Binary 32 θ^2 Cygni, by J. B. CANNON, M.A.; No. 11, Orbit of Boss 1082, by J. B. CANNON, M.A.; No. 12, Spectroscopic Binary Boss 1275, by J. B. CANNON, M.A.; No. 13, Orbit of the Spectroscopic Components of Boss 5173, by W. E. HARPER, M.A.

Reclamation.—Annual Irrigation Reports (including Reports of Irrigation Surveys and Inspections, 1912 to 1917-18). The Annual Reports of the Branch previous to 1912 are included in the Annual Reports of the Department. Annual Stream Measurements Reports, 1909 to 1916; Reports of Irrigation Surveys and Inspections, (1915 and 1917-18); Reports of the Western Canada Irrigation Association Conventions (1st to 10th); Report of the International Irrigation Congress, 1914. Bulletins: (1) Irrigation in Saskatchewan and Alberta; (2) Alfalfa Culture; (3) Climatic and Soil Conditions in C. P. Ry. Co's Irrigation Block; (4) Duty of Water Experiments and Farm Demonstration Work; (5) Farm Water Supply. Pamphlets: Address by Mr. S. G. PORTER on "Practical Operation of Irrigation Works." Addresses by Dr. RUTHERFORD on "Inter-dependence of Farm and City". Addresses by Mr. DON. H. BARK on 'The Actual Problem that confronts the Irrigator', "Practical Irrigation Hints for Alberta," and "Alfalfa Growing."

Dominion Water Powers: Annual Reports for 1912-13 to 1916-17. The Annual Reports of the Branch previous to 1913 are included in the Annual Report of the Department. Water Resources Papers: (1) Report of the Railway Belt Hydrometric Survey for 1911-12, by P. A. CARSON; (2) Report of Bow River Power and Storage Investigations, by M. C. HENDRY; (3) Report on Power and Storage Investigations, Winnipeg River, by J. T. JOHNSTON; (4, 19, 22 and 24) Annual Reports of the Manitoba Hydrometric Survey for 1912 to 1918, by M. C. HENDRY; (5 and 11) Preliminary and final Report on the Pasquia Reclamation Project, by T. H. DUNN; (6) Report on Cost of Various Sources of Power for Pumping in connection with the South Saskatchewan Water Supply Diversion Project, by H. E. M. KENSIT; (7) Report on the Manitoba Water Powers, by D. L. McLEAN, S. S. SCOVL and J. T. JOHNSTON; (8, 14, 13, 21 and 23) Annual Reports of the British Columbia Hydrometric Survey, for 1913 to 1918, by R. G. SWAN; (9) Report of Red River Navigation Surveys, by S. S. SCOVL; (10) General Guide for Compilation of Water Power Reports of Dominion Water Power Branch, prepared by J. T. JOHNSTON; (12) Report on Small Water Powers in Western Canada and Discussions of Sources of Power for the Farm, by A. M. BEALE; (13) Report on the Coquitlam-Bountzen Hydro-Electric Development, by G. R. G. CONWAY; (15) Report of the Water Powers of Alberta and Saskatchewan, by C. H. ATTWOOD; (16) Report of the Water Powers of Canada. A series of five pamphlets prepared for distribution at the Panama-Pacific Exposition, 1915, by G. R. G. CONWAY, P. H. MITCHELL, H. G. ACRES, F. T. KAELIN and K. H. SMITH; (17) Canadian Hydraulic Power Development and Electric Power in Canadian Industry, by C. H. MITCHELL; (20) Report on the Interests dependent on

Winnipeg River Power, with special reference to the capital invested and the labour employed, by H. E. M. KENSIR; (22) Directory of Central Electric Stations in Canada, to Jan. 1, 1919, by J. T. JOHNSTON.

Natural Resources Intelligence.—Maps: Northern Alberta, Southern Alberta, Saskatchewan and Manitoba Homestead Maps; Cereal Map of Manitoba; British Columbia Dominion Railway Belt Homestead Map; Sectional Sheets of Dominion Railway Belt in British Columbia; Land Map of Manitoba, Saskatchewan and Alberta; Elevator Map of Manitoba, Saskatchewan and Alberta; Bank Map of Manitoba, Saskatchewan and Alberta; Bank Map of Ontario and Quebec; Land Registration and Judicial Districts Map of Manitoba, Saskatchewan and Alberta; Small Map of the Dominion; Blue Print Maps of Manitoba, Saskatchewan and Alberta showing Uncultivated Lands. Reports: The Unexploited West; Preparing Land for Grain Crops on the Prairies; The Peace River Country; Handbook for the Information of Intending Settlers; The Athabaska Country—a Compilation regarding the Resources and Possibilities of the Athabaska River Basin; The Peace River District—Its Resources and Opportunities; The New Manitoba District—a Description of the Resources and Development of the New Mining District of Northern Manitoba; Athabaska to the Bay; The Province of Saskatchewan—a Description of the Resources, Development and Possibilities of the Province; Manitoba, Saskatchewan and Alberta Natural Resources—a Compilation Bearing on the Natural Resources of the Three Provinces; The Province of New Brunswick—Its Natural Resources Developed and Undeveloped; The Resources of Nova Scotia—a Compilation for the Information of Settlers and Investors; The Province of Quebec—Its Natural Resources Developed and Undeveloped; Supplement to Cereal Maps; Resources of Canada—a Compilation of Fifty Facts Regarding the Dominion; Lists of Unoccupied and Uncultivated Lands in Manitoba, Saskatchewan, Alberta, Nova Scotia, New Brunswick and Prince Edward Island.

Mining Lands and Yukon.—The Yukon Territory, its History and Resources; A two sheet map of Alberta, showing the coal mining rights disposed of; Yukon Placer Mining Act; Yukon Act; Yukon Land Regulations; Yukon Homestead Regulations; Yukon Timber Regulations; Yukon Grazing and Hay Regulations; Quartz Mining Regulations; Coal Mining Regulations; Placer Mining Regulations; Quarrying Regulations, Petroleum and Natural Gas Regulations; Potash Regulations; Dredging Regulations relating to the Yukon Territory; Dredging Regulations relating to beds of rivers outside of the Yukon Territory; Regulations relating to bar-digging on the North Saskatchewan River; Domestic Coal Regulations.

Dominion Parks.—A Sprig of Mountain Heather; Glaciers of the Rockies and Selkirks; Classified Guide to Fish and their Habitat in the Rocky Mountains Park; The Nakimu Caves; Guide to the Geology of the Canadian National Park on the C.P.R. between Calgary and Revelstoke; Handbook to the Rocky Mountains Park Museum; Hints to Householders re Fire Protection; Livery Tariff for Rocky Mountains Park; Livery Tariff for Yoho Valley; Map of Rocky Mountains Park; Map of Yoho Park; Map of Glacier Park; Map of Revelstoke Park; Map of Buffalo Park; Map of Banff and Vicinity; Lake Louise Sheet; Map 3 of Jasper Townsite.

Forestry.—Annual Reports of the Director of Forestry, 1914 to 1918, inclusive. Bulletins (where number and title are omitted, the document is out of print): (1) Tree Planting on the Prairies; (8) Forest Products of Canada, 1908; (11) Forest Products of Canada, 1909; Lumber, Square Timber, Lath and Shingles; (14) Cross-ties purchased; (16) Forest Fires and Railways; Forest Products of Canada, 1910; (22) Cross-ties; (23) Timber used in Mining Operations; (24) Wood-using Industries of Canada, 1910; Agricultural Implements and Vehicles, Furniture and Cars and Veneer; (27) Forest Products of Canada, 1910; Cooperage; (32) The Turtle Mountain Forest Reserve; (33) Forest Conditions in the Rocky Mountains Forest Reserve; Forest Products of Canada, 1911; (34) Lumber, Square Timber, Lath and Shingles; (35) Poles and Cross-ties; (36) Wood-using Industries of Ontario; (37) Forest Products of Canada, 1911 (being Nos. 30, 31, 34 and 35); Forest Products of Canada, 1912; (38) Pulpwood; (39) Poles and Ties; (42) Co-operative Forest Fire Protection; (44) Wood-using Industries of the Maritime Provinces; Forest Products of Canada, 1913; (46) Pulpwood Consumption; (47) Poles and Cross-ties; (48) Lumber, Lath and Shingles; (49) Treated Wood-block Paving; (51) Game Preservation in the Rocky Mountains Forest Reserve; (52) Forest Products of Canada, 1913 (being

Nos. 46, 47 and 48); (53) Timber Conditions in the Smoky River Valley and Grand-Prairie Country; Forest Products of Canada, 1914; (54) Pulpwood; (56) Lumber, Lath and Shingles; (57) Forest Products of Canada, 1914 (being 54, 55 and 56); Forest Products of Canada, 1915; (58a) Lumber, Lath and Shingles; (58b) Pulpwood; (58c) Poles and Cross-ties; (58) Forest Products of Canada, 1915 (being Nos. 58a, 58b, 58c.); (59) Canadian Woods for Structural Timbers; (60) Canadian Douglas Fir: its mechanical and physical properties; Forest Products of Canada, 1916; (62a) Lumber, Lath and Shingles; (62b) Pulpwood; (62c) Poles and Cross-ties; (62d) Directory of Saw-mills in Canada; (63) Wood-using Industries of Quebec; (64) Forest Fires in Canada, 1914-15-16; (65) Forest Products of Canada, 1917; Poles and Cross-ties; (66) Utilization of Waste Sulphite Liquor (Price 50 cents); (67) Creosote Treatment of Jack Pine and Eastern Hemlock for Cross-ties; (68) Forest Fires in Canada, 1917. Circulars: (5) Planning a Tree Plantation for a Prairie Homestead; (6) Preservative Treatment of Fence-posts; (8) The Forest Products Laboratories; (9) Chemical Methods for Utilizing Wood Wastes.

Finance.—Annual Reports of the Public Accounts of the Dominion of Canada. Monthly Statement of the Chartered Banks of Canada. Estimates.

Insurance.—Quarterly Statement of List of Licensed Companies. Annual Abstract of Statements of Insurance Companies in Canada (subject to correction). Annual Reports of the Insurance Department, Vol. I (Fire and Miscellaneous), Vol. II (Life Companies). Annual List of Securities held by Insurance Companies in Canada with Department's Valuation thereof.

Militia and Defence.—Annual Report. Semi-Annual Militia List. Militia Daily Orders. Militia General Orders. Routine Orders.

Trade and Commerce.—Annual Report. Annual Report re Mail Subsidies and Steamship Subventions. Annual Report of Board of Grain Commissioners for Canada. Rules and Regulations made by Board of Grain Commissioners. (Annual) List of Licensed Elevators, etc. (Annual) Grain Inspection in Canada, (1914). Weekly Bulletin containing Reports of Trade Commissioners and other Commercial Information. Patent Office Record. (Weekly) Rules and Forms of the Canadian Patent Office. Canada and the British West Indies (1915). Canada the Country of the Twentieth Century (1915), price \$1. Handbook for Export to South America (1915). Trade with China and Japan (1914). Export Directory of Canada (1915). Russian Trade (1916). The German War and its relation to Canadian Trade (1914). Toy-making in Canada (1916). The Timber Import Trade of Australia (1917). Quantities of Grain in store in all Elevators in Canada (except Country Elevators) with grades (Weekly). Number of Cars of Grain inspected in Western Inspection Division (Monthly). Receipts and Shipments of Grain at Port William and Port Arthur (Monthly). Trial Shipments of Wheat from Vancouver via the Panama Canal to the United Kingdom.

Publications of the Dominion Bureau of Statistics.—Annual Report of the Trade of Canada. Monthly Report of the Trade of Canada. The Canada Year Book. Monthly Bulletin of Agricultural Statistics. Bulletins of the Fifth Census of Canada, 1911, Nos. I-XIX. Report of the Fifth Census of Canada, 1911: Vol. I, 1912, Areas and Population by Provinces, Districts and Sub-districts. (*Out of Print.*) Vol. II, 1913, Religions, Origins, Birthplace, Citizenship, etc. Vol. III, 1913, Manufactures for 1910. Vol. IV, Agriculture. (*Out of Print.*) Vol. V, Forest, Fishery, Fur and Mineral Production. Vol. VI, Occupations of the People. (*Out of Print.*) Special Report on the Foreign-born Population. Population and Agriculture of the Prairie Provinces (1916). Postal Census of Manufactures (1916). Criminal Statistics, 1918. Reports on Production of Creameries and Cheese Factories, 1915 to 1918. Reports on the Census of Industry, 1917. Beet Sugar Industry (1908). Annual Report on Coal Trade of Canada (1918). Annual Report on Grain Trade of Canada. Directory of Chemical Industries in Canada (1919). Monthly Coal Statistics. Monthly Cold Storage Statistics. Report of Conference of June, 1918, on Vital Statistics.

Labour—Monthly: The Labour Gazette (published in English and French at the nominal subscription price of 20 cents per annum, averaging 100 pages). Annually: Report of Department of Labour. Report of Proceedings under the Industrial Disputes Investigations Act, 1907. Labour Organization in Canada, 1919 (a Report is published for each year about May or June). Special Reports:

Strikes and Lockouts in Canada, 1901-1916 (published in 1917). Labour Legislation Report, 1918, and a special Report on "Labour Legislation of Canada as existing December 31, 1915." (A Report on Labour Legislation is published annually in July or August.)

Secretary of State.—Annual Report. Regulations and Despatches Respecting Extradition Proceedings. List of Companies incorporated under the various Companies Acts of the Parliament of Canada from 1867 to December 31, 1913. Copies of Proclamations, Orders in Council and Documents relating to the European War.

Naval Service.—Annual Report. Royal Naval College of Canada Calendar, containing general idea of scheme of training, prospects of cadets, regulations for entry, etc. Naval Branch: Regulations for the entry of Naval Instructors and of Medical Officers. Tidal and Current Survey: Tide Tables, published annually, for the East Coast, Pacific Coast, and Hudson Bay and Strait; also three abridged editions for St. Lawrence region, Bay of Fundy and Strait of Georgia. Currents in the Gulf of St. Lawrence, the entrance to the St. Lawrence, and the Southeast Coasts of Newfoundland. Tables of Currents in the Bay of Fundy. Tides at the head of the Bay of Fundy. Tide Levels on the East Coast of Canada and Pacific Coast. Radiotelegraph Branch: Proceedings of the International Radiotelegraph Conference of London, 1912. Chart showing the Radiotelegraph stations in the Dominion of Canada. Postmaster General's Handbook for Radiotelegraph Operators (Instructions re handling of traffic, etc.). Hydrographic Survey: International Waterways Commission Report. Sailing Directions: St. Lawrence Pilot above Quebec; St. Lawrence Pilot below Quebec (English and French); Canadian shores of Lake Huron and Georgian Bay. Charts: 34 charts of the St. Lawrence river between Pte. des Monts and Cornwall; Ottawa river: 2 sections covering Lake of Two Mountains; Lake Ontario: 9 coast charts with plans of harbours; Lake Erie: 2 sheets, plans of harbours and anchorages; Lake Huron: 5 coast charts; Georgian Bay: 9 charts; North Channel of Lake Huron: 4 charts; Lake Superior: 7 coast charts; Lake Winnipeg: 2 charts; Pacific Coast in the vicinity of Prince Rupert and Queen Charlotte Islands: 12 charts; Atlantic Coast in the vicinity of Halifax Harbour: 2 charts; Hudson Bay: 7 charts; International Waterways Commission Boundary charts between St. Regis and Pigeon river: 29 charts. Fisheries Branch: Fisheries Annual Report. Biological Report. Reports of Fisheries of Hudson Bay. Fish and How to Cook it. Report of Fish Culture (contained in Fisheries Annual Report). Check List of Canadian Fishes. Quarterly Bulletin of Sea Fishery Statistics. Official Report of Lobster Conservation in Canada. Report of Special Fishery Commission re British Columbia Fisheries.

Railways and Canals.—Annual Report of the Department. Annual Report of the Board of Railway Commissioners for Canada. Annual Reports of the Comptroller of Statistics comprising (1) Railways; (2) Canals.

Marine.—Marine Annual Report, containing Harbour Commissions, etc. Steamboat Inspection. List of Canadian Shipping. Reports of Expeditions to Hudson Bay. Canadian Port Directory. List of Lights, etc., in Canada: (a) Pacific Coast; (b) Atlantic Coast; (c) Inland Waters.

Indian Affairs.—Annual Report. Indian Act, 1906, with Amendments to date. Schedule of Indian Reserves, 1913. Indian Treaties and Surrenders, Vols. I, II, III.

King's Printer and Controller of Stationery.—The Canada Gazette, published weekly by authority, with occasional supplements and extras, subscription, \$4 per annum payable in advance, single copies, 10 cents each number. Contains weekly a list of current Government publications, as required by Order in Council 1,522. Judgments of the Board of Railway Commissioners, bi-monthly, \$3 per annum; single copies, 20 cents; Exchequer Court Reports, \$4 per annum. Acts Public and Private with amendments to date, 5 cents to 75 cents a copy. Parliamentary Debates, published by Hansard, issued daily during session, French and English, \$3 per session each for House of Commons and Senate Debates, single copies, 5 cents. Prices of blue-books are in nearly every case printed upon the front cover and are based practically on the cost of paper and presswork. They may be ordered direct from the Chief Clerk of Distribution, Department of Public Printing and Stationery, or through any bookseller in the Dominion.

Mines.—The Department of Mines examines the most important mineral deposits and sections of geological interest, makes scientific investigations of the mining and metallurgical industries of Canada and carries on exploratory work in the little-known parts of the country. Detailed reports and geological maps of mining camps, and maps and notes on explored routes have been published. Memoirs have also been issued dealing with economic mineral deposits that have a wide distribution throughout the country. High grade contoured topographical maps of a number of sections have been issued in recent years. Publications also appear from time to time, giving the results of investigations in palæontology, botany, zoology, mineralogy and anthropology. A summary report of the operations for the calendar year is published annually by each branch of the Department, i.e., Geological Survey Branch and Mines Branch, and other reports appear at irregular intervals throughout the year. The total number of publications exceeds 2,000. A copy of a report or map of any particular section may be obtained by applying to the Deputy Minister, Department of Mines, Ottawa.

Commission of Conservation.—Annual Reports, 1910-19; Fire Waste in Canada, J. Grove Smith; Altitudes in Canada, James White, F.R.S.C., F.R.G.S.; Dictionary of Altitudes in Canada, James White, F.R.S.C., F.R.G.S.; *Pamphlets*; Address before the 1st Annual Meeting, His Excellency Earl Grey; Chairman's Addresses, 1910, 1914, 1915, 1917, 1918, Hon. Clifford Sifton; Conservation of the Natural Resources of Ontario, Hon. Frank Cochrane; The National Domain in Canada and its Proper Conservation, F. D. Adams, Ph.D., D.Sc.; National Council of Women and Conservation, Mrs. H. P. Plumptre; The Smoke Nuisance, R. C. Benner and J. J. O'Connor, Jr.; Work of the Ontario Association for the Promotion of Technical Education, R. D. Fairbairn; Fire Prevention and Fire Protection, F. D. Wentworth; Production and Preservation of Food Supplies, Dr. P. H. Bryce; Conservation in 1918, James White, F.R.S.C., F.R.G.S. *Conservation*; Monthly Bulletin. *Agriculture*; Lands, Fisheries, Game and Minerals, (1911); Rural Planning and Development, Thomas Adams; *Pamphlets*; Agriculture in Canada, 1910, F. C. Nunnick and J. W. Robertson; Agricultural Conditions in Canada, 1911, J. W. Robertson and F. C. Nunnick; Agricultural Survey, 1912, F. C. Nunnick; Agricultural Survey, 1913, F. C. Nunnick; Report of the Committee on Lands, 1915, J. W. Robertson; Report of the Committee on Lands, 1916, J. W. Robertson and F. C. Nunnick; Report of the Committee on Lands, 1917, F. C. Nunnick; Report of the Committee on Lands, 1918, F. C. Nunnick; The Conservation of Agricultural Resources, Dr. J. W. Robertson; Agricultural Work in Ontario, C. C. James; Administration of the Agricultural Instruction Act, C. C. James; La Conservation des Traditions Nationales, Mgr. C. P. Choquette; Fertilizers and Their Use in Canada, F. T. Shutt, M.A., D.Sc.; Rural Production and Development, Dr. J. W. Robertson; The Use of Commercial Fertilizers, H. J. Wheeler, Ph.D., D.Sc.; Handbook for Farmers, F. C. Nunnick, B.S.A., and E. P. Bradt, B.S.A.; Garbage as Feed for Hogs; Farmer's Account Book, F. C. Nunnick. *Fisheries, Game and Fur-Bearing animals*; Lands, Fisheries, Game and Minerals; Sea Fisheries of Eastern Canada; Fur Farming in Canada (2 editions), J. W. Jones, B.S.A.; The Canadian Oyster, Jos. Stafford, M.A., Ph.D.; Fish, Birds and Game; Wild Life, its Conservation and Protection; Report of National Conference. *Pamphlets*; Fish and Game in Ontario, Kelly Evans; Whitefish in the Great Lakes, etc.; North Atlantic Fisheries Dispute, Jas. White; The Canadian Oyster Industry, M. J. Patton, M.A.; Insect Food of Fresh-water Fishes, Dr. C. G. Hewitt; Salmon Fisheries of British Columbia, Dr. J. P. Other Publications: Journal of the Legislative Assembly; British Columbia Gazette. Annual Reports: Board of Health; Births, Marriages and Deaths; Mental Hospitals. Reports of the Ministers of Lands, Mines, Public Works, Auditor General, Superintendent of Insurance, Fisheries Commissioner.

NOTE.—Departmental Reports are mailed to applicants by the King's Printer at 50 cents per copy.

YUKON TERRITORY.

Ordinary Journals and Sessional Papers of the Territorial Council. The Sessional Papers contain Reports of the Territorial Officers, including those of the Superintendent of Works, Health Officer, Territorial Assayer, Chief License Inspector and Superintendent of Schools, Revenue and Expenditure.

Reports from the Gold Commissioner, the Crown Timber and Land Agent, and the Comptroller and Director of Surveys are contained in the Annual Report of the Department of the Interior, Ottawa. Pamphlet "Yukon Territory, Its History and Resources", published by the Department of the Interior.

XIII.—LEGISLATION AND PRINCIPAL EVENTS OF THE YEAR 1919.

DOMINION LEGISLATION, 1919.

Ordinary Session (February 26 to July 7).

During the year 1919 were held the second and third sessions of the thirteenth Parliament of Canada, the former extending from February 26 to July 7, and the latter—a special session called for the purpose of ratifying the Peace Treaty—from September 1 to November 10. During the former or regular session of Parliament seventy-six public general Acts and 78 local and private Acts were passed. Of the latter, fifteen were railway companies' Acts, one was a bridge company's Act, five were insurance companies' Acts, four were other companies' Acts, one was an Act amending the Act incorporating the Canadian Red Cross Society, one was an Act incorporating the Canadian Wholesale Grocers' Association, and fifty-one were divorce Acts.

Finance.—Four Appropriation Acts were passed during the session, chapters 1, 34, 35 and 76, chapter 34 relating to the fiscal year 1919 and chapters 1, 35 and 76 to the fiscal year 1920. Among the larger appropriations were \$30,000,000 in the main estimates and \$10,000,000 in the supplementary estimates for steel shipbuilding. Other appropriations included a loan of \$35,000,000 to the Canadian National Railway Company and \$35,000,000 for railway equipment. The Demobilization Appropriation Act appropriated \$350,000,000 for

demobilization of the Canadian forces, and for the promotion of trade and industry, and transportation facilities therefor, and for any measure deemed necessary in consequence of the war.

By chapter 39, the Business War Profits Tax was renewed for the calendar year 1919 in order to make it apply to accounting periods ending on or before December 31, 1919, at the following rates: Businesses having a capital of \$25,000 and over, but less than \$50,000, profits in excess of 10 p.c. to be taxed at the rate of 25 p.c.; businesses having a capital of \$50,000 and over, profits in excess of 7 p.c. in the case of incorporated companies, and in excess of 10 p.c. in other cases to be taxed as follows: profits between exempted rate and 15 p.c. to be taxed 25 p.c. of excess; profits between 15 p.c. and 20 p.c. inclusive to be taxed 50 p.c. thereof; profits in excess of 20 p.c. to be taxed 75 p.c. thereof. The Income War Tax Act was amended by chapter 55, which increases the general rate of taxation. All corporations pay 10 p.c. of their net income in excess of \$2,000, as against 6 p.c. under the former Act. In respect of individuals the normal rate of 4 p.c. is to be levied on all incomes exceeding \$1,000, but not exceeding \$6,000, in the case of unmarried persons and widows or widowers without dependent children, and upon all incomes exceeding \$2,000 but not exceeding \$6,000 in the case of all other persons, the respective minimums of \$1,000 and \$2,000 being exempt from taxation. A normal tax of 8 p.c. is levied on the excess of all incomes over \$6,000. The surtax is imposed on a progressive scale on all incomes of over \$6,000, applying first at the rate of 1 p.c. on the amount by which the income exceeds \$5,000 and does not exceed \$6,000; then at the rate of 2 p.c. on the amount by which the income exceeds \$6,000 and does not exceed \$8,000; then at a rate increasing by 1 p.c. for each \$2,000 increase of income up to \$100,000, so that 48 p.c. is levied on the amount by which the income exceeds \$98,000 and does not exceed \$100,000; then at 52 p.c. on the amount by which the income exceeds \$100,000 and does not exceed \$150,000; 56 p.c. on the excess between \$150,000 and \$200,000; 60 p.c. on the excess between \$200,000 and \$300,000; 63 p.c. on the excess between \$300,000 and \$500,000; 64 p.c. on the excess between \$500,000 and \$1,000,000; 65 p.c. on the excess income over \$1,000,000.

Chapter 47 provided for the entire repeal of the extra duty of 5 p.c. ad valorem added to the British Preferential Tariff under the Customs Tariff War Revenue Act, 1915, and for the partial repeal in respect of the intermediate and general tariff rates of the excess of $7\frac{1}{2}$ p.c. imposed under the same Act; also for the free importation into Canada of wheat, wheat flour and potatoes from countries not imposing a customs duty on such articles when grown or produced in Canada. Five cents per lb. were deducted from the duty on coffee roasted or ground under the preferential, intermediate and general tariff schedules and 3 cents per lb. were deducted from the duty on British grown teas under the preferential tariff. Under the general tariff the Act provided for a total reduction (including the $7\frac{1}{2}$ p.c. war duty) from $27\frac{1}{2}$ p.c. to 15 p.c. on cultivators, harrows, horse-rakes, seed-drills, manure spreaders, and

weeders and complete parts thereof; from $27\frac{1}{2}$ to $17\frac{1}{2}$ p.c. on ploughs and complete parts thereof, windmills and complete parts thereof, portable engines and traction engines for farm purposes, horse-powers and threshing machine separators and appliances therefor. On hay-loaders, potato diggers, fodder or feed cutters, grain crushers, fanning mills, hay tedders, farm, road or field rollers, post-hole diggers, and other agricultural implements, provision was made for a reduction of duty to 20 p.c. with a similar reduction on farm wagons. Respecting cement, the war customs duty was repealed and the general tariff rate reduced to 8 cents per 100 lb. Specific instead of ad valorem rates of duty were enacted for pig-lead, zinc spelter, and copper ingots.

Department of Health.—Under chapter 24 was established a Department of Health, over which a Minister of the Crown appointed by the Governor in Council is to preside. A Deputy Minister and staff were authorized to be appointed. The duties of the Department include the administration of the Quarantine Act, the Adulteration Act, the Public Works Health Act, the Leprosy Act, sections 406, 407 and 408 of the Canada Shipping Act (being chapters 74, 133, 135, 136, 113, respectively of the Revised Statutes of Canada, 1906), also of the Proprietary or Patent Medicines Act (Statutes of 1908, chapter 56) and amendments of any of the aforesaid Acts; also co-operation with provincial, territorial and other health authorities with a view to improving the public health, conserving child life and promoting child welfare; the establishment of a national laboratory for public health and research work; inspection and medical care of immigrants and seamen; supervision, as regards public health, of all means of transportation, as well as of all Dominion public buildings and offices; also, subject to the provisions of the Statistics Act, the collection, publication and distribution of information relating to public health, improved sanitation, social and industrial conditions affecting the health and lives of the people. A Dominion Council of Health is also established.

Board of Commerce.—By chapter 37 a Board of Commerce of Canada is established, to consist of three commissioners appointed by the Governor in Council, each Commissioner holding office for ten years and devoting his whole time to the duties of his office. Provision is made for the appointment of a secretary and staff, and experts may be employed in an advisory capacity, and an advisory council may be established. The Board of Commerce is to administer the Combines and Fair Prices Act of 1919. An appeal shall be had from the Board to the Supreme Court upon a question of jurisdiction or of law. By chapter 45 (Combines and Fair Prices Act, 1919) machinery is provided for the investigation and restraint of harmful combines, monopolies, trusts and mergers, and for restraining the enhancement of the prices of commodities. The Board of Commerce is empowered and directed to restrain and prohibit the formation and operation of combines, which are operating to the detriment of the public. Any British subject of full age resident in Canada may apply to the Board for an order directing investigation into any al-

leged combine, or the Board may itself act without such request. Investigations are to be thorough and complete, and if the Board after investigation is of opinion that a combine is being formed, it may order that the acts or practices complained of shall cease, failure to observe such an order being punishable by heavy fine or by imprisonment. Whenever it is found that with respect to any article a combine exists unduly promoting the advantage of manufacturers and dealers at the expense of consumers, the Governor in Council may order that such article may be admitted into Canada free of duty, or may reduce the duty. The unreasonable accumulation or withholding of any necessary of life is forbidden. The Board is also empowered to restrain and prohibit the taking of unfair profits. Disobedience to its orders is criminal and punishable by a fine of \$1,000 per day. Whenever the Board considers that unreasonable hoarding exists, or that unfair profits are being exacted, it may both prohibit the offence under heavy penalties and may remit to the Attorney-General of any province the evidence and recommend him to prosecute. No prosecution shall be initiated except on written leave of the Board.

Settlement of Returned Soldiers.—Chapter 71, known as the Soldier Settlement Act, 1919, provides financial assistance to soldiers of the Canadian, Imperial or Colonial military, naval and air forces, who apply to the Soldier Settlement Board of three Commissioners created under the Act for assistance to enable them to go upon the land. Under certain conditions loans up to \$7,500 may be granted for purchase of land, live stock, implements and for the erection of buildings, the applicant being required, except in special cases, to pay 10 p.c. of the cash value of the land. The Board may also lend to settlers already owning land an amount up to \$5,500 to discharge encumbrances and effect improvements. The interest rate on all loans is 5 p.c., and the principal in the case of loans for live stock and implements is repayable in four annual instalments, beginning the third year, while the principal of other loans is repayable with interest in 25 equal annual instalments.

Exclusion of Anarchists.—Chapter 25, an Act to amend the Immigration Act, and chapter 26, an Act to amend chapter 25, provide for the exclusion from Canada of persons not being born or naturalized in Canada who believe in or advocate the overthrow, by force, of constituted authority, or who disbelieve in or are opposed to organized government, who advocate the assassination of public officials, or who advocate or teach the unlawful destruction of property, or who are members of or affiliated to societies advocating any of such things. Enemy aliens, persons guilty of espionage, persons guilty of high treason are also excluded. Furthermore, persons over fifteen years of age unable to read in some language or dialect designated by such persons are excluded, except in cases where such exclusion would break up family ties by excluding the relatives of persons already resident in Canada.

Canadian National Railway.—Chapter 13 provides for the incorporation of the Canadian National Railway Co., the stock

of which shall be vested in the Minister of Finance on behalf of the Crown, and under which the railways, works and undertakings of the companies comprised in the Canadian Northern Railway System may be consolidated, and, together with the Canadian Government Railways, operated as a national system. The Act provides for the appointment by the Governor in Council of a Board of Directors, not fewer than five nor more than 15 in number, who shall hold office from one annual meeting to another, or until removed for cause by the Governor in Council. This body may be entrusted with the management and operation of any railway, property or works vested in His Majesty. The expenses incurred in the management and operation of the Government railways are to be paid out of the rates and revenues of the enterprise, while any deficit shall be payable out of the Consolidated Revenue Fund, to which also any surplus shall revert. The Company may sue or be sued like other companies. With the approval of the Governor in Council, it may issue bonds, debentures, debenture stock, perpetual or terminable, or other securities in respect of the mileage of the lines of railway which it from time to time constructs, acquires, owns or controls—not including the Canadian Government railways, nor exceeding in the aggregate \$75,000 per mile.

Railways.—In chapter 68 are consolidated the various Acts relating to railways. Annual, and if required monthly statistical reports, are to be compiled in duplicate by railway, telegraph, telephone and express companies, as well as by water carriers, for the Minister of Railways and Canals and for the Dominion Statistician. Limits are set to the granting of passes and reduced rates. Railways having legal powers to transmit telegraph and telephone messages for the public or to transmit or distribute electric and other power or energy, must not construct or operate lines along any highway or public place, or dispose of power or energy within the limits of a municipality without the consent of the municipality, expressed by by-law. The rates at which messages may be sent or at which power may be sold, must be approved by the Board of Railway Commissioners.

Technical Education.—Chapter 73 provides for aid to the provinces in promoting and assisting technical education in Canada, by annual grants beginning at \$700,000 and aggregating \$10,000,000 within a period of ten years. Out of the annual grant each province is to receive \$10,000, while the balance is to be divided among the provinces in proportion to their population as shown at the last decennial census. The grants to any province in any year are not to exceed an amount equivalent to that which the Provincial Government shall expend on technical education within such year, and the Dominion Minister of Labour is entitled to an accounting for the federal moneys expended and to a report setting forth the work done in the province in promoting technical education.

Control of Aeronautics.—The Air Board Act (Chapter 11) provides for the appointment by the Governor in Council of an Air Board consisting of from five to seven members to include a Minister of the Crown as chairman and representatives of the Departments

of Militia and Naval Service. The Board is given powers of control over aerodromes, air stations, air craft, etc., and generally over aerial navigation in Canada and its territorial waters.

Highways.—The Canada Highways Act (chapter 54) authorizes the expenditure within five years from April 1, 1919, of \$20,000,000, for assisting the provinces in the construction and improvement of highways in Canada. To each province is to be given \$80,000 in each year, the balance of the annual grant being divided among the provinces in proportion to population, on condition that any highway for which aid is granted shall be constructed or improved in accordance with an agreement made by the Dominion Minister of Railways and Canals with the Government of the province, and approved by the Governor in Council. The federal grant in aid in each case shall be 40 p.c. of the actual necessary and reasonable cost of the construction or improvement.

Bankruptcy.—By the Bankruptcy Act (chapter 36) an effort has been made to provide a uniform bankruptcy law for the various provinces. An expeditious means of administering an insolvent estate is provided and such administration is made as inexpensive as possible. Provision is made for an honest insolvent obtaining under certain conditions an absolute discharge from further obligations. The Act applies to all corporations, with the exception of banks, railways, trust and insurance companies, and to all persons except farmers and wage-earners earning less than \$1,500 a year.

Dominion By-Elections Act.—The right to vote at by-elections is given by chapter 48 to British subjects by birth or naturalization, male or female, 21 years of age, who have ordinarily resided in Canada for at least twelve months and in the electoral district for two months. In the case of naturalized subjects, only personal naturalization is accepted as qualifying for the franchise, except in the case of those born in North America, or of those who, already being naturalized by operation of law, obtain from judges of competent jurisdiction certificates that but for such naturalization they would be entitled to be personally naturalized in Canada.

Currency.—By chapter 21 it is provided that the proclamation of September 6, 1914, made under authority of the Finance Act, 1914, suspending the redemption of Dominion notes in gold, and authorizing the advance to the chartered banks of Dominion notes on the pledge of approved securities, and making bank notes legal tender, shall, unless otherwise provided, continue in force for two years after the conclusion of peace. Further, paragraph (c) of this proclamation authorizing the banks to issue excess circulation from March 1 to August 31 of each year (as well as in the other six months) shall continue in force throughout 1919 and 1920 unless otherwise provided. Authority is also given to the Governor in Council by proclamation to prohibit the export of gold coin, gold bullion and fine gold, except under license from the Minister of Finance, for two years after the end of the war.

Forestry.—By chapter 17, one of two Acts amending the Dominion Forest Reserves and Parks Act, authority is given to forest officers to seize the outfit and equipment of persons arrested for capturing or killing game or fish. Power is also given to expropriate lands for Dominion parks. Chapter 49 makes provision for the withdrawal of certain lands from forest reserves.

Housing Scheme.—The sum of \$25,000,000 was appropriated by Parliament for the purpose of furthering the Housing Scheme authorized by Order in Council of December 3, 1918. The Order, which is intended to facilitate the building of dwellings for working men, particularly returned soldiers, provides that the money is to be lent to the provinces in proportion to their population. The loans are to be made for a period not exceeding 20 years at 5 p.c. interest.

Miscellaneous.—Under chapter 62, the Ottawa Improvement Commission receives \$150,000 per annum to be expended under the supervision of the Minister of Finance in the improvement of the capital. By chapter 60, the increase is authorized of the Permanent Force of the Militia from 5,000 to 10,000 men. A loan to the Vancouver Harbour Commissioners not to exceed \$5,000,000 is authorized by chapter 74. An Act (chapter 46) to amend the Criminal Code declares that organizations aiming to bring about by violent means governmental, industrial or economic changes in Canada are unlawful associations, whose property may be forfeited to His Majesty, and whose organizers, members, and those who print, circulate or import its literature may be punished with not more than 20 years' imprisonment. By chapter 30 the sum of \$200,000 per year for ten years is appropriated to aid construction work for public safety at railway crossings.

Special Session (September 1 to November 10, 1919).

At the second or special session of 1919 (third session of the thirteenth Parliament of Canada), extending from September 1 to November 10, 1919, thirty-one public general Acts and five local and private Acts were passed. Of the latter, one was an insurance company Act, and four were divorce Acts.

Finance.—Under chapter 31, appropriations were made aggregating \$62,916,039. Of this amount \$20,000,000 were voted as a supplementary grant to provide advances to soldiers settling on the land and for the cost of administering the Soldier Settlement Acts of 1917 and 1919, and \$40,000,000 to carry out the recommendations of the Report of the Committee on Soldiers' Civil Re-establishment.

Peace Treaties.—By chapter 30, the Governor in Council is authorized to "make such appointments, establish such offices, make such Orders in Council, and do such things as appear to him to be necessary" for giving effect to the Treaty of Peace signed on June 28, 1919, with Germany, and to the Treaty of Peace with Austria, signed at St.-Germain-en-Laye, September 10, 1919.

Grand Trunk Railway.—The Government is authorized by chapter 17 to enter into an agreement with the Grand Trunk Railway Company of Canada for the acquisition by the former of the entire capital stock of the Company, except £12,500,000 of 4 p.c. guaran-

teed stock. As part of the consideration in such purchase, the Government may guarantee the payment of: (a) half-yearly dividends at 4 p.c. per annum upon the present guaranteed stock; (b) the interest upon the present debenture stocks; (c) half-yearly dividends at 4 p.c. per annum, from the date of the appointment of the committee of management, upon an issue of non-voting capital stock not exceeding the amount determined by the board of three arbitrators, such issue to be distributed among the holders of the present preference and common stocks, in proportions determined by the arbitrators, in satisfaction of their claims. One of the arbitrators is to be appointed by the Government, one by the Grand Trunk, and the third is to be Sir Walter Cassels, Judge of the Exchequer Court of Canada. The total award by the arbitrators shall not be greater than an amount on which the annual dividend at 4 p.c. per annum on the face value of the present guaranteed stock and the new guaranteed stock taken together would exceed \$5,000,000.

Civil Service.—By the Civil Service Amendment Act, 1919, (chapter 10), the salaries of the Civil Service Commissioners are increased. The Commissioners are empowered to establish lists of persons eligible for temporary employment, and to employ temporarily persons possessed of professional, scientific, technical or other expert knowledge. They are authorized to prescribe working hours for the Civil Service, to set examinations for candidates for employment, to classify the service, and to determine the rates of compensation to be paid.

Dominion Lands.—The Dominion Lands Act is amended by chapter 13 to allow only those who have served in the war to enter for any parcel or parcels of Dominion lands on the first office day after such lands become available for entry. Also where a period of service with the forces has been credited to an entrant as performance of residence duties, it shall not be necessary for him to erect a house upon the land held by him in order to fulfil the requirements of the Act as to residence.

Prohibition.—Amending the Canada Temperance Act, the Governor in Council is by chapter 8 authorized, on the request of the Legislative Assembly of a province, to take a vote on the question "That the importation and the bringing of intoxicating liquors into such province be forbidden." If the majority of those voting are found to be in favour of prohibition the Governor in Council shall declare such prohibition to be in force, in which case no person shall either import intoxicating liquor into such province or sell it for such importation. By a similar vote, prohibition may after three years be repealed. Liquor seized under the Act is forfeited. By chapter 21, the manufacture of intoxicants knowing or intending that they shall be unlawfully used is forbidden; but no prosecution shall be initiated against a person residing in another province without the written approval of the Attorney-General of such province.

House of Commons.—By chapter 18, amending the House of Commons Act, it is provided that in the event of a vacancy occurring an election writ shall be issued within six months after the receipt by the Clerk of the Crown in Chancery of the warrant for the issue of

a new writ for the election of a member of the House of Commons, except where the vacancy occurs within six months of the legal limit of the existence of the House of Commons. Provision is also made that no one shall be a candidate for more than one electoral district at the same time.

Soldiers' Civil Re-establishment.—It is provided by chapter 29, amending the Soldiers' Civil Re-establishment Act, that the Minister of Civil Re-establishment shall have power, subject to the approval of the Governor in Council, to make regulations for managing hospitals, workshops, and other institutions, for employing technical and special temporary staff, supplying suitable artificial limbs, disposing of the moneys due to deceased or insane officers and soldiers, prescribing rates of allowances to patients or their dependents, and fixing penalties for the violation of such regulations.

Miscellaneous.—The Board of Commerce receives, under chapter 1, authority to require under penalty the attendance of any person for examination under oath touching any matter, and the production of books, articles or documents. Under chapter 2, the disqualification of persons under any provincial law from voting in any province shall not be affected by the Dominion By-Election Act of 1919. The powers of the Board of Grain Supervisors of Canada are continued by chapter 5, in order to enable it to conclude its business; and the guarantee respecting the 1918 wheat crop is ratified and confirmed. By chapter 9, the powers of the Canada Wheat Board are continued for 18 months from the passage of the Act. Under the French Convention Act (chapter 15), passed as a result of the notice of denunciation by the French Government of the conventions respecting commercial relations of September 19, 1907, and January 23, 1909, these conventions will remain in force subject to termination upon three months' notice on either side. The importation and manufacture of oleomargarine are permitted by chapter 24 until August 31, 1920, and its sale until March 1, 1921; such importation is to be made only under license from the Minister of Agriculture and is to be free of customs duty. Under chapter 26, the importation and exportation of opium and cocaine in any of their forms without a license from the Minister of Health is forbidden. Under an Act respecting Patents of Invention (chapter 26), the Minister is authorized to modify the requirements of the Patent Act where non-compliance with these requirements has resulted from circumstances arising out of the war. The Royal Northwest Mounted Police from the date when chapter 28 comes into force, are to be known as the Royal Canadian Mounted Police, and their headquarters are to be at such place as the Governor in Council shall from time to time appoint.

PROVINCIAL LEGISLATION, 1919.

The following are all Acts of the Provincial Legislative Sessions held between January and May, 1919: 9 Geo. V (New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan, Alberta, British Columbia); 9-10 Geo. V (Prince Edward Island, Nova Scotia).

Acts Arising out of the War.—In Nova Scotia, chapter 16 authorizes soldiers being in actual military service and sailors being at sea to dispose by testamentary disposition of personal property and real property, though such soldiers or sailors may be under 21 years of age. Chapter 21 establishes a War Memorials Commission. In Quebec, chapter 9 provides for the appropriation of public lands for free conveyance to returned soldiers, and chapter 62 empowers municipal councils to erect monuments to deceased soldiers and to borrow monies therefor. In Ontario, chapter 5 repeals the Provincial War Tax Act under which the province had collected through the municipal administration a special tax of one mill on the dollar of the assessed valuation of the province. Chapter 6 disqualifies for ten years defaulters under the Military Service Act, 1917, and persons convicted of treasonable or seditious offences, from holding public office or voting at provincial or municipal or school elections.

Agriculture.—In Nova Scotia, chapter 28 provides safeguards for the maintenance of pure bred cattle. In Manitoba, chapter 52 empowers the Lieutenant Governor in Council to raise \$400,000 for the purchase of live stock for sale to resident farmers; chapter 77 incorporates the Manitoba Poultry Breeders' Association and permits the organization of and provides grants for affiliated local associations; chapter 91 empowers rural municipalities to borrow by note or debentures (the latter not required to be submitted to rate-payers) sums up to \$60,000 to furnish seed-grain, and empowers the Lieutenant Governor in Council to guarantee such debentures and to authorize the Provincial Treasurer to lend certain monies on security of promissory notes issued by municipalities under the Act. In Saskatchewan, chapter 16 empowers the Minister, on petition and on favourable report by the Engineer, to organize drainage districts and carry out the works incidental to drainage, and to issue debentures and enforce taxation to raise the necessary funds; chapter 52 amends the Agricultural Societies Act in respect of grants to Societies; chapter 53 amends the Stray Animals Act and empowers the justice of peace to sell at auction stray animals to defray costs and damages; chapter 71 provides relief for farmers suffering from crop failures in 1918, by empowering mortgagees to advance money to owners up to \$250 a quarter-section, such advances to be secured by property and lien on crop; chapter 79 provides for the enforcement of mutual obligations on the part of landlord and tenant and confers the same rights and obligations on sub-tenants and sub-lessees as on the original tenants or lessees and defines how rents may be collected. In Alberta, chapter 9 secures the interests of mortgagees advancing seed-grain or money for seed-grain; chapter 10 empowers the Provincial Treasurer to advance, upon application, seed-grain or money for seed-grain or feed up to \$300 per quarter-section, payment to be secured by mortgage on real estate, chattels and lien. Chapter 30 of British Columbia authorizes the constitution of a grazing district in any part of the province, on which free grazing permits may be issued under certain conditions.

Forestry.—In Quebec, chapter 26 amends the Revised Statutes of 1909 regarding the protection of forests from fires by compelling every leaseholder to have his limits patrolled from May 1 to November 1 by rangers paid by him but appointed by the minister; monthly returns of fires and of the number of fire rangers are prescribed; offenders against this and other fire-protective regulations may be tried summarily before a justice of the peace. In Ontario, chapter 11 provides that the Minister of Lands, Forests and Mines may authorize the export of poplar pulpwood in an unmanufactured state. In British Columbia, chapter 44 amends the Forest Relief Act so as to exempt, up to March 31, 1920, from penalties for neglect of renewal, ex-service men holding special timber licenses. Chapter 45 amends the Forest Act by placing lease holders on renewing their licenses, under the same conditions as the holders, of special timber licenses; under certain conditions special timber licenses are made exchangeable for pulp licenses; the close season for fires is extended to October 1.

Buying and Selling.—In Prince Edward Island, chapter 11 defines the mutual rights and obligations of buyers and sellers of goods, the formation and performance of contracts between them, the rights of unpaid sellers against the goods and the power of the parties to a sale to negative by agreement any rights, duties or liabilities legally implied. In New Brunswick, chapter 4 is similar to chapter 11 of Prince Edward Island; chapter 5 defines the rights and obligations of factors and agents. In Manitoba, chapter 33 requires all vendors of farm implements to list their prices of implements and repairs annually with the Minister of Agriculture and Immigration, and forbids them to sell above the price list; it also provides safeguards for purchasers in making contracts. In Saskatchewan, chapter 80 embodies the present rules of court respecting executions against land and goods, seizures of mortgages and sale by the sheriff of personal property and growing crops; it also contains the provisions of the English law, enabling a judgment creditor to charge government securities, bonds, etc., in possession of the debtor with the amount of judgment and interest.

Assessment.—In Ontario, chapter 50 provides for the assessment of land acquired for cemetery purposes, but not yet used as such, of receipts from long distance business, of restaurants, municipal electric railways, structures, rails, etc., and the exemption or part exemption of dwelling houses.

Child Welfare.—In Nova Scotia, chapter 49 requires a license from the Superintendent of Neglected and Delinquent Children to enable any person to receive or keep a child under twelve who is not a relative, apprentice, pupil or ward; chapter 63 amends the Children's Protection Act of 1917 so as to empower the Lieutenant Governor in Council to prescribe the territorial jurisdiction of any Children's Aid Society and to make the municipality, city or town, within which a child apprehended under the provisions of the Act has a settlement, liable for the expenses in connection with the apprehension and maintenance of such child, and fixes a sum to be paid by municipalities, and by the provincial treasurer, for the maintenance

of reformatories, etc. In New Brunswick, chapter 6 defines the duties of municipalities in protecting children, in the provision and upkeep of temporary homes, places of detention, Children's Aid Societies, etc., their power to assess rate-payers for expenses thus incurred and to compel parents or guardians to take full share in their responsibilities; it also defines what religious denomination shall have supervision over illegitimate children in homes; and defines what public places children of a certain age may not resort to and the responsibilities of the public in the matter of influence over a child's conduct.

Production and Conservation.—In Prince Edward Island, chapter 13 provides for the prevention and suppression of fires, by appointing fire marshals with local assistants to enforce fire regulations, investigate causes, inspect buildings and their means of egress, and keep records and require insurance companies to make reports. In Manitoba, chapter 44 provides for the formation of an Industrial Research Bureau to make research into the natural resources of Manitoba and disseminate the information collected, the members to be without pay, but with powers to appoint paid experts. In Saskatchewan, chapter 89 ratifies on the part of Saskatchewan an agreement between the Dominion of Canada, Manitoba and Saskatchewan to contribute amounts for the purpose of establishing an experimental plant capable of producing 30,000 tons of briquettes from lignite each year, and for research and experimental work. In British Columbia, chapter 73 empowers the province to levy taxes for the construction of works to prevent the encroachment of rivers upon their banks. In Nova Scotia, chapter 24 provides for the appointment of a commission on the hours of labour; chapters 74 and 75 amend coal mining regulations so as to provide for the safety of mines.

Labour.—In Quebec, chapter 11 provides for the appointment of a commission to decide on a minimum wage for women in various industries; chapter 14 provides for the appointment of a Deputy Minister of Labour under the Minister of Public Works and Labour, and in addition to the Deputy Minister of Public Works; chapter 50 forbids the employment of any illiterate boy or girl under sixteen. In Ontario, chapter 22 provides for the establishment of a Department of Labour under the control of a Minister of Labour. In Manitoba, chapter 8 provides for the examination, licensing and inspection of barbers; chapter 43 provides for the appointment of a joint Council of Industry, consisting of five persons,—two to represent employees, two employers, and one to be impartial—to investigate and settle labour disputes, and to investigate the cost of living, the number of persons employed and wages paid, unemployment, housing and living conditions, unfair profits, breaches of contract and violation of laws. In Saskatchewan, chapter 61 provides that contracts between master and servant of over a year's duration shall be in writing and prescribes penalties for violation of this contract by either party; chapter 62 provides that the Bureau of Labour shall establish employment bureaus in certain districts to assist employment and establish-

ment of industries; chapter 85 provides that no employer, unless licensed to do so, shall require a white female employee to reside in a restaurant or laundry. In British Columbia, chapter 58 amends the Coal Mines Regulation Act by providing for the constitution of a board with powers to fix a minimum wage for coal miners.

Highways.—In Nova Scotia, chapter 1 regulates the load of vehicles on public highways; chapter 64 amends the Public Highways Act so as to define "Common and Public" highways, their width and boundaries and their freedom from any form of private control. In New Brunswick, chapter 14 amends the Act to provide funds for building permanent highways and authorizes the Government to borrow from time to time, sums up to \$150,000 for constructing permanent highways. In Quebec, chapter 6 contains amendments to the Good Roads Act of 1912 which authorize municipalities to contract temporary loans up to the amount supplied by the Government for the work in question; chapter 66 permits borrowing by railways at a rate of interest up to 6 p.c. In Ontario, chapter 17 amends the Provincial Highways Act in matters pertaining to fencing and the keeping open of highways; chapter 18 amends the Highways Improvement Act by setting aside \$5,000,000 for the improvement of highways; chapter 19 amends the Ontario Highways Act by authorizing taxation by municipalities for sidewalks, etc.; chapter 20 amends the Toronto and Hamilton Highways Commission Act, giving power to issue debentures for 40 years for the purpose of constructing certain works. In Manitoba, chapter 38 amends the Good Roads Act of 1914 so as to empower municipalities to issue debentures for their portion of the cost of bridges and culverts; it also empowers the minister to repair roads and collect one-third of the cost from municipalities affected. In Saskatchewan, chapter 65 amends the Highways Act, defining "Main Highways" and providing for grants to the amount of \$500 a year to each municipality of nine townships, and a proportional amount to larger or smaller municipalities, for the maintenance of highways.

Prohibition and Temperance.—In Prince Edward Island, chapter 4 amends the Prohibition Act, by providing for forms to be used by physicians when prescribing for liquor; it also provides for increasing the penalties for violation of the Act, for permitting physicians and dentists to use liquor as stimulant and for cancelling vendors' licenses heretofore granted, and defines rights of appeal; chapter 5 provides for a referendum to the electors on the question of the Prohibition Act of 1918 and amendments. In Nova Scotia, chapter 73 amends chapter 87, 1918, by forbidding under penalties the sale of liquor, drinking in public places, and obtaining prescriptions under false pretences; it also provides for the protection of inspectors in carrying out their duties. In Quebec, chapter 18 enacts the Quebec Prohibition Law, forbidding the sale of any liquor of more than $2\frac{1}{2}$ p.c. of proof spirits, except that license may be issued to authorized vendors. In Ontario, chapter 60 amends the Ontario Temperance Act, permitting Board to deal in liquors, to take over stocks of licensed vendors, acquire leases of licensed premises, to

license premises, and extend licenses; it also defines the quantity of liquor which may be kept by medical practitioners and how prescriptions are to be dealt with, and forbids advertising the prices of liquors; chapter 61 provides for a referendum upon certain questions connected with the Temperance Act. In Saskatchewan, chapter 75 amends the Saskatchewan Temperance Act by restricting the sale of liquor by druggists and prescriptions by physicians. In British Columbia, chapter 69 amends the British Columbia Prohibition Act in the matter of forms to be used for prescriptions for liquor, and by restricting and demanding information regarding the quantity of liquor in possession of bonded manufacturers; it also forbids the advertising of prices and quality of liquors.

Planning and Developing.—In Nova Scotia, chapter 62 amends the Town Planning Act of 1915, by providing for the creation of a local board by every local authority, and by classifying land that should be used for different kinds of agriculture, for horticulture, for public or private open spaces, for timber or for other purposes. In Ontario, chapter 55 provides for the establishment of community halls and athletic fields in rural districts. In British Columbia, chapter 14 provides for access by the public to towns situated on property owned by industrial companies.

Public Health.—In Nova Scotia, chapters 70, 71 and 72 amend the Public Health Act of 1918, chapter 70, by permitting local boards to make regulations regarding water supply, etc.; chapter 71, by forbidding the treatment of venereal diseases by other than medical practitioners; chapter 72, by providing for the division of the province into three health divisions with divisional medical officers with the powers of medical health officers and of sanitary inspectors under the Provincial Health Officer; it also provides for the establishment of public health nurses and of county health clinics. In New Brunswick, chapter 51 amends the Public Health Act of 1918, by demanding certificates of vaccination of men employed in camps, etc., and making employers liable for the expenses arising out of violation of the Act; it also demands that notice of births, marriages and deaths be given, and empowers the Minister to divide health districts into sub-districts with boards of health to act without remuneration; chapter 52 confirms measures taken during the influenza epidemic, the action of municipalities in providing funds for Board of Health, the action of Board of Health in incurring and paying liabilities, the action of municipalities in voting money for health purposes; it also defines when the council of city, town or municipality may vote money for health purposes. In Quebec, chapter 51 contains several amendments of the Public Health Act, mostly in the nature of a widening of the scope of the powers of the Superior Board of Health; it also contains certain provisions respecting the examination of prisoners, venereal diseases and reporting of same to Inspector of the Board of Health; chapter 4 ratifies contracts between the Laurentian Society, the Dominion Government and the Provincial Government respecting the Tuberculosis Sanatorium at Ste. Agathe-des-Monts. In Ontario, chapter 62 amends the Public Health Act in respect to registration of certificates of charges for installing sanitary conveniences.

In Manitoba, chapter 109 provides for the prevention of venereal diseases by empowering the Provincial Board of Health to provide for compulsory examination and treatment. In Saskatchewan, chapter 12 amends and consolidates the law relating to public health by establishing a council of Public Health, a permanent Bureau with a "Commissioner" as chief officer, with powers to take precautions against the spread of communicable diseases and measures for their cure; it also empowers the province to establish health districts with boards, and every municipality to appoint a medical health officer and employ sanitary inspectors; chapter 13 provides for the control of venereal diseases, requiring a patient to report to a physician for treatment and the physician to report to the Commissioner of the Bureau of Health; it also states what occupations the patient may not follow; chapter 44 amends the Union Hospital Act, by giving power to the Board, on approval of municipality, to make additions and extensions to hospital buildings; it also empowers the Lieutenant Governor in Council, upon petition, to define and establish hospital districts and to arrange for defraying expenditure; it furthermore empowers the Minister of Municipal Affairs to take direct action in the case of neglect of proper authorities to carry out certain provisions of this Act. In Alberta, chapter 7 provides for the formation of an Association of Public Health Nurses and arranges for the incorporation in such of present members of the Alberta Nurses' Association. It also provides that a register of public nurses be kept in the Minister's office and gives rights to these nurses to undertake public nursing and inspect school children; chapter 8 empowers the Minister on petition to establish hospital district with elected Board which may issue debentures, etc.; chapter 13 allows issue of debentures for the payment of indebtedness contracted in fighting the Spanish influenza; chapter 16 establishes a Department of Public Health under a Minister of Public Health with powers to take measures to inspect and suppress diseases; chapter 46 amends the Public Health Act of 1910 by defining communicable diseases and empowering the Provincial Board to issue any orders for the prevention and suppression of such diseases; chapter 48 amends the Venereal Disease Act of 1918 and forbids the advertising of medicine for the cure of venereal diseases. In British Columbia, chapter 88 compels medical practitioners and heads of hospitals to keep a record of cases of venereal diseases attracting their attention and report the same to the Medical Health Officer; it also provides that any such case refusing treatment may have his name published; it also provides that only legally qualified medical practitioners are allowed to treat venereal diseases and prohibits the advertisement of remedies, save such as are approved by the Medical Health Officer; it also provides penalties for knowingly communicating the disease.

Uniform Legislation.—In Nova Scotia, chapter 25 provides for the appointment of commissioners for the promotion of uniformity of legislation in Canada, the commissioners to hold office for three years and to be employed in research and consultation with similar com-

missions of other provinces. In Alberta, chapter 31 provides for a similar commission for Alberta, and defines the field of duties of the board of commissioners.

Civil Service Reform.—In Manitoba, chapter 16 amends the Civil Service Act in the matter of the oath to be taken by civil servants on appointment. In British Columbia, chapter 12 amends the Civil Service Act by allowing civil servants cost of living bonuses in addition to regular salaries; permits of the temporary employment of a person under 16 without examination; amends the oath to be taken by civil servants, and empowers the Civil Service Commission to employ qualified returned soldiers, irrespective of age.

Housing.—In Prince Edward Island, chapter 12 empowers the Lieutenant Governor to borrow amounts from the Dominion Government to lend at 5 p.c. to municipalities, farmers, etc., for the purpose of erecting houses and purchasing land, the cost of the houses not to exceed \$3,000 and of the land \$3,500; also to appoint a salaried housing commission. In New Brunswick, chapter 56 provides for better housing conditions by empowering the Lieutenant-Governor to borrow from the Dominion and lend to farmers, municipalities and companies, sums not exceeding 85 p.c. of the cost of house; no company is allowed to make a profit on this loan or to receive more than 5 p.c. interest. In Nova Scotia, chapter 2 provides for fair rents to landlords and for the restriction of the eviction of tenants; chapter 4 provides for the erection of dwelling houses which are to be rented or sold at moderate prices, no dividend to exceed 6 p.c.; it authorizes the loan to municipalities, and to resident overseas men and working men and women of moderate means, of amounts up to the full cost of houses; it also empowers the Lieutenant-Governor in Council to make loans to farmers for the purpose of erecting dwellings for married employees—the interest on loans in each case to be 5 p.c. and the benefits to be extended only to British subjects. In Quebec, chapter 10 provides for the distribution of the loan to the province by the Dominion Government of \$25,000,000 for the building of sanitary dwellings for returned soldiers and workmen, empowering the appointment of a director of housing and the granting of loans to city and town municipalities at 5 p.c. interest. In Ontario, chapter 54 provides for the erection of dwelling houses by empowering the Lieutenant Governor to borrow amounts from the Dominion Government or any person, and to lend to municipalities and corporations and (from money lent other than by the Dominion Government) to farmers for the erection of dwellings for their employees; it also empowers the appointment of salaried housing commissions and that sales of dwellings erected shall be at cost, save for a small commission in the case of companies. In Manitoba, chapter 42 authorizes urban or rural municipalities to borrow from the Provincial Treasurer and the latter to apply to the Dominion Government for the loan of sums not exceeding \$2,000,000 for housing purposes, returned soldiers to receive preference in the distribution of these loans. In Saskatchewan, chapter 45 authorizes, as in the case of Manitoba, loans to urban municipalities through the Provincial Treasurer from amounts not exceeding \$2,000,-

000 borrowed from the Dominion Government to provide homesites and buildings, loans to be protected against sales for debt; it also empowers province to give free homesites to returned soldiers.

Single Tax.—In Manitoba, chapter 106 amends the Unoccupied Lands Act so as to exempt from single tax lands occupied by farmers or tenants, together with lands unfit for cultivation.

Vital Statistics.—In Prince Edward Island, chapter 10 provides that the Registrar-General shall annually issue, for the use of the Legislature, a full report of the births, marriages, and deaths of the preceding year, and that any person may have access to such records; it also defines the powers and duties of the Registrar-General and District Registrar and the plans of Registration Districts and requires that all recognized informants and persons officially or professionally connected with births, marriages, baptisms and deaths shall under penalty report the same to the proper authorities; it also defines the line of action in exceptional cases, such as illegitimacy, etc. In Nova Scotia, chapter 3 provides for the appointment of a Registrar-General in the person of the Provincial Secretary, and a Deputy Registrar-General, and defines registration divisions and the office and duties of the Registrars and of all persons officially or professionally concerned with vital statistics in keeping full records and making full reports of same; it also defines methods of dealing with regular and exceptional cases and prescribes penalties for violation of the Act. In Ontario, chapter 23 defines Registration Divisions, the office and duties of Division Registrar and Sub-registrar and all persons professionally concerned, the proper steps to secure and publish full information respecting births, marriages and deaths, and provides penalties in all cases for nonfulfilment of duties. In Manitoba, chapter 110 amends the Vital Statistics Act of 1913 so as to define procedure when persons responsible for registering vital statistics are not located, also the duties in connection with this Act of an undertaker in large cities. In Alberta, chapter 45 amends the Vital Statistics Act of 1916, especially in providing for the division of Alberta into registration districts.

Co-operation.—In Saskatchewan, chapter 86 ratifies an agreement between the Government and the Saskatchewan Co-operative Elevator Company; chapter 87 provides for the incorporation of the Northern Saskatchewan Co-operative Stock Yards, Limited; chapter 88 provides for the incorporation of the Southern Saskatchewan Co-operative Stock Yards, Limited; chapters 94 and 95 validate and confirm agreements between the Government and the Saskatchewan Co-operative Creameries, Limited.

Corporations.—In Nova Scotia, chapter 50 amends the Nova Scotia Companies' Act, especially by inserting a table of fees to be paid to the Registrar of Joint Stock Companies by companies having and companies not having a capital divided into shares. In Ontario, chapter 42 amends the Loan and Trust Corporation Act by defining the term "accountant", the prerequisites to incorporation, the limit of capital investment in any one corporation, the necessary securities, and the limit of amount of investment in buildings for use of company;

it also prohibits or limits a loan on own shares and defines the requirements in case of an extra-provincial corporation lending but not borrowing monies in Ontario. In Manitoba, chapter 17 amends the Corporation Taxation Act by providing for a tax on the head office and branches of a bank, on insurance companies and on trust companies, these amend-ments to have retroactive effect to January, 1919. In Saskatchewan, chapter 31 amends the Companies Act by defining "Company", and "Extra-Provincial Company", and stating the requirements before registration of company.

Employment Bureaus.—In Quebec, chapter 33 empowers the Lieutenant Governor in Council to close all private employment bureaus in any place. In Saskatchewan, chapter 67 prohibits employment agencies (except educational employment offices) to collect fees for procuring employment. In Alberta, chapter 14 provides for the establishment of the Alberta Government Employment Bureau as a branch of the public service and defines the duties of this bureau in locating and recording industries and unemployment and procuring employment free of charge; chapter 15 forbids the operation of employment agencies which collect fees for their services. In British Columbia, chapter 26 repeals the Employment Agencies Act of 1912, and prohibits the receipt of fees for procuring employment.

Hydro-Electricity.—In Nova Scotia, chapter 6 provides for the incorporation of the Nova Scotia Power Commission with salaried members, and empowers the Commission to appoint officers and fix their remuneration; also to invest funds or, on permission by Lieutenant Governor in Council, to construct and operate works and make purchases; it also defines the duties in making reports and dealing with surpluses. In Ontario, chapter 16 amends the Power Commission Act of 1918, by providing for the superannuation of employees and by ratifying certain by-laws and contracts; chapter 45 amends the Hydro-Electric Railways Act of 1914 and confirms certain contracts and by-laws. In Manitoba, chapter 30 empowers the Lieutenant Governor in Council to appoint and fix the remuneration of officials and of members of a board, and to raise the sum of \$350,000 to carry out an act to provide for the transmission of electrical power; it also provides that any municipality shall have the right by resolution to apply for and enter into contract for such power.

Initiative and Referendum.—In British Columbia, chapter 21 provides that 25 p.c. or more of the electors may by petition submit a proposed law (Appropriation Bills excepted) to the Legislature for enactment, and that such a law if *intra vires* and approved be submitted to the electors at the following general provincial election; it also provides that 25 p.c. or more of the electors may by petition request that certain Acts be submitted to a vote of the electors.

Municipal Affairs.—In Nova Scotia, chapter 31 provides that every city shall send in statistical returns for its fiscal year. In Manitoba, chapter 64 amends the Municipal Act so as to provide for hoists and elevators in warehouses and factories, for the inspection of vacant buildings, for defining residential streets and tenement houses and for regulations respecting gasoline systems for light, heat and power

and respecting all buildings to ensure warmth and comfort to occupants; chapter 72 empowers the Lieutenant Governor in Council to grant permission to any municipality to erect a municipal hospital. In Saskatchewan, chapter 34 amends the City Act largely for the purpose of meeting after-the-war conditions and to ensure for soldiers further definite concessions by way of exemption from taxation; it also empowers the attorney general to appoint the judge on a commission of inquiry respecting matters pertaining to a city, and exempts from taxation incomes of \$1,500 in the case of married and of \$1,000 in the case of unmarried persons; chapter 35 amends the Town Act in almost the same particulars that chapter 34 amends the City Act; chapter 37 amends the Rural Municipality Act so as to allow the council, subject to approval of the electors, to hire a medical doctor for the municipality; it also defines the powers and responsibilities of rural municipal councils in regulating places of amusement. In Alberta, chapter 50 amends the Town Act so as to empower the Minister to displace and replace any member of the council or the whole council; chapter 51 amends the Village Act by empowering the judge of the District Court embracing any village to oust a member of the council of that village who has been judged to have forfeited his seat; it also empowers the Minister to displace and replace any member or members of a village council or the whole council; chapter 52 amends the Municipal District Act by providing that the residents of an area which they wish to organize into a municipal district may apply to the Minister of Municipal Affairs; it also gives the Minister powers over the councils of rural municipalities similar to those provided in chapters 50 and 51 in the case of Town and Village Municipalities. In British Columbia, chapter 63 amends the Municipal Act by empowering the Council, by by-law passed by a three-fourths majority, to dispose of any lands or personal property acquired by the municipality under tax sale proceedings, etc.; it also provides for the protection of sinking fund monies and makes regulations respecting assessment, taxation, tax sales, licenses and statute labour.

Education.—In Prince Edward Island, chapter 2 provides for the taxation of all real property, Charlottetown and Summerside excepted, at from two to three mills on the dollar, and for a poll tax of from \$2 to \$4 for school purposes. In New Brunswick, chapter 30 amends chapter 41 of 1918 by constituting a vocational Education Board and permitting two or more cities, towns or districts to co-operate in establishing vocational schools; chapter 31 amends chapter 50 of 1903 by providing for the assessment of non-residents and empowering the Board of Education to set aside certain sums to provide school privileges in certain districts; chapter 33 provides for the appointment of a Commission in respect of the salaries of public school teachers. In Quebec, chapter 35 provides for the taking of a census of school children and that a statistical report under oath be sent to school inspectors every year; chapter 36 unites all Protestant school boards of the city of Quebec into one body; chapters 37 and 38 refer to temporary loans in Montreal Roman Catholic schools and increase the taxation in Montreal Protestant and neutral schools.

In Ontario, chapter 73 provides for the appointment of officers for medical and dental school inspection, for the granting of certificates to qualified persons other than British subjects and for the establishment of a college of education; it also defines "Union School Section", empowers councils to make municipal grants for school purposes, and defines the qualifications of urban school trustees and the composition of trustee boards of union school sections. Chapter 74 amends the Teachers' and Inspectors' Superannuation Act by defining the term "employed", allowing teachers partly employed to contribute to funds and receive benefits therefrom, regulates retirement through ill health, employment after superannuation, superannuation contributions from teachers employed by boards in a non-teaching capacity and allowances to teachers not entitled to share in funds; chapter 75 allows agreements between sections upon approval of ratepayers and Minister for consolidation, for the division of existing sections for purposes of consolidation and for transportation in cases of extended sections; chapter 76 renders farmers' wives and daughters, if British subjects, eligible as members of school boards; chapter 77 makes school attendance compulsory during the full school year by children from 8 to 14 years of age and places children between the ages of 5 and 8, if in actual attendance, under the same obligations to attend full time as the others; it also provides for the appointment of an attendance officer with powers of a peace officer in every urban municipality and in rural municipalities, except where truant officers already exist, this official to act under the inspector and provincial attendance officer; it also empowers the provincial attendance officer to act as trustee in the case of unorganized districts; chapter 78 makes school attendance compulsory for adolescents between 14 and 16 years of age who have not attained matriculation standing; if exempted for any reason they must attend part time of 400 hours a year, and adolescents between the ages of 16 and 18 must attend 320 hours a year, where part time instruction is within their reach; every urban municipality of 5,000 or more inhabitants must and others may establish means for part time instruction, these to come under the school boards; commercial high schools are to be under commercial committees; employment of adolescents is to be suspended during the hours of part time instruction and these hours are to be included in the legal hours of employment; the penalties are \$5 for the first offence and \$25 for every additional offence against the Act.

In Manitoba, chapter 83 amends the Public School Act of 1913 by empowering the Minister to constitute a school district, by requiring the secretary-treasurer of a school district to be bonded; by allowing a trustee to resign office and by prescribing penalties for refusal of a trustee to perform duties; chapter 90 amends the School Attendance Act by permitting any school board having an attendance officer to compel children to attend up to the age of 15. In Saskatchewan, chapter 47 amends the Secondary Education Act of 1909 by requiring that a secondary school shall have three teachers before undertaking the work of Grade XII; chapter 48

requires that members of a school board be resident rate-payers who have taken the oath of allegiance and provides for the union of public and separate school districts where desired, also for the employment of a school medical officer; that English be the sole language taught in school hours unless the board resolve that French reading, grammar and composition be taught one hour a day, and that children in unorganized districts be admitted to schools on application. Chapter 49 provides that the council of a municipality pay the school board one fourth share of school expenditure each quarter commencing on March 31; chapter 50 provides for certain grants for the teaching of household science, for evening schools and schools doing work above Grade VII, and that grants to all schools continue during the closing of the schools on account of the Spanish influenza. In Alberta, chapter 32 amends the School Ordinance, School Grants, School Attendance and School Assessment Acts, provides for and defines consolidation, confirms existing consolidations and provides for grants in aid of rural, elementary, secondary and technical education; chapter 33 provides for a school tax of one mill on the dollar on the assessed value of wild lands outside municipal district.

Miscellaneous.—In Ontario, chapter 64 requires permits before women or girls are taken into such employment as involves their lodging in a camp, and, in cities of 50,000 or over, before articles of clothing are taken in for manufacture, alteration or repair. In Saskatchewan, chapter 82 defines the rights and obligations respecting the custody of infants and the status of infants' property and the rights and duties of their guardians. In Nova Scotia, chapter 26 provides for an inquiry respecting hours of labour of women employed in industrial occupations and other matters relating to such employment and respecting mothers' pensions or allowances. In Alberta, chapter 6 provides for assistance to widowed mothers supporting children. In British Columbia, chapter 19 consolidates and amends the law respecting the maintenance of wives deserted by their husbands. In Manitoba, chapter 112 provides for the creation of a Board of Welfare Supervision to inspect and report and make research and recommendations on matters pertaining to social welfare. In British Columbia, chapter 71 provides for the regulation of public utilities, imposes duties and restrictions on public utilities companies and provides for their supervision; it also provides for the creation of a public utilities commission and defines its jurisdiction and powers. In Ontario, chapter 8 provides for the admission of women to election as members of parliament; chapter 47 enables women to be elected or appointed to municipal offices. In Manitoba, chapter 26 requires the written consent of wife to the disposition of homestead, that she receive one-half of surplus on sale of homestead under mortgage and that she have life estate in homestead after death of husband, and that on the death of a testator one-third of his estate shall be received by his widow in addition to life estate on the homestead; it also requires that husband shall have the same rights in case the homestead is owned by the wife. In Alberta, chapter 40 amends the Dower Act in matters relating to the consent of wife to disposition of

property. In Ontario, chapter 83 amends the Acts relating to public institutions by providing for grants and making regulations for discipline; chapter 84 is concerned with industrial refuges for women. In Manitoba, chapter 9 amends the Act to provide for the support and maintenance of blind persons in the matter of providing clothing for needy persons; chapter 53 provides for the care and treatment of mentally diseased persons. In Nova Scotia, chapter 51 amends the Act respecting the descent of real and personal property in the case of intestates. In Saskatchewan, chapter 19 amends the Land Title Act of 1917; chapter 20 regulates the devolution of the estates of deceased persons; chapter 22 amends the Married Woman's Property Act by empowering the district judge to dispose summarily of questions between husband and wife concerning title to property; chapter 24 exempts certain property (necessaries of life) from seizure and sale under execution; chapter 25 regulates costs, etc., in cases of distress and extrajudicial seizures. In Alberta, chapter 22 provides for the appointment of a commission to act in matters pertaining to subdivided and other property and defines the powers and duties of this commission; chapter 37 amends the Land Titles Act of 1906, especially in the case of proceedings for recovery of money secured by a mortgage or encumbrance.

PRINCIPAL EVENTS OF THE YEAR 1919.

Visit of the Prince of Wales.—An event of outstanding importance was the official visit to Newfoundland, Canada and the United States of H.R.H. the Prince of Wales. Landing at St. John, N.B., on August 15, His Royal Highness traversed the Dominion from coast to coast, mixing freely with all classes of the population and winning all hearts. The speeches he delivered at different centres exhibited a high degree of statesmanlike ability. Amongst the numerous ceremonies in which the Prince played the chief part during his stay in Canada was the laying of the foundation stone of the tower of the new Parliament Buildings at Ottawa on September 1. In the address which he delivered on that occasion His Royal Highness referred in appropriate terms to the laying of the corner stone of the original building on September 1, 1860, by his grandfather King Edward VII, then Prince of Wales, and to the re-laying of the same stone as corner stone of the new buildings on September 1, 1916, by his grand uncle the Duke of Connaught, then Governor General of Canada. His Royal Highness terminated his official tour at Montreal on November 1, but remained in Canada until November 10, when he left Ottawa for the United States. He sailed from Halifax, N.S., on November 25, his tour having proved in every way an unqualified success.

Other Distinguished Visitors.—Amongst other distinguished personages who visited Canada during the year on missions arising out of the war were General Pau of France (February 16 to 28), H.M. King Albert of Belgium (Niagara Falls, October 6), Cardinal Mercier, of Belgium (October 30-November 2), and Admiral of the Fleet Viscount Jellicoe (November 8, 1919 to January 1, 1920).

Canada and the Peace Conferences.—Early during the war it had been announced in the various parliaments of the Empire that the Dominions would be fully consulted concerning the terms of peace. Agreeably with this understanding, on November 8, 1919, the Prime Minister (Sir Robert Borden), with three colleagues in the Ministry (Sir George Foster, Mr. C. J. Doherty and Mr. A. L. Sifton), left Ottawa to attend the peace deliberations, and upon their arrival in England the status of the Overseas Dominions at the forthcoming Peace Conference immediately came under consideration. Eventually a proposal by Sir Robert Borden was adopted to the effect that each of these Dominions should have distinctive representation similar to that accorded to the smaller Allied Powers, and that in addition the British Empire representation of five delegates should be selected from day to day from a panel made up of the representatives of the United Kingdom and the Dominions. Afterwards, at the preliminary Peace Conference begun at Paris on January 12, 1919, this proposal was accepted by the representatives of the principal Allied and Associated Powers. The adoption of the panel system gave to the Dominions especially effective representation. At plenary sessions of the Peace Conference there were sometimes three Canadian plenipotentiaries, two as representatives of Canada, and one as representative of the Empire.

Canadian ministers acted for the Empire on five different Allied Commissions upon special aspects of the conditions of peace. On several occasions the Canadian Premier attended as one of the British Empire representatives on the "Council of Five"; he also put forward the British Empire case in connection with certain questions before the "Council of Four", and at times he acted as Chairman of the British Empire Delegation in the absence of the British Prime Minister. Formerly, in the case of treaties in which the Empire was concerned, it had been the practice to insert an article or reservation providing for the adhesion of the Dominions; but another proposal of Sir Robert Borden's which was accepted was that, for the Treaty of Peace, the assent of the King as High Contracting Party should, in respect of the Dominions, be attested by the signatures of the Dominion plenipotentiaries. At the Peace Conference, where the Dominions enjoyed the same status as that of the minor powers, their representatives maintained that the Dominions should be similarly recognized in the international relationships contemplated by the League of Nations. The League of Nations Commission at first hesitated to concede the point, but finally did so. In the final draft of the Peace Treaty with Germany the status of the Dominions as to membership and representation in the Assembly and Council was fully recognized. The Peace Treaty with Germany was signed and sealed in the Hall of Mirrors at Versailles on the afternoon of Saturday, June 28, 1919, when Mr. C. J. Doherty, Minister of Justice, and Mr. A. L. Sifton, Minister of Customs, in the absence of the Prime Minister and Sir George E. Foster in Canada, affixed their signatures as Canadian plenipotentiaries immediately after those of the five representatives of the United Kingdom. The Treaty of Peace between the Allied and Associated Powers and Austria was signed at

St. Germain-en-Laye, on September 10, 1919, the Canadian signatory being Sir A. E. Kemp, K.C.M.G., Minister of the Overseas Forces.

From September 1 to November 10, 1919, a special session of the Dominion Parliament was held at Ottawa for the purpose of considering the treaties of peace between the Allied and enemy powers. A resolution approving the Treaty of Peace with Germany was adopted after the defeat by 102 votes to 70 of an amendment by Mr. Fielding to the effect that in giving its approval the House in no way assented to the impairment of the existing autonomous authority of the Dominion, but declared that the question of what part, if any, the forces of Canada should take in any war was one to be determined by the people of Canada through their representatives. The Treaty with Austria was approved without discussion.

Anniversary of the Armistice of 1918.—On November 6, 1919, the following telegraphic message from His Majesty the King was addressed to His Excellency the Governor General :

TO ALL MY PEOPLE: Tuesday next, 11th November, is the first anniversary of the armistice which stayed the world wide carnage of the four preceding years, and marked the victory of right and freedom. I believe that my people in every part of the Empire fervently wish to perpetuate the memory of that great deliverance and of those who laid down their lives to achieve it.

To afford an opportunity for the universal expression of this feeling it is my desire and hope that at the hour when the armistice came into force, the eleventh hour of the eleventh day of the eleventh month, there may be for the brief space of two minutes a complete suspension of all our normal activities. During that time, except in the rare cases where this might be impracticable, all work, all sound and all locomotion should cease; so that in perfect stillness the thoughts of every one may be concentrated on reverent remembrance of the glorious dead.

No elaborate organization appears to be necessary. At a given signal, which can easily be arranged to suit the circumstances of each locality, I believe that we shall all gladly interrupt our business and pleasure whatever it may be and unite in this simple service of silence and remembrance.—GEORGE, R.I.

His Majesty's gracious message was published immediately by the press; and at the time appointed the suggestion made was universally acted upon throughout Canada. The fact that the anniversary of the armistice was similarly observed throughout the British Empire gave to this "simple service of silence and remembrance" a deep and impressive significance.

Provincial General Elections.—General elections to provincial legislatures took place during 1919 in three provinces, viz., Quebec, Prince Edward Island and Ontario. In Quebec, (June 23) the existing Liberal Government was sustained by a large majority, 70 Liberals, 9 Conservatives and 2 Labour representatives being elected. In Prince Edward Island (July 24) the Conservative administration was overthrown, 25 Liberals, 4 Conservatives and 1 Independent being returned. In Ontario (October 20), the Conservative Government was overthrown, and a new Government was formed consisting of members of the United Farmers' Organization supported by labour members. The total number returned comprised 39 representatives of the United Farmers' Organization, 11 Labour members, 31 Liberals, 25 Conservatives, 1 Soldiers' representative, and 4 Independent members.

The High Cost of Living.—A special committee, appointed for the purpose of inquiring into the prices charged for foodstuffs, clothing, food and other necessities of life, and the rates of profit made thereon by dealers and others—popularly known as the “High Cost of Living” Committee,—held its sessions from June 4 to July 5. The report of the committee stated that “scarcity of material and destruction due to war” had partly caused the rise in prices; but, even more, the expansion in currency and credit had caused a general money depreciation, and as values or prices were expressed in terms of money, which was really a quantity of counters, the doubling of the number of counters and the lessening of the quantity of commodities necessarily gave a resultant high price. The closest attention and control by Government agencies over the country’s trade had been a large factor in preventing exceptional rises in certain commodities. Individual cases of high profits were discovered, but these were probably no more numerous or excessive than during peace. Some of the blame for the high cost of living was due to the consumers’ wasteful buying, purchasing by telephone and incurring exorbitant delivery costs. Amongst the remedies proposed was the constitution of a Board of Commerce, which should continue and extend the control which the Government had put into operation during the war. The question of co-operative buying and selling should also be investigated, as the greatest spread, in all lines, occurred in the distribution of products from the manufacturer to the consumer. Over and above all this, the committee reported, the only way for the nation to get back to more normal conditions was by intensive application to productive industry.

Industrial Unrest.—During the year the cost of living was almost continuously on the up-grade. Attempts on the part of labour to secure correspondingly increased wages, together with the large number of returned soldiers, who came upon the labour market in naturally a rather unsettled state of mind, produced great industrial unrest. In number and importance the strikes occurring were unparalleled in the industrial history of Canada, as there were in all 298 strikes during the year, involving 138,988 employees and a time loss of 3,942,189 working days, and entailing upon Canadian producers direct and indirect losses estimated at \$100,000,000. During the spring and summer, and more particularly in the months of May and June, the wave of unrest reached its height, but towards the end of the year conditions became more normal, and December showed only seven new strikes and a smaller loss of time through strikes than in December, 1918. The chief events of the year in the labour world, the variations of labour opinion, and the attempts of the Government to harmonize the relations between capital and labour, are outlined, in roughly chronological order, in the following paragraphs.

Western Interprovincial Labour Conference.—A conference of labour representatives from the four western provinces met at Calgary, March 13–15, following a conference held in the same city, March 10–12, of the British Columbia Federation of Labour, which

had declared its future policy to be "the building of organizations of workers on industrial lines for the purpose of enforcing their demands by virtue of their industrial strength rather than by political activity." The interprovincial conference passed resolutions favouring the "abolition of production for profit and the substitution of production for use," condemning the present organization of trade unions by crafts, and favouring the "one big union." Another rather significant resolution was that "there be recognized no alien except the capitalist."

The Winnipeg Strike.—Most serious of the industrial disturbances of the year was the sympathetic general strike at Winnipeg, combined as it was with other sympathetic strikes in Brandon, Calgary, Edmonton, Saskatoon, Regina and Prince Albert. It originated with the metal trades, the members of which ceased work on May 1 after lengthy negotiations with their employers concerning wage increases and a 44-hour week. The question of "collective bargaining" was also a keen point of contention, and according to the strike leaders it was the crux of the whole situation. By May 15, after the Winnipeg Trades and Labour Council had espoused the cause of the striking metal workers, about 27,000 employees, including street railway men, elevator men, postal employees, clerks, book-keepers and stenographers, employees of departmental stores, some classes of railway employees and municipal employees, had gone on strike in sympathy with the metal workers. On May 16, telegraph, telephone and electrical workers joined the strikers and on May 17 the pressmen did likewise, causing the newspapers to cease publication, and cutting off the city from communication with the outer world. Permits were issued by the Strike Committee to certain dealers in necessities to continue business, and these were described by the opponents of the strike as a usurpation of power. As a result of the critical position of the city, a Citizen's Committee of One Thousand was formed, for the purpose of carrying on necessary public services, maintaining order and bringing about a settlement of the strike. The Dominion Ministers of Labour and of the Interior, after reaching Winnipeg on May 21, held a series of conferences with the military authorities, the Citizen's Committee, the Mayor and City Council and the Strike Committee. Postal employees were notified that they must return to duty within three days, or their places would be filled, and the Manitoba Government issued a similar notice to the telephone employees. Towards the end of May, processions, demonstrations and rioting took place, resulting in casualties, including one death. On May 29 the policemen were served by the city with an ultimatum that they must agree to be loyal to the city, and under no circumstances join in a sympathetic strike. On June 9, the period fixed by the ultimatum having expired, the police were dismissed, and their places taken by volunteers and special policemen. On June 17 a number of labour leaders prominent in connection with the conduct of the strike, were arrested on the charge of seditious conspiracy, proceedings against them being taken under the Criminal Code and the Immigration Act. Simultaneously with the arrest,

Mounted Police visited the offices of various organizations and houses of their leaders and seized a large amount of alleged seditious literature. On June 25, the Strike Committee notified the Provincial Premier that the sympathetic strike would cease on June 26 and made formal application for a Royal Commission of Inquiry, a request which was subsequently granted. Within a few days there was a general return to work. Of the seven strike leaders arrested, six were convicted; and, on April 6, 1920, were sentenced to imprisonment, five for one year and one for six months.

Royal Commission on Industrial Relations.—On April 9 a Royal Commission of seven members was appointed by the Dominion Government to investigate and report upon industrial relations. The Commission presented, under date of June 28, two reports. A majority report signed by five members recommended legislation for an eight-hour day, a minimum wage, relief of unemployment through public works, the building of workers' houses, restoration of the fullest liberty of press and speech, industrial councils, collective bargaining, and the recognition of unions. An inquiry by experts was also suggested with regard to proportional representation and state insurance against unemployment, sickness, and old age. The minority report, signed by two members, stated that there was no serious unemployment in Canada and that the Whitley plan was not suitable for Canada. They expressed a preference for the Colorado plan. They found no real poverty in the Dominion that was not provided for by the local authorities.

National Industrial Conference.—A National Industrial Conference, presided over by the Dominion Minister of Labour, was held at Ottawa, September 15-21, between representatives of the Dominion and Provincial Governments and representatives of employers and of labour. The conference adopted resolutions in favour of uniformity of provincial labour legislation; the establishment of Joint Industrial Councils; an inquiry into the question of state insurance against unemployment, sickness, invalidity and old age; minimum wages; laws for women and children; the housing policy of the Dominion and Provincial Governments; equal opportunities for free education with compulsory education for full time up to at least the age of 14, with part time education in cities and towns up to 16. The Dominion and Provincial Governments were also asked to make adequate provision against unemployment during the winter of 1919-20 by the commencement of public works and by the centralization of labour supply and demand in one agency, with adequate machinery to direct unemployed workers to the employment available.

Trades and Labour Congress.—Immediately following upon the National Industrial Conference at Ottawa, the thirty-fifth annual convention of the Trades and Labour Congress of Canada, the largest on record, was held at Hamilton, Ontario, September 22-27. The executive council, consisting of the president, three vice-presidents, and the secretary-treasurer, made a number of recommendations to the congress, most significant of these being the condemnation of the political strike as essentially "a strike against the public at

large" and of the "One Big Union" as an organization whose leaders preached class hatred throughout the country and staked their existence upon sympathetic and national strikes. Fortunately, their methods had been discredited, and the International Trade Union movement was once more established in the centres which had for a short time gone over to the "One Big Union." This report was adopted, and a further motion that the question of the "One Big Union" should not again be introduced in the convention was approved with but one dissenting voice.

International Labour Conference at Washington.—Under the authority of the Treaty of Peace, and having for its object the international regulation of labour conditions, an International Labour Conference, at which 40 countries were represented, was held October 29 to November 29, at Washington, U.S.A. The Canadian delegation, consisting of the Hon. G. D. Robertson, Minister of Labour, the Hon. N. W. Rowell, President of the Privy Council, Mr. R. S. Parsons, employers' delegate, and Mr. P. M. Draper, employees' delegate, took a prominent part in the proceedings, more especially as the United States was not officially represented. The concrete results of the conference were embodied in six draft conventions and six recommendations, which have been referred to all the countries that are members of the League of Nations for such action as each may deem advisable. The more important draft conventions were as follows: limitation of the hours of work in industrial undertakings to 8 in a day and 48 in a week; communication to the International Labour Office, by States ratifying the convention, of all available statistics and information regarding unemployment; establishment of free employment exchanges under central management; general prohibition of night work for women, with special prohibition of all work during the six weeks following confinement; establishment of 14 as the minimum age for the employment of children (some concessions being made to the industrially less developed countries such as Japan) with a general prohibition of night work for minors under the age of 18. Other recommendations dealt with the elimination of unhealthy processes, notably those involving a risk of poisoning by lead or by anthrax, and prohibition of the use of white phosphorus in the manufacture of matches.

Department of Soldiers' Civil Re-establishment.—The creation and organization of this department of the Dominion Government was described in the Canada Year Book of 1918, p. 666. Continued progress has been made in this direction during the year 1919. The medical staff consists of 211 full time and 338 part time doctors and 265 full time nurses, about 90 per cent of the doctors and 56 per cent of the nurses having been members of the Canadian Expeditionary Force. Between April 1, 1918, and January 3, 1920, 34,554 soldiers received regular and 126,657 occasional treatment. About 14,000 amputation and orthopaedic cases have received attention, and 90 per cent of the soldiers requiring artificial limbs have been fitted from the factories of the department. In the Vocational Branch, up to December 31, 1919, 49,260 applications for retraining have

been recommended to the head office and 42,679 courses, representing 380 different occupations, have been granted with pay and allowances. Of these, 9,455 have completed their courses, while 23,614 were still in attendance, the remaining 9,610 had either discontinued their courses or had not yet commenced. Of 6,923 who had completed their course by September, 4, 1919 166, or about 60 per cent, were employed in the occupations for which they had been trained and 1,317, or 19 per cent, in other occupations. The duration of courses ranges from 3 to 12 months. Three classes of institutions are utilized: (1) Inside or Departmental Schools, where in November, 1919, 6,421 students (of whom 747 were minors) were in attendance; (2) Outside Schools (Business Colleges, Universities, etc.) where at that time 5,265 (including 2,585 minors) were attending, and (3) Industrial Establishments, where 9,491 (including 2,378 minors), were apprenticed. Under an Order in Council, dated November 21, 1919, (P.C. 2329), men may be granted a loan for necessary equipment up to \$500 repayable within five years without interest, and the same amount of loan on the same terms may be granted for retraining purposes to men suffering certain war disabilities but not entitled to regular retraining. Since March, 1919, single men while retraining have been granted \$60 per month for pay and allowances and married men without children \$85 per month and men with children up to a maximum of \$110. The average monthly cost of training each student, exclusive of pay and allowances, is \$19.46. The Information and Service Branch of the Department, which began operations in January, 1919, provides specific information as to Government benefits available for ex-members of the forces and places them in touch with opportunities for employment. It maintains a special section for the placement of professional, technical and trained business men. By arrangement with railway companies, the inter-transit of unplaced workers is facilitated by a one cent a mile rate. Up to May 1, 1920, the number of employment offices was 105 regular and 63 part time. The number of applications received was 167,996, of placements 160,197, of which 69.4 per cent were placed once, 18.1 per cent twice and 12.5 per cent 3 to 29 times; the number of inquiries and special cases dealt with was 1,143,003 and of certificates of relief granted under the Free Employment Act 44,559. In addition to the Department of Civil Re-establishment, and in touch therewith, are other agencies for repatriation, such as the Provincial Returned Soldiers' Commissions, the voluntary patriotic societies, the Khaki Universities overseas and St. Dunstan's Institution for the Blind in England.

Land Settlement of Returned Soldiers.—As indicated in the Canada Year Book of 1918, pages 667–8, and in this edition at page 647, the Soldier Settlement Acts of 1917 (7–8 Geo. V, c. 21) and 1919 (9–10 Geo. V, c. 71) are designed to assist returned soldiers to settle upon public lands and to increase agricultural production. For these purposes a Soldier Settlement Board was appointed on February 1, 1918. The Soldier Settlement work of the Board is now divided into (1) an Agricultural Branch; (2) a Lands and Loans

Branch, and (3) a Home Branch. The Agricultural Branch undertakes the selection of soldiers, qualified by military service, farming experience, physical fitness, character and intelligence, to become successful farmers. The Lands and Loans Branch assists in the selection of lands for applicants approved by the Agricultural Branch. The value of the land is ascertained by appraisers, and to reduce legal costs a legal branch has been established in each district office of the Board. The Home Branch is composed of trained women at various centres to act as supervisors and advisers in domestic economy. From the date of its institution on February 1, 1918, to March 21, 1920, the Soldier Settlement Board received 50,423 applications for loans. Of these, 36,830 have been accepted as qualified, and 15,234 are actually on the land with loans approved. Of these last, 9,981 have settled on purchased lands, 2,779 have received advances on land already owned and 2,564 on Dominion Soldiers' Grants; 3,947 more have settled on Soldiers' Grants without receiving advances, making a total of 19,181 who have settled on land under the Act. Of the 15,234 receiving loans, 12,800 have settled in the four western provinces, Alberta leading with 4,603 settlers. The operations of the Board entail upon the Dominion a financial commitment of \$58,741,605, of which about \$42,000,000 has been disbursed. Of the total commitment, \$32,173,776 are for loans against purchased lands, \$1,834,157 to remove encumbrances, \$6,502,435 for permanent improvements and \$18,348,701 for stock and equipment. Loans have been advanced to the full value of the land purchased in 801 cases. Up to the date mentioned, 64 settlers have paid back the full amount of their loans. The expenditure connected with training has amounted to \$82,457, and at present (March, 1920,) 674 ex-soldiers are in training. Out of the sum advanced, \$4,777,419 has been invested in implements, \$273,487 in improvements, \$5,747,109 in live stock, while \$1,319,406 has been invested by the soldier himself in second hand equipment not purchased through the Board. The saving to the settler thus far in the cost of implements through the arrangements with manufacturers and agents is estimated at \$403,768. The total number of employees of the Board is 1,321, of whom 962, including 876 returned soldiers, are males.

War Service Gratuities.—The amount of war service gratuities payable to members of the Canadian naval and land forces who served during the war has aroused a great deal of public discussion, and has been the subject of various Orders in Council, dated December 21, 1918, February 8, June 23 and December 1, 1919. As settled by the last named Order (P.C. 2389) the regulations provided for the payment to soldiers who had served overseas of gratuities equivalent to pay and allowances for 183 days, 153 days, 122 days and 92 days according as total service was for three years, two years, one year or under one year and for pay and allowances to soldiers who had served in Canada only for 92 days, 61 days and 31 days according as service was for three years, two years or one year, no payee to receive less than \$100 per month, if married, or less than \$70 per month, if single. Various proposals, some of them involving much larger

payments than these, were put forth on behalf of the returned soldiers, and the whole question was the subject of exhaustive inquiry by a special committee appointed by resolution of the House of Commons on September 18, to whom was also referred Bill No. 10 to amend the Department of Soldiers' Civil Re-establishment Act. The committee presented their fourth and final report on October 31. In rejecting three alternative proposals involving, in addition to \$30,000,000 annually paid in pensions, expenditures estimated at \$1,000,000,000 for the first, \$400,000,000 for the second and \$200,000,000 for the third, the committee found that either of them would be seriously detrimental to the financial interests of the country, would involve obligations to meet which no satisfactory scheme of taxation had hitherto been devised, and by inflating the currency and thus lowering the purchasing power of money would increase the high cost of living to the disadvantage of the soldiers themselves.

National Education Conference.—A National Education Conference, held at Winnipeg, October 20-22, was attended by 1,500 delegates from all parts of Canada, as well as by visitors from Great Britain and the United States. Recommendations were made in favour of continuation work in rural schools, until compulsory attendance up to the age of 16 should be made effective; assumption by the Dominion Government of a fair share of the expense incurred by Provincial Governments in the education of foreign immigrants; state aid for parents unable to keep their children at school throughout the compulsory period; and the rigid enforcements of legal enactments prohibiting the employment of children within the compulsory ages. A National Council was elected of fifty members, including a professional educator, a representative of women's organizations, a business man and a representative of teachers' organizations in each province, together with fourteen others.

National Conference of Women.—During the year, representatives of the National Council of Women, Interprovincial Farm Women, Federated Women's Institute, Daughters of the Empire, Women's Christian Temperance Union, women representatives of the Great War Veterans' Association, Social Service Council, Catholic Women's League, and Young Women's Christian Association, met in Conference at Ottawa on May 12 and again on September 9-10. The purpose of the first conference was to discuss the immigration of women, particularly in connection with the selection, housing and settlement in Canada of women from the United Kingdom. On the recommendation of this conference, a woman official was appointed to make a survey of existing organizations which during the year immediately prior to the war were interested in the reception, placing and supervision of women domestics. The second conference, called to discuss the report of this survey, decided, with the approval of the Minister of Immigration and Colonization, to create an organization known as the Canadian Council of Immigration of Women with the object of studying the problems arising out of women immigration in the interests both of the immigrants themselves and of Canada. The organization is assisted in its work by the receipt of

a grant from the Dominion Government, in addition to which the hostels established in the different provinces receive a certain amount from the Government of the province concerned.

Social Service Movement in Canada.—Among the most remarkable phenomena of the social life of the white races during the past generation has been the growth of organized humanitarian effort for amelioration of the lot of the less fortunate members of the body politic. The movement naturally began in the old world, where the conditions of that section of the population known as "the submerged tenth" were most distressing. While in the newer countries the struggle for subsistence was not so strenuous, the rapid growth of an urban proletariat largely drawn from old world cities has since the beginning of the present century led to a reproduction in the Dominion of the social problems of European city life, and an extension of the social service movement to our own country. Whilst the Roman Catholic Church has always provided for the social needs of its adherents, it is only within comparatively recent times that the more individualistic Protestant churches have undertaken to provide for social needs. So far as organized social work in Canada is concerned, the Methodist church was the pioneer in the new movement, as its board of evangelism and social service was inaugurated by the General Conference in 1902. This body has taken a very active part in the campaign for prohibition, and has actively assisted in all efforts for child welfare, industrial improvement, better housing, the censorship of moving picture films and posters, and the reclamation of boys and girls, the victims of vicious environment. A department of social and moral reform was established in 1907 by the Presbyterian church which adopted as its aims the suppression of gambling and betting, the suppression of social vice, the protection of children against cruelty, neglect and child labour, more adequate care for the feeble-minded and more humane treatment of the criminal, the prevention of undesirable immigration, and the promotion of better relations between the church and working men. This department has developed under the supervision of the Board of Home Missions and Social Service. The expenditure in 1919 had reached the considerable figure of \$440,134, out of which four well equipped settlements were maintained in the cities of Montreal (two), Toronto and Winnipeg, besides seven redemptive homes. This department has also done much to forward the cause of advanced social legislation, to aid in organized relief work, and to assist the immigrant to adapt himself to his Canadian environment.

A Council for Social Service was created in 1915 by the General Synod of the Church of England in Canada. This council publishes a monthly bulletin on social service, which has done much to interest the clergy and laity alike in the social problems with which the citizens of Canada are to-day confronted. The Baptist church has no definite Dominion-wide organization for social work, but wealthy congregations maintain three social settlements in congested urban areas, one in Toronto and two in Winnipeg. Charitable organizations and hospitals, as well as churches, have also profoundly modified their attitude to-

ward their work as a consequence of this wider conception of social service. Charity has been so organized as to aim at the prevention rather than the mere palliation of destitution. Hospital authorities, too, have been convinced that prevention is better than cure, and have organized out-patient departments for the dissemination of medical information and assistance among the poorer classes. The great problems of feeble-mindedness and venereal disease have also been courageously attacked, and considerable progress has been made in arousing the public mind and conscience to the greatness of the dangers resulting from these scourges of humanity. All these activities above described have led to an active demand for the services of trained social workers. The universities were called upon to supply such workers, and in 1914 the University of Toronto opened its Department of Social Service, the first institution in Canada to provide regular academic training for social workers. The success of this venture led to the establishment of similar departments in other Canadian universities, notably McGill and the University of Montreal, while Queen's, Saskatchewan, Alberta and Manitoba Universities have offered part time courses or special lectures on topics of social service.

To co-ordinate the social activities of the agencies above described, the Social Service Council of Canada was established in 1907. It consists of a federal union of eighteen Dominion-wide bodies and nine provincial Social Service Councils; as well as similar councils in Newfoundland and Bermuda. The bodies thus federally united for the purpose of social work are as follows: The Church of England in Canada, the Methodist, Presbyterian, Baptist and Congregational Churches in Canada, the Salvation Army, the Evangelical Association of North America, the Canadian Purity-Education Association, the Dominion Grange and Farmers' Association, the Dominion Women's Christian Temperance Union, the Christian Men's Federation of Canada, the National Councils of the Young Men's and Young Women's Christian Associations, the Canadian Council of Agriculture, the Canadian Council of Provincial Sunday School Associations, the Dominion Council of the Royal Templars of Temperance, the International Association of Rotary Clubs, the Canadian Conference on Public Welfare, the Citizen's League of Bermuda, and the Social Service Councils of each of the nine provinces of Canada and of the Dominion of Newfoundland. During and since the war the Social Service Council of Canada has been active in the work of reconstruction, and since 1918 has published a monthly magazine entitled "Social Welfare."

Interprovincial Conference on Water Power.—With a view to effect co-ordination of effort and standardization of method in investigating the water resources of Canada, the Dominion Power Board convened at Ottawa, January 16-17, a meeting of representatives of all the Dominion and provincial organizations concerned with water resources, investigation and administration. The subjects of most general interest included a water resources index-inventory system for all Canada; co-ordination of effort; the prompt publication

of the results of hydrometric surveys; extension of the meteorological service to secure all the data necessary for reclamation, irrigation and drainage and for the consideration of water-power problems; and co-ordination of water-power administration in the various Dominion and provincial jurisdictions. A resolution was passed in favour of future annual conferences under the auspices of the Dominion Power Board.

Control of Wheat Marketing.—By Order in Council of July 31, 1919, authority was given for the appointment of the Canada Wheat Board with powers to handle and control the purchase, sale, storage, transfer and exportation of wheat, and its products, and to make regulations for its sale. Under regulations since issued by the Board, prices per bushel have been fixed as cash payments to the producer from August 16, 1919, to July 31, 1920, or such other dates as may be fixed by the Board. An initial payment of \$1.25 per bushel was authorized to be paid for wheat grading No. 2 Northern in store at Port Arthur, and payments for other grades and at other points were based thereon. The crop of 1919 was to be sold by the Wheat Board at the best available world prices, and the surplus over the initial payment remaining after the deduction of necessary expenses was to be distributed to the original sellers at or before the end of the year 1920. Each original seller of wheat was at the time he made his sale given, in addition to his initial payment, a participation certificate denoting the number of bushels sold by him. On the presentation of this certificate to the Wheat Board he was to receive his proportion of the surplus to be distributed. This surplus will provide from 40 cents to 50 cents per bushel to the sellers in addition to their first payment made to them at the time of sale.

Cessation of Food and Fuel Control.—The Canada Food Board, created February 11, 1918, was dissolved by Order in Council of March 19, 1919, all functions vested in the Canada Food Board relating to license for exports from and imports into Canada being transferred to the Canadian Trade Commission. By Order in Council of March 5, 1920, the Order in Council of July 12, 1917, appointing a Fuel Controller, and all other Orders in Council and Regulations respecting fuel control, were cancelled.

Reconstruction of the Parliament Buildings, Ottawa.—Steady progress was made during the year on the reconstruction of the Parliament Buildings, the interior stone and marble works alone not keeping pace with the others. Many of the works not completed by the end of the fiscal year were then expected to be finished before the end of the calendar year. Most of these works are as follows: the exterior masonry of the main tower, the furring and partition work of the ground floor, the installation of the main switchboard of the electrical work, the plastering of the rooms at the eastern end of the main floor and portions of the ground floor, portions of the marble flooring of the ground floor corridors and the ashlar dadoes in the second and third floor corridors, the lavatories on the main and ground floors, the setting of the interior stonework except most of the main floor, some of the plumbing, the installation of certain

radiators, the steel casements and metal covered windows in the tower connections, certain elevator cabs, and a small portion of the electric conduit work. The daily average of the force employed by the general contractors was 602 men. The expenditure on the work up to March 31, 1920, amounted to \$5,037,922. By the end of the year, the work was advanced sufficiently to enable both Houses of Parliament to occupy their new buildings, and, accordingly, on February 26, 1920, the fourth session of the thirteenth Parliament of Canada was opened therein, with the customary time-honoured ceremonies, by His Excellency the Governor-General.

The Late Sir Wilfrid Laurier.—The Right Hon. Sir Wilfred Laurier, G.C.M.G., leader of the Liberal party of Canada for 32 years and Prime Minister of Canada from 1896 to 1911, died from the effects of a paralytic stroke at Ottawa, at 2.50 p.m. on Monday, February 17, 1919. His remains were removed from his home in Laurier Avenue to the Chamber of the House of Commons, where they lay in state from the evening of February 20 until the state funeral at 10 a.m. on Saturday, February 22. The unanimous adjournment of both Houses of Parliament from February 20 to 25 and the large crowds who filed through the death chamber and attended the funeral, testified to the deep, personal respect and affection which the great statesman had inspired amongst all classes of his fellow countrymen in both political parties. Sir Wilfrid Laurier was born at St. Lin, Quebec, on November 20, 1841, and was called to the Bar in 1864. In 1871 he was elected a Member of the Quebec Provincial Assembly. In 1874 he entered the Dominion House of Commons as Member for Drummond and Arthabaska, becoming head of the Liberal Party on the retirement of the late Hon. Edward Blake in 1887. While in London during the Diamond Jubilee festivities of 1897, he was appointed a member of the Imperial Privy Council and created G.C.M.G. At a convention of the Liberal Party, held in Ottawa on August 4, the Hon. W. L. Mackenzie King was chosen to succeed Sir Wilfrid Laurier as Leader of the Party and of the Opposition in Parliament, this position having in the meantime been temporarily filled by Mr. D. D. McKenzie, M.P. for Cape Breton North and Victoria, N.S.

Obituary.—1919: Jan. 3. The Hon. Ernest de Warennnes, Member of the Legislative Council of Quebec. Feb. 17. The Rt. Hon. Sir Wilfrid Laurier, Premier of Canada, 1896-1911; The Hon. Geo. W. Brown, Lieutenant-Governor of Saskatchewan, 1910-1915. Feb. 19. Sir Rodolphe Forget, M.P. for Charlevoix, P.Q., 1904-1917. Feb. 28. John Fraser, I.S.O., Auditor General.
